- Lithiophorite, 22, 215
- Lithite, 8, 193
- Lithium, 64, 400—Ammonium- (*see* Ammonium-Lithium)—And other salts, concentrated solutions of, 76, 177—And potassium, separation, 55, 18, 29, 40, 56, 78—And sodium, separation, 55, 18, 29, 40, 50, 78—As a nitrogen absorbent, 74, 6—Atomic weight, 1, 166; 5, 139, 183; 47, 73, 166; 98, 55; 99, 69; 100, 278—Cold, absorption of nitrogen by, 73, 12—Compounds, phosphorescence of, 62, 239—Compounds, soluble, combination heats, 48, 83—Detection methods, 91, 28—Determination by means of fluorides, 58, 71—Determination by means of the spectroscopic, 34, 94, 122; 56, 90—Effects of blows on, 93, 200—Extraction from lepidolite, 36, 246—Glass, 42, 36—In Bath waters, 10, 158—In metallic iron and slags, detection, 58, 27—In meteoric stones, 5, 208—In mineral waters, determination, 58, 83—In radio-active minerals, 97, 167, 179; 98, 151—In soils and thermal waters of the Solfatara, 38, 101—Lines, order of reversibility, 47, 133—Metallic, preparation, 68, 313; 81, 146—Researches on, 94, 12—Salts, dissociation spectra, 74, 12—Spectrum, abnormal changes in lines in, 87, 2—Spectrum, blue band of, 4, 303—Test for, 54, 279—Thermochemical researches on, 72, 245
- Lithium amide, 69, 143—Preparation, 79, 22; 81, 106
- Lithium-ammonium, action on antimony, 85, 107—Decomposition by ammonium chloride, 84, 268—Preparation, 79, 22; 81, 106
- Lithium antimonide, properties, 85, 107—And alloys, 85, 96
- Lithium arsenide, preparation and properties, 80, 59
- Lithium borate, 34, 184; 75, 300; 76, 59
- Lithium bromide and ammonia gas, compounds, 81, 299—Hydrated, 81, 216
- Lithium carbide, heat of formation, 78, 242
- Lithium carbonate, decomposition by heat, 87, 311—Solubility, 55, 169
- Lithium chloride, 76, 268—Action on arable soil, 35, 241—And copper chloride, double, 64, 273—And methylamine, combinations, 78, 327
- Lithium chlorides, ammoniacal, 78, 291
- Lithium fluoride, 69, 50
- Lithium hydrate, 67, 249—Hydrates, action of heat on, 97, 264
- Lithium hydride, 73, 107—Formation heat, 74, 270
- Lithium iodomercurates, 93, 33
- Lithium iodomethylammonium, preparation and properties, 79, 84; 81, 106
- Lithium nitrate and its hydrates, solubilities and transition points, 87, 90
- Lithium nitride, 65, 73; 75, 11
- Lithium nitrite and its decomposition by heat, 97, 176
- Lithium oxide, heat of formation of anhydrous, 97, 142—Preparation of anhydrous, 96, 34, 47
- Lithium peroxide, 81, 311
- Lithium phosphate, 62, 25—Neutral crystalline, 59, 313
- Lithium polymetalanthanate, mono- (*see* Monolithium)
- Lithium silicate and silica, 44, 273
- Lithium silicates, dissociation, 95, 286
- Lithium silicide, 85, 274
- Lithium subchloride, 73, 35
- Lithium sulphate, heat of dissolution, 50, 255
- Lithographic inks (*see* Inks)—Stones (*see* Stones)
- Lithography, 90, 160—Photo- (*see* Photolithography)—Reproduction of pictures by, 21, 10
- Lithopone, analysis, 86, 261
- Lithoreactive, 20, 312
- Lithotrite or lithotribe, new form, 11, 140
- Lithurate of magnesia (*see* Magnesia)
- Litmus, 34, 140, 184; 52, 18, 29—Action of acids on, 61, 2—Colouring matter, method of preserving, 9, 205—Colouring matter, purification, 60, 306—Colouring power, 74, 297, 317—Decolouration, 61, 37—Paper, 17, 277; 26, 247—Paper, arseniates neutral to, 46, 122—Paper as a reagent, 25, 58—Paper, neutral, 54, 84—Paper, sensitive, 75, 48—Paper test for milk, 86, 192—Paper, use of, 86, 150—Pencils, 73, 198—Phosphates neutral to, 45, 111—Preparation, 11, 149—Preparation as an indicator, 40, 277—Sensitive indicator for, 67, 242—Substitute for, 39, 98—Tincture, 32, 62—Tincture, change of colour in alkalimetric assays, 27, 70—Tincture, decolouration in closed vessels, 58, 219—Tincture, durable, 47, 166—Tincture, preservation, 52, 32—Use as indicator, 47, 123, 135, 184; 49, 32, 38, 119

- Magee, W. H., and L. M. Dennis (*see* Dennis, L. M.)
- Magenta, acid, in wines, determination, 53, 25, 297; 54, 97 — Action on blood, 6, 261 — And cochineal, adulteration by means of, 20, 317 — And derivative colours, 11, 235 — And mauve, 5, 90 — Conversion into aniline, 37, 250 — Colour or dye manufacturing, 9, 271 — Detection of rosolic acid in presence of, 35, 5 — Distinctive character of ordinary, and of acid magenta S, on Schiff's reaction, 74, 117 — Dyes (*see* Dyes) — Dyeing, 4, 55 — Formation, 65, 29 — In orchil and cudbear, detection and estimation, 57, 165 — In wines, detection, 34, 51, 152, 227, 273; 35, 11; 39, 85; 45, 36; 46, 123 — Injection into blood, 35, 95 — Manufacture by Couper's process, 39, 259 — Molt, occurrence of paraleucanilin in, 41, 146 — Non-arsenical, introduced into stomach and blood, action, 35, 31 — Powder, 3, 380 — Preparation without arsenic, 28, 10, 204; 31, 141 — Preparing, Bruning's method, 27, 283 — Printing with, 3, 243 — Red, preparing, 2, 286 — Residues, extraction of arsenic from, 36, 5 — Separation from colouring-matter of orchil, 57, 263 — Sulpho-conjugated derivatives of, reaction of, 53, 40 — Wines sophisticated with, 35, 165
- Magentas, acid, 72, 198 — Are they ethers or salts? 72, 173 — Constitution, 69, 12, 230
- Mager, W., and G. W. Lehmann (*see* Lehmann, G. W.)
- Magerstein, J. T., Chilean saltpetre, 55, 81 — Value of nitrogenous manures in development of plants, 62, 185
- Maggiarra, A., Analysis of cheese, 67, 97
- Magie, Ennemoser, 94, 3 — Lantern and megascope, 41, 284 — Lantern, erecting the inverted image in, 21, 245 — Lantern pictures on gelatine by a new method, 22, 20 — Mirrors, 43, 130, 232
- Magitot, M., Sanitation of match trade, 75, 131
- Maglin, M., Art bronze castings, 75, 309
- Magnalium, 88, 77
- Magnanini, G., Electro-conductivity of boric acid, 64, 322
- Magnanini, G., and T. Bentivoglio (*see* Bentivoglio, T.)
- Magne, L., Chemical treatment of flax, 21, 204
- Magne, L., and C. Guignet (*see* Guignet, C.)
- Magnesia, action during hardening of lime-alumina silicates, 23, 107 — Action on alkaline fluorides, 7, 245 — Adulterated, 27, 47 — Analysis of substances containing, 59, 128 — And alkalies, estimating, 11, 226 — And alkalies, separation, 1, 155 — And alumina separation, 2, 291; 25, 277 — And alumina, simultaneous precipitation by ammonia, circumstances which favour, 22, 4 — And ammonia arseniate, double, 21, 193, 213 — And ferric oxide, separation, 25, 277 — And lime in plants, 49, 104 — And lime, precipitation by ammonia, 35, 238 — And lime, separation, 2, 119; 14, 33; 20, 167; 25, 277; 47, 101 — And lime simultaneously present in solutions of chloride of sodium, estimation, 88, 310 — And lithia, separation, 1, 72 — And phosphoric acid, determination, 47, 84 — And phosphoric acid, separation, 25, 277 — And potash, separation, 8, 99 — And protoxide of manganese, separation, 2, 266 — And sesquioxide of iron, separation, 2, 328 — And soda, separation, 8, 90 — As manure for vines, 55, 272 — Behaviour of certain amidic acids with 50, 31 — Burner, 21, 190 — Calcination, 6, 151 — Compounds with halogens, 58, 240 — Containing rare earths, behaviour, 54, 82 — Defecation

- of sugar-cane with, 36, 247—Detection in presence of manganese, 17, 49—Determination of acetyl by means of, 41, 101—Earths and manganese oxide, examination, 78, 282—Effects on vegetation, 42, 13—Estimation, 30, 200—Estimation as ammonio-magnesium phosphate, 53, 99—Estimation, ponderable or gasometric, 90, 161—Extracting from magnesians limestones, 20, 60—Fluid, 6, 295—Formation from magnesium carbonate by heat, 91, 55—Hard water, softening, 39, 258—Hydraulicity of, 12, 287—In drinking water, 32, 136—In limestone, detection, 46, 11—In plants, 49, 104—In Portland cements, influence of, 53, 297—Incandescence, association of, to that of the carbons in the voltaic arc, 17, 252—Incandescence, gas burner giving a white light by, 49, 145—Industry, 44, 143, 150, 108, 52, 70, 201—Melted, density, 69, 144—Melted, specific gravity, 71, 50—Mixture, 51, 286—Non-precipitation by ammonia in presence of ammoniac salts, 91, 23—Precipitation of, 28, 226; 60, 239—Preparation for resisting high temperatures, 17, 231—Production, 44, 76—Reduction by carbon, 95, 226, 283—Role in transformation of *Stoecheol* at different temperatures, 99, 228—Salts, action of bicarbonate of ammonia upon, 5, 235—Salts, spectral-analytical reactions for, 35, 40—Solubility in magnesium sulphide, 96, 35—Solubility in solutions of sugar, 37, 134—Magnesia acetate, preparation of crystalline, 35, 145—Magnesia alum, 46, 13—Magnesia ammonio-phosphate, decomposition, 21, 179—Estimation of phosphoric acid as, 21, 205—Incandescence, 22, 23—Magnesia arseniate and ammonia arseniate, double, 22, 193, 213—Magnesia bicarbonate, 14, 152; 74, 116, 197—Magnesia carbonate, artificial production of carbonate of soda by action on chloride of sodium, 38, 33—Behaviour towards gypsum in presence of a solution of common salt, 27, 35—Magnesia carbonates and silicates, alkalinity, 38, 287—Magnesia citrate, 9, 178; 14, 82, 140—Effervescing, 16, 166—Granular, 21, 263—Granular, effervescing, 16, 234, 269—Granular, preparation and properties, 1, 44—Manufacture of citric acid from, 13, 100—Solution of, 21, 144—Magnesia cupel, 89, 304—Magnesia cupels, 90, 23—Magnesia hydrate, preparation, 6, 101—Magnesia hypochlorite, employment in bleaching, 15, 150—Magnesia lithurate, 26, 288—Magnesia monocarbonate, 74, 116, 197—Magnesia oxychloride, 17, 61, 108, 157—Hydrates of, 23, 47—To replace plaster-of-Paris, 16, 35—Magnesia phosphate, reduced, in superphosphates, estimating, 19, 229, 266—Magnesia pyrophosphate, action of nitric acid on, 6, 206—Incandescence, 22, 23—Magnesia selenite, 32, 9—Magnesia silicates and carbonates, alkalinity, 38, 287—Magnesia sulphate, 16, 52—Analysis, 23, 289—And carbonate of soda, 8, 10, 34—Crystalline basic, 6, 313—Manufacture, 15, 162, 178—Uses, 15, 196—Uses in dyeing, 32, 314—Magnesian, amino- (*see* Amino-magnesian)—Cement (*see* Cement)—Crucibles (*see* Crucibles)—Light, 2, 12; 9, 128, 171—Limestone bricks (*see* Bricks)—Organohalogen (*see* Organohalogenmagnesian)—Rocks (*see* Rocks)—Salts (*see* Salts)—Series of oxides, 61, 145—Silicate (*see* Silicate)—Pyrophosphate (*see* Pyrophosphate)—Water, 26, 95—Waters, softening, 55, 276, 308; 56, 11, 22—Magnesite, abnormal behaviour of, 22, 274—Industry, Indian, 99, 249—Magnesium, 7, 54, 285; 9, 219; 11, 228, 238; 14, 119; 15, 305; 64, 41—Action of water on, 80, 254—Action on bromophenol, 89, 262—Action on cupric sulphate solution, 76, 297—Action on metallic salts, 32, 309; 33, 112, 236—Action on metallic solutions, 14, 27, 42; 68, 263—Action on neutral metallic salts, 14, 188—Action on organic compounds, 35, 117; 74, 78—Action on phenylhydrazine compounds, 71, 73—Action on saline solutions, 80, 123; 81, 71, 131—Action on vapours of alcohols, 71, 118—Alloys, 14, 282; 15, 10—Alloys of platinum and palladium with, 80, 185—Amalgam, action on aldehydes, 95, 286—Amalgam, action on dimethylketone, 91, 176—Amalgam, reaction obtained by means of, 85, 143—Amalgam, use in organic chemistry, 88, 281—And alkalis, separation by arsenate process, 96, 166—And alkyl halides, interaction, 98, 232—And aluminium alloys, 83, 312; 85, 12—And aluminium and antimony alloys, 90, 45—And aluminium and bismuth alloys, 90, 35—And aluminium, combinations, 14, 190—And aluminium, gases retained by occlusion in, 41, 273; 42, 318—And aluminium and calcium, heats of combustion, 99, 21—And aluminium and cerium ferrocyanides, double and triple, with potassium and ammonium, 100, 31—And argon and helium, combination, 72, 153—And aryl halides, interaction, 97, 8—And atmospheric nitrogen, combination, 73, 35—And cadmium alloys, 86, 23, 239—And calcium, combinations, 14, 190—And calcium, separation, 11, 97; 29, 209—And chromium, separation, 11, 101—And copper alloys, 86, 281; 88, 11—And cupric sulphate solution, reaction between, 80, 303—And electric lights as applied to photomicrography, 21, 208—And manganese, bismuth, and zinc, equivalent weights of, 50, 69—And monomethylamine, double phosphate of, 98, 47—And nickel compounds, 89, 235—And potassium bicarbonates, limits of combination, 51, 310—And sodium, behaviour with substances and liquids containing sulphur, 21, 166—And solution of copper sulphate, interaction, 77, 127, 139—And thallium alloys, 15, 245—And zinc alloys, 90, 160—And zinc chromites, basic, 63, 261—Application to toxicological researches, 14, 27, 42—As a reagent, 60, 187—At the edge of sun, 28, 195—Atomic weight, 49, 47; 62, 267; 75, 148, 158, 172, 183; 93, 55; 99, 69; 100, 278—Cheap, 18, 281—Combination-heats of soluble compounds of, 47, 224—Combustion, 40, 11; 63, 104—Compound of triphenylchloromethane, 93, 141—Compounds, organo-metallic, 81, 287; 83, 202—Compounds, organo-metallic, action of chlorides of acids and anhydrides of acids on, 83, 179—Crystalline form, 41, 282—Cyanogen compounds, 64, 26; 65, 227—Derivative of bipropargyl octadienedioic acid, 100, 12—Derivatives of bromides of xyllys, 99, 288—Detection, 11, 197; 71, 25—Detection of phosphorus by means of, 19, 179—Displacement of metals by, 79, 75—Distilling, 8, 42—Does it form compounds with hydrocarbon radicals? 63, 101—Electro-chemical deposits of, 34, 227—Elimination, 71, 293—Employment in toxicological examinations, 14, 21—Estimation, 53, 142—Estimation as pyrophosphate,
- 28, 51, 69—Etheroorganomagnesian (*see* Etheroorganomagnesian)—Facts relating to, 14, 27, 42—Group of metals, precipitation and determination in form of oxalates, 22, 190, 210—In ashes, determination, 81, 177—In entire border of sun, 28, 43—In qualitative analysis, 77, 105—Light, 16, 156; 52, 178—Light, rival for, 12, 108—Manufacture, 7, 294, 305; 8, 4, 10, 23, 28; 12, 120—Metal Company, a catastrophe averted, 16, 26—Metallic, action of ammonia upon, 58, 297—Metallic, action on acetylene, 100, 317—Metallic, action on aqueous solutions, 88, 312—Metallic, action on manganous salts, 71, 2—Metallic, action on water, 80, 211—Notes on, 14, 73—Organic compounds, action on arsenious acid, 98, 222—Organic compounds, action on benzylidene dimethylcyclohexanone, 95, 312—Organic compounds, action on boric acid esters, 100, 219—Organic compounds, action on dicarboxylic acids, 100, 304—Organic compounds, conversion into amino complexes, 95, 252—Organic compounds, ether complexes of, 93, 142—Organic compounds, preparing, 91, 34—Organo- (*see* Organo-magnesian)—Phenyl- (*see* Phenylmagnesian)—Platinised, as a reducing agent, 4, 247; 50, 55—Position in genetic system of elements, 70, 235—Powder lamp, Larkin's, 15, 323—Preparing, 17, 191—Pulverised, as powerful reducing agent, 22, 167—Reducing properties, 83, 202—Reduction, 14, 143—Rods for toxicological purposes, 14, 192—Salts, and ammonia, reactions between, 54, 273—Salts, basic, 76, 240; 77, 83—Spectroscopic detection, 35, 84—Spectrum under various circumstances, 43, 261, 271—Substitution for zinc in synthesis of unsaturated alcohols, 99, 123—Test, 54, 279—Thermochemical researches on, 39, 196—Use in voltaic piles, 12, 191—Voltaic cell, 70, 179—Volumetric method for, 80, 275, 287—Magnesium alkyl compounds, action on halogen derivatives of phosphorus, arsenic, and antimony, 90, 255—Halides, action on derivatives of camphor, 90, 278—Haloids, action on menthyl benzoylformate, 90, 251—Halides and tertiary amines, stability of compounds derived from, 99, 233—Halides, interaction of acridines with, 92, 243—Magnesium aluminate, 84, 222—Magnesium-aluminium alloys, 85, 12; 90, 35, 45—Alloys, property of, 92, 10—Magnesium ammonio-chloride, reactions, 39, 225—Magnesium ammonium phosphate in human urine, large crystals of, 48, 105—Magnesium borates, 83, 107—Series, 81, 103—Magnesium bromide and iodide, 49, 70—Anhydrous, additive compounds with organic oxygen and nitrogen compounds, 90, 21—*a*-Naphthyl- (*see a*-Naphthylmagnesian)—Magnesium bronze, 60, 272—Magnesium carbide, existence of, 91, 198—Formation, 77, 85—Magnesium carbonate and ammonium, 11, 144—Anhydrous, 80, 230—Crystallised, 19, 103—Formation of magnesia from, by heat, 91, 55—Neutral, 52, 250—Neutral, and potassium carbonate, combination, 52, 237—Solution in carbonic acid, 51, 142—Magnesium chloride, 63, 12—And acetic ether, compound, 53, 118—Benzyl (*see* Benzyl)—Hydrates of, 81, 213—Magnesium chromite, 64, 61; 74, 306—Magnesium cobaltite, 74, 85—Magnesium diphenyl, 67, 237—Compounds, 67, 191

Magnesium fluoride, 35, 264
 Magnesium hydrate, crystalline, production, 52, 53
 Magnesium hydride, 80, 261 — Spectrum of, 100, 21
 Magnesium hydrocarbonate, formation, 51, 190
 Magnesium hydrosulphide, solution of, 50, 233
 Magnesium hydroxide, 88, 194, 208
 Magnesium iodide, 49, 70 — Phenylamine (see Phenylamine)
 Magnesium iodine, orthotoluidine (see Orthotoluidine)
 Magnesium iodomercurate, 94, 24
 Magnesium methyl iodide, action on dextrolimonene nitroschlorides, 93, 200 — Action on pinene nitroschloride, 91, 277 — And amyl ether, crystalline compound, 98, 44
 Magnesium monosulphide, double compounds of aluminium sesquisulphide with, 95, 286
 Magnesium α -naphthyl bromide, action of phthalic anhydride on, 90, 276
 Magnesium nitride as a reagent, 75, 152 — Formation by calcination of magnesium in the air, 85, 204 — Production by smothered combustion of magnesium in air, 38, 39
 Magnesium oxalate, precipitation with calcium oxalate, 89, 146
 Magnesium oxide, dissociation by means of metallic magnesium, 63, 279 — Reducibility of carbon, 97, 93
 Magnesium oxybromide, 89, 115
 Magnesium oxychloride, 26, 230
 Magnesium oxychlorides, 45, 99
 Magnesium permanganate as an oxidising agent, 94, 167
 Magnesium peroxide, 90, 257; 91, 154 — And peroxides of sodium, calcium, strontium, and barium, iodometry of, 89, 96
 Magnesium phenylbromide, action of carbonic acid on, 90, 247
 Magnesium phosphate, ammonium (see Ammonium) — And monomethylamine phosphate, double, 98, 47 — Table for calculating the phosphoric acid in, 74, 110 — Test for purity of, 45, 209
 Magnesium phosphide, 11, 220; 79, 276
 Magnesium platinocyanide, hydrates of, 78, 160
 Magnesium pyroarsenate, determination of arsenic as, 44, 32
 Magnesium pyrophosphate, test for purity of, 49, 110
 Magnesium selenate, ammonium (see Ammonium)
 Magnesium silicide, 97, 143 — Action of nitrogen on, 16, 17
 Magnesium suboxide, 50, 157
 Magnesium sulphate, ammoniacal, in regions of Tuscany, 23, 261 — Ammonium (see Ammonium) — And sodium sulphate, equilibrium between, 91, 70 — Colorimetric determinations of, 50, 282
 Magnesium sulphide, 17, 290 — And aluminium sulphide, combinations, 95, 226 — Anhydrous and crystallised, 78, 86, 260 — As a pigment, 63, 285
 Magnesium-thallium alloys, 92, 195
 Magnesium thiocarbonate, 45, 125
 Magnesium vanadates, 42, 85
 Magnesium zinc-eisen, 67, 78
 Magnesium-zinc organic derivatives, synthesis by means of mixed, 96, 71
 Magnet, 40, 100 — Analytical solution of problem of distribution in a, 33, 101 — And magnetic needle, 47, 295 — At Kew, diurnal variations, 61, 287 — Bar, direction of lines of force in, 40, 21 — Compound, moment of, 48, 224 — Consecutive poles in, 21, 193 — Electro- (see Electromagnet) — Power of, augmentation by reaction thereon of currents induced by the magnet itself, 15, 89
 Magnets, action on liquids, method of observing, 57, 71 — Action on rarefied gases enclosed in capillary tubes and illuminated by an induced current, 31, 250 — Artificial, 37, 83 — Circular, Duchemin's compass with, 34, 250

— Deflection of Röntgen rays by, 73, 177, 189 — Distribution of magnetism in interior of, 33, 17 — Distribution of magnetism on surface of, 34, 217 — Effect produced by application of armatures to, 31, 98 — Electro- (see Electro-magnets) — Electrolytic preparation, 31, 73 — Formed with compressed powders, 32, 103 — Formula for lifting power of, 57, 220 — Horse-shoe, supporting power, 35, 4 — Induction coils, insulating wire, and metal for electric and other purposes, 7, 47 — Internal constitution, 33, 42 — Internal magnetisation, 33, 33 — Jamin's, supporting power of, 32, 51 — Law of action between, 89, 284 — Portable force of, 27, 293 — Remarkable points in, 33, 116 — Self-demagnetising factor of bar, 99, 143 — Steel, determination of temperature coefficients, 29, 175 — Use of chilled cast-iron for permanent, 93, 67 — Use in measurement of horizontal component of earth's field, determination of moment of inertia, 91, 200
 Magnetarium, 69, 131
 Magnetic action of rotary conductors, 35, 8 — Action on rarefied gases of Geissler's tubes, 33, 74 — Alloys (see Alloys) — Apparatus of M. Edard, 42, 258 — Attractions, new experiments on, 41, 241 — Balance, 89, 308 — Bodies, telephonic effects from shock of, 42, 83 — Bundles of separated plates, 30, 19 — Bundles, use of armatures applied to, 28, 108 — Carbide filters, 16, 281 — Circular double refraction, law relating to, 44, 59 — Circular polarisation of compounds, 52, 166 — Coils, maximum resistance, 28, 108 — Condensation (see Condensation) — Curves, 23, 285 — Declination in connection with aurora of Oct. 14, 1870, 23, 107 — Declination with induction compass, method of determining, 49, 125 — Disc, method of measuring, 15, 248 — Dynamo- (see Dynamo-magnetic) — Elements found in rocks and minerals, 66, 308 — Experiment, 10, 152 — Field, action on Becquerel rays, 81, 60 — Field, action on discharge through a gas, 91, 68 — Field and inductance coefficient of circular, cylindrical, and helical currents, 95, 93 — Field, behaviour of Becquerel and Röntgen rays in, 81, 61 — Field, behaviour of oxyhaemoglobin, carbonic-oxyhaemoglobin, methaemoglobin, and derivatives in, 84, 85 — Field, effect on electrical conductivity of flame, 100, 19 — Field, influence on radiation frequency, 75, 289 — Field, instrument for measuring strength of an intense horizontal, 100, 36 — Field of a circular current, 67, 131 — Field of a current running in a cylindrical coil, 68, 304 — Field of any cylindrical coil or plane circuit, 72, 242 — Field, permanent, 64, 307 — Field, produced by electric tramways, 82, 301 — Fields, experiments in, 66, 278 — Fields, measuring, 65, 250 — Fields, study of variable, 70, 49 — Figures, 38, 20, 130 — Flux, propagation of longitudinal waves of, along iron wires and rods, 93, 67 — Fluxes in meters and other electrical instruments, 78, 231, 252 — Force, influence on electric discharge, 1, 112 — Hysteresis loss in straight iron strips, 75, 297 — Hysteresis, variations with frequency, 90, 266 — Induction compass, 49, 10 — Induction, distribution in a long iron bar, 79, 285 — Induction, effect of a solid conducting sphere in a variable magnetic field on, at a point outside, 79, 212 — Induction, electrostatic field produced by, 59, 250 — Intensities, new method for direct measurement of absolute, 50, 93 — Iron sand from Kyles of Bute, 39, 102 — Lag (see Lag) — Meridian, application of telephone to determination of, 38, 164 — Metals (see Metals) — Motive power, 23, 94, 130; 24, 155 — Needle, declination and

inclination, 22, 119 — Needle, movements of, 40, 214 — Needle, reply to Flammarion on declination of, 39, 218 — Needle, variations of, 22, 70 — Needles, measurement of magnetic moment of very small, 29, 122 — Needles plunged into liquids, mutual action, 41, 282 — Nucleus submitted to magnetising action of an electric current, mechanical effects produced in, 42, 48 — Observations, 28, 9 — Oscillators as radiators in wireless telegraphy, 96, 233 — Oxides (see Oxides) — Oxygen (see Oxygen) — Perturbations observed by de Saussure, 22, 22 — Phenomena, 21, 164; 44, 313 — Polarity (see Polarity) — Potentiometer, 55, 233 — Power, maximum evolved by a galvanic battery, 22, 205, 285, 310 — Power of a battery, 23, 21 — Power, rotatory, in crystallised bodies, 53, 251 — Powers developed by influence in certain specimens of nickel and cobalt as compared with iron, 39, 73 — Precession, 82, 301 — Proof pieces and proof-planes, 63, 163 — Properties of alloys of iron and aluminium, 80, 218 — Properties of boron and manganese compounds, 94, 24 — Properties of iron-rust, 66, 230, 239 — Properties of liquid oxygen, 67, 210 — Properties of nickel-iron of Santa Caterina, 44, 286 — Purification, researches on rotatory, 37, 41 — Resistance, 55, 138; 56, 4 — Rotation, 63, 80 — Rotation of certain compounds, 65, 284 — Rotation of hydrogen chloride, 68, 302 — Rotation of saline solutions, 62, 255 — Rotation of sulphuric and nitric acids, 66, 277 — Rotation of unsaturated hydrocarbons, 71, 123 — Rotation produced by chloral, 55, 269 — Rotations, apparatus for measuring, 93, 196 — Rotatory power of aromatic compounds, 73, 301 — Rotatory power of bodies in absolute units, measurement, 52, 23 — Rotatory power of liquids, 22, 58 — Sand (see Sand) — Shells (see Shells) — Shielding of concentric spherical shells, 68, 276 — Shunts, property of, 63, 210 — Spectra (see Spectra) — Susceptibility and permeability, measuring, 56, 15 — Tensions, conductivity, 29, 101 — Torsion of iron wires, 55, 259 — Variations of magnetised rods during storms, 45, 233 — Viscosity, 59, 124 — Wires (see Wires) — Work, recent, 61, 204
 Magnetical, hydrodynamical, and electrical phenomena, 44, 313
 Magnetisation, 55, 200 — Action of heat in, 33, 74 — Easy process of, 45, 221 — Effect in changing dimensions of iron, steel, and bismuth bars, and increasing interior capacity of hollow iron cylinders, 27, 250, 272; 30, 58, 70, 104, 139 — Heat due to, 45, 173 — Influence of coercive force upon heat produced by, 45, 221 — Influence of heat on, 38, 89 — Influence of temperature on, 33, 54, 160; 34, 238 — Of cobalt (see Cobalt) — Of iron (see Iron) — Of metals (see Metals) — Of Nickel (see Nickel) — Of steel (see Steel) — Process of so-called double touch, 33, 10 — Processes, 32, 61, 225 — Singular case of, 31, 206 — Stress of, 37, 212
 Magnetised needles, rupture of, 29, 132
 Magnetising constants of inorganic substances, 80, 290 — Spiral, attraction exercised by, upon a moveable iron cylinder, 23, 35
 Magnetism, 18, 238; 28, 43, 70, 195, 225, 313; 29, 36, 72, 132, 217; 30, 40, 64, 195, 240; 31, 59, 118, 119; 32, 83; 50, 80 — A solution of a geometrical problem, 62, 204 — Action on character of spectral lines, 52, 302 — Action on gases, 21, 45 — Action on two electric currents, 21, 190 — And atomic weight, relation between, 63, 171 — And diamagnetism, 22, 321 — And electricity, 13, 245, 258 — And gravitation, 16,

- 37, 59, 76, 101.—And temperature, influence on electrical resistance of bismuth and its alloys with lead and tin, 57, 50.—Caloric effects in an electro-magnet with several poles, 29, 217.—Condensing, 20, 22.—Dependence of, 29, 72.—Distribution in circular or elliptical discs of steel, 33, 70.—Distribution in soft iron, 29, 112.—Distribution in a thin plate of great weight, 32, 50.—Distribution on surface of magnets, 34, 217.—Electro- (see Electromagnetism) — Ewing's theory of, 62, 293.—Experiment in connection with the telephone, 38, 34.—Hydro- (see Hydromagnetism) — In interior of magnets, 33, 17.—In mechanical units, 24, 20.—In nickel and cobalt, 36, 166.—Influence on electric jets propagated in partially-vacuous space, 22, 22.—Interior distribution in a bundle of plates, 30, 8.—Mirrors of, 70, 268.—Modifications produced by, in light emitted by rarefied gases in Geissler tubes, 21, 119.—New source, 31, 228, 250.—Residual, 40, 142.—Specific (see Specific) — Terrestrial, and eclipses, connexion between, 47, 293.—Terrestrial, elements of, 20, 214.—Terrestrial, induction of the sun a probable cause, 25, 114.—Terrestrial, solar diurnal variations, 53, 188.—Terrestrial, theory of, 39, 112; 40, 21; 41, 91.—Theory of, 47, 63, 304.—Theory of permanent, 61, 204.—Thermic effects, 30, 155.—Transient variation of permanent, 37, 123.—Transversal, of iron and steel, 20, 167.
- Magnetite, artificial production, 55, 224.—Determination of ferrous oxide in, 100, 99.—In certain minerals and rocks, 66, 283.
- Magneto-electric apparatus (see Apparatus)—Explosion apparatus (see Apparatus)—Light (see Light) — Machine, 15, 141; 32, 14.—Machine, electro-motive force of, 46, 10.—Machine which produces a constant current, 24, 205.—Machines of Wilde, Wheatstone, and Siemens, 15, 144.—Phenomenon, 52, 315.
- Magnetograph, quartz-thread vertical force, 89, 127.
- Magnetometer deflection-bars, bending, 88, 231.—Kew, additions to, 57, 249.
- Magneto-optic phenomenon, 78, 231.—Rotation, 59, 141.
- Magnetostatic field, stresses in a, 89, 128.

- Manganates, manganese in, estimation, 82, 308 — Mangani- (*see* Mangani-manganates)
- Manganese, 64, 52; 71, 245 — Action of carbon monoxide on, 99, 191 — Action on phosphorescent power of calcium carbonate, 54, 321 — Activity in relation to phosphorescence of sulphide of strontium, 79, 287; 81, 22 — Adulteration, 10, 305 — Alloys, 13, 12 — Alloys, action of carbon monoxide on, 99, 191 — Alloys of copper, tin, zinc, and lead with, 22, 194 — Amalgam, 39, 84 — Analysis, 21, 156; 63, 72 — And alumina, separation, 40, 33 — And aluminium, separation, 57, 125; 76, 65 — And bismuth, fluorescence, 54, 309; 56, 90 — And bleaching-powders, commercial value, 21, 143 — And boron compounds, magnetic properties, 94, 24 — And carbides of iron, calorimetric study of, 31, 217 — And cerium, separation, 10, 195 — And chrome, rapid preparation, 67, 137 — And chromic acid, separation, 77, 131 — And chromium, determination, volumetric, along with ferric oxide and alumina, 43, 253 — And chromium, separation, 11, 101; 76, 65 — And cobalt alloy, 22, 34 — And cobalt, and their alloys with copper, 21, 153 — And cobalt, determination, 41, 184 — And cobalt, separating, 13, 45, 133; 57, 125; 76, 65 — And copper alloy, report on Manhes, 51, 106 — And copper and silicon, equilibrium between, 87, 94 — And ferric oxide, separation, 40, 33 — And fluorine, chemistry of, 54, 96; 55, 133, 309 — And iron, separation, 40, 300; 55, 236; 57, 125; 59, 232; 62, 19; 76, 65; 77, 201; 79, 195; 87, 312; 98, 105 — And iron and aluminium, alloys of, 66, 140, 160 — And iron, cobalt, chrome, etc., amalgams, 39, 84 — And iron test, 54, 289 — And lead, 87, 300 — And magnesium, bismuth, and zinc, equivalent weights of, 50, 69 — And mercury, separation, 72, 65 — And molybdenum alloys, 94, 107, 206 — And nickel, separating, 13, 45, 133; 57, 125; 64, 294; 76, 65 — And periodic law, 96, 250 — And phosphorus in pig-iron, estimation, 54, 174, 200 — And phosphorus in spiegeleisen, 36, 275 — And silicon alloys, use in casting steel, 35, 226 — And silver, separation, 72, 91 — And tungsten alloys, 94, 241 — And tungstic acid, separation, 75, 26 — And zinc, separation, 40, 33; 57, 125; 63, 255; 64, 182; 65, 159; 76, 65 — Appearance on surface of rocks, 46, 122, 149 — As substitute for nickel in German silver, 27, 249 — Atomic weight, 47, 98; 93, 55; 95, 102, 111, 123, 209; 96, 34; 99, 69; 100, 278 — Battery, 44, 225; 45, 176 — Behaviour with chloride of potash before the blowpipe, 16, 51 — Blue, 37, 133 — Brass, occluded gases in a complex, 99, 35 — Bronze, 77, 192 — Calcoined, 50, 273 — Cast, manufacture, 38, 20 — Cast-irons, constitution, 97, 118 — Cast-iron function, 55, 201 — Chemistry of, 66, 329 — Compounds, 17, 9 — Compounds, action of sulphuretted hydrogen on, 21, 192 — Compounds, fluorescence, 54, 165 — Cyanogen compounds, 15, 201 — Detection and estimation of minute quantities, 24, 182; 83, 76 — Detection of magnesia in presence of, 17, 49 — Determination, 36, 96; 40, 169, 207; 52, 224 — Determination as the pyrophosphate, 78, 238, 246 — Determination as the sulphide, 81, 193 — Determination by oxydometric methods, 68, 51 — Determination, colorimetric, 59, 230 — Determination, influence of organic matter and iron in, 50, 75 — Determination of small quantities, 24, 196 — Determination, volumetric, 38, 207; 47, 177; 48, 176, 273; 50, 249; 59, 121; 62, 251; 71, 122 — Ebullition and distillation, 93, 140 — Estimation,

22, 230; 79, 195; 86, 317; 99, 388, 390—Estimation, ammonium persulphate as substitute for lead peroxide in, 84, 230—Estimation as pyrophosphate, 17, 198; 73, 247—Estimation as the carbonate, 77, 23—Estimation as the sulphate and as the oxide, 77, 255—Estimation by Bunsen's method, 21, 48—Estimation by means of hydrogen peroxide, 53, 41—Estimation by means of potassium permanganate, 79, 25, 47, 58, 83, 104—Estimation by sulphide of ammonium, 21, 166—Estimation, colorimetric, 76, 219—Estimation, different methods, 8, 227 — Estimation, Guyard's process, 12, 58 — Estimation, improved method, 26, 37, 81, 111—Estimation in state of sulphides, 81, 60—Estimation of small quantities, 57, 48—Estimation of tartaric and male acids by, 18, 13—Estimation, persulphate method, 91, 136—Estimation, phosphate method, 83, 37—Estimation, quantitative, 77, 201—Estimation, volumetric, 8, 292; 9, 13, 251; 41, 207; 49, 9, 25, 57; 63, 66; 84, 209, 247, 248, 269, 302; 85, 24, 50, 93—Ferro- (see Ferromanganese)—Ferromagnetic compounds with boron, antimony, and phosphorus, 95, 227—Ferromagnetic nitrogen compounds of, 98, 318—Formation heat of some compounds of, 73, 59—In acid solution, conditions under which it can be estimated by persulphates, 87, 129—In animals, 50, 24—In ash of plants, estimation, 26, 296—In ashes in state of phosphate, 35, 75—In beech-nuts, 23, 155—In blood, 21, 274; 24, 230—In cast-iron, estimation, 33, 90; 50, 112—In cast-irons, determination, 28, 158; 38, 70—In chrome steels, 79, 157—In commercial zinc, zinc ash, and calamine, qualitative detection, 48, 193—In dolomitic regions, 47, 93—In ferrochromium alloys, estimation, 83, 25—In ferromanganese, estimation, 23, 279; 35, 247—In ferromanganese alloys, 38, 268—In ferromanganese and manganese oxides, volumetric determination, 52, 117—In iron and steel, determination, 18, 232; 53, 74; 63, 204; 88, 241—In iron and steel, estimation, 32, 100; 33, 35—In iron and steel, estimating, persulphate method, 90, 237—In iron ores, determination, 53, 74, 75—In iron ores, estimation, 27, 78—In irons, 38, 70—In manganese, estimation, 82, 308—In manganese ore, electrolytic estimation, 81, 12—In manganese ores and ores, determination, 64, 242—In milk, 21, 274—In natural silicates, separation and estimation, 96, 2—In ores, estimation, 67, 162—In oxidations, 76, 47—In oxidations by iocase, 75, 265; 76, 60—In pig-iron, estimation, 27, 14, 85; 29, 57, 110—In plants, 50, 24; 77, 108—In slightly mangiferous cast-iron, determination, 58, 173—In scoria from old copper workings, 5, 210—In soils, estimation, 26, 296—In spiegeleisen, determination, 33, 47; 36, 275; 51, 230—In spiegeleisen, estimation, 22, 186; 23, 279; 29, 86, 150; 32, 100; 35, 175, 247; 50, 112—In spiegeleis, 73, 13—In steel, 26, 194; 43, 266—In steel, determination, 18, 232; 28, 158; 38, 70; 48, 23; 58, 209; 63, 204; 74, 214, 248, 262—In steel, estimation, 27, 14, 85; 32, 100; 33, 35; 81, 171; 86, 283—In tungsten alloys, estimation, 82, 209—In vegetable soils, 77, 108—In water, 84, 183, 278—In water, determination, 97, 3—In wines, 49, 266—In wrought iron, estimation, 27, 14—Influences accelerating or retarding action of, considered as a metallic ferment, 89, 12—Manufacture, 7, 299; 67, 16—Metallic, 25, 139; 56, 27—Metallic,

preparation, 60, 20; 63, 61—Nodules, 44, 133—Non-precipitation by sulphide of ammonium, 19, 137, 166—Ore, analysis, 34, 30, 50—Ore, antimoniferous, 42, 223—Ore, electrolytic estimation of manganese in, 81, 15—Ore, from New South Wales, 35, 6—Ores, 12, 232—Ores, determination of cobalt in, 65, 75—Ores, docimastic assaying, 26, 111—Ores, estimation, 67, 162—Ores, estimation of manganese peroxide in, 20, 352—Ores in Russia, 75, 143—Ores of the Bukovina, 35, 198—Ores, testing, 21, 16—Ores, uses of, 12, 233—Organic compound rich in, extracted from the woody tissue, 76, 119—Oxidation by means of, active influence of albumenoid matter on, 89, 83—Pig-iron containing, 35, 44—Precipitated by chlorate process, condition of oxidation of, 77, 269, 278—Precipitation, 49, 201—Precipitation as ammonium manganous phosphate, 63, 184—Precipitation as dioxide, 39, 201—Precipitation by hydrogen peroxide, 36, 147; 53, 41—Precipitation by persulphuric acid, 88, 11—Precipitation by sulphide of ammonium, 21, 166—Precipitation, influence of ammonia and its salts on, 4, 150—Preparation, 18, 46; 69, 50—Process, Greene-Wahl, 67, 114—Producing colouring matters or pigments from, 6, 190—Properties of, 66, 62—Reaction, new, 36, 212—Residues, utilisation in glass manufacture, 23, 326—Restoration of exhausted, 2, 226, 263; 3, 47—Salts, 4, 69; 18, 190—Salts, absorption spectrum, 92, 116—Salts, action of roasting on, 58, 36—Salts, basic, 46, 57—Salts, colouration, 1, 178—Salts, containing cobalt, purification, 20, 276—Salts, experiments on, 21, 300; 22, 251—Salts, oxidation by alkaline persulphates in acid liquor, 88, 59—Salts, oxidising action, 76, 35—Salts, pink, 3, 300—Salts, soluble, 88, 11—Separation of, 40, 207—Separation from cobalt and nickel, 66, 11—Separation of small quantity from large quantity of lime, 60, 262—Spectra in blowpipe beads, 25, 139—Spent, recovery of, 15, 10—Test for, 23, 290; 54, 289—Titration, 89, 83—Use of phosphate of soda for removing, 20, 35—Volatility, 67, 204—Waters of Excelsior springs, 61, 123—Williams method for, 85, 16—Manganese acetate, oxidation by chlorine, 87, 118—Manganese aluminate, 86, 317—Manganese-aluminium alloys (see Aluminium-manganese)—Manganese bichloride, existence of, 11, 129, 254—Manganese binoxide and oxygen, experiments on, 13, 189, 193—Determination, 47, 2—Nitric acid in natural, 1, 299—Manganese borate, 66, 313—Manganese boride, preparation, 91, 38—Manganese borides, preparation and properties, 91, 280—Manganese bromide, crystalline, and part played by, in metallurgy of iron, 33, 42—Manganese carbide, 73, 141—And barium carbide, dissociation, 77, 165—Manganese carbonate, action of air on, 59, 277—Manganese carbonates, composition, 21, 107—Manganese chloride, action of alkali-waste on, at a high temperature, 36, 113, 173—And alcohol, compounds, 85, 155—Decomposition of sulphide of calcium by means of, 19, 287—Hydrates of, 81, 209—Silicated, 49, 125—Manganese cyanide and copper cyanide, 73, 24—Manganese dioxide, 40, 261—Action of hydrochloric acid on, 96, 310—Action of selenious acid on, 55, 308—Action on ammonium nitrate, 35, 118—And

potassium chlorate, catalysis, 58, 247—And sulphuric acid, oxidation of benzinic carbides by, 84, 242—Double iodides of, 79, 168—Natural formation, 47, 93—Manganese ferricyanide, 51, 164, 226, 248—Manganese ferrocyanides, 75, 186—Manganese hydrate, causes of variation in precipitation by ammonia, 42, 259—Manganese iodomercurate, 94, 24—Manganese molybdates, 77, 105—Manganese oxalate, 19, 41; 59, 36—Crystallised, formation during permanganic oxidation of citric acid, 81, 203—Manganese oxide, 60, 12; 63, 279—Action of carbon monoxide on, 99, 191—And earths of magnesia, examination of, 78, 282—Black, new views of constitution, 6, 121, 136, 145, 157, 169, 182, 207, 217—Considered as a carrier of oxygen of air to combustible matters, 5, 9—In the Yoredale rocks of East Cheshire, 45, 241—Method of recovering, as practised at Dieuze, France, 16, 63—Regeneration in chlorine stills, 16, 125—Soluble in water, 57, 112—Sulphate which appears to contain a new, 33, 129—Manganese oxides, 42, 267; 43, 189, 201, 213, 225; 44, 241; 61, 94—Action of roasting on, 57, 141; 58, 36—Analysis, 34, 39—Assay, 68, 15, 301, 305—Contributions to our knowledge of, 48, 193—Formation of deposits, 58, 312—Higher, and their hydrates, 41, 291; 44, 301—History of, 45, 137—Native, 68, 49, 209—Natural, 61, 265; 68, 209—Obtained in moist way, 59, 265; 60, 12; 62, 249—Potassium chlorate in presence of, 86, 9—Reduction by amorphous boron, 91, 38—Manganese perchloride, absorption spectrum, 21, 167—Existence of, 12, 70—Manganese perfluoride, 16, 35—Preparation and properties, 81, 154—Manganese peroxide, action on chlorate of potassa, 21, 263—Action on cuprous salts, 14, 107—Action on salts of copper, 15, 72—Action on uric acid, 16, 225—Analysis, 33, 243; 34, 8—And alkalis, separation, 87, 23—And chloride of lime, behaviour on ignition with chromium oxide and sodium carbonate in the absence of air, 45, 80—And potassic chlorate, liberation of chlorine from, 74, 95—And sal-ammoniac battery, improvement in, 38, 152—And zinc chloride battery, report on, 40, 143—As deodorising agent, 1, 60—Constitution, 61, 157—In manganese ores, estimation, 20, 352—Native, composition of, 33, 259—Native, purification of manganic chloride obtained from residues of chlorine with hydrochloric acid and, 35, 196—Preparation, 2, 338—Regeneration in manufacture of chlorine, 36, 144—Salts formed by, 34, 8—Manganese phosphates, estimation of fluorine in, 11, 194—New, 36, 183—Manganese phosphides, 75, 95—Manganese picrate, optical properties, 2, 314—Manganese protosulphate, 5, 98—Manganese protoxide, separation from alumina, lime, and magnesia, 2, 266—Manganese pyrophosphate, composition, 79, 275—Manganese selenide, crystalline, 81, 225—Crystallised, 82, 8—Manganese silicide, 32, 113; 72, 306; 87, 94—Manganese silicides, 87, 70—Preparation, 78, 318—Manganese silico-aluminate, vanadiferous, 26, 287—Manganese steel, 39, 118; 58, 172; 70, 97—Of Mr. Hadfield, report on, 61, 277—Physical properties of, 55, 158, 169—Manganese steels, properties and constitution, 88, 210

- Manganese sulphate, **15**, 202; **19**, 252, 263 — And potassium permanganate, reaction between in acid solution, **100**, 266 — Free from iron, preparation, **1**, 299 — Influence on titration of iron, **58**, 156 — New native, **40**, 10
- Manganese sulphide, **35**, 165 — Flesh-coloured, behaviour with reagents, **21**, 34 — Green, **20**, 226
- Manganese sulphite, **47**, 117
- Manganese tetrachloride, **37**, 270
- Manganese trioxide, **57**, 48
- Manganese tungsten, preparation, **78**, 318
- Manganic acid (*see* Acid) — Chloride (*see* Chloride) — Metaphosphate (*see* Metaphosphate) — Oxide (*see* Oxide) — Phosphate (*see* Phosphate) — Phosphates (*see* Phosphates) — Salts (*see* Salts) — Sulphide (*see* Sulphide)
- Manganiferous minerals (*see* minerals)
- Manganian-manganates, alkaline earth (*see* Alkaline)
- Manganite of barium (*see* Barium) — Of calcium (*see* Calcium)
- Manganites, alkaline earthy, method of producing, **52**, 70 — Forming, **55**, 164 — Of potassium (*see* Potassium) — Of sodium (*see* Sodium)
- Manganocyanides of potassium (*see* Potassium)
- Manganomolybdate, **76**, 71
- Manganesomanganic fluoride (*see* Fluoride)
- Manganous acid (*see* Acid)—Acids (*see* Acids) — Fluoride (*see* Fluoride) — Hydroxide (*see* Hydroxide) — Salts (*see* Salts) — Sulphate (*see* Sulphate)
- Manget and Marion, MM., Reaction of formaline, by which it may be detected in certain food-stuffs, **86**, 233
- Mangin, Louis, Aération of soil in promenades and plantations of Paris, **71**, 270 — Callose, **61**, 191 — Colouring reagents of fundamental substances of vegetable membrane, **62**, 52 — Pectic compounds in plants, **60**, 221 — Separation and determination of tin and antimony in an alloy, **70**, 93 — Use of ruthenium red in microscopic morphology, **67**, 181
- Mang-Koudou, colouring and other principles in, **70**, 254
- Mangon, H., and D. Claye (*see* Claye, D.)
- Mangon, M. Herve, (*see* Herve-Mangon, M.)
- Manhès' alloy of copper and manganese, report on, **51**, 106
- Mania metaphysical, **37**, 134
- Manipulation, chemical, **64**, 146 — Microscopical, **20**, 145, 157, 169, 181, 193, 207, 219, 231, 243, 255, 265, 291, 307, 318; **21**, 8, 19, 29, 38, 50, 62, 88, 100, 113, 125, 139, 149, 158, 171 — Practical, **61**, 63, 100
- Manipulations, chemical, electricity in, **61**, 424
- Manitoba, black soil of, analysis, **51**, 159
- Manley, Herbert, "Practical Sanitation" (review), **99**, 34
- Manley, J. J., and R. T. Günther (*see* Günther, R. T.)

- Mant, J. B., "Pocket Book of Mensuration, Gauging, etc." (review), **64**, 24
- Mantle, incandescent, as a catalyst, **92**, 370 — Incandescent, theory of, **91**, 62
- Mantles for incandescent gas burners, **79**, 25, 41 — Improvements in manufacture, **1**, 81
- Mantrand, M., Cari- (*see* Cari-Mantrand, M.)
- Manuals, Italian chemical, **26**, 203
- Manufactories, children in, **21**, 83
- Manufacturers, chemical (*see* Chemical) — In Germany, responsibilities of, **72**, 98—A suggestion to, **15**, 216
- Manufactures and trades, noxious and offensive, **32**, 263, 273, 295, 311 — Artificial colouring matters applied in, **53**, 288 — Chemical (*see* Chemical) — English (*see* English)—Metalurgical and chemical, Irish, **11**, 36 — Textile, salicylic acid in, **43**, 37 — Waste water and gases from, damage to soil and crops by, **40**, 168
- Manufacturing residues, utilisation, **24**, 199
- Manure, **4**, 214; **6**, 215, 297; **7**, 203; **19**, 262; **21**, 202, 287; **29**, 230; **40**, 214 — Alkali waste as, **42**, 295 — Analyses, **24**, 19, 80; **26**, 11 — Analysis, advantages of uniformity in, **81**, 285—Animal, concentrated, preparation, **8**, 41 — Animal phosphated and chlorinated, manufacture and use, **20**, 48 — Application of a natural product as, **40**, 312 — Application of human excreta as, **53**, 285 — Application to beet-roots, **24**, 86 — Application to vineyards, **44**, 36 — Artificial, **7**, 10; **18**, 211, 220; **26**, 169 — Artificial, analysis of, **5**, 228 — Artificial, analysis, plea for uniformity in, **81**, 143 — Artificial, manufacture from native phosphates, **22**, 47 — Beer yeast as, **21**, 36 — Bone, presence of arsenic in vapours of, **34**, 81, 132, 162 — Cesspool, value of, **45**, 142—Coke ash as, **59**, 241 — Compounds, chemical, division of nitrogen in, (*see* Nitrogen in France, **27**, 84—**83**, 3, 46 — Cost in France, **27**, 84—**83**, 3, 46 — 171, 232, 255 — Experiments on agricultural trial-field of University of Giessen, **39**, 94 — University of Giessen, **39**, 94 — Farmyard, and Farmyard, **49**, 279 — Farmyard, and artificial fertilisers, experiments with, **48**, 170 — Farmyard, formation, **59**, 218, 229, 265 — Farmyard, formenic fermentation, **60**, 305 — Formenic fermentation, **60**, 305 — Farmyard, loss of nitrogen during fermentation, **50**, 127 — Farmyard, loss of nitrogen in, **29**, 190 — Farmyard, manufacture, **29**, 158; **57**, 170 — Farmyard, preparation, **50**, 79 — Farmyard, preservation, **53**, 86, 226; **54**, 62 — Farmyard, production cost, **49**, 58, 236 — Farmyard, study of, **55**, 58 — Farmyard, waste of nitrogen in, **67**, 60 — Floral, **42**, 330 — For beet-root and other crops, **24**, 312; **26**, 106; **31**, 262 — For horticultural use, **26**, 241 — For vines attacked by phylloxera, **30**, 175 — Improvements in manufacture when urine is used, **4**, 102 — Influence on herbage, **1**, 123—Dr. Jeannel's horticultural, **28**, 170 — Liquid, absorptive of plant food by a meadow from, **35**, 220 — Manufacture, **1**, Manufacture from sewage waters, **1**, 45 — Manufacture, Spence's process of treating mineral phosphates in, **24**, 277 — Manufacturers, German, general congress of, **44**, 226 — Manufacturing from offal of wool, **20**, 180 — Mineral and organic phosphates in, **34**, 154 — Mineral, application to horticulture, **27**, 63 — Mineralised, **19**, 276 — Nitric nitrogen in, **39**, 281 — Nitrogenous matter used as, analysis, **32**, 20 — Of Gen, **27**, 267 — Patent Eureka Sanatory and Manure Company, **5**, 294 — Phosphates, **40**, 37, 50; **45**, 49 — Phosphoric, **81**, 210 — Preparation, **2**, 311; **9**, 32 — Preparation of bones for, **2**, 297; **14**, 24 — Preparation of fish

- and marine animals for, 4, 316 -- Preparation of pulverulent, from fecal matter, 25, 180 -- Production by sheep, and relation between manure produced and the food consumed, 11, 55 -- Production from air, 2, 220 -- Salts, analysis, 53, 210 -- Separation and as, 42, 81 -- Sewage, question, 1, 30 -- Sulphuric acid as, 55, 12 -- Use of carnallite as, 46, 149 -- Use of felspar as, 54, 216 -- Use of iron sulphate as, 51, 60 -- Use of soda nitrate as, 51, 143 -- Waste liquor from distillers as, 45, 13
- Manures, ammoniacal, manufacture, 63, 107 -- Analysis, 24, 19; 27, 11; 34, 221 -- And cattle foods and soils, examination, 64, 161 -- And natural phosphates, determination of phosphoric acid in, 28, 19 -- And their uses, 60, 174 -- Animal (see Animal) -- Artificial, 5, 96; 78, 328 -- Artificial, analysis, 25, 300 -- Artificial, determining precipitated and reduced phosphates in, 19, 229, 266, 310 -- Artificial, experiments on influence of quantity of seeds, and use of, upon yield and composition of oats, 48, 118 -- Artificial, experiments with, on beets, 43, 167 -- Artificial, influence upon physical conditions of soil, 46, 184 -- Artificial, nitrogen in, 50, 291 -- At Paris Exhibition, 38, 220 -- Chemical, 16, 217; 49, 266 -- Chemical, applicable to sugar cane, 46, 24 -- Chemical, consumption, 71, 185 -- Chemical, judged by tradition, 26, 72 -- Commercial value, 28, 8 -- Complementary, 51, 201 -- Composition, 23, 130 -- Different methods of applying, 52, 285 -- Effect on soil, 91, 235 -- Examination, 64, 161 -- Exhaustion of soils by cultivation without, 62, 97 -- Fertilising substances which may be added to, 24, 182 -- For beet-root, 24, 312; 30, 42; 31, 262; 46, 159 -- Fraudulent, reports on, 48, 226 -- Industry of, 10, 83, 105, 130 -- Inexhaustible, 20, 22 -- Influence of copperas and carbolic acid added to, upon germination of seeds and growth of plants, 35, 220 -- Influence on nitrogen of peaty soils, 52, 12 -- Influence on seeds of kidney-beans, 36, 174 -- Inspection, 53, 298 -- Judicious use, 46, 24 -- Manner of distribution, influence on plants, 69, 168 -- Mineral, receipts for various, 27, 47 -- Money-values of substances in, 21, 108 -- Nitrogen in, determination of total, 39, 196; 48, 225 -- Nitrogen in, estimation, 2, 280; 4, 238 -- Nitrogen in nitriferous, determination, 74, 110 -- Nitrogenised, dangers of exclusive use of, 33, 43 -- Nitrogenous, 38, 153 -- Nitrogenous, influence on development of barley, 38, 90 -- Nitrogenous, value, 52, 83 -- Nitrogenous, value in development of plants, 42, 185 -- Organic, decomposition in soil, 61, 77, 80, 314 -- Organic, influence on temperature of the soil, 47, 225 -- Phosphates as, 5, 112 -- Phosphates in, estimation, 20, 77, 108, 132 -- Phosphates of iron and alumina in, 28, 232 -- Phosphatic, solubility in organic acids, 84, 199 -- Phosphoric acid in, determination, 28, 9 -- Phosphoric acid in estimation, 1, 97, 122 -- Potash, experiments with, 48, 118 -- Potassic, action on the vine, 38, 90 -- Potassic, use in Bretagne, 50, 213 -- Preparing animal matters for manufacture of, 28, 126 -- Production in distilleries, 45, 152 -- Report on methods of examining, 54, 187 -- Retrogression of soluble phosphates in mixed, 92, 27 -- Special, 69, 265; 72, 162 -- Theory of, 49, 47 -- Treatise on, 59, 145; 64, 276; 66, 62**
- Manurial agent, mode of action of common salt as, 17, 122, 154 -- Experiment on a peaty meadow, 43, 118 -- Experiments, 52, 261 -- Experiments**
- at Kiel Agricultural Station, 48, 71 -- Experiments at Peterhof, 49, 59 -- Experiments at Plan, 46, 150 -- Experiments, comparative, 44, 230 -- Experiments for determining requirements of arable soils, 40, 312 -- Experiments, Hohenheim, 54, 203 -- Experiments in Province of Posen, 48, 170 -- Experiments of Noorder Afdeeling, 47, 131 -- Experiments on barren heath soils, 45, 176 -- Experiments on forest trees, 47, 131 -- Experiments on fruit trees, 44, 300 -- Experiments on maize, potatoes, and beets, 48, 280 -- Experiments on oats and summer-wheat with nitre and superphosphate, 59, 254 -- Experiments on potatoes, 49, 245 -- Experiments on field at Giessen, 31, 218 -- Experiments on wheat, 47, 201 -- Experiments, performance of, 43, 118 -- Experiments with barley, 32, 193 -- Experiments with different phosphates on barley and oats, 54, 333 -- Experiments with phosphoric acid, 44, 238 -- Experiments with potash compounds, 38, 175 -- Experiments with superphosphates containing crude ammonia, 50, 248 -- Matter containing phosphoric acid, 74, 318 -- Matters, 40, 217 -- Matters, nitrogenous organic, decomposability of, 44, 49 -- Phosphates (see Phosphates) -- Salts, potassa in, 74, 318 -- Value of dried blood, 48, 280**
- Manuring beets (see Beets) -- Influence on chemical composition of potatoes, 84, 258 -- Lime in, 83, 132 -- Theory of, 52, 12 -- With potassium salts, 44, 192**
- Manuscripts, testing antiquity of, 20, 130**

- Mercury, **64, 111**—Action of sulphuric acid on, **77, 146**—Action on iodide of methylene, **81, 121**—Action on solution of sodium in ammonia, **41, 133**—Action on steel, **55, 225**—Action which vapours of sal-ammoniac and hydrochloric acid exert on, **11, 92**—Adsorbing surfaces, **100, 287**—Air-pump, application to coke analysis, **25, 98**—Ammoniacal, compounds, **39, 220**—And alkali metals, double nitrites of, **95, 308**—And alkaloids, formation of double sulphocyanides of, **17, 150, 184**—And antimony, separation, **74, 145**—And antipyrine,

- chlor compound of, 81, 101—And arsenic, separation, 65, 51; 73, 28, 38; 74, 145—And benzile compound, 12, 251—And bismuth, separation, 72, 64; 79, 28; 93, 31—And bismuth hypophosphites, 71, 72—And bismuth salts, separation, 77, 145—And concentrated sulphuric acid, reactions between, 77, 40—And copper, alkaline solutions of, behaviour of, 42, 60—And copper, position and character founded upon their atomic weights, 32, 151—And copper, separation, 73, 28, 38; 74, 145; 79, 145—And copper separation, electrolytic, 85, 280—And gineose, determination, 38, 154—And hydrochloric gas, reaction between, 38, 264—And iodides, detection, 73, 134—And lead, separation, 4, 218; 72, 65—And manganese, separation, 72, 65—And molybdenum, separation, 90, 28—And naphthol, compound of, 80, 24—And palladium, separation, 55, 75—And silver compounds, 83, 167—And silver, separation, 4, 218—And sulphur, history of, 52, 11; 53, 100—And thallium, determination, 60, 86—And tin, separation, 59, 135—And tungsten, separation, 90, 28—Apparatus for measuring and dropping, 60, 68—Arc lamp (*see* Lamp)—As mercurous oxalate, separation and determination, 82, 192—Assay of silver which contains, 21, 201—Atomic weight, 49, 32; 87, 78; 93, 55; 99, 69; 100, 278—Bed of, discovered by M. Quatrefages, 35, 231—Blowpipe assay of, quantitative, 39, 111—Blowpipe test for, 62, 41—Bubbles floating on water, 20, 69, 71—Burette for collecting, measuring, and delivering gases over, 40, 188—Cathodes, use of, 100, 24—Chemistry of, 81, 227—Cleansing, 85, 153—Coloured rings produced on surface of, 41, 10—Combining heats of, 72, 185, 209—Compound, photographic radiation of, 91, 164—Compounds, ammoniacal, contributions to a knowledge of, 39, 229—Compounds containing chlorine, bromine, iodine, and cyanogen, 21, 46—Compounds, electro-analysis with a gold cathode, 99, 188—Compounds, organic, 99, 209—Compounds, organo-metallic, 83, 83—Conditions under which it causes evolution of hydrogen, 99, 187—Conducting power for heat, 14, 32—Calculation of mixture of snow and hydrochloric acid, 33, 26—Decomposition of hydroselenic acid by, 40, 240—Derivatives, 80, 315—Derivatives of camphor, 96, 277; 100, 252—Detection, 41, 273; 42, 186, 307; 47, 177—Detection, electrolytic, 51, 36—Detection in chemico-judicial investigations, 65, 12—Detection in poisoning cases, 19, 34—Detection in toxicological investigations, 63, 254—Detection use of Smithson's battery for, 41, 79—Determination, 61, 133; 64, 227—Determination, electrolytic, 38, 273; 53, 249—Determination in antiseptic soaps, 94, 188—Determination, iodometric, 96, 149—Determination of atomic masses of, by electrolytic method, 75, 28, 29, 54, 61, 77, 81, 101—Determination, volumetric, 47, 238; 48, 150; 49, 14; 66, 60; 67, 241; 88, 200; 94, 201—Displacement by hydrogen, 79, 203—Distillation in vacuo, 44, 211—Distilling apparatus, 61, 131—Efflux from capillary tubes, 35, 44; 35, 111—Electrolytic method applied to, 62, 244—Estimation, 27, 129; 33, 238—Estimation in its solid combinations by distillation, 4, 218—Estimation in state of sulphurets, 1, 119—Estimation of silver in presence of, 100, 252—Estimation, volumetric, 8, 12; 65, 152; 95, 233; 100, 252—Estimation, volumetric and gravimetric, 87, 96—Expansion of, 21, 47—Extent to which it volatilises along with vapour of water, 4, 102—Extinction and reducing power of, 22, 217—Extraction of, 14, 68—Films, 75, 249—Haloid compounds of, emission spectra of, 40, 215—Haloid double salts formed by, 45, 99—Heated by passing a galvanic current through it, 23, 227—In animal liquids, detection, 60, 120; 61, 229—In animal tissues, determination, 64, 177—In antiseptic soaps, determination, 94, 188—In Cevennes, 34, 40—In cinnabar, 74, 310—In dilute solutions of mercuric chloride, determination, 68, 50—In dilute solutions of sublimate, determination, 67, 158; 69, 13—In milk, 1, 47—In minerals, detection, 59, 221—In spring of Roher at Mont Cornadore, 35, 231—In urine, detection, 62, 249—In urine, determination, 65, 105; 58, 84; 74, 318—Loss of, 25, 20, 83—Metallic, action of ozone on, 96, 59—Mines of Almaden, 20, 132; 24, 74—Mines of California, 6, 314—Naphthyl (*see* Naphthyl)—New source of, 20, 227—Occurrence in same group with the alkaline earths, 90, 271—Organic radicals, 8, 262—Oxidation in air, 51, 25—Passage through glass capillary tubes, 22, 191—Pipette, calibrating, 84, 21—Poisoning, 74, 40—Precautions to be taken by those who work with, 20, 275—Precipitates, solubility in alkaline salts, 1, 181—Preservation of gases over, 54, 227—Pump, Friedrich's, 55, 284—Purification, 6, 131; 40, 32, 77; 48, 259; 58, 60; 63, 24; 69, 121; 75, 120; 97, 158—Reaction of sulphuric acid with, 76, 325—Recognition, 55, 261; 62, 284—Reduction in California, 36, 22—Reduction of ferric nitrate by, 54, 27—Relations to other metals, 56, 113—Rheostat designed by H. von Jacobi, 35, 53—Salts, 4, 225—Salts, action of ammonia on halogen, 63, 310—Salts, action on aluminium, 74, 30—Salts, basic, 40, 22—Salts, deposit by Reinsch's process distinguished from, 23, 73—Salts, determination by means of sodium peroxide, 73, 198—Salts, explosive, 92, 81—Salts, haloid, 45, 151; 60, 293—Salts, haloid, compounds of organic bases with, 43, 257—Salts, haloid, double decomposition, 47, 36—Salts, haloid, double salts formed by, 45, 99—Salts, observations on, 27, 129—Salts, solubility of chloride, bromide, and iodide of silver in, 21, 226—Sensitive test for certain impurities, 61, 40—Separation from metals of arsenic and copper groups, 67, 174—Solution and diffusion of metals in, 73, 81; 74, 289—Solution of solid metals in, 83, 118—Specific gravity, 13, 103—Specific resistance, 45, 202—Spontaneous oxidation, 42, 329; 44, 169—Standards, resistance of, 63, 247—Submerged in different solutions, effects of electric currents on, 27, 208, 219, 301—Test for traces, 40, 229—Thermometers (*see* Thermometers)—Titration by sodium thiosulphate, 82, 228, 235—Use as standard in refractometry, 100, 34—Valve in place of glass- and pinch-cocks, 58, 256—Vapour, absorption spectrum and fluorescence, 92, 102—Vapour, condensation on selenium in Sprengel vacuum, 33, 203—Vapour densities of dried, 81, 152—Vapour in air, determining, 97, 263—Vapour lamp, 87, 308—Vapour lamp, Bastian, 89, 156—Vapour, pressure at ordinary temperature, 48, 251—Vapour, pressure of saturated, 47, 147—Vapour, pressures of, 52, 269; 64, 21—Vapour tensions, 49, 9, 21—Vapour, viscosity, 75, 291—Volatility with vapour of water, 2, 143
- Mercury acetamide, 78, 250
Mercury acetates, action of acetylene on, 86, 252
Mercury alkyls, reaction of argon and nitrogen with, 80, 135
Mercury ammonium bromide, di- (*see* Dimercury)
Mercury ammonium chlorides, 59, 97, 107, 168, 301, 312
Mercury bichloride, action on hydrocyanic acid, 11, 6
Mercury bromide, 21, 46; 71, 269—Precipitation by means of sulphuric acid, 86, 138
Mercury chloride, 68, 306; 69, 265; 71, 269—Action on sulphocarbamide and sulphocarbotoxide, 20, 251—And chloride of ammonium, double salts containing, 5, 351—Compounds, 63, 261—Molecular weight, 70, 198—Precipitation by means of sulphuric acid, 86, 138—Stability of solutions of, 69, 25; 70, 109—Toxicological search for, 60, 133
Mercury chlorosulphate, 81, 299
Mercury cyanide, action on salts of copper, 59, 11—And alkaline and alkaline-earthly metals, double decomposition between, 72, 209—And silver cyanide, auto-reduction, 87, 19—And silver nitrate, reaction between, in presence of ammonia, 48, 161—And zinc cyanide, 65, 164—Compounds, 63, 165; 72, 161—Compounds with alkalis and with nitric acid, 98, 12—Decomposition, 43, 284—Estimation, 81, 122—Preparation, 26, 264—Reactions, 97, 144
Mercury cyanides, ammoniacal, 60, 317—Double, 90, 317
Mercury diammonium iodide, dissociation, 80, 123
Mercury diethyl, oxidation with potassium permanganate, 50, 103
Mercury diiodide, effect of heat on, 39, 55
Mercury dinaphthyl, 70, 254
Mercury fluoride, 2, 156
Mercury formate, 92, 35
Mercury fulminate, 45, 254; 48, 193; 50, 164—Decomposition, 22, 269—Derivatives, 50, 164—Estimation, 89, 303—Explosive properties, 41, 261—Preparation with lignone, 2, 328
Mercury hyponitrites, 74, 289
Mercury hypophosphite, 71, 72
Mercury iodide, 21, 46; 71, 269—Decomposition, 9, 97—Measure of dissociation tension of, 49, 224—Non-existence of an intermediate, 76, 319—Recovering iodine from, 21, 46
Mercury iodides, sublimation of yellow and red, 68, 318
Mercury iodoantimonide, 83, 263
Mercury lactates, 86, 272
Mercury nitrate, acid, use in analysis of sugar liquors, 87, 8—Action of acetylene on, 70, 11, 47—And trimethyl carbonyl, combination obtained with, 77, 225—And sulphate, dissociation, 71, 221
Mercury nitrates, 70, 258; 71, 221—Conversion of mercurous nitrite into, 90, 289
Mercury nitrite, molecular volume of, 97, 176
Mercury nitrites, 74, 289
Mercury nitro-salts, 90, 59
Mercury oxamate, 3, 253
Mercury oxide, 71, 269—Action on organic bodies, 83, 167—Compounds of ketones and aldehydes with, 92, 201—Dissociation, 27, 110—Ointment, red, preparing, 11, 115; 12, 250—Ointment, yellow, 12, 38, 60—Red, dissociation, 28, 70—Red, form of, 21, 201—Red, in old samples of grey powder, 42, 67—Red, solubility and dissociation, 90, 47—Yellow, action on acids of ethylene series, 90, 328—Yellow, action on styrolene and safrol, 82, 169—Yellow, solubility and dissociation, 90, 47
Mercury oxides and salts with an earthy or alkaline base, reciprocal action, 9, 229—Isomeric states of, 71, 173

- Mercury oxybromides, formation-heat, 49, 167
- Mercury oxychlorides and oxybromides, thermic study of, 49, 287
- Mercury oxy-salts, 74, 84
- Mercury perchlorates, 72, 254—Action of alcohol on, 91, 267
- Mercury peroxide, explosive properties of oxalate of, 2, 46
- Mercury-phenyl, relation to aromatic series, 20, 285
- Mercury phosphide, 83, 48—Crystalline, 66, 121
- Mercury picrate, 71, 126
- Mercury protochloride, molecular weight, 11, 301
- Mercury protoiodide, crystalline, 28, 44—Crystalline form and optical properties, 36, 34
- Mercury protonitrate, action on bi-chloride of platinum, 14, 175
- Mercury protoxide, santonate of, 3, 56
- Mercury salicylates, 45, 153
- Mercury selenide, 4, 116—Action of hydrogen on, 82, 71
- Mercury sulphate, action of hydracids on, 38, 287—And nitrate, dissociation, 71, 221
- Mercury sulphates, action of mercuric iodide on, 91, 256
- Mercury sulphide, 11, 22 — Action of hydrogen on, 85, 172—Basic salts of, 40, 241—Behaviour with sulphide of ammonium, 9, 145—Compounds of, 31, 109—Native, 23, 23—Transformation of black into red, 71, 245
- Mercury sulphites, 53, 56
- Mercury sulphocyanide and alkaloid sulphocyanide, formation of double, 17, 150, 184
- Mercury-zirconium double salt, 98, 234
- Mercury and Venus, relative brightness of the planets, 38, 215
- Merget, A., Artificial production of phenomena of aqueous thermo-diffusion of leaves by moist, porous, and pulverulent bodies, 29, 229—Detection of mercury in animal liquids, 60, 120—Diffusion of mercurial vapours, 25, 33, 87; 26, 190—Functions of leaves in gaseous interchange between plants and atmosphere, 35, 125—Phenomena of gaseous thermodiffusion produced in leaves, 29, 72—Synthesis of gases in plants, 35, 96

—Ammonia compounds in aqueous solutions, 82, 241; 83, 58; 84, 21—Ammonium, action on sulphuretted hydrogen, 84, 279—Ammonium combinations, 10, 83—Cast, desulphuration, 72, 317—Cast, for moulding, total carbon in, 70, 269—Cast, sulphur in, determination, 72, 15—Cast, super-silicated, conditions under which it is produced in blast furnaces, 27, 243—Coke (*see* Coke)—Crystalline, 60, 154—Delta, (*see* Delta metal) Fusible, 2, 257; 3, 161—Glasses, *see* Glasses—Growth, spontaneous, 37, 120—In radiferous barium chloride, atomic weight of, 80, 281—Influence upon surface of another metal placed at a very small distance, 45, 233—Melting in a handkerchief, 17, 145—Moulding fruits and insects in, 1, 18—Muntz's, mass analysis by electrolysis, 91, 60—Muntz, sheathing, effect of sea-water on, 85, 131—Muntz, sheathing, removal of silver and gold from sea-water by, 74, 182, 161—New, 7, 264, 278—New, actinium, 44, 138—New, in native platinum of Rogue River, Oregon, 6, 30—New, indium, 8, 122—New, laevoisium, 35, 137—New, vesbium, 65, 217—Particles, electrical resonance for light waves, 85, 141; 86, 22—Pig, titanite, or alloy of titanium and iron, 7, 35—Rosette, estimation of suboxide of copper in, 19, 238—Salts (*see* Salts)—Separations by hydrochloric acid gas, 75, 52, 63, 76—Silicium (*see* Silicium)—Sodium (*see* Sodium)—Solid, crystallisation in, by pressure, 81, 28—Stereo, 3, 270—Stereo, alloy analysed by M. Sommanza, 15, 71—White, alloys (*see* Alloys)—White, analysis, 83, 12—White, use in embroidery, 40, 89—Wire (see Wire)—Work and alloys, composition, 45, 84—Work, dead black for, 3, 241, 266—Work, preventative of rust on, 78, 183—Work, protection, 88, 210—Yellow, analysis of old, 22, 1200—Yellow, platinising, 19, 226

Metals, absorption of gases by, 16, 22, 63—Absorption of hydrogen by, 60—Accurate recognition of sulphides with, 65, 44, 53—Activity of, effect of electric spark on, 94, 22—Action exerted by, upon the acid solution of

their chlorides, 69, 8—Action of ammonia and oxidising agents on, 92, 38—Action of ammonia on, at high temperatures, 74, 264—Action of hydrochloric acid gas on, 54, 305—Action of a mixture of oxygen and hydrochloric acid on, 89, 33—Action of nitric acid on, 43, 284; 44, 23, 59, 205—Action of nitrogen on, 55, 155—Action of oils on, 42, 190—Action of ozone on, 100, 304—Action of pyrosulphuric acid on, 52, 7—Action of saline solutions on, 35, 116—Action of sulphur monochloride on, 99, 35—Action of sulphurous acid on, 3, 82—Action on acetylene and ethylene, 82, 94—Action on acids, 53, 211—Action on chloral hydrate, 51, 57—Action on hot fatty acids, 87, 179—Action on india-rubber, 64, 169—Action on mixture of acetylene and air, 52, 35—Action on oils, 47, 106—Action on salts dissolved in organic liquids, 65, 96, 225—Adhesion of hydrogen to, 19, 261—Affinity of sulphur and oxygen for, 36, 120—Alkali (*see* Alkali)—Alkaline (*see* Alkaline)—Allotropic forms of, electro-chemical relations between, 83, 191—Allotropic transformations, 64, 125—Ammonio-salts, of formation and crystallisation, 14, 265—Ammonium (*see* Ammonium)—Analysis of samples, 77, 121—And acids, action between, 99, 187—And acids, interaction, 59, 202—And alloys, action of acids on, 14, 3—And alloys, coating, 4, 68—And alloys, curious properties of, 58, 235—And alloys, expansion, 3, 315, 357, 371; 28, 231—And alloys, oxygen in, 52, 95—And alloys, researches on, 13, 93, 114—And alloys, solution and diffusion in mercury, 74, 289—And ammonia, salts of, compounds, 90, 107—And ammonium salts, reactions between, 90, 142—And atmospheric and chemical nitrogen, combination, 73, 115—And chlorine, direct combination, 65, 101, 118—And hydrogen, combination, heat disengaged by, 31, 8—And metallic alloys, 4, 68—And nitrogen of the atmosphere, combination, 73, 62—And non-metals, connection between, 86, 295; 87, 162—And their salts, action on ordinary and on Röntgen rays, 74, 235, 257—And vanadic acid, separating, 47, 101—Aniline (*see* Aniline)—Anti-friction, having lead and tin bases, 93, 47—Apparatus for determining hardness, 57, 200—Apparatus for rapid electro-analytical separation, 100, 47—Apparent substitution of, for themselves in their saline solutions, 27, 59—Applications of theory of electrolysis to separation of, from one another, 89, 110, 118, 125—Arsenic in, estimation, 81, 242—Artificial redistribution, 96, 189—Assay of, 76, 207—Atomic latent heats of fusion, 88, 237, 280—Atomic weights of, 17, 284—Behaviour in electric current, 19, 10—Behaviour with gases, 67, 113—Boiling and evaporation in cathodic vacuum, 90, 47—Boiling-points, 39, 286—Boiling-points, approximate determination, 99, 294; 100, 38, 40—Boiling-points, method of calculating, 99, 110—Bromides of, preparation from cerite, 83, 23—Bronzing, 55, 120—Carbon in, estimation, 74, 23—Cast, determination of sulphur in, 72, 15—Cellular structure of, 83, 312—Cerite (*see* Cerite metals)—Cerium (*see* Cerium)—Chemical action upon the heart of the frog, 45, 141—Chlorides of, preparation from cerite, 83, 23—Coating with aluminium or its alloys, 5, 153—Coating with brilliant covering of other metals, 13, 1—Coating with lead, 73, 304—Coating with nickel, 25, 214; 45, 110—Colloidal, electric preparation, 92, 281—Colours of, 24, 223—Columbium (*see* Columbium)—Composition for

cleaning and polishing, 5, 307—Composition for preserving, 14, 203—Combination of, for production of white alloy resisting the action of vegetable acids, 5, 251—Covering with other metals, 10, 249—Crystalline structure, 79, 265; 82, 4—Cupellation of, 73, 282—Cyanometric estimation, 78, 177, 190—Density of hydrogen combined with, 29, 250—Depositing cobalt on, 35, 196—Detection and determination, 31, 143—Determination, 30, 121; 41, 280; 46, 105; 64, 227, 241, 252; 72, 166; 73, 247, 277; 74, 109—Determination, electrolytic, use of a rotating cathode in, 87, 284—Diathermous character of, 35, 95—Diatomic, congelation-point of solution of salts of, 49, 266—Discoveries of new, in last century, 94, 158—Displacement by hydrogen, 79, 47—Displacement by magnesium, 79, 75—Displacement from aqueous solutions of their salts by hydrogen at high temperature and pressure, 100, 60—Dissolution in acids, rate of, 59, 202—Distillation of a mixture of two, 90, 56—Ductile, influence of phase changes on, at ordinary temperature and at boiling-point of liquid air, 92, 120—Earth (*see* Earth)—Earthy alkaline, toxicity, 66, 121—Earthy, chlorides of, and mercuric cyanide, compounds, 36, 22—Earthy, fluorescence of salts of, 39, 262—Earthy, preparation in works of Dr. Schuchardt, 35, 32—Effect of presence of, upon electric conducting power of pure copper, 2, 217—Effect of X-rays on the contact electricity, 73, 165—Elasticity at different temperatures, 33, 139, 211; 35, 106—Electric and thermic conductivities of, relation between, 61, 85—Electric separation, 68, 243, 248—Electrical deposition, 36, 1700—Electro-analysis, rapid, 93, 91—Electro-analytical deposition and separation, 95, 90; 98, 230; 100, 252—Electro-analytical separation, 98, 163—Electro-deposition, 24, 194—Electro-deposition from acetone solution, 100, 319—Electro-deposition, preparation of non-conducting substances for, 4, 110—Electrolytic determination, 41, 280—Electrolytic precipitation, 46, 255—Electrolytic separation, 54, 84—Electrolytic separation and determination, 61, 2, 18, 27, 30—Electromotive force by contact of, 22, 101—Employed in arts, action of acids, etc., on, 53, 240—Equivalent replacement of, 78, 155—Equivalents of, 78, 270—Equivalents of, determination, 48, 232—Estimation, 3, 68—Etching action induced upon different by the acids, 34, 206—Evaporation at ordinary temperature, 74, 72—Evaporation in a vacuum, 46, 77—Evolution of structure in, 90, 160—Expansion at high temperatures, 59, 301—Expansion, laws of, 40, 312—Expansion of spectral rays of, 60, 8—Extracted from their amalgams, properties of, 73, 138—Extraction from pyrites, 38, 281, 203; 39, 7—Extraction of gases contained in, 97, 46—Fancy colouring of, 21, 36—Fatigue testing machine for, 98, 243—Fergusonite (*see* Fergusonite)—Finely-divided, acceleration by hydrogen, 29, 118—Flames of, 67, 265—Fluid density of, 45, 52—Formation at high temperatures of refractory, from their chlorides, 100, 240—Fusibility and volatility, 20, 32—Gaseous state at certain temperatures, 65, 276—Halides of, compounds of methyl sulphide with, 84, 68, 70—Hard and soft states in, 89, 307—Hardness of, 55, 170, 105, 205, 217—Heated, action of gases on glass in neighbourhood of, 90, 18—Heavy acid character of, 59, 160—Heavy, affinity for sulphur, 64, 12—Heavy, determination, 72, 212—Heavy, dissociation of salts of, 90,

- 59—Heavy, polysulphides of, 3, 268—Hydrates of heavy, solubility in soda, 87, 239—In blood (*see Blood*)—In Bolivia, 25, 203—In contact, measurement of difference of potential of two, 41, 262—In cyanide of potassium, electromotive-order of, 35, 224—In fused substances, electrical relation of, 9, 266—In mineral waters, 82, 303—In organism, detection, 28, 315—In soot from coal, 26, 205—In vacuo, action of heat on, 40, 152—Industrial separation by double decomposition, 90, 316—Institute of (*see Institute*)—Iron and other, amalgamation, 34, 35—Liquid, thermo-electric properties of, 75, 116—Magnetic, molecular vibration in, during passage of undulatory currents, 39, 184—Magnetisation of, 61, 231—Magnetism of, and their atomic and specific weights, 17, 284—Mechanical properties, 57, 133—Melting-points, 41, 279—Melting-points and latent heats of fusion, 75, 278—Melting-points, determining, 35, 128—Microscopic examination, 92, 43—Minute structure of, 84, 163—Molecular condition of, 62, 280—Molecular weights, 59, 174; 61, 124, 189—Molten, solution of solid metals in, 83, 118—Molten, transparency of, 16, 268; 55, 163—New, 59, 234—New type of compound in rare earth group of, 93, 68—Nitro- (*see Nitro-metals*)—Noble, action of ozone on, 41, 54—Noble, law of, during cupellation, 73, 282—Non-magnetic, production of magnetic alloys from, 90, 180—Non-volatile, evaporation in evacuated glass vessels, 99, 119—Occluded gases in common, 99, 101—Occlusion of hydrogen gas by, 48, 55—Of alkaline earths, 83, 107—Of alkaline earths, effect of pressure on band spectra of fluorides of, 100, 9—Of aluminium group (*see Aluminium*)—Of ancient Greeks, 94, 2—Of Upper Burma, 28, 187—Ores containing, treatment of, 5, 355—Origin of symbols of, 94, 2—Oven for smelting, 22, 47—Oxidation at ordinary temperatures in presence of ammonia, 91, 201—Oxidation, spontaneous, 42, 329; 44, 169—Oxides of, cause of retention and release of gases occluded by, 79, 19, 27, 42, 52, 68—Oxides of, occlusion of gases by, 68, 240, 250—Passivity of, 10, 253—Permeability for X-rays, 73, 85, 97, 155—Peroxides of, obtained by electrolysis, 22, 240—Phosphorus as a reagent for, 18, 130—Platinising, 16, 120, 148—Platinum (*see Platinum*)—Poisonous, in cheese, 2, 69—Polyatomic, chromates of, 90, 95—Polyvalent, phosphates of, 61, 132—Positive effect of different, on changes of potential of voltaic couples, 58, 51—Precious, extraction from copper-containing pyrites, 26, 143—Precious, extraction from ores, 46, 121—Precious production, 17, 265—Precious, state in which they are found, 39, 162—Precipitated by hydrochloric acid, separation, 51, 97—Precipitations, by electrolytic method, 46, 255—Preparation of binary compounds of, by means of aluminium, 92, 57, 80—Preparation of difficulty fusible, 79, 181—Preserving, 14, 203—Pure, and allied matters, temperature variation of electrical resistances of, 85, 140—Qualitative analysis for, general routine of, 11, 197—Quantitative determination, when precipitated as sulphides, 2, 402—Quantitative separation of, 64, 83—Rare, 40, 58—Rare, colloidal compounds of, 73, 284—Rare, of cerium group, combination of, 93, 122—Reciprocal displacement of, 80, 292—Red-hot, transparency of, 15, 266, 278, 290; 16, 222—Reduction from solution by metallic sulphides, 23, 232—Reduction of difficulty reducible, 60, 228, 237—Reduction of nitrous acids by, 21, 286—Refractory, preparation, 70, 167—Refractory, specific heats and melting-points of various, 40, 240—Relative affinities and reciprocal displacements of oxygen and halogens combined with, 37, 152—Sacrificial, 3, 298—Secondary radio-activity of, 83, 130—Selective absorption for ultraviolet light, 58, 216—Separation of, 24, 311; 57, 24; 64, 83; 69, 20, 234, 258, 284, 292; 70, 4, 71, 72, 84, 61, 73, 24—Separation and detection, 61, 298, 305—Separation, application of theory of electric batteries to quantitative, 87, 193—Separation by electrolysis, influence of gases on, 88, 217—Separation by electrolysis, in influence of nature of cathode on, 88, 5—Separations by electrolytic method, 46, 105—Separations in alkaline solutions, 69, 184—Soldering, cyanide of potassium in, 3, 346—Solid, solution in mercury and other molten metals, 83, 118—Solubility in petroleum, 41, 284—Solubility without chemical action, 23, 169—Specific heats of, 68, 58, 69, 82, 93, 105; 81, 133; 87, 100; 89, 165—Specific weights of, 17, 284—Spectra of, at base of flames, 35, 107—Spectra of, influence of electro-negative elements on, 12, 243, 255—Spectra of, ultra violet, 93, 231—Structure of, 74, 174—Structure of, use of polishing in studying, 69, 205—Subjected to rapid oxidation, behaviour, 39, 217, 238—Substitution of chlorine, bromine, iodine, etc., for, in salts, 3, 225—Sulphides of, preparation from cerite, 83, 23—Sulphur (*see Sulphur*)—Tabular atlas of chemistry of, 76, 219—Transmutation of, 12, 36; 13, 47, 143—Transmutation of, and astrology, 94, 3—Transparency of, 14, 175—Ultramarines of different, 38, 153—Volatile, observing the spectra of, 66, 313—Which accompany iron, 35, 226—Which accompany platinum, separating, 82, 304—Yttrio-ceric, carbides of, 11, 253
- Metalbumen and paralbumen, 47, 119
- Metalddehyde, 44, 204
- Metallamines, metallic ammonias of, 23, 131
- Metallic bases, complex, 73, 23—Benzoates (*see Benzoates*)—Capillary tubes, polarisation, 51, 252—Colour, iridescent, process for obtaining a very fine, 49, 82—Columbium (*see Columbium*)—Combinations, spectral rays of, 7, 99—Compounds, 41, 87, 158—Compounds, constitution, 21, 99—Compounds, fluorescence under influence of Röntgen and Becquerel rays, 81, 157—Compounds or alloys, manufacture, 1, 214, 238—Compounds, triboluminescence of, 91, 280—Deposits upon zinc, influence of, in presence of acids and bases, 27, 294—Objects, coating with a black-brown varnish, 24, 217—Objects, photography of, through opaque substances, 73, 85, 133, 144—Particles contained in fumes or vapours from lead or other smelting works, obtaining, 1, 94—Particles, examination of paper for, 67, 293—Separations in an alkaline solution, 68, 311—Spheres, production and measurement of minute, 54, 231—Strata of different colours, electric deposition, 44, 315—Strontium (*see Strontium*)—Substance, coating to preserve from corrosion or decay, 9, 189—Substance, treating ores to obtain a new, 1, 176—Surfaces, protection of, 7, 239—Tubes and discs, action on X rays, 74, 73
- Metaliferous mines (*see Mines*)—Mineral Bill, 11, 217, 228, 252—Sulphides (*see Sulphides*)—Veins of Cornwall, 28, 180
- Metallic minerals, classification and nomenclature, 58, 66, 79—Species, classification and nomenclature of, 57, 259
- Metallisation of organic bodies to render them fit to receive galvanic deposits, 34, 9
- Metalloid of sulphur group, new, 3, 303
- Metalloids, action of sulphur monochloride on, 99, 35—Affinity of hydrogen to, 27, 290—Arsenic and antimony from a thermo-chemical standpoint, 99, 133—Effect of presence of, upon electric conducting power of pure copper, 2, 217—Electro-chemical preparation, 12, 3—Pentavalent, action of halogen derivatives of, on alkyl halogen compounds, 90, 269—Reciprocal interchange of, 25, 45—Spectra, 27, 59, 178—Test for, 54, 289—Tri- (*see Tri-metalloids*)
- Metalloidal oxides (*see Oxides*)
- Metallurgical and chemical fumes (*see Fumes*)—And engineering work, powerful blowpipes for, 50, 13—Furnaces (*see Furnaces*)—Industry, influence on, by cession of Alsace and Lorraine to Germany, 24, 74—Method of Messrs. Whelpley and Storer, 15, 329—Microscope (*see Microscope*)—Notes, 37, 23; 77, 192—Operations, Chinese, 50, 19—Operations, conditions of loss by volatilisation, 23, 236—Products, estimation of vanadium in, 88, 244—Products, spectrum of phosphorus in, 74, 41, 49—Review, 61, 133, 169—Science, 27, 167
- Metallurgy, ancient Egyptian, 94, 1—And mining, subject matter index of, 84, 292—Application of electricity in, 54, 165—Development of technical instruction in, 52, 179—Electro- (*see Electrometallurgy*)—Electrolysis in, 53, 240—Hydro- (*see Hydrometallurgy*)—In Venezuela, pre-Columbian, 61, 192—Iron, discovery in, 1, 231—Lessons on, 44, 180—Micro- (*see Micrometallurgy*)—New process in, 40, 219—Relation to modern chemistry, 26, 107, 157
- Metameric bodies, action on nicotiana longiflora, 46, 271
- Metamerism in organic compounds, 43, 106, 197
- Metametholcamphor, 36, 64
- Metamethylcyclohexanone, benzylidene (*see Benzylidene*)
- Metamidobenzoic acid (*see Acid*)
- Metamorphia, Mohr's, 3, 150
- Metamorphism of rocks, 60, 269—With special reference to chemical changes in rocks, 11, 53
- Metamorphoses, alcoholic, 8, 72
- Metanaphthaline, 22, 168
- Metanil yellow, 97, 238
- Metanitroaniline, action of quinones on, 93, 91—Alkaline reduction, 73, 9—And quinones, interaction, 69, 291—Iodine compounds obtained with, 90, 35, 70
- Metanitrobenzoic acid (*see Acid*)
- Metanitrobenzophenone, alkaline reduction, 95, 47
- Metanitrobenzoylcanacetate ethers (*see Ethers*)
- Metanitrobenzylalcohols (*see Alcohols*)
- Metanitrocinnamic acid (*see Acid*)
- Metanitrocumenylacrylic acid (*see Acid*)
- Metanitrodimethyl aniline (*see Aniline*)
- Metantrosacetanilide, 97, 177
- Metaoxide of thorium (*see Thorium*)
- Metaoxybenzoic acid (*see Acid*)
- Metaphenetidine, 52, 213—Dimethyl- (*see Dimethylmetaphenetidine*)
- Metaphenylendiamine, preservation of solutions of, 68, 37—Synthesis from resorcin and ammonia, 60, 293—Use of, 64, 125
- Metaphenyltoluene, 65, 144, 210
- Metaphosphate, cuprous, 95, 82—Manganic, violet, of Gmelin, 87, 11—Of thorium (*see Thorium*)
- Metaphosphates, 66, 329
- Metaphosphoric acid (*see Acid*)
- Metargon, 78, 70
- Metasantonin, 31, 21

- Metasilicic acid (see Sodium)
 Metastannic acid (see Acid)
 Metastyrolene, styrolene, reversible transformation of, 76, 210—Rotatory power, 37, 40; 38, 24—Transformation of styrolene into, 80, 261
 Metasulphites, 47, 105
 Metasulphonation of aniline (see Aniline)
 Metatitanic acid (see Acid)
 Metatoluidine, 30, 166—Derivatives, 23, 276—Dimethyl- (see Dimethylmetatoluidin)—From commercial aniline, 29, 102—Preparation, 43, 48; 44, 206—Salicylidene- (see Salicylidene-metatoluidine)
 Metatolyllic acid (see Acid)
 Metatungstates, 3, 260—Nature of, 99, 203—Potassium (see Potassium)
 Metatungstic acid (see Acid)
 Metavanadic acid (see Acid)
 Metaxenol, 33, 218
 Metaxylene, 50, 79
 Metaxylenesulphonic acids (see Acids)
 Metaxyleneol, azo-derivatives of, 53, 227
 Metaxylenesulphonic acid (see Acid)
 Metaxylol, sulphonic acids of, oxidation products of, 35, 263
 α -Metaxylol sulphonic acid (see Acid)
 Metcalfe, R., "Sanitas Sanitatum et Omnia Sanitas" (review), 36, 98
 Metchnikoff, Elias, Copley Medal, 94, 232
 Metelodine, 98, 277
 Meteor, extraordinary, seen at Marseilles, 24, 193—Falls in Greece, 16, 227—Of Sokol Banja in Serbia, 37, 162—Remarkable, 34, 247—Seen on February 18, 1873, 27, 91
 Meteors, 16, 170, 180; 21, 214—Luminous, 29, 275—November, 16, 264; 26, 288—Peridote, 18, 237, 248, 262, 272
 Meteoric appearance, 20, 71—Dust among snow, 22, 262—Dust, peculiar substance which accompanied, 25, 300—Dusts, New South Wales, 86, 207; 88, 16, 32, 41, 55—Iron (see Iron)—Irons (see Irons)—Mineral (see Mineral)—Sand rain, 25, 214—Shower of November, 1860, 14, 297—Shower of November, 1872, 27, 8—Stone, analysis, 28, 278; 69, 89—Stone, description, 27, 83—Stone, description and spectrographic analysis, 94, 227—Stone fallen from sky, 19, 299—Stone found in New Zealand, 67, 63—Stone of Seamount, 24, 146, 168—Stone, vanadium in, detection, 28, 278—Stone which fell December 5, 1868, in Franklin Co., U.S.A., 20, 213—Stones, 26, 61—Stones, fall near Danville, 21, 96—Stones which fell near Zomba, British Central Africa, on January 25, 1899, 84, 4, 16, 34, 44, 65, 81, 91, 103—Waters, lime in, 29, 250
 Meteorite, analysis, 18, 225; 19, 178—Arragonite on surface of, 34, 32—Breitenbach, mineral constituents of, 19, 182—Canon Diablo, 69, 26; 90, 295—Canon Diablo, examination of carbon silicide in, 91, 109—Canon Diablo, micrographic examination, 91, 61—Carbon and soluble salts in, 26, 70—Chemical examination of, 26, 59—Containing diamonds, 93, 304—De l'Aigle, France, 26, 157—Existence of carbon compound and free sulphur in, 7, 130—Examination of a, 61, 25—Fall at Mourzouk, December, 1869, 21, 154—Fall in Commune de Lancé, 26, 71—Fall near Wellington, April, 1866, 33, 179—Found near Cranbourne, Australia, 21, 12—From Saint-Denis-Westrem, 21, 300—From Shergotty, 25, 131—From S. Africa, analysis, 18, 257—Khetree, analysis with account of its fall, 21, 278—Krähenberg, which fell May, 1869, 20, 83, 167—Narraburra, 83, 233—Observations of a, 21, 119—Observed at Alicante, 21, 142—Of Deesa, analysis of, 20, 274, 297—Of Kermoué, analysis, 20, 12—Of Knyahinya, Hungary, 26, 157—Of Lodran, 22, 72—Of Tjabe, 25—Saline Township, free phosphorus in, 87, 66—Sporadically, 40, 203—Study of a, 67, 110—Which fell at Estherville, Iowa, May, 1870, 41, 262—Which fell at Ibbenbüren, Prussia, June, 1870, 26, 95—Which fell at Virba, Turkey, May, 1874, 30, 155—Which fell in Java, 1871, 26, 312
 Meteorites, 17, 19—Analysis of, 21, 218; 76, 231—And stones, relation between, 23, 108—Australian, 62, 267—Chemical composition, 1, 108—Chemistry of, 16, 117—Compounds of carbon found in, 34, 32—Contribution to our knowledge of, 22, 59, 287—Deposited and kept in museums, 20, 46—From Desert of Atacama, 32, 218—Gases contained in, 35, 77—Gases evolved on heating, 78, 395, 317—Geology of, 23, 131—Gold in, 86, 207—Greenland, 25, 21—In spectral analysis, 56, 270—Investigation of, 26, 106—Iron, photographic arc spectrum of, 69, 89—Japanese, 45, 216—Mineralogical chemical properties, 21, 203—Nature and origin, 33, 43, 68—Observed from November, 1869, to March, 1870, 21, 287—Of Rochester, Warrenton, and Cynthia, 36, 195—Of Shalka and Hainholz, composition, 22, 95—Periodical appearance in November, 23, 156—Platinum and iridium metals in, 87, 92—Researches on composition and structure, 20, 35—Researches on gases produced by explosion of dynamite on various characteristics of, 36, 100—Seen in Italy during March and April, 1871, 24, 74—Solid carbon compounds in, 33, 196, 204, 215; 34, 153—Study of, 72, 208—Synthetic experiments on artificial, 44, 273—Synthetical researches on, 13, 60, 104, 152—Three enormously large, 24, 269—Which fell in neighbourhood of Orgueil, 9, 286—Which fell September, 1841, and November, 1871, 42, 60
 Meteoritic ferriolites, 38, 305
 Meteorograph, Secchi's, 25, 143
 Meteorologic system, universal, 29, 176
 Meteorological observations, continuous, 28, 195—Observations, foretelling weather in connection with, 8, 121—Observations in a balloon, 28, 263—Observations in fields and forests, 42, 83—Observations on coast of Labrador, 22, 60—Observations, use of kites for, 46, 241—Observatory on summit of Puy de Dome, 26, 180—Observatory on the Azores, 24, 21—Optics, 41, 284—Prognostics for 1870, 21, 251—Science, progress, 3, 127—Society, 41, 99, 292; 45, 85, 116; 46, 241, 300; 49, 117
 Meteorology of forests, 36, 184—Of month of January, 1874, at Tongour, 29, 185—Of spring of 1870, 22, 34—Optical, 25, 31—Present state of, 5, 137, 191; 23, 226
 Meter, a consistency, 74, 258—Coulomb, 57, 200—Current, 45, 52—Electric radiation, 60, 230—Fire-damp (see Fire-damp)—Gas (see Gas)—Steam, 99, 249—Water, 22, 172; 25, 155
 Meters and other electrical instruments, magnetic fluxes in, 78, 231, 252—Water, reports on results of composition for, 26, 160
 Meth, R., Preparation of optically active butyl alcohol, 95, 179
 Meth, R., and W. Marckwald (see Marckwald, W.)
 Methacrylic acid (see Acid)
 Methæmoglobine, 64, 286—Absorption spectrum, 64, 113—Behaviour in magnetic field, 84, 85—Crystalline, 48, 170—Spectrum, 67, 61
 Methylaldehyde, conversion of formic acid into, 24, 204
 Methanal, action of acid chlorides on, 84, 60—And acid chlorides, mutual action, 85, 264—Polymerised, action of chlorides and anhydrides of acids of fatty series on, 87, 119—Polymers, 88, 47
 Methane, action of liquid fluorine on solid, 91, 130—Action of silent electric discharge on damp, 97, 96—Amidotriphenyl- (see Amidotriphenylmethane)—Amongst decomposition products of nitrogenous bases as source of error in estimation of nitrogen, 93, 150—And ethylene hydrates, 58, 96—And hydrogen, fractional combustion of a mixture, 88, 282—Aromatic derivatives, chemical history of, 45, 127—Azo- (see Azomethane)—Azodiphenyl- (see Azodiphenylmethane)—Bromdiphenyl- (see Bromdiphenylmethane)—Combustion, slow, 88, 283—Density, 99, 72—Determining, 96, 234—Diantipyrine- (see Diantipyrinemethane)—Diazo- (see Diazomethane)—Dibrom- (see Dibromomethane)—Dimethoxydiphenyl- (see Dimethoxydiphenylmethane)—Dinitrodiphenyl- (see Dinitrodiphenylmethane)—Dinitrophenyldiacetyl- (see Dinitrophenyldiacetyl)-Dioxidiphenyl- (see Dioxidiphenylmethane)—Diphenyl- (see Diphenylmethane)—Diphenylcamphor- (see Diphenylcamphoromethane)—Diphenyl- (see Diphenylmethane)—Diphenylphenyl- (see Diphenylphenylmethane)—Experiments with compounds of, 69, 229—Halogen derivatives of, action of ammonium metals on, 91, 280—Hexamethyltriamidotriphenyl- (see Hexamethyltriamidotriphenylmethane)—Hexaphenyl- (see Hexaphenylmethane)—Hydrate, 58, 96—Hydrazo- (see Hydrazomethane)—In atmosphere, elimination, 83, 118—Luminosity of, 51, 102—Mixed trihaloid derivatives of, 97, 209—Nitro- (see Nitromethane)—Orthonitrodiphenyl- (see Orthonitrodiphenylmethane)—Oxidation at low temperatures, 85, 137; 88, 20—Phenylacetylnaphthyl- (see Phenylacetylnaphthylmethane)—Phenyltribromo- (see Phenyltribromomethane)—Physical constants of pure, 91, 130—Preparation, 85, 132—Stanni- (see Stannimethane)—Syntheses with calcium hydride, 98, 234—Synthesis, 85, 155; 98, 265—Tetrachloro- (see Tetrachloromethane)—Tetramethyldiaminophenylphenyl- (see Tetramethyldiaminophenylphenylmethane)—Triamidotriphenyl- (see Triamidotriphenylmethane)—Tricyclohexyl- (see Tricyclohexylmethane)—Triphenyl- (see Triphenylmethane)—Triphenylchlor- (see Triphenylchloromethane)
 Methanes, nitro- (see Nitromethanes)
 Parantriamidotriphenyl- (see Parantriamidotriphenylmethane)—Phenyl- (see Phenylmethanes)
 Methanedisulphonic acid (see Acid)
 Methanetrisulphonic acid (see Acid)
 Methanometer, 44, 215—Modifications of, 73, 164
 Methazonic acid (see Acid)
 Methanol oxide, diphenyl- (see Diphenylmethanol)
 Methenedioxypropylbenzene, dichloro- (see Dichloromethenedioxypropylbenzene)
 Methenic and methinic acids (see Acids)
 Methethine, kyan- (see Kyanmethethine)
 Methide, mercuric, and iodide of potassium, 13, 59—Mercuric, poisoning by, 12, 213, 289; 13, 35—Mercuric, toxic properties, 13, 47
 Methine, cyan- (see Cyanmethine)—Kyan- (see Kyanmethine)
 Methinotrisulphonic acid (see Acid)
 Methoxybenzene, 85, 228
 Methoxybenzene dibromide, 87, 47
 Methoxybenzene oxide, 91, 304
 Methol, trinitrothymo- (see Trinitrothymomethol)
 Methol camphor, meta- (see Metamethol)
 Methoxide of sodium (see Sodium)

- Methoxybenzoic acid (*see* Acid)
 Methoxybenzoin, di- (*see* Dimethoxybenzoin)—Orthodi- (*see* Orthodimethoxybenzoin)
 Methoxydiphenylmethane, di- (*see* Dimethoxydiphenylmethane)
 Methoxyheptane, di- (*see* Dimethoxyheptane)
 Methoxyhydratropic acid (*see* Acid)
 Methoxyl, determination, **63**, **37**; **88**, **288**
 —Groups, estimation, Zeisel's method, **85**, **67**—Groups in sulphurised compounds, estimation, **87**, **304**
 Methoxy-4:5-methylenedioxy-1-allylbenzene, 2:3-di- (*see* 2:3-Dimethoxy-4:5-methylenedioxy-1-allylbenzene)
 Methoxynaphthalenesulphonic acids (*see* Acids)
 Methoxypropionic acid (*see* Acid)
 Methoxysuccinates, di- (*see* Dimethoxysuccinates)
 Methoxysuccinic acid (*see* Acid)
 Methoxytartrates, di- (*see* Dimethoxytartrates)
 Methoxytrichloropentanol-1:5:4, **93**, **93**
 Methyl, action of chlorine on, **9**, **220**, **214**—Aluminium (*see* Aluminium)—And hydride of ethyl, identity, **10**, **5**—Benzoyl monochloride (*see* Benzoyl)—Compounds of tellurium, **5**, **98**
 —Compounds, physiological action, **16**, **104**—Cyclohexane: 3:3-di- (*see* Cyclohexane: 3:3-dimethyl)—Derivatives of anthracene, **36**, **213**—Derivatives of gallate, **68**, **209**—Derivatives of 2-phenyl-1:3-naphthylenediamine, formation from tolylacetanitriles, **99**, **104**—Derivatives of pyridine, chlorination, **98**, **266**—Di- (*see* Dimethyl)—Diethylidi- (*see* Diethyldimethyl)—Displacement of benzyl by, in substituted nitrogen compounds, **84**, **276**
 —Gaseous, easy means of preparing, **12**, **156**—Green on wool, **31**, **251**
 —Green, wool-dyeing with, **33**, **19**—Group, influence on ring formation, **83**, **33**—Group, migration under influence of hydriodic acid, **87**, **119**
 —Potassium (*see* Potassium)—Replacement of alkyl radicals by, in substituted ammonium compounds, **96**, **317**
 —Salts of camphoric acid, **66**, **158**, **292**—Stan- (*see* Stanmethyl)—Sulphocyan- (*see* Sulphocyanmethyl)—Tin mono- (*see* Tin)—Triphenyl- (*see* Triphenylmethyl)—Zinc (*see* Zinc)
 Methyl, stib- (*see* Stibmethyls)
 Methylacetal, di- (*see* Dimethylacetal)
 Methylacetanilide, **59**, **218**
 Methylacetate and ethylic alcohol, separation, **74**, **110**—Saponification, **89**, **88**, **103**
 Methylacetacetate, methyl di- (*see* Methylidimethylacetacetate) — Of Ethyl (*see* Ethyl)
 Methylacetate, **89**, **251**
 Methylacetylates, action of fuming nitric acid on, **87**, **263**
 Methylacetylacetone, action on diazoic chlorides, **83**, **60**
 Methylacetylcarbinol, **91**, **304**
 Methylacetylene, di- (*see* Dimethylacetylene)
 Methylacridines, tetra- (*see* Tetramethylacridines)
 Methylacridol, phenyl- (*see* Phenylmethylacridol)
 Methylacrylate, di- (*see* Dimethylacrylate)—Ethyl di- (*see* Ethyl)
 Methylacrylactates, action of fuming nitric acid on, **87**, **263**
 Methyladipate and ethyladipate, synthesis by means of, **97**, **95**, **119**
 Methyladipic acid (*see* Acid)
 α - β -Methyladipic acids (*see* Acids)
 Methylalcohol, acetic fermentation, **20**, **70**—Action of electrolytic oxygen on, **31**, **99**—Action of metallic oxides on, **100**, **160**—Action on aconitine, **74**, **120**—And benzene, **81**, **42**—And copper sulphate, compound of, **53**, **155**, **181**—And dimethyl acetal, **24**, **271**—And ethyl alcohol, separation, **88**, **198**—And water, specific heat of mixtures of, **37**, **28**—Artificial, **18**, **7**
 —Assay of commercial, **44**, **226**—Condensation of benzoic with, **97**, **260**—Conversion into ethylic alcohol, **18**, **7**—Conversion of formic acid into, **23**, **227**—Dangers of industrial use of, **38**, **264**—Detection, **12**, **268**; **58**, **256**; **92**, **140**, **152**—Detection of spirit in presence of, **38**, **26**—Determination in presence of ethylic alcohol, **51**, **115**—Estimation, **76**, **296**—Estimation in presence of ethyl alcohol, **89**, **18**—Impurities in, **52**, **83**—In chloroform, etc., **12**, **153**—In commercial methylene, **39**, **103**—In commercial wood-spirit, determination, **29**, **52**—In distillation of formate of lime, **28**, **32**—In ethylic alcohol, **49**, **58**; **78**, **267**—In fermented juice of fruits, **83**, **48**—In mixtures, detection, **83**, **55**—In presence of ethylic alcohol, tests for, **12**, **164**—In presence of vinous alcohol, **31**, **239**—In vinic alcohol, **43**, **147**—Iodo-hydrargyride of potassium and oxidation tests for, **12**, **164**—Marsh-gas from, **27**, **153**—Methylated products, and preparation of pure, **41**, **220**—Methylac in, **27**, **21**—Occurrence among products of dry distillation of resin, **48**, **214**—Oxidation at boiling-point, **90**, **281**—Purification, **50**, **80**, **236**—Vapours, behaviour with electrical discharges of high frequency, **93**, **288**
 Methylalcoholtrisulphonic acid (*see* Acid)
 β -Methyl- δ -alcoylcyclohexanones and their corresponding alcohols, **91**, **83**
 Methylaldehyde (*see* Aldehyde)
 Methylalizarin, **27**, **171**
 Methylallyl, preparation, **37**, **133**—Synthesis, **16**, **156**
 Methylallyl ammonium, phenyl di- (*see* Phenyldimethylallyl ammonium)
 Methylamide of caesium (*see* Caesium)
 Methylamidobenzene, ethyl di- (*see* Ethyldimethylamidobenzene)
 Methylamidodimethylamidooorthobenzoyl, di- (*see* Dimethylamidodimethylamidooorthobenzoyl)
 Methylamine, **6**, **46**—Action on chromic chloride, **77**, **269**—Action on oxylenes, **62**, **258**—And lithium chloride, combinations, **78**, **327**—Extraction of amines from commercial, **50**, **260**—Di- (*see* Dimethylamine)—Hexa- (*see* Hexamethylamine)—Manufacture of ice and production of cold by means of, **6**, **138**—Mono- (*see* Monomethylamine)—Preparing, **68**, **257**—Tri- (*see* Trimethylamine)
 Methylaminehydrochlorate, tri- (*see* Trimethylaminehydrochlorate)
 Methylamines, **73**, **305**—Producing in manufacture of pyrolytic products, **28**, **279**
 Methylaminobenzaldehyde, di- (*see* Dimethylaminobenzaldehyde)
 Methylaminomagnesian arseniates (*see* Arseniates)—Phosphate (*see* Phosphate)
 Methylammoniocadmium chloride, di- (*see* Dimethylammoniocadmium chloride)
 Methylammoniocalcium chloride, hexa- (*see* Hexamethylammoniocalcium chloride)
 Methylammonium, benzylphenylallyl- (*see* Benzylphenylallylmethylammonium)—Lithiummono- (*see* Lithiummonomethylammonium)—Tri- (*see* Trimethylammonium)
 Methylammoniumferrocyanide, tetra- (*see* Tetramethylammoniumferrocyanide)
 Methylammoniumhydroxide, tetra- (*see* Tetramethylammoniumhydroxide)
 Methylammoniumiodides, tetra- (*see* Tetramethylammoniumiodides)
 Methylammoniumnitrate, tetra- (*see* Tetramethylammoniumnitrate)
 Methylanhydracetonebenzil, dimorphism of, **87**, **89**
 Methylanhydracetonebenzil, α -Di- (*see* α -Dimethylanhydracetonebenzil)
 Methylanilide of malonic acid, **79**, **263**
 Methylaniline, **30**, **65**—Bromdi- (*see* Bromdimethylaniline)—Di- (*see* Dimethylaniline)—Dinitrodi- (*see* Dinitrodimehylaniline)—Mono- (*see* Monomethylaniline)—Monobenzoyldi- (*see* Monobenzoyldimethylaniline)—Paranitrosodi- (*see* Paranitrosodimethylaniline)
 Methylanilines, sulph-acids of, **27**, **282**
 Methylanthracene, **35**, **263**—Di- (*see* Dimethylanthracene)
 Methylanthracenedihydride, 2:7:9:10-tetra- (*see* 2:7:9:10-Tetramethylanthracenedihydride)
 Methylanthracenes, di- (*see* Dimethylanthracenes)
 Methylanthranilate, methyl (*see* Methyl)
 Methylarbutine, **49**, **23**
 Methylarsenate, disodic, estimation, **85**, **170**; **87**, **10**
 Methylarseniate of sodium (*see* Sodium)
 Methylarsenic, **90**, **57**—Acids (*see* Acids)
 Methylarsinic acid (*see* Acid)
 Methylasparagine, **79**, **288**
 Methylathol, penta- (*see* Pentamethylathol)
 Methylazide, **92**, **58**
 Methylbenzoquinone, formation, **74**, **120**—Pharmacology of, **84**, **38**
 Methylbenzene, di- (*see* Dimethylbenzene)
 Methylbenzine, hexa- (*see* Hexamethylbenzine)—Tri- (*see* Trimethylbenzine)
 Methylbenzol, di- (*see* Dimethylbenzol)—Paradi- (*see* Paradimethylbenzol)—Tetra- (*see* Tetramethylbenzol)—Tri- (*see* Trimethylbenzol)
 Methylbenzophenones, benzoylamino- (*see* Benzoylaminoethylbenzophenones)
 Methylbenzoyl, chlorination, **53**, **297**; **54**, **98**—Chloro-derivatives, **54**, **261**
 Methylbenzoylanilide, preparation, **66**, **210**
 Methylbenzoylpropionic acid (*see* Acid)
 Methylbenzyl, **11**, **56**
 Methylbenzylacetic acid (*see* Acid)
 1-Methyl-4-benzylcyclohexanols, **91**, **162**
 Methylbenzylketone, isomeric additive products of, with benzylidene aniline, **85**, **310**
 Methylbrazilone, tri- (*see* Trimethylbrazilone)
 Methylbromide, triphenyl (*see* Triphenyl)
 Methylbutadiene **94**, **267**
 Methylbutanetricarboxylate, ethyl di- (*see* Ethyl)
 Methylbutyrolactone, di- (*see* Dimethylbutyrolactone)
 Methylbutyrylacetate, decomposition, **84**, **72**
 Methylbutyrylacetates, action of phenylhydrazine and hydrazine on isomeric, **83**, **239**
 Methylcamphocarbonate of ethyl (*see* Ethyl)—Of methyl (*see* Methyl)
 Methylcamphor, bromo- (*see* Bromomethylcamphor)—Di- (*see* Dimethylcamphor)
 α -Methylcamphor and fenchone, **97**, **309**
 Methylcamphorimide, crystallographic determination, **87**, **94**
 Methylcarbamide, decomposition, **90**, **277**—As di- (*see* as-Dimethylcarbamide)
 Methylcarbanilate derivatives, **54**, **286**
 Methylcarbinol, diallyl- (*see* Diallylmethylcarbinol)—Ethyl di- (*see* Ethyldimethylcarbinol)—Tri- (*see* Trimethylcarbinol)
 Methylchloride, action of potassium hydride on, **85**, **132**—Bromo-derivatives of, **64**, **309**—Hydrate, **77**, **211**—Properties, preparation, and uses, **41**, **281**
 Methylchloriodide, **51**, **102**
 Methylchloroform, monobromised, **49**, **158**
 Methylchloropyridine, di- (*see* Dimethylchloropyridine)
 β -Methylcinnamic acids (*see* Acids)
 Methylcoumarin, benzeneazodi- (*see* Benzeneazodimethylcoumarin)
 Methylcrotonic acid (*see* Acid)
 Methylcresane and common alcohol, properties of mixtures of, **41**, **218**—Preparation, **97**, **47**

- Methylxano camphors (see Camphors)
 Methyl- $\Delta_{2,3}$: 5-cyclohexadiene, 1:1-di- (see 1:1-Dimethyl- $\Delta_{2,3}$: 5-cyclohexadiene)
 Methylcyclohexane, 4-bromo-1- (see 4-Bromo-1-methylcyclohexane) (see Paramethylcyclohexane)
 Methylcyclohexanol, allylic ethers of, 90, 56
 Methylcyclohexan-2-ol-carboxylic acid (see Acid)
 Methylcyclohexanols, di- (see Dimethylcyclohexanols)
 Methylcyclohexanone, benzylidene meta- (see Benzylidene)—Derivatives, 86, 257—Di- (see Dimethylcyclohexanones)—Monochloro-derivatives, 91, 201—Tri- (see Trimethylcyclohexanones)
 Methylcyclohexanones and their corresponding methylcyclohexanols, 91, 118
 Methylcyclohexenone, 77, 59
 1-Methylcyclohexylidene-4-acetic acid (see Acid)
 Methylcyclopentane, 1:3:5-triphenyl-2:4-di- (see 1:3:5-Triphenyl-2:4-dimethylcyclopentane) — 1:3:5-triphenyl-2- (see 1:3:5-Triphenyl-2-methylcyclopentane)
 Methylcyclopentan-3:4-dione-2:5-dicarboxylate, methyl-1:1-di- (see Methyl-1:1-dimethylcyclopentan-3:4-dione-2:5-dicarboxylate)
 Methylidacetanamin, 40, 43
 Methylidacetylacetone, di- (see Dimethylidacetylacetone)
 Methylidacetylpentane, di- (see Dimethylidacetylpentane)
 Methylidacetylpinelate, di- (see Dimethylidacetylpinelate)
 Methylidamide, tetramethyldiamidodiphenylanthranilatetra- (see Tetramethyldiamidodiphenylanthranal-tetramethyldiamide)
 Methylidamidobenzhydrol, tetra- (see Tetramethyldiamidobenzhydrol)
 Methylidamidobenzophenone, tetra- (see Tetramethyldiamidobenzophenone)
 Methylidamidodiphenylethane, tetra- (see Tetramethyldiamidodiphenylethane)
 Methylidamidophenylloxanthranol, tetra- (see Tetramethyldiamidophenylloxanthranol)
 Methylidaminobenzhydrol, tetra- (see Tetramethyldiaminobenzhydrol)
 Methylidaminobenzhydryl methylene, tetra- (see Tetramethyldiaminobenzhydryl)
 Methylidaminodiphenylenephenylmethane, tetra- (see Tetramethyldiaminodiphenylenephenylmethane)
 Methylidaminophenylloxanthranol, tetra- (see Tetramethyldiaminophenylloxanthranol)
 Methylidibenzylcyclohexanol, 91, 162
 Methylidicarboxylacetate, 96, 28
 Methylidethylacetate, preparation, 89, 208
 Methylidethylethylene, 77, 129
 Methylidihydroresorcin, di- (see Dimethylidihydroresorcin) — Tri- (see Trimethylidihydroresorcin)
 Methylidihydroxyheptamethylene, di- (see Dimethylidihydroxyheptamethylene)
 Methylidketobutrate, condensation with aromatic carbides and amines, 99, 252
 Methylidimethylacetate, action of nitric acid on, 84, 256
 Methyl 1:1-dimethylcyclopentan-3:4-dione-2:5-dicarboxylate, preparation, 99, 177
 Methylidioxacetone, tetra- (see Tetramethylidioxacetone)
 Methylidiphenyl, nitrotetra- (see Nitrotetramethylidiphenyl)
 Methylidiphenylamine, 24, 181—Action of heat on, 29, 155
 Methyl ester, peroxylbenzoic, 70, 121
 Methyl esters of diortho-, meta-, and paranitrobenzoyltartaric acids, 90, 277
 Methylthane, hexa- (see Hexamethylthane)
 Methylthanol, penta- (see Pentamethylthanol)
 Methyl ether, acid, action of zinc-ethyl on silico, 27, 46—Monochloro- (see Monochloromethyl ether)—Nitrohydroquinonedi- (see Nitrohydroquinonedimethylether)—Of paradimethylamidoorthobenzoic benzoic acid, action of phenyl magnesium bromide on the second, 97, 270—Monochloro- (see Monochloromethyl ether)—Nitrohydroquinonedi- (see Nitrohydroquinonedimethyl ether)—Salicylaldehyde (see Salicylaldehyde)
 Methyl ethers, chlorinated, chemical constitution, 32, 242, 255—Of allyl and propargyl carbinol, 95, 208—Of catechol derivatives, action of phosphorus pentachloride on, 98, 278; 99, 100—Of catechol derivatives, action of thionyl chloride and of phosphorus pentachloride on, 97, 128, 153—Of some hydroxyanthraquinones, 96, 316
 Methyl ethylcarbinol, 22, 70
 Methyl ethylene catechin, 79, 168
 α -Methyl ethylacrylic acid (see Acid)
 Methyl ethylketone, action of sulphurated hydrogen on, 88, 35—Azobides of, 97, 129—Chlorination, 91, 105—Phosphorus acids derived from, 87, 94—Pinacon and pinaolin derived from, 35, 53—Superoxide of, 95, 58—Tetrahydro-derivatives of, 94, 315
 Methyl ethyl- β -naphthylamine, d-camphorsulphonate of, rotatory power, 57, 143
 Methyl ethylpropylsilicane, di-benzyl- (see di-Benzylmethyl ethylpropylsilicane)
 Methyl ethyl tin dextrobromocamphorsulphonate, dextro- (see Dextromethyl ethylpropyl tin dextrobromocamphorsulphonate)
 Methyl ethylsuccinic acid (see Acid)
 Methyl ethyl-n-propyl tin iodide, dextro- (see Dextromethyl)
 Methyl ethylthetine dextrobromocamphorsulphonate, 81, 80
 Methyl ethylthetine dextrocamphorsulphonate, 81, 80
 Methyl ethylthetine menthyl esters, nitrates of, 96, 317
 Methyl ethylthetine platinichloride, 82, 238
 Methyl eugenol, derivatives of, 39, 289
 Methyl fluoride, 59, 94; 90, 252
 Methylformene, ethyltri- (see Ethyltrimethylformene)
 Methylformic ether (see Ether)
 Methylfurfural and derivatives, colour reaction for, 90, 182—Derivatives, 83, 272
 Methylfurfuraldehyde, bromo- (see Bromomethylfurfuraldehyde)
 Methylgallate, derivatives, 68, 209
 Methylglucose, tetra- (see Tetramethylglucose)
 Methylglucoside, trimethyl α - (see Trimethyl α -methylglucoside)
 Methylglucosides, tetramethyl (see Tetramethyl)
 β -Methylglutaconic acid (see Acid)
 Methylglyceramine, tri- (see Trimethylglyceramine)
 Methylglycerammonium, tri- (see Trimethylglycerammonium)
 α -Methylglycolic acid (see Acid)
 Methylglyoxaline, 1:4-di- (see 1:4-Dimethylglyoxaline)—1:4:5-Tri- (see 1:4:5-Trimethylglyoxaline)
 Methylglyoxim, di- (see Dimethylglyoxim)
 Methylheptamethylene, di- (see Dimethylheptamethylene)
 Methylheptanol, di- (see Dimethylheptanol)—Transformation of geraniol into, 80, 196
 Methylheptanone, acetyl- (see Acetylmethylheptanone)—Derivatives of synthetic, 79, 95—Natural, 74, 12
 Methylheptylketone, bromo- (see Bromomethylheptylketone)
 Methylhexahydrobenzene, 1:1-di- (see 1:1-Dimethylhexahydrobenzene)
 Methylhexylcarbinol, 30, 224—Influence on rotation of ethyltartrate, 83, 117
 Methylhexylcarbinol octane-2-ol, 96, 315
 Methylhexylketone, methyl- β - (see Methyl- β -methylhexylketone)
 Methylhomopropionate, reaction of, 69, 13
 Methylhydantoinic acid (see Acid)
 dl-Methylhydramine, resolution of, 89, 19
 d- and l-Methylhydrindamines, isomeric salts of, with d-chlorocamphorsulphonic acid, 89, 19
 Methylhydrindene, amido- (see Amidomethylhydrindene)
 Methylhydrindone, 85, 104
 β -Methylhydrindone, atmospheric oxidation, 99, 82
 Methylhydrindonium hydroxide, tri- (see Trimethylhydrindonium)
 Methylhydroxide, trimethylplatin- (see Trimethylplatinmethylhydroxide)
 Methylindole derivatives, 58, 241—Dihydro- α - (see Dihydro- α -methylindole)
 Methyl iodide, action, 93, 65—Action of sodium on, 1, 245—Action of sparteine on, 92, 21—Action on alcohol, 32, 52—Action on benzoflavine, 92, 233—Action on diamidobenzoic acid, 29, 155—Action on ethyldimethylbutyricarboxylate, 82, 34—Action on hydroxylamine, 69, 308—Addition to vegetable alkaloids, 17, 129—And bromide, action on bromomethylamine, 13, 24—And methylic alcohol, molecular combination formed by, 84, 231—And potash, action on nitrosophenol, 77, 226—Hydrated, 42, 35—Magnesium (see Magnesium)
 Methyl iodoforn, 57, 263
 Methylisoamylsuccinic acid (see Acid)
 Methylisobutylic acid (see Acid)
 Methylisobutylcarbinol, di- (see Dimethylisobutylcarbinol)
 Methylisobutylglutaric acid (see Acid)
 Methylisopropylidipic acid (see Acid)
 Methylisopropylcarbinol, di- (see Dimethylisopropylcarbinol)
 Methylisopropylketone, 31, 109
 Methylisopropylsuccinic acids (see Acids)
 da-Methylisoserine, conversion into d-methylglyceric acid, 99, 176
 a-Methylisoxazol, 99, 119
 Methylketohexamethylene, di- (see Dimethylketohexamethylene)
 Methylketol, synthesis, 41, 252
 Methylketone, di- (see Dimethylketone)—Undecyl- (see Undecylmethylketone)
 Methylketones, mixed, 53, 263
 Methylkavalonose, mono- (see Monomethylkavalonose)
 Methylmalonate, ethyl sodio- (see Ethyl)
 Methylmalonates, action of bisdiazoic chlorides of benzidine, orthotolidine, and dianisidine on, 79, 191
 Methylmercaptandisulphonic acid (see Acid)
 Methylmercaptantrisulphonic acid (see Acid)
 Methylmetaphenatidine, di- (see Dimethylmetaphenatidine)
 Methylmetatoluidin, di- (see Dimethylmetatoluidin)
 Methylmethylanthranilate in vegetable organisms, 86, 233
 Methylmethylcamphocarbonate, crystallographic determination, 87, 94
 Methylmethylene, tri- (see Trimethylmethylene)
 Methyl methylglucoside, tri- (see Trimethyl)
 Methyl methylglucosides, tetra- (see Tetramethyl)
 Methyl β -methylhexyl ketone, 86, 265
 Methylmonobromocamphor, 87, 192
 Methylmorphine iodide, action of potassium ferricyanide on, 41, 220
 Methylnaphthaeridines, di- (see Dimethylnaphthaeridines)
 Methylnaphthalin, preparation, 19, 251
 Methylnaphthimidazole, amido- (see Amidomethylnaphthimidazole)
 Methylnaphthochinoline, di- (see Dimethylnaphthochinoline)
 Methyl α -naphthocumarin, azo-derivatives from, 93, 18
 Methylnaphthoquinon, di- (see Dimethylnaphthoquinon)

- Methylnaphthylamin, di- (*see* Dimethyl-naphthylamin)
- Methylnataloemodine, **91**, 304
- Methylnitrate, **31**, 173—Action of ammonia gas on, **49**, 46—Preparation, **74**, 12—Production, **5**, 310
- Methylnonylketone, **81**, 45—Derivatives, **83**, 35; **85**, 143
- Methyl-6-nonyl-9, synthesis, **87**, 203
- Methylcyclohexenol, cyclic isomerisation, **81**, 107
- Methyloctenol **79**, 118
- Methyloisethionio acid (*see* Acid)
- Methylorange, colour of aqueous solutions of, **88**, 317—Use as indicator, **47**, 123, 135, 184—Use as indicator in alkalimetry, **44**, 288
- Methylxalate, action of alcoholic ammonia on, **35**, 116
- Methylxide, bichlor. (*see* Bichlormethylxide)—Monochlorated, **35**, 95
- Methyloxybutyric acid (*see* Acid)
- Methyloxymethyleneacyanacetate, **80**, 59
- Methyloxysuccinic acid (*see* Acid)
- Methylparabromophenyletone, **79**, 227
- Methylparachlorophenyletone, **79**, 227
- Methylparaphenyldiamin, di- (*see* Dimethylparaphenyldiamin)
- Methylpararosanilin, tri- (*see* Trimethylpararosanilin)
- 2-Methyl-5-pentanone, action of organo-magnesium compounds on, **100**, 84
- Methylphenonaphthacridines, tri- (*see* Trimethylphenonaphthacridines)
- Methylphenyletone, bromo- (*see* Bromomethylphenyletone)
- Methylphenylethylglutarate, ethyl (*see* Ethyl)
- Methylphenylfurfuran, acetyl- (*see* Acetylmethylphenylfurfuran)
- Methylphenylketone derivatives, halogen, action of hydroxylamine on, **87**, 47—Derivatives, iodised, **83**, 131
- Methylphosphina, oxidation products, **25**, 131
- Methylphosphonium, tetra- (*see* Tetramethylphosphonium)
- Methylpipicoline, **77**, 226
- Methylpiperazine, di- (*see* Dimethylpiperazine)
- 2-Methylpiperidine and water, mutual solubility, **97**, 261
- Methylplatinimethyl hydroxide, tri- (*see* Trimethylplatinimethyl)
- Methylpropanetetracarboxylate, di- (*see* Dimethylpropanetetracarboxylate)
- Methylpropylketone and benzophenone, phosphorus acids derived from, **87**, 142
- Methylpropylketones, acetone oils from dry distillation of pyrolignite of lime as source of, **79**, 202
- Methylprotocatechuic acids (*see* Acids)
- Methylpseudopropylcarbinol, di- (*see* Dimethylpseudopropylcarbinol)
- Methylpyrazine, di- (*see* Dimethylpyrazine)
- Methylpyrazole, 1:3-di- (*see* 1:3-Dimethylpyrazole)
- Methylpyridine, synthesis, **45**, 164—2:4:6-Tri- (*see* 2:4:6-Trimethylpyridine)
- 2-Methylpyridine, **91**, 265; **98**, 266
- Methylpyrogallic acid (*see* Acid)
- Methylpyrone, di- (*see* Dimethylpyrone)—Tetra- (*see* Tetramethylpyrone)
- 6-Methyl-2-pyrone-3:5-dicarboxylate, ethyl (*see* Ethyl)
- Methylquinazarin, **37**, 7
- Methylresorcin, di (*see* Dimethylresorcin)—Mono- (*see* Monomethylresorcin)
- Methylsalicin, penta- (*see* Pentamethylsalicin)
- N-Methylsilylamine, benzoyl derivatives of, **95**, 78
- Methylsilylate, **78**, 47
- Methylsilylidene, crystallographic properties, **74**, 49; **87**, 47
- Methylsilylic acid (*see* Acid)—Alcohol (*see* Alcohol)
- Methyl-selenium compounds, **33**, 18
- Methylsilicate, **11**, 228
- Methylsilicates, **16**, 103
- Methylsilioic ethers (*see* Ethers)
- Methylsilicium, **11**, 228
- Methylsodacetylacetate, action of acid chlorides on, **84**, 292
- Methylsodiocyanacetate of ethyl (*see* Ethyl)
- α -Methylspartein, conversion into isospartein, **98**, 96—Cyclisation of, **98**, 305—Diiodo- (*see* Diiodo- α -methylspartein)—Isomerisation of, **97**, 38
- Methylsparteins, isomeric, **96**, 305
- Methylsparteinum, di- (*see* Dimethylsparteinum)—Hydrate, **92**, 95—Hydrate, tri- (*see* Trimethylsparteinum)
- Methylstannibromofom, **87**, 254
- Methylstannichlorofom, **87**, 254
- Methylstanniiodofom, **87**, 254
- Methylstannoxylic acid (*see* Acid)
- Methylstrychnine, physiological action, **14**, 228
- Methylstyrolene, **91**, 304
- Methylsuccinate, ethyl bromonitro- (*see* Ethyl)
- Methylsuccinic acid (*see* Acid)
- Methylsulphate, di- (*see* Dimethylsulphate)
- Methylsulphide, compounds with halides of metals, **84**, 68, 79
- Methylsulphine, tri- (*see* Trimethylsulphine)
- Methylsulphon chloride, trichlor- (*see* Trichlormethylsulphon)
- Methylsulphonic acid (*see* Acid)
- Methyltartrate, rotation value at different temperatures, **89**, 259
- Methyltartrates, alkaline (*see* Alkaline)—Optical rotations of, **77**, 163
- Methyltetrahydrobenzene, chloroketodi- (*see* Chloroketodimethyltetrahydrobenzene)
- Methyl- Δ_4 -tetrahydrobenzene, di- (*see* Dimethyl- Δ_4 -tetrahydrobenzene)
- Methyl- Δ_4 -tetrahydrobenzene, 5-chloro-3-keto-1:1-di- (*see* 5-Chloro-3-keto-1:1-dimethyl- Δ_4 -tetrahydrobenzene)
- Methyltetrahydrofuran, α -trichloro- (*see* α -Trichloromethyltetrahydrofuran)
- Methylthiocarbimides, carboxy- (*see* Carboxymethylthiocarbimides)
- Methylthiocyanate, action of chlorine on, **55**, 67
- Methyltoluquinoline, di- (*see* Dimethyltoluquinoline)
- Methyltoluydins, di- (*see* Dimethyltoluydins)—Mono- (*see* Monomethyltoluydins)
- Methyl tin, mono- (*see* Monomethyl)
- Methyltriamidodiphenylmethane, ha- (*see* Hamethyltriamidodiphenylmethane)—Hexa- (*see* Hexatrimethyltriamidodiphenylmethane)
- Methyluracil, nitro-derivatives of, **54**, 273
- Methyluric acid (*see* Acid)
- Methylviolet, **36**, 243—Crystalline, **53**, 24—Formation, **38**, 34; **40**, 217
- Methylal, sulphuric, **80**, 292
- Methylate of sodium (*see* Sodium)
- Methylates of iron (*see* Iron)
- Methylated dioxethylenamines (*see* Dioxethylenamines)—Spirit, **6**, 250, 288, 298; **7**, 55; **64**, 310, 320; **65**, 24, 36, 38, 40; **94**, 170—Spirit, action of iodine on, **45**, 221—Spirit, freeing commercial, from mineral oil, **87**, 104—Spirit in Holland, **13**, 102—Spirit, new decree concerning, **64**, 102—Spirit, use of, **8**, 242—Spirit, use in pharmacy, **7**, 32; **17**, 150—Spirits, **16**, 103—Spirits, detection by chemical reactions, **17**, 186, 196—Toluydins (*see* Toluydins)
- Methylation, **81**, 111—In ethylene (*see* Ethylene)—Of aniline (*see* Aniline)—Of ethyl alcohol (*see* Ethyl alcohol)—Of maltose (*see* Maltose)—Of phenols (*see* Phenols)—Of toluidine (*see* Toluidine)
- Methylene and ethyl alcohol, separating, **71**, 270—Chemistry of, **83**, 263—Compounds, **85**, 191—Derivatives, **20**, 24—Dibro- (*see* Dibromethylene)—Diketoisopropylhexa- (*see* Diketoisopropylhexamethylene)—2:6-Diketo-4-isopropylhexa- (*see* 2:6-Diketo-4-isopropylhexamethylene)—Dimethyl-dihydroxylhepta- (*see* Dimethyl-dihydroxylheptamethylene)—Dimethyl-hepta- (*see* Dimethylheptamethylene)—Dimethylketohepta- (*see* Dimethylketoheptamethylene)—Dioxy (*see* Dioxymethylene)—Dioxyethyl- (*see* Dioxymethylene)—Ethylidenetri- (*see* Ethylidenetri-methylene)—Hexa- (*see* Hexamethylene)—Oxy- (*see* Oxymethylene)—Penta- (*see* Pentamethylene)—Pheno- α -aminohepta- (*see* Pheno- α -aminoheptamethylene)—Pheno- α -ketohepta- (*see* Pheno- α -ketoheptamethylene)—Tetra- (*see* Tetramethylene)—Tetramethyldiaminobenzhydryl- (*see* Tetramethyldiaminobenzhydrylmethylene)—Tri- (*see* Trimethylene)—Trimethyl- (*see* Trimethylmethylene)—Trioxy- (*see* Trioxymethylene)—Vinyl tri- (*see* Vinyl)
- Methylenamine, hexa- (*see* Hexamethyleneamine)
- Methylenamines, diaryl- (*see* Diarylmethyleneamines)
- Methylene bichloride, **16**, 204, **18**, 60
- Methylene blue, **38**, 221; **49**, 94—Manufacture, **55**, 188
- Methylene bromide, tetra- (*see* Tetramethylenebromide)
- Methylene camphor, **87**, 192—Oxy- (*see* Oxy-methylene camphor)
- Methylene carbamides, **99**, 141
- Methylenecarbinol, tetra- (*see* Tetramethylenecarbinol)
- Methylene chloride, action of ammonia water on, **54**, 23—Action on toluene, **91**, 9, 58—Action on toluene and benzene, **49**, 287—And sodium derivative of ethyl malonate, interaction, **95**, 306; **96**, 277—Preparation, **42**, 7
- Methylene chloroacetate, action of alcohols on, **87**, 312—And diacetate, chlorine derivatives, **88**, 46
- Methylene chlorobenzate, **35**, 36
- Methylene chlorobromide, **70**, 37
- Methylene cyanacetate, methyl oxy- (*see* Methyl)
- Methylenediacetate, chlorine derivatives, **88**, 46
- Methylenediamines, diaryl- (*see* Diarylmethylenediamines)—Dicarbanilino- (*see* Dicarbanilinomethylenediamines)
- Methylene dibenzate, **85**, 36
- Methylene dibromide, hexa- (*see* Hexamethylenedibromide)
- Methylene dichloride and 1-substituted-2-naphthylamines, condensation, **97**, 8
- Methylene diiodide, properties of, **77**, 199
- Methylenedioxy-1-allylbenzene, 2,3-dimethoxy-4,5- (*see* 2,3-Dimethoxy-4,5-methylenedioxy-1-allylbenzene)
- Methylene-3,4-dioxhydratropic acid, (*see* Acid)—Aldehyde (*see* Aldehyde)
- Methylene ethers of catechol derivatives, action of phosphorus pentachloride on, **100**, 230
- Methylene-glucose, **83**, 149
- Methyleneglycol, hexanediol-1,6-hepta- (*see* Hexanediol-1,6-heptamethyleneglycol)—Phenylethers of, **71**, 146
- Methylenimine, deca- (*see* Decamethylenimine)
- Methylene iodide, action of mercury on, **81**, 121—Action on aryl- and naphthylamines, **85**, 69—And strychnine, reaction between, **81**, 255—Preparation, **24**, 157
- Methylenelactate, **71**, 113
- Methylenephylacetate, menthyl hydroxy- (*see* Menthyl)
- Methylene sulphate, **80**, 292—Action on benzylic alcohol, **81**, 215
- Methylenetetramine, hexa- (*see* Hexamethylenetetramin)
- Methylenes, determination of impurities in, **67**, 15—Dibro- (*see* Dibromethylenes)
- Methylene soda (*see* Soda)
- Methylac in methyl-nitric ether and in methylic alcohol, **27**, 21
- Methylic acetone dicarboxylate (*see* Acetone)—Alcohol (*see* Alcohol)—Compounds, comparative volatility of, **54**, 213—Cyanacetate (*see* Cyanoacetate)

- Cyanoacetate) — Ditoluylglycerates (*see* Ditoluylglycerates) — Ether (*see* Ether) — Ethyl (*see* Ethyl) — Oxide (*see* Oxide) — Salts (*see* Salts) — Santonate (*see* Santonate) — Spirit (*see* Spirit)
- Methysteine and kavaine, 2, 338
- Metre, fire-damp, 35, 135—Prototype, conference on, 22, 120
- Metres, standard, 14, 17—Standard, shape to be given to, by international committee for weights and measures, 26, 203
- Metrical standard, 12, 307—System, 16, 61; 20, 117, 212; 21, 273; 87, 209—System in Austro-Hungarian Empire, 23, 202—System, international committee on, 22, 117—System, international congress on, 26, 180—System, measures and weights of, 21, 252—Standards of, 20, 213—Weights and measures, 20, 225—Weights and measures and foreign trade, 64, 83
- Metrology, application of elastic solids to, 83, 237
- Metronome, electrical, 24, 182
- Metropolis, coal-gas of (*see* Gas)—Gas Acts (*see* Gas)—Water supply of (*see* Water)
- Metropolitan Board of Works, 13, 264—College of Pharmacy, 76, 135; 80, 111; 82, 148—Gas (*see* Gas)—Railway, atmosphere of, 16, 128, 197, 235, 237; 18, 46—Sewage (*see* Sewage)—Water (*see* Water)

- Naphthalamine, ni- (see Ninaphthalamine)
- Naphthalene, phenyl- (see Phenyl-naphthalene)
- Naphthalene, 15, 188, 280; 17, 165; 18, 235; 44, 133—A protective against insects, 21, 83—Ac- (see Acenaphthalene)—Action of aluminium chloride on, 95, 177—Action of aluminium chloride on, absorption spectra of hydrocarbons isolated from products of, 97, 308—Action of chlorous acid on, 20, 165—Action of ethylaloxyl on, 74, 62—Action of oxidising agents on, 16, 314—Action of potash on, 62, 175—Action of sulphuric acid on, 33, 151—And anthracene, 20, 119—And benzene compounds, 39, 184—And benzhydrol, condensation of, 42, 109 — And methyl-violet, formation, 38, 34 — And β -naphthol, mixtures of, 97, 263 — And paraffin, 24, 250 — Artificial production of benzoic acid from, 16, 206—Azo- (see Azonaphthalene)—Benzylated, 27, 142 — Binitro- (see Binitronaphthalin)—Bromine derivatives, 46, 241—Bromo- (see Bromonaphthalene)—Chlorine derivatives of, 38, 35—Chloro- (see Chloronaphthalene)—Chloro-derivatives, 36, 232—Colours, 4, 107, 304; 19, 264; 32, 62—Coloured derivatives, 3, 327, 329, 351; 5, 8, 19, 60, 72; 11, 230—Colouring matters derived from, 5, 97—Compounds, constitution, 34, 270—Decomposition, 13, 103 — Derivatives, 20, 178; 21, 24, 58; 22, 82; 24, 265; 35, 8, 164; 42, 243; 43, 288; 50, 12; 59, 140, 188; 66, 288; 72, 252—Derivatives, constitution, 53, 164—Derivatives, crystallographic examination, 27, 321—Derivatives, formation, 93, 19—Derivatives, isomeric, 56, 241, 253; 58, 295; 60, 287; 66, 180; 69, 75; 71, 127; 88, 181—Derivatives, isomeric α - and β -, 28, 99—Derivatives, isomeric, report of committee on, 54, 326—Derivatives, isomerism of, 20, 70—Derivatives, production, 67, 35, 298; 73, 128—Detection, 66, 162—Determining, 83, 228 — 1: 2-Diamino. (see 1: 2-Diaminonaphthalene)—Dichlorated, corresponding to nitronaphthylsulphurous acid, 35, 95—Dichloro- (see Dichloronaphthalene)—Dicvan- (see Diavanaphthalene)—Dihydroxy- (see Dihydroxynaphthalene)—Dinitro- (see Dinitronaphthalene)—Dinitroso- (see Dinitrosophthalene)—Double retraction in, 80, 305—B-NH-ethyldiamino. (see B-NH-Ethyldiaminonaphthalene)—Ethyl- (see Ethylnaphthalene)—Ethyltri-amido- (see Ethyltriamidinaphthalene)—Formation, 38, 24—Glycide ethers and aldehydes in, 97, 47—Glycide, in coal-gas and spent oxide of iron, 66, 292—Group, aldehyde of, 24, 103—Group, compounds of, 28, 93—Haloid derivatives of, constitution, 51, 28 — Hexahydro- (see Hexahydronaphthalene)—Homologues of, 22, 167; 97, 276 — Influence on rotation of ethyl tartrate, 85, 310 — Isomeric investigation, 66, 189—

- Ketotetrahydro- (*see* Ketotetrahydronaphthalene) — Manufacture, 7, 94—Manufacture of porous earthenware by means of, 49, 51—Meta- (*see* Metanaphthalene) — Methyl- (*see* Methylaaphthalin) — Mononitro- (*see* Mononitronaphthalene) — Mono-sulpho acids of, formation, 21, 202—Nitro- (*see* Nitronaphthalene) — Nitro-derivatives of, 28, 294—Of amyl (*see* Amyl) — Octohydro- (*see* Octohydronaphthalen) — Pentabromazo- (*see* Pentabromazonaphthalin) — Pentachloro- (*see* Pentachloronaphthalene) — Peridinitro- (*see* Peridinitronaphthalene) — Phenyl- (*see* Phenyl-naphthalen) — Preparation, 20, 82—Preparing β -halogen derivatives of, 99, 228—Properties and uses, 20, 300—Pure, of commerce, 25, 23—Pure, preparation, 44, 63, 85, 142—Quantitative determination, 100, 255—Red, 20, 202—Scarlet, 18, 247—Series, 35, 191; 39, 163—Series, amidines of, isomerism of, 90, 288—Series, amido-amidines of, 80, 241—Series, amines of, action of formaldehyds on, 77, 248; 81, 307—Series, aminoamidines of, 82, 239; 88, 252—Series, compounds of, 57, 148—Series, diazo-compounds of, rate of decomposition, 87, 18—Series, history of, 37, 270; 39, 94—Series, isomeric change in, 57, 8, 9; 60, 58; 61, 285—Series, migration of naphthyl group in iodohydrins of, 98, 258—Series, steric hindrances in, 94, 216—Solubility in water, 30, 90—Sulpho-derivatives, 36, 232—Sulphonation, 57, 9—Synthesis, 27, 94; 87, 121; 2: 4-Tetrachloro-1,3-dicetotetrahydro- (*see* 2: 4-Tetrachloro-1,3-dicetotetrahydronaphthalene) — Tetrahydro- (*see* Tetrahydronaphthalene) — Trichloro- (*see* Trichloronaphthalene) — Tridinitro- (*see* Tridinitronaphthalene) — Tridinitro-derivatives, constitution, 61, 92, 94; 62, 162; 63, 124; 71, 253, 255; 73, 55; 76, 68—Trinitro- (*see* Trinitronaphthalene) — Use in colouring matters, 30, 218—Use in section cutting, 28, 232—Vapour, maximum pressure of, 79, 237—Working up, for useful products, 38, 18, 58, 99—Yellow, 18, 96; 19, 104
- Naphthalin bisulphide, 10, 250
- Naphthalin bisulphite, action of aldehyds on, 28, 180
- Naphthalinearboxyl-acid-amide, 25, 263
- Naphthalinearboxylic acid (*see* Acid)
- Naphthalene chlorides, 38, 220; 61, 284
- Naphthalene decahydride, 90, 281
- Naphthalene glycol, bi- (*see* Binaphthalene glycol)
- Naphthalene octohydride, 91, 153
- Naphthaline A, octohydride, 93, 11
- Naphthalene picrate, 100, 255
- Naphthalin-sulpho acids (*see* Acids)
- Naphthalene- β -sulphonate, menthyl (*see* Menthyl)
- Naphthalene-sulphonic acid (*see* Acid)
- Naphthalene tetrachloride, 26, 36, 82—Derivatives, 26, 228; 27, 142
- Naphthalen $\bar{e}$ tetrahydride, 90, 281
- Naphthalenes, benzyl- (*see* Benzyl-naphthalenes) — Chloro- (*see* Chloronaphthalenes) — Dichloro- (*see* Dichloronaphthalenes) — Nitro- (*see* Nitronaphthalenes) — Phenyl- (*see* Phenyl-naphthalenes) — Trichloro- (*see* Trichloronaphthalenes)
- Naphthalic acid (*see* Acid) — Alizarine (*see* Alizarine) — Series, corresponding term to benzoic acid in, 17, 155, 164
- Naphthalide, acet- (*see* Acetnaphthalid) Sulpho- (*see* Sulpho-naphthalide)
- Naphthamein, 3, 352
- β -Naphthane diols, 100, 80
- Naphthaquinacridines, 100, 242
- Naphthaquinone, 61, 286—Formation by direct oxidation of naphthalene, 26, 307
- Naphthaquinone, 46, 26—49, 257, 69, 126—Origin and constitution, 45, 152
- Naphthazarine, 23, 22, 275; 25, 263
- Naphthene, ace- (*see* Acenaphthene) — 4-Chloroace- (*see* 4-Chloroacenaphthene) — Hexa- (*see* Hexanaphthene) — Hydrindo- (*see* Hydrindonaphthene) — Thio- (*see* Thionaphthen)
- Naphthenes, synthesis, 83, 155
- α -Naphthilides of normal fatty acids, melting-points of, 97, 261
- Naphthimidazole, amidomethyl- (*see* Amidomethylnaphthimidazole)
- Naphthindol derivatives, synthesis, 77, 225; 78, 267
- Naphthindulines, synthesis, 80, 24
- Naphthioacridine, 54, 190
- Naphthobioxy and derivatives of naphthol, 19, 262
- Naphthochinoline, dimethyl- (*see* Dimethylnaphthochinoline)
- Naphthocoumarin, methyl- α - (*see* Methyl-naphthocoumarin)
- β -Naphthocoumarine, 48, 249
- Naphthoflavone, 79, 106
- Naphthoic acid (*see* Acid)
- Naphthol, 45, 209—And azo colouring matters, 41, 283—And carbonaphtholic acid, 21, 58—And mercury compound of, 80, 24—Benzeneazo- (*see* Benzeneazonaphthol) — Benzeneazo- α - (*see* Benzeneazo- α -naphthol) — Binitro- (*see* Binitronaphthol) — Bromo- (*see* Bromonaphthol) — Bromonitro- (*see* Bromonitronaphthol) — Chino-like derivative of, 25, 35—126—Compounds, 24, 133— β -Decachloro- and bromo-derivatives, 63, hydro- (*see* β -Decahydronaphthol) — Detection, reactions for, 47, 178 — Di- (*see* Dinaphthol) — Diazoamido- (*see* Diazoamidonaphthol) — Dibrom- (*see* Dibromnaphthol) — Dinitro- (*see* Dinitronaphthol) — Dinitroalphi- (*see* Dinitroalphanaphthol) — Diphenyldi-amido- (*see* Diphenyldiimidonaphthol) — In animal fluids, detection, 48, 170—Mononitro- α - (*see* Mononitro- α -naphthol) — Nitro- (*see* Nitronaphthol) — Nitroso- (*see* Nitrosnaphthol) — *ac*-Tetrahydro-2- (*see* *ac*-Tetrahydro-2-naphthol)
- α -Naphthol, action of pyromellitic acid on, 28, 204—And benzophenone chloride, condensation products, 94, 13, 70—Decahydro- (*see* Decahydronaphthol- α -) — Diazo-derivatives, transposition on formation, 64, 126—Orthoxyazo-derivatives, 64, 126
- α -Naphthol-benzoin as indicator, 64, 166
- α - and β -Naphthol and naphthaline, detection, 66, 162—Colour reactions of pyruvic acid with, in sulphuric acid solution, 91, 209—Diagnosis of, 66, 220—Distinguishing between, 64, 321; 65, 18; 66, 35; 72, 246; 76, 48
- β -Naphthol, acetamido- p -benzoyl- (*see* Acetamido- p -benzoyl- β -naphthol) — Action of chloroform on, 46, 47; 87, 47—Action of PCl_3 on, 33, 180—And naphthalene, mixtures of, 97, 263—And trinitroacetylaminophenol, molecular compound of, 98, 255—Benzoylamido- p -benzoyl- (*see* Benzoylamido- p -benzoyl- β -naphthol) — Bromine derivatives, 40, 87, 237—Condensation of dimethylaminobenzaldehyde with, 86, 252—Derivatives, etherification of, 80, 277—Derivatives, mobility of substituents in, 94, 7—Derivatives, morphotropic relations, 74, 302—Diatomic alcohol derived from, 45, 77—Ether oxides of, 77, 188—In solution in solid naphthalene, molecular weight, 95, 307—Nitration, 22, 312
- Naphthols and naphthylamines, behaviour with nascent bromine, 74, 100—Derivatives, 41, 101—Isomeric, 21, 58—Mononaphthylamines from, 42, 302—Nitro- (*see* Nitronaphthols) — Reactive power, 46, 160
- Naphtholic sulpho acid (*see* Acid)
- Naphtholsulphonic acid (*see* Acid)
- Naphthomorpholones, electrolytic reduction, 87, 247
- Naphthopiric acid (*see* Acid)
- Naphthopurpurine, 80, 255
- Naphthopyryl, di- (*see* Dinaphthopyryl)
- Naphthoquinoleins, two isomeric, 57, 241
- β -Naphthoquinolines, 77, 188
- Naphthoquinone and dimethylnaphthylamin, 41, 209—Bibrom- (*see* Bibrom-naphthoquinone) — Dimethyl- (*see* Dimethylnaphthoquinone)
- α -Naphthoquinone derivatives, 38, 254
- β -Naphthoquinone derivatives, 53, 227—Formation and constitution, 46, 209
- Naphthoxanthene, di- (*see* Dinaphthoxanthene)
- Naphthoxanthonium, tribromodi- (*see* Tribromodinaphthoxanthonium) — Triiododi- (*see* Triiododinaphthoxanthonium)
- Naphthoylacetate, ethyl- β - (*see* Ethyl- β -naphthoylacetate)
- Naphthoylbenzoic acid (*see* Acid)
- Naphthyl, di- (*see* Dinaphthyl) — Group, migration in iodohydrins of naphthalene series, 98, 258—Hydrocarbon phenyl- (*see* Hydrocarbon) — Iodid- (*see* Iodinaphthyl) — Mercurodi- (*see* Mercurodinaphthyl) — Mercury di- (*see* Mercury)
- Naphthylacetone, decahydro- α - (*see* Decahydro- α -naphthylacetone)
- α - and β -Naphthylacetylene derivatives, 66, 270
- Naphthylamide, benzoyl- (*see* Benzoyl-naphthylamide)
- Naphthylamine, 21, 227—Acid derivatives, 27, 294—Action of acids on, 13, 246—Action of chloride of benzol on, 28, 58—Action of nitrous acid on, 13, 91—Action of zinc dust on, 21, 227—Action on bromotolunitro-salicylic acid, 79, 251—Action on cyanuric chloride, 53, 139—Additive compounds with trinitrobenzene derivatives, 83, 138—Aldehyde derivatives, 29, 252— α -N-Alkylated, derivatives of, 94, 219—And aniline homologues, derivatives, 94, 189—And its coloured derivatives, 6, 292—Aniline, phenol, and anthraquinone, electrolysis of derivatives of, 34, 118—Azo-derivatives, 63, 245—4-Bromo-2-nitro-1 (α)- (*see* 4-Bromo-2-nitro-1 (α)-naphthylamine) — Chlor- (*see* Chloronaphthylamine) — Chloro- (*see* Chloronaphthylamine) — Decahydro- α - (*see* Decahydro- α -naphthylamine) — β -Decahydro- (*see* β -Decahydronaphthylamine) — Derivatives, 7, 210; 87, 130, 142—Derivatives, action of aromatic aldehydes on, 82, 240—Derivatives and formaldehyde, interaction, 79, 57—Dextro-*ac*-tetrahydro- (*see* Dextro-*ac*-tetrahydronaphthylamine) — Dextro-tetrahydro- (*see* Dextro-tetrahydronaphthylamine) — Diethyl- (*see* Diethylnaphthylamine) — Dimethyl- (*see* Dimethylnaphthylamine) — Dinitro- (*see* Dinitronaphthylamine) — Ethyl (*see* Ethyl) — Manufacture, 21, 275—Me- (*see* Mephynaphthylamine) — Methyl- (*see* Methyl-naphthylamine) — Nitroso- (*see* Nitrosnaphthylamine) — Oenanthal- (*see* Oenanthal-naphthylamine) — Preparation, 22, 130—*ar*-Tetrahydro- (*see* *ar*-Tetrahydro- α -naphthylamine) — *ar*-Tetrahydro- β - (*see* *ar*-Tetrahydro- β -naphthylamine) — Transformation into nitronaphthal, 27, 282—Violet, 21, 275; 22, 120
- Naphthylminesulphonic acid (*see* Acid)
- α -Naphthylamine sulpho-acids, isomeric, 53, 119
- Naphthylamines, action of methylene iodide on, 85, 60—Chlorine and bromine derivatives, 77, 128—Condensation of nitrated derivatives of chloride of benzyl with, 87, 165—Mono- (*see* Mononaphthylamines) — Primary and secondary, 48, 94—Tetrahydro- (*see* Tetrahydronaphthylamines)
- Naphthylaminic sulpho acid (*see* Acid)

- Naphthylazoinides and nitro-derivatives, **96**, 280
a-Naphthyl bromide, magnesium (*see* Magnesium)
 Naphthylcarbamides, di. (*see* Dinaphthylcarbamides)
 Naphthylcarbazol, phenol (*see* Phenol)
 Naphthyleyanide, nitro and amido-derivatives, **20**, 201
 Naphthylidiamines, di. (*see* Dinaphthylidiamines)
 Naphthylenediamines, benzenesulphonyl (*see* Benzenesulphonylnaphthylenediamines)
 1:3-Naphthylenediamine, formation, **95**, 140—Formation from β -amino- α -cyano γ -phenyl-propane, **99**, 10—Formation of methyl derivatives of, from tolalacetanitriles, **96**, 242—2-Phenyl- (*see* 2-Phenyl-1:3-naphthylenediamine)
 1:1-Naphthylenediamine, benzoyl-1:4 (*see* Benzoyl-1:4-naphthylenediamine)—Formation, **95**, 283
 Naphthylenglycol, bi- (*see* Binaphthylenglycol)
 Naphthylmethiophene, di- (*see* Dinaphthylmethiophene)
 Naphthylglycols, tetrahydro- (*see* Tetrahydronaphthylglycols)
 Naphthylhydrazines, **53**, 263
 Naphthylidenamines, **100**, 265
 Naphthimid, amidodi- (*see* Amidodinnaphthylimid)
 Naphthyl ketone, β -decahydro- (*see* β -Decahydronaphthyl ketone)
a-Naphthylmagnesium bromide, action of sulphur and selenium on, **89**, 239
 Naphthyl mercury, **19**, 250
 Naphthylmethane, phenylace- (*see* Phenylacenaphthylmethane)
 Naphthylphospho and arsenic compounds, **39**, 34
 Naphthylpurpuric acid (*see* Acid)
 Naphthylsulphurous acid (*see* Acid)
 Naphthyls, di- (*see* Dinaphthyls)
 Naphtide, mercuric, **16**, 98
 Naphtyle, mercuric, **18**, 130
 Napier, James, Analyses of manures, **27**, 12—Boiler incrustation, **7**, 37—Commercial sulphuric acid, **36**, 54—Improvements in producing figures or representations upon glass, **1**, 94—"Manual of Dyeing and Dyeing Receipts" (review), **32**, 101; **33**, 30—"Manual of Electro-Metallurgy" (review), **33**, 40
 Napier, James, jun., Action of concentrated sulphuric acid on lead, **42**, 214
 Naples, School of Chemistry at, **13**, 131

- Nisbet, C., and M. Don Lemon (*see* Don Lemon, M.)
- Nisiro, volcano of, **28**, 195
- Nissen, H., Analysis of white metal, **83**, 12—"Einrichtungen von Elektrolytischen Laboratorien unter besonderer Berücksichtigung der Bedürfnisse für die Hüttenpraxis" (review), **87**, 238
- Nitracetamide combinations, reduction products of, **26**, 277
- Nitracetic acid (*see* Acid)
- Nitracetone, **82**, 51
- Nitragein and soil ferments, **80**, 220
- Nitralizarin, **31**, 256; **34**, 10, 40, 51; **38**, 24—Preparing, **46**, 47
- Nitramidobenzoic acid (*see* Acid)
- Nitramidobenzols, isomeric, products of sulphurisation, **41**, 219
- Nitramine and isonitramine, and their ethers, **77**, 165—Iso- (*see* Isonitramine)
- Nitramines, aliphatic, **76**, 183—Nitrated aromatic, action of sulphide of ammonium on, **80**, 45
- Nitrilic acid (*see* Acid)
- Nitrilide, aceto (*see* Acetonitrilide)
- And acetoneitrilide, action of potassium nitrite on **37**, 113—Benzo (*see* Benzonitrilide)—Sebacedi (*see* Sebacedinitrilide)
- Nitrilides of salicylic acid, action of reducing agents upon, **31**, 244
- Nitriline, **25**, 131—Benzal- (*see* Benzal-nitriline)—Di- (*see* Dinitraniline)—Meta- (*see* Metanitriline)—Ortho- (*see* Orthonitriline)
- Nitrilines, **93**, 89
- Nitranissic acid (*see* Acid)
- Nitrate, ammonic, decomposition by heat, **11**, 225—Argentite, quantitative synthesis, **96**, 180, 190—Argentite, reduction by organic matter, **26**, 266—Auric, stability of, **25**, 85—Bismuthous, action of potassium cyanide on, **44**, 236—Determination in presence of nitrate, **93**, 269—Diazobenzol (*see* Diazobenzol)—Ferric, reduction by mercury, **54**, 27—Mercuric, action of alcohol on, **43**, 140—Mercuric, action on inorganic hydroxides, **97**, 60—Mercuric, dissociation, of, **71**, 221—Mercuric, solution, solubility of silver chloride in, **98**, 22—Mercurous, action on antipyrine, **88**, 61—Mercurous, and nitric oxide, reaction between, **52**, 1, 8—Mercurous, as a micro-chemical reagent for arsenic, **98**, 280—Telluric, action of water and nitric acid on basic, **50**, 207—Thallous, **90**, 56—Trade, **100**, 328—Uranic, preparing, **48**, 251
- Nitrates, **79**, 229—Absorption spectra in relation to ionic theory, **99**, 245—Aceto- (*see* Acetonitrates)—Action of bacillus coli and Eberth's bacillus on, **79**, 76—Action of copper-zinc couple upon, **43**, 69—Action of dilute nitric acid on, in presence of ether, **75**, 143—Action of nitric, sulphuric, hydrochloric, and phosphoric acids on, **76**, 23—Action of reducing agents on, **14**, 298—And ammonia, comparative action on vegetation, **3**, 341—And chlorates, detection, **53**, 25; **64**, 165—And chlorides, acid, interaction, **69**, 36—And infusoria, **34**, 33—And superphosphates, incompatibility of, **55**, 140—Bacterial oxidation of formates by, **83**, 117—Basic, **65**, 287; **71**, 149; **72**, 109—Basic and ammoniacal, **51**, 165—Basic, decomposition, **66**, 97—Chemical activity, **21**, 258—Currents produced by, **46**, 280—Deoxidation, **43**, 43—Detection of alkaline perchlorates in presence of, **74**, 38—Determination of nitrogen in, **70**, 261—Diphenylamine as reagent for, **91**, 155—Distillation in
- highly diluted solutions, **40**, 229—Electric production from atmosphere, **93**, 232—Electrolysis, **19**, 289—Estimation, **34**, 41; **44**, 107; **63**, 245; **68**, 215; **79**, 102; **94**, 250—Estimation, error in, **59**, 254—Estimation of nitrites in presence of, **19**, 9—Estimation of nitrogen in, **25**, 200; **63**, 302; **66**, 110—Experiments with, **7**, 267—Fermentation of, **46**, 267—Formation and destruction, **53**, 307—Formation in plants, **61**, 78—In arable soil, reduction, **46**, 208, 232; **48**, 170—In different parts of plants, **50**, 213—In dilute solutions, detection, **2**, 108—In earth, formation, **63**, 273—In guano, **1**, 303—In plants and vegetables at different periods of vegetation, **50**, 213—In plants, reduction of, **74**, 37—In potable waters, **73**, 269—In potable waters, detection, **60**, 110—In potable waters, determination, colorimetric method, **60**, 261—In potable waters, estimation **44**, 23, 46, 70, 80; **61**, 15; **63**, 223—In potable waters, origin of, **23**, 41—In rain-water of tropical regions, **59**, 289—In soil, detection, **59**, 144, 240—In vegetable kingdom, universal presence of, **50**, 45—In vegetable tissues, detection, **50**, 45—In water, **4**, 153, 165, 194, 239, 253—In water, determination, **64**, 121, 163—In water of Thames, **34**, 82—In waters, detection, **18**, 179—Iodometric, determination of, **68**, 40, 57—Metallic, absorption spectra, **85**, 162; **86**, 303—Metallic, action upon monohydrated nitric acid, **40**, 190, 214; **41**, 23—Natural production of, **27**, 63—Of alkali (*see* Alkali)—Of alkaline (*see* Alkaline)—Of alkyl (*see* Alkyl)—Of aromatic hydrocarbons, **35**, 185—Of bismuth (*see* Bismuth)—Of dimethyl- and methylethyl-thetamine methyl esters, **96**, 317—Of glycerin (*see* Glycerin)—Of mercury (*see* Mercury)—Of potassium (*see* Potassium)—Of tetratomic cerium and of thorium, double, **83**, 252—Of thorium (*see* Thorium)—Of zinc (*see* Zinc)—Organic, constitution, **85**, 103—Plato- (*see* Platonitrates)—Reagents for, **73**, 27—Reduction by sewage, **43**, 113; **88**, 182—Reduction during metallic substitutions, **41**, 196—Resorcinol as a test for, **58**, 176—Silver-mercurous-mercuric hydroxy- (*see* Silver-mercurous-mercuric hydroxynitrates)—Solubility in nitric acid, **20**, 100—Synthesis from its elements, **94**, 36—Test for, **36**, 115, 133—Transformation into nitrites, **47**, 34—Transformation into nitrogenous organic compounds in the soil, **57**, 131—Transformation into ulimates, **3**, 341
- Nitrated and sulphurised compounds derived from sulphide of carbon, **87**, 298—Azo-colouring matters (*see* Azo-colouring matters)—Benzile (*see* Benzile)—Bodies, reducing action of tin and hydrochloric acid on, **11**, 118—Cellulose (*see* Cellulose)—Gaiacols (*see* Gaiacols)
- Nitration, **74**, 301; **95**, 36—In fatty series, **82**, 243—Of cellulose (*see* Cellulose)—Of furfuran (*see* Furfuran)—Of hydrocarbons (*see* Hydrocarbons)—Of naphthol (*see* Naphthol)—Of tolueneazophenols (*see* Tolueneazophenols)
- Nitre, analysis, **5**, 294—Beds, **10**, 81—Earth, formation, **59**, 253—In amaranthus, **29**, 133—In Peru, theory of formation, **30**, 187—Loss in chamber process, **93**, 78; **95**, 296—Loss in vitriol manufacture, **37**, 147, 195, 216; **39**, 170, 193, 205, 215, 216, 226, 227, 232, 237, 249—Patent for supplying sulphuric acid chambers with, **37**, 203—Preparation from carbonate of potash and nitrate of soda, **5**, 268—Production in India,

- 18, 4—Soils in tropical countries, formation, 52, 59—Stering, 4, 40
- Nitres, colouring-matter of crude, 30, 196
- Nitric acid (*see* Acids)—Anhydride (*see* Anhydrides)—Ether (*see* Ethers)—Ethers (*see* Ethers)—Ferment (*see* Ferment)—Nitrogen (*see* Nitrogen)—Oxide (*see* Oxide)—Oxides (*see* Oxides)—Peroxide (*see* Peroxide)
- Nitrides, metallic, preparing, 86, 269—Non-metallic, action of, 66, 85
- Nitri ferous manures (*see* Manures)
- Nitrification, 4, 245, 259; 28, 107; 36, 263; 39, 223; 40, 271, 288; 41, 22; 63, 296; 81, 151—Atmospheric, 46, 280—By organic ferments, 35, 95; 36, 263; 37, 263—Chemical theory of, 2, 263, 337—Co-chemical, 38, 232—Ferment theory of, 37, 268—History of, 43, 81—In Algeria, 10, 82—In reference to purification of seawater, 91, 255—In soils, 28, 81—Influence of chlorides on, 70, 50—Influence of chloroform on, 39, 26—Of ammonia (*see* Ammonia)—Of humus (*see* Humus)—Of soil (*see* Soil)
- Nitrified bodies, action of oxidants on, 77, 265
- Nitrifying organisms in soil, distribution of, 54, 258, 322—Organisms, isolation of, 61, 135—Power of soils, 90, 250—Process, 61, 135
- Nitramine, cumo- (*see* Cumonitramine)
- Nitrile, aceto- (*see* Acetonitrile)—Bases, formation from organic acids and amines, 48, 270—Benzo- (*see* Benzonitrile)—Brombenzo- (*see* Brombenzonitrile)—Cyclopropane (*see* Cyclopropane)—Di- (*see* Dinitrile)—Dichloropropio- (*see* Dichloropropionitrile)—Ethoxyaceto- (*see* Ethoxyacetonitrile)—Iodoaceto- (*see* Iodoacetonitrile)—Malo- (*see* Malonitrile)—Mandelo- (*see* Mandelonitrile)—Mono- (*see* Mononitrile)—Of leucine acid, 3, 176—Paratolu- (*see* Paratolunitrile)—Paratolyllic, and derivatives, 31, 218—Phenols, synthesis and properties, 84, 263—Phenylaceto (*see* Phenylacetonitrile)—Propio- (*see* Propionitrile)—Protocatechu- (*see* Protocatechunitrile)—Salicilo- (*see* Salicilonitrile)—Succinamio, 59, 193—Synthesis, 90, 60—Tolu- (*see* Tolunitrile)—Trichloroaceto- (*see* Trichloroacetonitrile)
- Nitrides, 15, 187; 22, 263—Aceto- (*see* Acetonitriles)—Acetylenic, condensation with alcohols, 93, 116—Acetylenic, condensation with amines, 94, 232—Acetylenic, condensation with phenols, 93, 141—Action of bromhydric gas on, 16, 265—Action of bromine on, 16, 49—Action of hydroxylamine on, 96, 12—Aliphatic, trans formation into alicyclic imino-compounds, 99, 82—Amino- (*see* Amino-nitriles)—Application of the method of direct hydrogenation by catalysis to, 91, 111—Aromatic, action of potassium sulphhydrate on, 27, 307—Aromatic, synthesis, 72, 234—Chloro- (*see* Chloronitriles)—Class of, 71, 76—Conversion into imides, 39, 34; 48, 214—Conversion of phenols into, 48, 237—Cyclic, 85, 180—Di- (*see* Dinitriles)—Formation, 20, 107, 251; 26, 94—*Isa-see* Isocyanitriles—3-Ketonic, synthesis of non-substituted, 95, 143—Non-saturated, synthesis, 65, 132—Of alcohols (*see* Alcohols)—Oxidation, 64, 61—Oxy- (*see* Oxynitriles)—Oxygenous, volatility, 53, 191—Polymerisation, 59, 314—Preparation, 19, 269—Producing, 27, 3—Propio- (*see* Propionitriles)—Pyrotartaric and succinic, normal, 51, 166—Tolylaceto (*see* Tolylacetonitriles)—Transformation into imides, 36, 243; 37, 161
- Nitropentachlorosmiate, 86, 294
- Nitried silk (*see* Silk)
- Nitrite, benzo- (*see* Benzonitrite)—Cobalti- (*see* Cobaltinitrite)—Cuprie, 95, 236; 96, 303—Dimercurammonium (*see* Dimercurammonium)—Hypo- (*see* Hyponitrite)—Mercuric, and its decomposition by heat, 89, 175—Mercuric and mercurous, and nitrites of silver and sodium, interaction, 79, 211—Mercurous, and alkyl iodides, interaction, 74, 289—Mercurous, and ethyl iodide, interaction, 81, 10—Mercurous, decomposition by heat, 87, 176—Mercurous, monohydrated, crystallography of, 74, 289—Mercurous, production and conversion into mercury nitrate, 90, 289—Oxidation by permanganate, 85, 158—Potassiocobaltic, and analogous compounds, 22, 8, 15, 26—Potassium iodochloro- (*see* Potassium)—Silver hypo- (*see* Silver)—Solution of potassium iodide and starch mixture, 45, 287—Thallous, 90, 56
- Nitrites, acetylenic, 93, 93—Action of carbon dioxide on, 99, 141, 160—Analysis, 57, 33—And cyanic ethers of alcohols, 71, 294—And sulphites, interaction between, 81, 152—And sulphites, reaction between, 56, 21—Aromatic, 59, 133—Cobalti- (*see* Cobaltinitrites)—Cobaltic, 95, 162—Colouring matter of crude, 30, 196—Complex, containing potassium and lead, 97, 246—Constitution, 92, 290—Diphenylamine as reagent for, 91, 155—Diplo- (*see* Diplo-nitrites)—Estimating, 46, 1; 57, 117; 79, 102—Estimation in absence of air, 90, 114—Estimation in presence of nitrate, 12, 147; 19, 9—Estimation in presence of organic matter, 19, 9—Formation and destruction, 53, 307—Formation during nitrification of ammoniacal solutions, 56, 62—Formation-heats, 60, 24—Gasometric measurement in presence of nitrate, 82, 87—Hypo- (*see* Hyponitrites)—In air, 74, 230, 240—In potable waters, estimation, 62, 203—In potable waters, significance of, 70, 236—In sugar-works products, 87, 31—In urine, recognition, 69, 181—In water, detection and determination, 74, 222—In water, estimation, 32, 163; 63, 228; 78, 29—In waters, estimation, 17, 123; 91, 299—Indol as a reagent for, 69, 157—Metallic, and nitric acid, reaction between, 66, 13—Natural production of, 27, 63—Of alkaline metals and of alkaline earths, interaction of alkyl sulphates with, 94, 230—Of alkyl (*see* Alkyl)—Of barium (*see* Barium)—Of bismuth (*see* Bismuth)—Of calcium (*see* Calcium)—Of iridium (*see* Iridium)—Of mercury (*see* Mercury)—Of rhodium (*see* Rhodium)—Origin, 8, 55—Osmo- (*see* Osmonitrites)—Oxalo- (*see* Oxalonitrites)—Plato- (*see* Plato-nitrites)—Plato-iodo- (*see* Plato-iodo-nitrites)—Platooxalo- (*see* Platooxalonitrites)—Reaction with iodide of potassium, 17, 144—Recognition, 74, 6—Reduction to hydroxylamine, 54, 271—Transformation of nitrate into, 47, 34
- Nitried orthotoluidine (*see* Orthotoluidine)
- Nitritohydroximidosulphates of potassium (*see* Potassium)
- Nitro acid (*see* Acid)—Bodies, formation, 21, 70—Ortho-di- (*see* Orthodinitro)
- Nitroacetaminophenol, tri- (*see* Trinitroacetaminophenol)
- Nitroacetate, ethyl (*see* Ethyl)—Ethyl di- (*see* Ethyl)
- Nitroacetylaminophenol, tri- (*see* Trinitroacetylaminophenol)
- Nitro alizarin (*see* Nitralizarin)
- Nitroalphanaphthol, di- (*see* Dinitroalphanaphthol)
- Nitroamidostilbene-disulphonic acid (*see* Acid)
- Nitroamines, aromatic, and allied substances, transformation, and relation to substitution in benzene derivatives, 96, 85; 98, 164
- Nitroaminobenzenes, action of chlorine and bromine on, 86, 46—Chloro- (*see* Chloronitroaminobenzenes)—Highly substituted, preparation, 85, 235—Highly substituted, transformations, 91, 160; 95, 69—Transformation into nitroanilines, 98, 164—Wandering of bromine in transformation of, 97, 154
- Nitroaminobromobenzenes, wandering of bromine in transformation of, 98, 165
- Nitro- α -naphthol, mono- (*see* Mononitro- α -naphthol)
- Nitroaniline, di- (*see* Dinitroaniline)—Meta- (*see* Meta-nitroaniline)—Ortho- (*see* Ortho-nitroaniline)—Para- (*see* Para-nitroaniline)
- Nitroanilines, mechanism of reduction, 99, 90—Transformation of nitroaminobenzenes into, 98, 164
- Nitroanisidine, di- (*see* Dinitroanisidine)
- Nitroanisidines, di- (*see* Dinitroanisidines)
- Nitroanisoles, mono- (*see* Mononitroanisoles)
- Nitroanthracen, 29, 263—And its derivatives, 27, 304
- Nitroanthraquinone, diortho- (*see* Diorthoanthraquinone)
- Nitroaromatic derivatives, reduction of, 71, 50
- Nitroazoxybenzol, mono- (*see* Mononitroazoxybenzol)
- Nitrobenzalaniline, dibenzylketone, and deoxybenzoin, additive compounds of, 85, 137
- Nitrobenzaldehyd corresponding to the fourth nitrobenzoic acid, 36, 230
- Nitrobenzaldehydes, mono- (*see* Mononitrobenzaldehydes)
- Nitrobenzal-malonic acid (*see* Acid)
- Nitrobenzanilid, base from, 28, 205
- Nitrobenzene, action of hydrogen on, 4, 70—Action of light on a solution of, 76, 67—And essential oil of bitter almonds, qualitative and quantitative analysis, 26, 60—Anomalous viscosity of, 100, 32—Boiling-point, constant molecular elevation of, 88, 281—Detection, 67, 313—Fusion-point, boiling-point, and specific gravity of, 76, 67—Metadi- (*see* Meta-dinitrobenzene)—Oxidation, new acid by, 3, 297—Preparation with oil of turpentine, 2, 83—Properties of, 76, 149—Reduction by aliphatic alcohols in light, 95, 59—Reduction by sodium, 82, 7—Solution, polyiodides in, 85, 163—Tri- (*see* Trinitrobenzene)
- Nitrobenzenes, chloro- (*see* Chloro-nitrobenzenes)—Formation heats of, 66, 185
- Nitrobenzoic acetals (*see* Acetals)—Acid (*see* Acid)
- Nitrobenzol, 15, 242; 23, 263, 276—Action of hydrobromic and hydrochloric acids upon, 19, 261—Action of hydrochloric acid on, 21, 34—And sulphur, detection, 45, 46—And sulphur, reagent for, 46, 92—Bromo- (*see* Bromonitrobenzol)—Detection, 67, 261—Di- (*see* Dinitrobenzol)—In essential oil of almonds, detection, 25, 167—In oil of bitter almonds, detecting, 10, 232; 12, 120; 44, 34—In soda, detection, 12, 240—Manufacture, 25, 58—Orthodi- (*see* Orthodinitrobenzol)—Poisoning by, 12, 239—Reaction by sulphide of ammonia upon, 36, 102—Reduction of, 21, 252; 48, 305—Transformation into benzol and ammonia, 6, 131
- Nitrobenzols and amido-benzols, substituted, action of sulphuric acid upon, 43, 198—Diazo- (*see* Diazonitrobenzols)
- Nitrobenzophenone, meta- (*see* Meta-nitrobenzophenone)—Para- (*see* Para-nitrobenzophenone)
- Nitrobenzoyl, 35, 194
- Nitrobenzoylcamphor, 85, 138
- Nitrobenzoyl-chloride, ortho- (*see* Ortho-nitrobenzoyl-chloride)
- Nitrobenzoyltartaric acids (*see* Acids)

Nitrobenzylamide and amidobenzylamid, 28, 204
 Nitrobenzoylamine and amidobenzylcyanide, 22, 47—Diaz-derivatives of, 46, 300; 48, 214
 Nitrobenzyl diselenide, 100, 254
 Nitrobenzyl disulphides, 98, 229; 99, 105
 Nitrobenzyl mercaptans and disulphides, 100, 253
 Nitrobenzyl selenosulphate, 100, 254
 Nitrohibrombenzol, sulpho- (see Sulpho-nitrohibrombenzol)
 Nitroisobutylol, isomeric, 21, 202
 Nitrobutan, 30, 84—Normal, 37, 173—Tertiary, 30, 207
 Nitrobutylene, 38, 175
 Nitrocamphane, 81, 81—Bromo- (see Bromonitrocamphane)
 Nitrocamphene, 83, 213
 Nitrocamphene, action of nitrogen peroxide on, 89, 92
 Nitrocamphor, 76, 78—Acetonic function of, 59, 97—And its derivatives, 78, 8—And its saline and alcoholic derivatives, 54, 81—As example of dynamic isomerism, 79, 92—Benzoyl- (see Benzoylnitrocamphor)—Bromo- (see Bromonitrocamphor)— β -Bromo- α - (see β -Bromo- α -nitrocamphor)—Chloro- (see Chloronitrocamphor)—Influence of impurities on mutarotation of, 96, 28—Spontaneous decomposition, 87, 246—Transformation into nitrocamphor, 59, 230, 313
 Nitrocamphors, chloro- (see Chloronitrocamphors)—Isomeric, thermic researches on, 60, 62
 Nitrocamphorates, 58, 12
 Nitrocaoutchouc, 58 (see Dinitrocaoutchouc)
 Nitrocellulose and nitromannite, 84, 202—Constitution, 87, 227—Decomposition, 94, 8—Filter papers containing, 70, 38—Filters (see Filters)—Hydrolysis, 94, 250—Hygroscopic moisture in, 70, 247—Oxy- (see Oxy-nitrocellulose)—Science of, 84, 30, 41, 55, 66, 76, 90, 100, 133, 144, 153, 169, 178, 189, 200—Tetra- (see Tetranitrocellulose)
 Nitrocelluloses, 52, 201; 82, 169
 Nitrochlorobenzol, di- (see Dinitrochlorobenzol)
 Nitrochlorobromoanilines and derivatives, 85, 139
 Nitro-chlorophenols, 24, 284
 Nitro-chlorophenol, 22, 312
 Nitrocinnamates, 4, 334
 Nitrocinnamic acids (see Acids)
 Nitrocinic acid (see Acid)
 Nitro-compound explosives (see Explosives)
 Nitro-compounds, 9, 162; 12, 250; 13, 61, 85; 21, 262—Action of sulphuretted nitrogen on, 37, 6—And organo-magnesium halides, reaction between, 95, 284—Aliphatic, preparation, 96, 277—Aromatic, and arylamines, additive compounds of, 93, 151—Aromatic, oxidation by ammonium persulphate, 99, 288—Aromatic, reduction, 71, 88—Aromatic, reduction to azoxy-derivatives in acid solution, 95, 307—Explosive decomposition, 57, 23—Formation, 67, 215—Hydrogen sulphide reduction of, 92, 235—In presence of free nitrogen, 77, 188—Nitration and substitution in, 78, 20—Of fatty series, 25, 287; 26, 23; 27, 23, 117; 28, 280; 29, 175—Of inosite (see Inosite)—Of paraffin series, action of alkalis on, 82, 251—Products of explosive decomposition of, 77, 152—Reduction products, 69, 308—Reduction with zinc dust and acetic acid, 98, 222
 Nitro-copper, 67, 204
 Nitro-cotton, falsification with mercuric chloride and its detection, 97, 133
 Nitro-cresol, bi- (see Binitro-cresol)
 Nitro-cresols, 47, 259
 Nitro-cuminic acid (see Acid)
 Nitro-cyanide of silver (see Silver)
 Nitro-derivatives of alizarin (see Alizarin)—Of fluorescein (see Fluorescein)—Of hydroquinone (see Hydro-

quinone)—Of ortho-xylene (see Ortho-xylene)—Preparation, 63, 296—Reduction in alkaline solution, 91, 71
 Nitrodiamidoditriphenylmethanes, para- (see Parannitrodiamidoditriphenylmethanes)
 Nitrodiazamidobenzenes, di- (see Dinitrodiazamidobenzenes)
 Nitrodibenzyl, para-di- (see Paradininitrodibenzyl)
 Nitrodichlorophenol, ortho- (see Ortho-nitrodichlorophenol)
 Nitrodimethylacrylic ethers (see Ethers)
 Nitrodimethylaniline, di- (see Dinitrodimethylaniline)
 Nitrodimethylhydroresorcin, 96, 27
 Nitrodiphenyl, para-di- (see Paradininitrodiphenyl)
 Nitrodiphenylcarbamides, di- (see Dinitrodiphenylcarbamides)
 Nitrodiphenylmethane, di- (see Dinitrodiphenylmethane)—Ortho- (see Orthonitrodiphenylmethane)
 Nitrodisulphonic acid (see Acid)
 Nitrodurene, 100, 288
 Nitro-ethal, and method of converting alcohols into corresponding nitro ethers, 24, 156
 Nitro-ethane, decomposition, 58, 290—New formation, 38, 220—Second, 56, 255
 Nitroethylaniline, 48, 95
 Nitroethylbenzol and xylylene, isomeric, 20, 189
 Nitroethylene, diphenyldi- (see Diphenyldinitroethylene)
 Nitro-explosives, analysis, 66, 156
 Nitrofluorescein, di- (see Dinitrofluorescein)
 Nitroformazyl, carbon bisulphide, and potassium hydroxide, interact on, 94, 59
 Nitrofurfuran, 83, 83; 88, 172—Di- (see Dinitrofurfuran)
 Nitrogen, 16, 62; 64, 173; 77, 164; 95, 149—Absorbent for liberation of argon, and manufacture of metallic lithium, 74, 6—Absorption by cold lithium, 73, 12—Absorption by organic substances under influence of radio-active materials, 94, 95—Absorption by plants, 67, 3, 148—Absorption by soil, 30, 18—Acids (see Acids)—Action as ammonia, and as nitric acid upon crops, 37, 204—Action on alkaline ammoniums, 69, 181—Action on metals, 55, 155—Action on silicides of magnesium and calcium, 16, 17—Action on water-vapour, 92, 201—Affinity of hydrogen for, 25, 34—Albumenoid, in vegetables, 47, 225—Allotropic modification, 54, 9, 22—Ammoniacal, absorption by plants, 60, 246—Ammoniacal, in primitive rocks, 74, 64—Ammoniacal, in soils, determination, 49, 288—Amounts as ammonia, and as nitric acid, in rain-water collected at Rothamsted, 85, 225—Amounts as nitrates in drainage through uncropped and unmanured land, 85, 225—Analysis of organic bodies containing, 39, 228; 40, 308—And aldehyds, 77, 164—And alkyl, combined, 74, 49—And ammonia, estimation, 81, 144—And argon of firedamp, 74, 85, 87, 97, 100—And barium carbonate and carbon, influence of addition of chloride to reaction between, 97, 87—And carbon atoms, analogy between asymmetric, 91, 55—And carbon, combination in elementary state, 95, 114—And carbon disulphide, combination, 80, 83—And carbon and hydrogen, simultaneous estimation, 21, 120; 56, 91—And carbon and hydrogen, values of atomic weights of, 77, 224—And carbon in waters, total organic, 55, 121—And gold, combinations of, 54, 226—And hydrogen, compounds, 75, 141—And hydrogen, condensation by electric effluvia, 27, 233—And hydrogen, union, 48, 187, 202, 279—And metals of rare earth group, combination, 82, 290—And organic acids, 77, 164

—And other compounds, heat of formation and combustion, 79, 226—And oxygen, coefficients of absorption in distilled water and sea-water, 99, 250—And oxygen compounds, 80, 83—And oxygen compounds, additive compounds of anhydrous magnesium bromide with, 90, 21—And oxygen, density, 62, 98—And oxygen, explanation of two-fold spectra, 71, 169—And oxygen in atmospheric air, results for mean ratio of oxygen to, 45, 283—And oxygen, insulating power of liquid, 52, 70—And oxygen, isothermal distillation, 93, 67—And oxygen, mixtures of liquid, 94, 256—And ozone, 13, 305—And ozone and nitrous acid, 4, 193—And sulphur compounds, heat of formation, 87, 129—And water, reaction between, 36, 22—Assimilable, 71, 221—Assimilation, 82, 219—Assimilation by plants, 7, 127; 29, 197; 44, 215—Assimilation and elimination by plants and animals, 7, 280—Asymmetric, 69, 26—Asymmetric, isomerism of, 86, 12—Asymmetry in substituted ammonium compounds, 63, 174—Atmospheric, absorption by Leguminosae, 39, 264—Atmospheric, absorption by vegetation, 26, 184; 66, 308—Atmospheric, action of humic acid on, 43, 217—Atmospheric, ammonia from, 41, 208, 218, 229, 240, 259—Atmospheric, and aluminium, combination, 73, 35—Atmospheric, and argon, separation, 73, 24—Atmospheric, and chemical, combination with metals, 73, 115—Atmospheric, and iron, copper, etc., combination, 73, 35—Atmospheric, and metals, combination, 73, 115—Atmospheric, assimilation by plants, 52, 284—Atmospheric, density, 79, 13; 87, 11—Atmospheric, experiment showing argon in, 71, 209—Atmospheric, fixation, 62, 71, 81, 94, 101, 160, 170; 71, 123—Atmospheric, fixation by algae and bacteria, 74, 293—Atmospheric, fixation by clayey soils, 62, 249—Atmospheric, fixation by microbia, 66, 245—Atmospheric, fixation by soil and by plants, 65, 204—Atmospheric, fixation by vegetable soil, 33, 251—Atmospheric, fixation in arable soils, 62, 283—Atmospheric, in vegetation, 25, 33; 28, 8; 29, 271—Atmospheric, oxidation in electric arcs, 94, 35—Atmospheric, production of ammonia from, by means of peat, 98, 163—Atmospheric, relations to arable mould, 60, 97—Atmospheric, relations to vegetable mould, 57, 150, 161, 170, 180—Atmospheric, utilisation in production of calcium cyanamide, 97, 289, 303—Atom, affinities of, 99, 290—Atom and carbon atom, analogy between asymmetric, 91, 55—Atom of heterocyclic compounds, amido-group attached to, 97, 48—Atom, pentavalent, 90, 192—Atom, tervalent, arrangement in space of the groups combined with, 89, 116—Atomic volume, 43, 43—Atomic weight, 76, 110; 77, 224; 78, 184; 80, 270; 82, 208; 83, 241; 89, 207; 90, 31, 269; 91, 176, 220, 230, 292; 92, 21, 261, 275, 285; 93, 4, 13, 20, 33, 53, 160, 257; 94, 214; 95, 208; 96, 180, 190; 98, 318; 99, 54, 64, 69, 76; 100, 278—Atomic weight, determination, 90, 70—Band spectrum, 53, 11—Behaviour in liquid state, 70, 300—Behaviour of fluorine towards, in arc and induction spark, 99, 240—Boiling-point under pressure, 49, 255—Bulb, new form, 38, 251—Burning flame of, 65, 301—Chemistry of, 91, 277—Combined, existing on the earth, origin, 48, 70; 50, 47—Combustion, 36, 231; 76, 36—Compounds, 45, 277—Compounds, action of oxidising agents on, 79, 48—Compounds, comparison of actions of hypochlorates and hypobromites on, 38, 240—Compounds, displace-

ment of benzyl by methyl in substituted, 84, 270—Compounds, effect of constitution on optical activity of, 97, 308—Compounds, effect of constitution on rotatory power of optically active, 93, 64; 97, 93; 98, 233—Compounds, electrical decomposition, 1, 234, 311—Compounds in oil of vitriol, estimation, 37, 43—Compounds in rain and snow, 100, 308—Compounds in sedimentary sulphuric acid, detection, 58, 184—Compounds lost in manufacture of sulphuric acid, utilisation, 47, 286—Compounds, magnetic rotation, 59, 233—Compounds of anthracenon, 24, 341, 25, 22; 27, 71, 83, 131—Compounds of phosphorus containing, 18, 38—Compounds, optically active, and their bearing on valency of nitrogen, 83, 272—Compounds, optically active asymmetric, 80, 252; 89, 69—Compounds, quinquivalent, isomerism and optical activity, 88, 277—Compounds, quinquivalent, optical activity, 90, 193—Compounds, reagent for identification, 87, 18—Compounds, stereoisomerism of, 68, 95—Compounds, synthesis, 77, 117—Compounds, trivalent, 90, 193—Compressibility between one atmosphere and half an atmosphere of pressure, 89, 98—Conduct of finely divided iron towards, 44, 54—Critical temperature and pressure, 50, 80—Cycles, synthesis, 98, 60, 96—Density, 62, 58; 64, 84; 74, 292; 79, 13—Density of, anomaly in determinations of, 69, 231—Derivatives of ethylbenzoylacetate, 95, 155—Derivatives, reduction, 86, 138—Electrochemical researches on, 48, 253, 264—Elimination of, effect of diet and exercise on, 23, 127—Enrichment of soil in, 48, 161—Estimation, 4, 195; 5, 28; 13, 207, 217; 15, 149; 17, 9; 25, 205; 29, 28, 166, 188; 33, 238; 48, 101, 149; 50, 58, 180; 52, 34; 57, 64; 65, 37, 99, 111, 241, 257, 265; 89, 238, 282, 291—Estimation as ammonia by means of soda-lime, 62, 322—Estimation, Bettel's process, 50, 176—Estimation by combustion, 25, 189, 203; 40, 17; 42, 313, 53, 70—Estimation by combustion with soda-lime, errors in, 5, 238—Estimation by copper oxide method, 51, 245—Estimation by Gunning method, 69, 245—Estimation by Kjeldahl's process, 51, 283; 55, 20, 141; 57, 211, 236; 58, 49, 96; 59, 48, 97, 230, 272, 310; 60, 306; 63, 37, 67, 37; 71, 277—Estimation by Kjeldahl's process, apparatus for, 100, 50—Estimation by Kjeldahl's process, behaviour of nitrates in, 52, 162—Estimation by Kjeldahl's process, digestion stove for, 52, 107—Estimation by Kjeldahl's process, Jodlbauer modification, 57, 231—Estimation by Kjeldahl's process, modification, 81, 91—Estimation by Kjeldahl's process, Warington's modification, 52, 220—Estimation by soda lime process, 2, 83; 14, 33; 43, 187—Estimation by volume, 1, 59—Estimation by weight, 10, 182—Estimation by Will and Varentrapp's method, 35, 75; 41, 108; 42, 49—Estimation, constant error in, 71, 4—Estimation, Grove's apparatus for, 47, 55—Estimation, methane amongst decomposition products of nitrogenous bases as a source of error in, 93, 150—Estimation, nitrometer for use in, 78, 97—Estimation of absolute, 46, 300—Estimation, part played by soda-lime in, 58, 268—Estimation, quantitative, modification of Dumas' method, 50, 101—Estimation, source of error in, 59, 181—Estimation, various methods, 69, 187—Estimation, volumetric, 45, 91, 59, 74, 88—Electricity, deri-

vatives containing, 100, 196—Fixation, 55, 104; 57, 121, 150, 161, 180, 191, 250; 59, 167, 217; 60, 161, 173, 184, 257; 62, 296; 64, 309; 65, 11, 50; 66, 257, 269; 73, 47; 78, 220—Fixation, electro-chemical problem of, 93, 267—Fixation upon organic bodies, 36, 80, 276—Fixing from atmosphere, 86, 238, 260, 293, 305—Fixing bacteria (*see* Bacteria)—Form in which it is given to the crops, 45, 232—Formation of oxygen compounds of, and their metallic compounds in production of ozone, 100, 100—Free, absorption by organic matters at ordinary temperatures, 34, 9—Free, absorption by proximate principles of vegetables under the influence of atmospheric electricity, 34, 205—Free, combination of, 72, 11—Free, does ozone combine with, in presence of alkalies, to form nitrous compounds and nitrates? 35, 14—Free extract, certain constituents of, 65, 39—Free, in organic substances, determination, 34, 205—Gas (*see* Gas)—Gaseous, assimilation by microbia, 68, 13; 69, 109—Gaseous, excretion from animal body, 45, 142—Gaseous, liberation in putrefaction, 46, 159—Gaseous, loss during decomposition of organic matter, 59, 107, 109—Given off by organic nitrogenous substances, quantity of pure, 22, 82—Group of elements, 96, 69—Halogen compounds, 81, 55—Halogen derivatives of aliphatic diamines, 91, 102—Halogen derivatives of sulphonamides, 91, 54—Importation into France, 54, 109—In air, utilisation by plants, 94, 102—In analyses, 76, 100—In arable soils, 74, 110—In artificial manures, 50, 291—In black and white henbane, 22, 215—In blood, 75, 131—In carbon compounds, determination, 41, 223—In chemical manure compounds, division of, 83, 3, 46—In coal and coke, estimation, 46, 209—In coal, determination, 47, 8—In cultivated soils, cultivation, 55, 58—In farmyard manure, waste of, 67, 60—In fertilisers, 55, 151; 59, 45; 71, 41—In fire-damp and in Rochelle gas, 74, 87, 97—In human urine, determination, 53, 23—In iron and steel, 41, 231—In leather, 47, 155—In manures and other substances, estimation, 2, 280; 4, 238—In manures, determination, 28, 19; 39, 196; 48, 225—In manures, determinations, inaccuracy of, 31, 204, 217—In meteoric iron, 5, 41—In milk and its products, 55, 11—In mixtures containing organic matter, ammoniacal salts, and nitrates, determination, 47, 75, 92—In nitrates, estimation, 25, 200—In nitrates, estimation by Kjeldahl's method, 63, 302; 66, 110—In nitroferous manures, 74, 110—In nitroglycerine of dynamite, determination, 37, 6—In organic bodies, detection, 41, 101; 51, 84—In organic bodies, detection and determination, 63, 201—In organic bodies, determination, 47, 146; 48, 118; 55, 249; 60, 74; 63, 211—In organic compounds, determination, 33, 180; 47, 178—In organic matters, determination of total, 55, 147—In organic substances containing sulphur, detection, 82, 90—In organic substances, determination, 25, 142; 51, 35; 57, 183; 68, 38; 74, 293—In peaty soils, high percentages of, 38, 72—In plants, source of, 52, 35—In plot of meadow land, enrichment of, 54, 333—In steel, 10, 245; 40, 135—In uraninite, 64, 221, 230, 244, 255, 279, 290, 303—In urea, estimation, 79, 71, 119—In urine, determination, 58, 83; 68, 29; 69, 145; 71, 250; 73, 282—In vegetable economy, 57, 230—In vegetable soils, 58, 71, 83, 96, 293—

Increase in grass soil, 53, 11—Insufficiency of Kjeldahl's method, 71, 77—Liquefaction, 37, 3, 11; 47, 193, 236; 48, 193—Liquid, and liquid oxygen and their mixtures, densities, 93, 265—Liquid, products of arc and spark discharge in, 99, 96, 132—Liquid, properties of, 93, 256—Loss in farmyard manure, 50, 127; 52, 190—Loss in putrescent animal matter, 52, 83—Losses of, 71, 161—Losses and gains in field experiments, 59, 254—Losses and gains of arable soils in, 47, 105—Losses during fermentation of dung, 50, 24—Manaral value, 59, 84—Micro-organisms of soil which fix, 70, 233—Migrations in beet-root sugar manufacture, 21, 120—Natural, argon and helium in, 72, 310—Nature of, 69, 207—Negative pole of, 54, 100—New reaction for, 61, 163—Nitric, accumulation in unchanged water of aquaria, 40, 282—Nitric and nitrous, estimation in state of ammonia, 45, 159, 186—Nitric, estimation, 46, 33; 59, 293; 64, 236; 73, 2—Nitric, estimation by Pelouze-Fresenius method, 90, 57—Nitric, estimation by Schödlösing's method, 81, 97—Nitric, in guano, 39, 268, 281—Nitric, in presence of organic nitrogen, 74, 110—Nitric, or nitrates, greater assimilability, 68, 73—Non-albuminoid, in vegetables, 47, 225—Of air, formation of ammonia from, 2, 36; 25, 143—Of air, oxidation by electric arc, 92, 144—Of atmosphere, ammonia from, 41, 272—Of atmosphere, and the hydrogen of water, ammonia from, 41, 155, 195—Of atmosphere and metals, combination, 73, 62—Of atmosphere, does mould developed on organic bodies assimilate the, 33, 10—Of atmosphere, fixation, 55, 153—Of atmosphere, fixation by association of algae and bacteria, 74, 293—Of atmosphere, oxygen compounds, 4, 285—Of black matter in Pyrenean phosphates, agricultural value, 85, 114—Of food and plants, relations between, 49, 190—Of minerals, production of ammonia from, 47, 221—Of nicotine, saturation, 68, 67—Of nitrates and nitrites in potable waters, estimating, 18, 194—Of peaty soils, influence of manure on, 52, 13—Of plants, sources of, 2, 145—Of proteins and nitrogen of simpler amides or amido-acids, methods for distinguishing between, 80, 117, 168, 179—Organic, action of charcoal on, 26, 237—Organic, determination, 59, 97—Organic, in compound chemical manures, 56, 12—Organic, in liquids and solids, estimation, 45, 38—Organic, in natural waters, determination, 40, 179—Organic, in potable waters, estimating, 92, 8—Organic, nitrification, 81, 191—Organic, retention by charcoal, 22, 183—Oxidation, 93, 187—Oxidised, in potable waters, estimation by means of the ferrous sulphate test, 28, 283—Oxygen compounds of, 29, 82—Oxygen compounds of, formation in production of ozone, 100, 160—Oxygen compounds of, in atmospheric air, 4, 285—Oxygenated combinations of, 2, 334—Pentavalent, atom, 90, 192—Preparation, 16, 78; 19, 30; 20, 165, 228; 21, 250; 33, 90; 45, 105; 61, 61—Preparation by action of chlorine on ammonia, 5, 246—Problem under dry farming, 100, 151—Process of Dumas, 51, 84—Proportion to phosphoric acid, 35, 39—Quinquivalent, isomeric partially racemic salts containing, 86, 288; 87, 296—Radicals, introduction into compounds of fatty series, 37, 172—Ratios, Stas's, possible source of

- error in, 94, 44—Reaction on mercurial radicals, 81, 46—Reaction with mercury alkyls, 80, 135—Refractivity of, 77, 1—Removal from the alkaloids, 27, 303—Reverted, 45, 234—Ruffie method, 55, 6, 63—Solid, densities of, 89, 205, 217—Solidification, temperature of, 51, 143—Specific gravity at boiling-point, 82, 241—Spectro-chemistry of, 79, 202, 215—Spectrum, 12, 93; 21, 250—Spectrum of, and of alkaline metals in Geissler's tubes, 33, 64, 74—Stereochemistry of, 80, 207; 82, 243; 87, 143; 90, 193—Sulphuretted, action on nitro compounds, 37, 6—Supplied to the soil in manure, and not recovered in the crop, 23, 241—Thermo-chemical equivalence of, 98, 226—Thermo-chemistry of, 95, 50; 98, 226—Thermo-conductive power of, 35, 194—Valency of, bearing of optically active nitrogen compounds on, 83, 272—Vapour, specific volume at boiling-point of oxygen, 85, 373—Variation with temperature of surface-tensions and densities of, 85, 260—Weight of, 76, 304; 92, 172, 213
- Nitrogen binoxide, action of pyrogallate of potassa on, 40, 133—Action on barium-ammonium, 89, 14—Liquefaction, 36, 266
- Nitrogen bromides containing the propionyl group, 85, 235—Derived from ortho- and para-acetoluide, 81, 235—Derived from ortho-substituted anilides, 86, 45—Ortho-substituted, 81, 260
- Nitrogen chloride, 99, 81—Acid, 100, 265—Action on dimethylaniline, 78, 267—Action on dimethylaniline, end-product of, 77, 225—Analysis, 58, 196—Explosive properties, 20, 69—Fumes, harmful action, 81, 203
- Nitrogen chlorides containing propionyl group, 85, 160—Containing two halogen atoms attached to the nitrogen, 90, 31—Derivable from meta-chloro-acetanilide, 81, 296—Derived from ortho- and para-acetoluide, 81, 235—Derived from ortho-substituted anilides, 86, 45—Entrance of halogen into ortho-position in transformation of, 81, 260—Ortho-substituted, 81, 260—Substituted, 79, 284; 80, 302—Substituted, containing the azo-group, 86, 45—Substituted, new type of, 86, 34
- Nitrogen chlorophosphide, 21, 203—And two new acids related thereto, 9, 260
- Nitrogen chlorophosphuret, 57, 90
- Nitrogen dioxide, action on terpen, 20, 226
- Nitrogen dioxide, absorption by ferrous salts, 52, 273
- Nitrogen dioxide, action on salts of chromium peroxide, 80, 72—Molecular weight, 60, 25—Thermo-conductive power, 35, 194
- Nitrogen fluoride, 55, 289
- Nitrogen halides from camphoryl- ψ -carbamide, 93, 125
- Nitrogen hydride, means of obtaining, 62, 207
- Nitrogen hydrides, electrolysis, 81, 56
- Nitrogen iodide, 6, 131; 26, 118; 39, 257; 48, 149; 53, 25; 75, 154; 81, 131; 84, 244—Action of reducing agents on, 83, 9, 17—Chemistry of, 79, 90—Composition, 94, 130—Constitution, 74, 267; 90, 264—Derivatives, metallic, 90, 301—Explosion, influence of light on, 58, 64—Photometry with, 60, 248—Preparation and properties, 82, 199—Studies on, 93, 65
- Nitrogen iodides, properties, preparation, and composition, 48, 292
- Nitrogen monoxide, density, 90, 269
- Nitrogen oxides, 33, 255; 51, 80; 51, 102—Action on ferrous chloride and bromide, 75, 143—Action of fluorine on, 92, 21—Action on glass at high temperatures, 44, 253—Action on oximido compounds, 88, 227—And sulphuric acid, combination, 21, 24—Formation-heat, 42, 35—Formation in ozoniser, 97, 167—Hydrogenation, 86, 148—Influence of gaseous, on rate of interaction of chlorine and hydrogen, 100, 251—Production by electric arc in air, 38, 304—Thermic formation, 43, 259—Volumetric composition of, 59, 66
- Nitrogen pentaethyl, 74, 77
- Nitrogen peroxide, action of nitric oxide on, 79, 234—Action on ammonia and ammoniacal salts, 93, 173—Action on antimony tetrachloride, 74, 61—Action on haloid salts of antimony, 72, 233—Action on haloid salts of tin, 73, 58—Action on isonitrosomalonic ethers, 89, 311—Action on metals and metallic oxides, 68, 209—Action on 1-nitrocumphen, 89, 92—And other gases, liquefaction, 20, 180—And phosphate of magnesium, combination, 32, 9—Colouration, 18, 188—Density, 92, 57—Dissociation, 65, 83—Estimation, 64, 236—Estimation of small quantities, 95, 178—Evolution in decomposition of gun-cotton, 95, 178—In air, 21, 156—In gas mixtures, detection, 98, 65—In solution, 20, 60—In urine, determination, 68, 29—Liquid, as a solvent, 84, 275; 85, 131—Liquid, dissociation of, 64, 270; 72, 56—Vapour-densities, 40, 222, 233, 282, 294
- Nitrogen protoxide, analysis by weight, 90, 34—Preparation by moist way, 5, 254
- Nitrogen selenide, 47, 48
- Nitrogen sulphide, 42, 317; 44, 36; 46, 35—Action on metallic chlorides, 94, 230—Action on organic substances, 89, 93; 90, 277; 92, 269—Derivative, 43, 46—Relations of sulphammonium to, 92, 190
- Nitrogen tetrasulphide, action of hydrofluoric acid on, 91, 223
- Nitrogen tetroxide, action on alcohols, 76, 249—Action on ortho- and para-nitrobenzylalcohol, 76, 249—Action on pyridine, 87, 176—And water, reaction between, 22, 286, 311—Apparatus for converting into nitric acid, 55, 273
- Nitrogen trioxide, 71, 25—A supporter of combustion, 23, 117—Action on alcohols, 76, 249—Gaseous, 96, 275
- Nitrogenised manures (*see* Manures)—Matters of urine, determination, 46, 92
- Nitrogenous acids (*see* Acids)—And mineral substances in beet-root, proportion between the sugar and the, 41, 219—Animal matters, decomposability of, 47, 131—Bodies, complex, assimilation by vegetation, 13, 121—Bodies of physiological value, heats of combustion and formation, 95, 142—Bodies, separation, 88, 79, 92—Colloids (*see* Colloids)—Compounds for growth of plants, 48, 226—Compounds in humous soils, behaviour, 36, 246—Compounds, new group, 49, 178—Compounds of milk-sugar, 24, 263—Compounds, transformation of nitrates into organic, 57, 131—Constituents of feeding beet, 37, 133—Constituents of pasture grass, 39, 264—Derivatives of meconic acid, 47, 205—Fertiliser (*see* Fertiliser)—Food (*see* Food)—Manures (*see* Manures)—Matter, chemical changes in, due to fermentation, 42, 84—Matter used as manure, analysis, 32, 20—Matters in grass and ensilage, 49, 78—Nutrition of plants, 39, 264—Organic bodies, behaviour with potassium polysulphides, 74, 186—Organic compounds in arable soils, 53, 156—Organic compounds, synthesis, 50, 45, 177—Organic matter of soils, nature, 55, 27—Organic matters in water, determining, 16, 139—Organic substances, determination, 39, 41—Principles in vegetable moulds, 63, 285—Principles in vegetable soils, 63, 95—Refuse, manufacture of sulphate of ammonia from, 28, 9—Substances, assimilation by plants, 31, 6—Substances in beer, 22, 179—Substances, reaction of, 67, 86
- Nitroglucose, 18, 42
- Nitroglycerine, 16, 113; 19, 22, 250; 20, 44; 23, 131, 154; 36, 216—And Greek fire, 17, 84—And its manufacture, 97, 74—Decomposition, 99, 289—Decomposition by alkalis, 82, 160—Defended, 13, 240—Detection in cases of poisoning, 18, 20—Experiments, 16, 248—Explosions, 13, 216, 226, 239, 264; 17, 296, 300; 18, 8; 20, 31—Explosions, caution, 23, 214—Explosions, gases formed by, 24, 240—Explosions, results of, 12, 193—Explosive force of, 12, 95—How to make safe, 14, 35—Hydrolysis, 94, 250—In blasting, 16, 86—In cordite, etc., estimation, 94, 80—In dynamite, 27, 306—Inhalation of, 8, 226—Keeping and use of, 21, 83—Of dynamite, determination of nitrogen in, 37, 6—Or glonine, 17, 11, 35—Poisonous properties, 13, 288—Production and application, 99, 136, 152, 159—Properties and employment in quarries, 14, 64—Reconversion into glycerin, 47, 169—Rendered non-explosive, 13, 275—Storage, 16, 315—Thermic studies on, 40, 143—Use in stone quarries, 14, 57—Use in working of marble quarries, 24, 168—Velocity of decomposition by heat, 99, 308—Works, Massachusetts, visit to, 27, 306
- Nitro-group, elimination during diazotisation, 82, 239; 86, 32—Reaction product, 94, 171—Reduction, 65, 287
- Nitro-groups, 98, 22—Influence on reactivity of halogen derivatives of benzene, 87, 90
- Nitroguaiacol, mono- *see* Mononitroguaiacol
- Nitroguanidine, 87, 152
- Nitrohydric acid (*see* Acid)
- Nitrohydrochloric acid (*see* Acid)
- Nitrohydroquinonedimethylether and theory of solutions, 99, 89
- Nitrohydroxylic acid (*see* Acid)
- Nitrosodic acid (*see* Acid)
- Nitroisobutylene, 89, 23
- Nitroketone, 65, 215; 66, 50—Amethylcampho- (*see* Amethylcamphonitroketone)
- Nitrolamine, pinene (*see* Pinene)
- Nitroloam, 14, 83
- Nitrosulphates, 84, 7
- Nitromannite, 84, 202—And mannite considered in their action on polarised light, 26, 157
- Nitro-metals, 68, 209—Naphthalene, detection, 68, 297
- Nitrometer, 94, 306—For use in nitro-estimations, 78, 97—Lunge's, for determining nitrous and nitric acids, 39, 133—Lunge's improved, 57, 203—Modification of, 74, 257—New, 67, 50—Tennant's, 39, 168—Use of, 63, 72—Work, 84, 83
- Nitromethane, 52, 309—And its homologues, 71, 13—Condensation on, 79, 106—Condensation with aromatic aldehydes, 86, 70—Synthesis of aldehydes of fatty series by means of, 85, 300
- Nitromethanes, preparation, 82, 103
- Nitrometry, ammoni- (*see* Ammonitrometry)
- Nitromolybdic reagent, preparation, 49, 22
- Nitromonopyrocatechin, 37, 228
- Nitron, 94, 271
- Nitronaphthalic acid (*see* Acid)
- Nitronaphthaline, 53, 263—Action of pentachloride of phosphorus on, 25, 57—And its coloured derivative, 6, 292—Bi- (*see* Binitronaphthalin)—Di- (*see* Dinitronaphthaline)—Mono- (*see* Mononitronaphthaline)—Peridi- (*see* Peridinitronaphthalene)—Production of colouring matters by decomposition of, 5, 73—Test for, 55, 13—Tri- (*see* Trinitronaphthaline)

- Nitronaphthalenesulphonic acid (*see* Acid)
- Nitronaphthalins, **25**, 286; **26**, 276
- Nitronaphthol, **28**, 204—*Bi-* (*see* Binitronaphthol)—*Brom-* (*see* Bromnitronaphthol)—*Di-* (*see* Dinitronaphthol)
- Nitronaphthols, derivatives of, **74**, 302
- Nitronaphthylamine, di- (*see* Dinitronaphthylamine)
- Nitro-1-*am*-naphthylamine, 4-bromo-2- (*see* 4-Bromo-2-nitro-1-*am*-naphthylamine)
- Nitronaphthylsulphurous acid (*see* Acid)
- Nitronaphthene acid (*see* Acid)
- Nitronitrososcorcin, **58**, 59
- Nitroocerin, di- (*see* Dinitroocerin)
- Nitroorthanisidine, para- (*see* Paranitroorthanisidine)
- Nitroorthanisidine, di- (*see* Dinitroorthanisidine)
- Nitroorthozophenethol, **42**, 96
- Nitrosylulidine, production, **74**, 124
- Nitrosylpyridines, production, **76**, 66
- Nitrosylsulphobenzidamide, **30**, 10
- Nitroparazophenol, **42**, 96
- Nitroparadiibrombenzols, di- (*see* Dinitroparadiibrombenzols)
- Nitroparasulphamide-1:2:4-, toluene-ortho- (*see* Tolueneorthonitroparasulphamide-1:2:4-)
- Nitroparatoluidine, di- (*see* Dinitroparatoluidine)
- 2-Nitroparatoluidine, action of quinones on, **93**, 91
- Nitrophenanthren, **40**, 205
- Nitrophenates, campho- (*see* Campho-nitrophenates)
- Nitrophenol, preparation, **48**, 194
- Nitrophenine, **79**, 251
- Nitrophenol and dinitrobenzol, **29**, 155—Benzeneazortho- (*see* Benzeneazortho-nitrophenol)—Benzeneazortho- (*see* Benzeneazortho-nitrophenol)—*Chloro-* (*see* Chloronitrophenol)—*Di-* (*see* Dinitrophenol)—*Isomeric*, **59**, 157—*Mono-* (*see* Mononitrophenol)—*Monochloridi-* (*see* Monochloridinitrophenol)
- Nitrophenols, **44**, 226; **47**, 259; **93**, 89—*Bisimo* (*see* Bromonitrophenols)—*Chloro* (*see* Chloronitrophenols)—*Constitution*, **27**, 118—*Derived* from bromoparatoluidine of Wroblewski, **79**, 251—*Di-* (*see* Dinitrophenols)—*Halogens*, derivatives of, **59**, 156—*Iodo-* (*see* Iodonitrophenols)—*Mechanism* of reduction, **99**, 90—*Poly-* (*see* Polynitrophenols)
- Nitrophenolsulphonic acid (*see* Acid)
- Nitrophenolsulphuric acids (*see* Acids)
- Nitrophenylcyanam des, **92**, 11
- Nitrophenyldiacetylmethane, di- (*see* Dinitrophenyldiacetylmethane)
- Nitrophenylenediamine, **3**, 350
- Nitrophenylhydrazin, ortho- (*see* Ortho-nitrophenylhydrazin)
- Nitrophthalen, **23**, 47
- Nitrophthalic acid (*see* Acid)
- Nitroprussiate of potash (*see* Potassium)—*Of soda* (*see* Soda)
- Nitroprussiates, **62**, 49—*Action* of sulphites on, **85**, 287—*Of alkaline* (*see* Alkaline)
- Nitroprusside of sodium (*see* Sodium)—*Of strychnia* (*see* Strychnia)
- Nitroprussides, **73**, 142—*Action* of chlorine on, under different circumstances, **38**, 103—*Composition* and manufacture, **13**, 247—*Formation*, **20**, 165—*Formation* without nitric acid, **51**, 191
- Nitropyrocatechin, mono- (*see* Mononitropyrocatechin)
- Nitropyromucic acid (*see* Acid)
- Nitroquinine monohydrate, di- (*see* Dinitroquinine)
- Nitrosocerin, mono- (*see* Mononitrosocerin)
- Nitrosacylates of bismuth (*see* Bismuth)
- Nitrosalicylic acid (*see* Acid)
- Nitrosalicylous acid (*see* Acid)
- Nitrosalts of mercury (*see* Mercury)
- Nitrosamine, diphenyl- (*see* Diphenylnitrosamine)
- Nitrosamines, aromatic, **37**, 129—*Di-* (*see* Dinitrosamines)—*Nitrated* aromatic,
- action of sulphide of ammonium on, **80**, 45
- Nitrosilicate of silver (*see* Silver)
- Nitrosite of pulegone (*see* Pulegone)
- Nitroso-groups, **98**, 22
- Nitrosoacetanilide, meta- (*see* Metanitrosoacetanilide)—*Para-* (*see* Paranitrosoacetanilide)
- Nitrosoacetylamino derivatives of benzene and diphenyl series, **99**, 235
- Nitrosoanthraquinone, **87**, 131
- Nitroso-bases, aromatic, action of diazomethane on, **77**, 226
- Nitrosobenzene, action on secondary amines, **99**, 118
- Nitrosocamphor, iso- (*see* Isonitrosocamphor)—*Oxidising* action, **60**, 85—*Transformation* of nitro-camphor into, **59**, 239, 313
- Nitrosocarbides, action on concentrated sulphuric acid, **79**, 216
- Nitrosocarbonate, pinene (*see* Pinene)
- Nitrosoclorides, dextrilimonene (*see* Dextrilimonene)
- Nitrosocloroplatinate, **61**, 205
- Nitroso-compounds, iso- (*see* Isonitroso-compounds)—*Metallic*, **90**, 208—*Of fatty series*, **38**, 34—*Of ruthenium*, **59**, 230—*Oxidation* of aromatic, by ammonium persulphate, **99**, 288
- Nitrosocyanide, pinene iso- (*see* Pinene)
- Nitrosocyanides of limonene (*see* Limonene)
- Nitroso-derivatives, aromatic, action of hydrochloric and hydrobromic acids on, **80**, 231—*Compounds* with acids and salts, **95**, 249—*Of fatty series*, **79**, 276
- Nitrosodiethyline, **25**, 106
- Nitrosodimethylaniline, para- (*see* Paranitrosodimethylaniline)
- Nitrosodisulphonic acid (*see* Acid)
- Nitrosofurfurin, **37**, 263—*Oxy-* (*see* Oxynitrosofurfurin)
- Nitroseganidin, **36**, 152; **39**, 239—*Action* of iodine on, **38**, 49
- Nitrosodioxyl, **48**, 270
- Nitrosoisobutyric acid (*see* Acid)
- Nitrosonaphthalene, di- (*see* Dinitrosonaphthalene)
- Nitrosophenol, application of, **60**, 38
- Nitrosophenolsulphonic acid (*see* Acid)
- Nitrosophenylamine, **3**, 352—*Action* of nitrous acid on, **83**, 45
- Nitrosoocerin, di- (*see* Dinitrosoocerin)
- Nitrosooxindol, **48**, 270
- Nitrosophenol, action of diazomethane and methyl iodide and potash on, **77**, 226—*Dibromo-* (*see* Dibromonitrosophenol)
- Nitrosophenolhyposulphurous ester (*see* Ester)
- Nitrosophenylene, **3**, 350
- Nitrosopropionate, ethyl (*see* Ethyl)
- Nitrosopropionic acid (*see* Acid)
- Nitrosopropylacetamide, **71**, 234
- Nitrososcorcin, nitro- (*see* Nitro-nitrososcorcin)
- Nitrosoruthenium compounds, **59**, 239; **73**, 186
- Nitrososilver, **36**, 40
- Nitrososulphate of potassium (*see* Potassium)
- Nitrososulphates of lead (*see* Lead)
- Nitrososulphhydantoin, **40**, 169
- Nitrosoterpenes, isomeric, **35**, 121
- Nitro starch, **93**, 106
- ω -Nitrostyrolene, reduction, **89**, 23
- Nitrosuccinic aldehyde (*see* Aldehyde)
- Nitro-substitution compounds of organic, **22**, 98
- Nitro-substitutions, **72**, 172; **74**, 12
- Nitrosulphate of potassium (*see* Potassium)—*Of sodium* (*see* Sodium)
- Nitrosulphates, Pelouze's, conversion into hyponitrites and sulphites, **51**, 124—*Reduction*, **74**, 269
- Nitrosulphides of iron (*see* Iron)
- Nitrosulphobenzoic acid (*see* Acid)
- Nitrosulphochloride of toluene (*see* Toluene)
- Nitrosulphocyanbenzene, di- (*see* Dinitrosulphocyanbenzene)
- Nitrosulphonic acid (*see* Acid)
- Nitrosulphophenol, bromo- (*see* Bromo-nitrosulphophenol)—*Iodo* (*see* Iodonitrosulphophenol)
- Nitrosulphuric acid (*see* Acid)
- Nitrosyl of silver (*see* Silver)
- Nitrosyl bromide, **31**, 276
- Nitrosyl chloride, action of heat on, **62**, 367—*Action* on amides, **71**, 239—*Action* on members of olefine series, **67**, 108—*Action* on organic bodies, **29**, 284—*Action* on pinene, **89**, 271—*Action* on unsaturated compounds, **69**, 200—*Action* on unsaturated carbon compounds, **64**, 143—*Action* on unsaturated hydrocarbons, **40**, 24
- Nitrosylperchlorate, **100**, 59
- Nitrosylsulphate, denitration by sulphurous acid, **36**, 213
- Nitrotartaric acid (*see* Acid)
- Nitrotetramethyldiphenyl, **99**, 296
- Nitrothymol, di- (*see* Dinitrothymol)—*Mono-* (*see* Mononitrothymol)
- Nitrothymomethol, tri- (*see* Trinitrothymomethol)
- Nitrotoluene, **26**, 289—*Chlorodi-* (*see* Chlorodinitrotoluene)—*Chlorotri-* (*see* Chlorotrinrotoluene)—*Determination* in ortho- and para-nitrotoluene, **69**, 12—2,6-*Di-* (*see* 2,6-Dinitrotoluene)—*Ortho-* (*see* Orthonitrotoluene)—*Para-* (*see* Paranitrotoluene)—*Tri-* (*see* Trinitrotoluene)
- Nitrotoluenes, constitution, **86**, 253—*Dibromodi-* (*see* Dibromodinitrotoluenes)—*Dibromo-* (*see* Dibromonitrotoluenes)—*Electrolytic* oxidation, **85**, 203
- Nitrotoluenesulphonic acid (*see* Acid)
- Nitrotoluidide, benzo- (*see* Benzonitrotoluidide)
- Nitrotoluidines, behaviour with reducing agents, **52**, 177
- Nitrotolual, **15**, 215, 293; **20**, 251—*Ortho-* (*see* Orthonitrotolual)—*Reduction*, **48**, 305—*Tri* (*see* Trinitrotolual)
- Nitrotoluals and toluidines, isomeric, **20**, 189; **21**, 154
- Nitrotolquinon and chloranilic acid, **35**, 155
- Nitrotolylhydrazine derivatives, **84**, 263
- Nitrourea reduction, electrolytic, **84**, 274
- Nitrous acid (*see* Acid)—*Acid* ether (*see* Ether)—*Anhydride* (*see* Anhydride)—*Compounds* in vitriol, estimation, **53**, 6, 226—*Compounds*, losses in sulphuric acid manufacture, **43**, 78—*Ether* (*see* Ether)—*Fermentations* (*see* Fermentations)—*Gas* (*see* Gas)—*Oxide* (*see* Oxide)—*Vapours* (*see* Vapours)
- Nitroxanilide, hexa- (*see* Hexanitroxanilide)
- Nitroxyl, reactions supposed to yield, **53**, 106
- Nitroxylsulphobenzide, tetra (*see* Tetranitroxylsulphobenzide)

- Oidium aurantiacum in bread, **26**, 180
- Oil, **2**, 329, 339—Acetone, manufacture, **77**, 83—Alizarin, **63**, 77, 134—Alizarin, estimation of fatty acids in, **61**, 52, 76, 84 — Almond, adulteration of sweet, **19**, 11 — Almond, commercial purification of bitter, **3**, 386—Analysis, elipshod methods, **87**, 217, 250—Angelica, of the roots, **47**, 223, 280—Animal, in mineral oils, **84**, 62—Aniseed, Russian, **73**, 95, 164—Anthracene, treatment, **33**, 99, 138, 168—Arachis, in olive oil, **24**, 311; **75**, 251—Barrels, impermeable, **16**, 221—Bath, **100**, 238 — Bay, **6**, 189—Bergamot, **66**, 329; **90**, 252—Bergamot, determination of purity, **74**, 25, 246—Bergamot, sophistication, **64**, 237—Brown, **58**, 161, 170—Cacao, composition, **49**, 202, —Cake, **52**, 285—Cake, myronic acid in, **46**, 185—Cake, valuation, **58**, 211 — Calorific power, **86**, 197—Camphor, of Japan, **50**, 275 — Canada, and sulphide of carbon, relative value for extracting oils from seeds, **24**, 168—Cajeput, **4**, 124; **29**, 183; **57**, 241 — Cajeput, as a means of distinguishing between amber and copal, **5**, 184—Canada, **71**, 54—Castor, **15**, 84; **59**, 180—Castor, alcohol test for pure, **62**, 215, 235—Castor, alcoholysis of, **95**, 142—Castor, behaviour with petroleum and paraffin oils, **22**, 162 — Castor, characters of, **64**, 297 — Castor, decomposition products of, **29**, 45, 283—Castor, experiments with, **64**, 286 — Castor, in oily mixtures, determination, **64**, 113—Castor, in volatile oils, **3**, 42—Castor, insoluble residue obtained on distilling in a vacuum, **48**, 204—Castor, plant, leaves of, **1**, 51—Castor, purification, **1**, 183—Castor, seed, **62**, 13—Castor, verification by cohesion figures, **9**, 78 — Chamomile, blue-coloured essential, **23**, 131—Cedar-nut, composition of extract of, **80**, 72—Citron, **28**, 98—Citronella, **28**, 253—Citronella, estimation of the adulterant in, **89**, 21, 82—Citronelle, essential, **29**, 84—Citrus lumia, essential, **2**, 134—Cleansing port-objects from, **74**, 258 — Clove, refractive index of, **90**, 146 — Coal (see Coal)—Cocoonut, **50**, 274; **68**, 246—Cocoonut, distillation, **99**, 141—Cocoonut, in butter, detection, **95**, 121; **96**, 297—Cocoonut, in butter, determination, **97**, 146—Cocoonut, in butter, estimation, **95**, 121; **97**, 110—Cocoonut, in margarine, **88**, 317 —Cocoonut, oxygen equivalent of, **96**, 288—Cocoonut, treating, **8**, 180—Cod-liver, alkaloids, **58**, 48; **67**, 133—Cod-liver, chalybeate, **2**, 28—Cod-liver, composition, **10**, 53; **69**, 293 — Cod-liver, genuine, **50**, 176 — Cod-liver, iodine in, **35**, 95; **48**, 233—Cod-liver, preparing and bottling, **2**, 297 — Cod-liver, solid, **12**, 252—Cod-liver test for, **52**, 118—Coffee, **43**, 197—Cognac, **2**, 215—Colour of, **18**, 24 — Colours for printing, **28**, 10—Colza, **93**, 299—Combustion of, **17**, 300 — Copal, varnish, manufacture, **6**, 271 — Copra, assay, **60**, 258 — Copra, purity, **66**, 224—Cotton, in American lards, **73**, 83—Cotton, in lard, detection, **68**, 174—Cotton, in olive oil, detection, **49**, 214; **50**, 68; **57**, 111, 211—Cotton, reaction of, **45**, 254—Cotton, sophistication of olive oil with, **45**, 253—Cotton, sulphuretted substance in, **72**, 209—Cotton-seed, **10**, 240; **11**, 5, 94, 119, 26, 216; **44**, 107; **81**, 163—Cotton-seed, action of nitrate of silver on fatty acids of, **80**, 134—Cotton-seed, and beef-fat in lard, **59**, 99—Cotton-seed, blue colour from, **4**, 291 — Cotton-seed, coloured reaction for, **91**, 291—Cotton-seed, detection in admixture with olive, **42**, 27—Cotton-seed, reaction, **77**, 11 —Cotton-seed, reagents, **79**, 72—Crab, acids contained in, **21**, 169—Creosote, determination of phenol in, **50**, 57—Croton, **78**, 255—Croton, alcohol as a test for, **11**, 53—Croton, detection in mixtures, **4**, 32—Croton, non-volatile acids of, **21**, 34 — Croton, volatile acids in, **22**, 323; **35**, 217—Crotonyl, of mustard, **30**, 65—Cumin, hydrocarbons from, **13**, 13—Cyprus organum, constituents, **97**, 235 — Dead, **17**, 290, 302—Distilling, **16**, 26 — Drying, **22**, 204—Dugong, specimens, **1**, 87—Earth-nut, sensibility to heat when electrified, **58**, 259—Elaeococca, and its solid modification as produced by action of light, **33**, 129—Essential, **8**, 285—Essential, adulteration, **23**, 95—Essential, from fruit of *Pittosporum undulatum*, constituents, **94**, 7—Essential, of American pennyroyal, **95**, 234—Essential,

of *Asarum Canadense*, constituents, 84, 286—Essential, of Californian laurel, constituents, 89, 224—Essential, of *Eschscharia officinalis*, 19, 286—Essential, of hops, 68, 97, 70, 302; 87, 174—Essential, of *Licari Kunali*, 65, 178—Essential, of nutmeg, constituents of, 96, 315—Essential, of rue, constituents, 86, 265—Eucalyptus, containing sixty per cent. of geranyl acetate, 83, 5—Eucalyptus, essential, 68, 126—Eucalyptus, from Queensland, 96, 72—Eucalyptus globulus, 57, 220—Eugenio, relative constitution, 33, 44—Extraction, 16, 317; 17, 14, 37; 81, 45—Extraction by means of sulphide of carbon, 18, 85—Extraction from coal and other minerals, 1, 227—Extraction from seeds, 85, 48, 288; 86, 36—Fatty, detection of falsification, 32, 146—Fatty, extract of cedar nut, composition, 80, 114—Fatty, from grape-pips, 23, 275—Fixed, in adulterated citronelle, 30, 293—Formation in olives, 4, 241—From cotton-seed, 26, 216—From *Curus purpureus*, 19, 120—From *Pimenta acris*, 95, 232—From shale, 27, 116—Furnaces (*see* Furnaces)—Fusel, 91, 252—Fusel, determination, 55, 58; 57, 92—Fusel, examination, 61, 182—Fusel, examination of spirit for, 74, 100—Fusel, fatty acids, in, 23, 121—Fusel, formation, 95, 232—Fusel, in alcohol, 45, 288; 47, 72; 53, 302—Fusel, in beer, 53, 81, 87—Fusel, improvements in treatment of, and for various applications to useful purposes, 7, 250—Fusel, in spirit of wine, 1, 144—Fusel, in water from condensing engines, 92, 108—Fusel, treatment of, 8, 110—Fusel, withdrawing from crude spirits by means of charcoal, 26, 301—Gallipoli, 18, 60, 84, 154—Gas lamp (*see* Lamp)—Gas lamp, 62, 83, 63, 22—Gas reports, vertical, 22, 179—Geranium, 3, 254; 65, 11—Geranium, Indian, 23, 155—Glycerine, 13, 232—Heraclium, from hexyl alcohol, 24, 263—Heraclium, heptylic acid from hexyl alcohol of, 26, 230—Heraclium, nonylic acid from octylalcohol of, 25, 57—In cattle-cake, estimation, 51, 181—In kernels of Avoca elais, 23, 83—In pips of grapes and raisins, 24, 300—In various seeds, proportion of, 13, 276—Juniper, test for etheral, 50, 45—Kerosene, blowpipe, 83, 206—Kerosene, in New York, quality, 21, 119, 120—Lamp furnace (*see* Furnace)—Lard, iodine number for, 65, 39—Lavender, 66, 329—Lemon, 43, 235—Lemon, essential, 52, 106; 69, 20—Lemon, new substances in, 84, 9—Limonene, and pure naphthalene of commerce, 25, 23—Linseed, 6, 100; 90, 104—Linseed, alcoholysis of, 97, 142—Linseed, analysis, 25, 106—Linseed, assay, 47, 202—Linseed, estimation of rosin and rosin oil in, 77, 287—Linseed, oxidation, 59, 12—Linseed, saponification, 67, 250—Linseed, solubility of sulphur in, 22, 214—Linseed, sophistication, 62, 7—Linseed, varnish, oxidation, 66, 37—Lubricating, determining composition of, 65, 27—Luteana, 2, 271—Manufacturing gas from, 68, 283, 296—Menhaden, 6, 312—Mineral, 23, 84, 95—Mineral, and paraffin wax, 38, 167—Mineral, examination, 50, 69—Mineral, for excluding air in Pavy titrations, use of, 72, 11, 24—Mineral, for lubrication of watches, 1, 144—Mineral in a mixture of mineral and vegetable oils, 86, 51—Mineral, lubricating, 35, 116—Mineral, standard of safety for, 70, 284—Mordants (*see* Mordants)—Mustard, crotonyl, 30, 65—Mustard, determination, 59, 85—Mustard, essential, 20, 106—Mustard, essential, and cyanides, relation existing between, 27, 105—Mustard,

essential, action on milk, 25, 191—Mustard, in rape cake, 47, 249—Mustard, metamorphoses of, 11, 238—Mustard, phenyl, chlorated and iodated, 25, 156—Mustard, phenylated, action on diphenyl guanidine, 40, 109—Mustard, seed, essential, 24, 252—Myrbane, 99, 96—Niaouli, chemical composition, 67, 266—Nutmeg, constituents of essential, 96, 315—Nutmeg, constituents of lime leaves, 53, 107—Of American black walnuts, 76, 145—Of *Andropogon Schenanthus*, geraniol of, 69, 276—Of bitter almonds, alleged poisoning by, 11, 244—Of bitter almonds and chloride of calcium, 1, 167—Of bitter almonds and nitrobenzene, analysis, 26, 60—Of bitter almonds, artificial, 35, 134—Of bitter almonds combined with acetic anhydride, 16, 66—Of bitter almonds, essential, 23, 228—Of bitter almonds, essential, purification of, 11, 20—Of bitter almonds, etheral, 44, 82—Of bitter almonds, natural, 60, 109—Of bitter almonds, *parabenzol* in, 12, 120; 44, 82—Of lemons, essential, cymol from, 26, 60—Of lignite, decomposition of tarry, at a red heat, 38, 35—Of limes, distilled, composition, 89, 176—Of reseda root, 74, 74—Of root of mignonette, 71, 88—Of roses, 69, 181—Of roses, detection of Turkish geranium oil in, 66, 31—Of roses, French essential, 74, 270—Of roses, spermaceti in, 57, 263—Of seeds of *Atropa curcas*, 58, 72—Of sesame, process for, 57, 192—Of sheeps' feet, 42, 166—Olive, action of sunlight upon, 24, 230—Olive, adulteration, 19, 11—Olive, Arachis oil in, 24, 311; 75, 251—Olive, assay, 2, 251—Olive, detection of copper in, 41, 160—Olive, detection of cotton oil in, 49, 214; 50, 68; 57, 111, 211—Olive, detection of cotton-seed oil in admixture with, 42, 27—Olive, examination of crude, 74, 74—Olive, falsification, 59, 230—Olive, for purifying carbonic acid evolved from limestone, 25, 34—Olive, manufacture in California, 26, 216—Olive, new fact in history of, 11, 44—Olive, presses, residue from, 24, 313; 25, 23, 35—Olive, remarkable property of, 51, 36—Olive, solubility of alkaloids in, 1, 268—Olive, sophistication with cotton oil, 45, 253—Olive, sophistications of, 40, 192—Olive, test for, 39, 136; 51, 57—Orange-peel, oxidation products of essential, 24, 147—*Origanum hirtum*, 95, 232—Painted surfaces, cleaning, 22, 231—Paints and varnishes, dryer for, 25, 300—Paints, substitution of zinc-white for white-lead in, 83, 287—Palm, 15, 268, 280; 16, 258; 23, 282; 24, 146; 41, 146—Palm, acids from, 16, 268—Palm, assay, 60, 258—Palm, bleaching, 16, 222, 245, 282, 317; 17, 120; 18, 76—Palm, for softening dyed yarns, 17, 170, 206—Palm, purity of, 66, 222—Paraffin, 25, 11—Paraffin, assay, 14, 08, 168—Paraffin, European, 27, 59—Paraffin, oxalic acid from, 44, 284—Paraffin, poisonous nature, 14, 110—Paraffin, report on quality of illuminating oils sold in Manchester and neighbourhood, 5, 312—Paraffin, to prevent causing fire, 27, 47—Pelargonium, 70, 98—Peppermint, adulterated, 1, 51—Petroleum, novel transformation of, for lighting purposes, 46, 161—Petroleum, solidification and saponification, 35, 76—Phenyl-mustard, chlorinised, 31, 130—Pile, 75, 264—Produced from coal, 3, 342—Purifying or refining, 11, 81—Rape, 63, 261—Rape, adulteration, 64, 233—Rape, detection in other oils, 5, 111—Rape, purification, 8, 134—Refining, 21, 120—Regions of Canada, 4, 201—Removing from

woollen and cotton waste, 36, 63—Resin, 63, 106, 261—Resin, and Fuller's earth, 28, 326—Resin, essential, 74, 281—Resin, in mineral lubricants, determination, 63, 261—Resin, in oil of turpentine, 76, 35—Resin, in oil of turpentine, detection, 65, 144—Resin, refined, 20, 276—Rhodium, 52, 298, 310; 53, 62—Rock, American, chemical constitution, 7, 157—Rock, as fuel for steam engines, 3, 328—Rock, Pennsylvania, 1, 96—Rosin, in fatty oils, detection, 5, 111—Rosin, in linseed oil, estimation, 77, 287—Rue, 22, 59, 202; 23, 214—Rue, essential, constituents of, 86, 265—Sage, essential, 37, 211; 41, 223—Sandalina, as a product of decomposition of glucosides, 86, 131—Seal, analytical constants of, 70, 1—Seed, new, 39, 264—Seeds, albumenoids of, 43, 36—Seeds, crystalline albumenoids from, 44, 122—Seeds, value, 24, 46—Sesame, process for, 57, 192—Sesame, reaction for, 68, 38—Shale, bases contained in Scottish, 82, 277, 290; 85, 131; 87, 296—Solar, in petroleum, 50, 68—Spike, camphene in, 69, 26—Spike, essential, 68, 62—Spike, essential, camphene in, 69, 217—Springs, 7, 83, 216, 228, 288—Springs in America, 4, 152—Storax, volatile, 33, 118—Tallioconah, 1, 235—Testers, graduation of, 21, 275—Tree, Chinese, fatty matter in seed of, 32, 179—Turkey red, examination, 47, 72—Turkey red, estimation of fatty matter in, 64, 15, 49, 84—*Tropæolum majus*, 60, 65—Turpentine, action of acetic acid on, 53, 100, 130, 252—Turpentine, action of iodide of cyanogen on, 22, 107—Turpentine, action of iodine on, 41, 34—Turpentine, action of picric acid on, 52, 189—Turpentine, action of sodium on, 3, 159—Turpentine, American, 70, 311—Turpentine, and amylen, relations existing between, 20, 165—Turpentine, conversion into cymol, 25, 131; 27, 283—Turpentine, cymen as a constituent and derivative of, 29, 41—Turpentine, cymol from, 26, 60—Turpentine, decomposition at high temperature, 35, 84—Turpentine, detection of resin oil in, 65, 144—Turpentine, effects of inhaling, 39, 251—Turpentine, French, action of formic acid on, 57, 51—Turpentine, hydrate of, production of cymen by, 25, 81, 286—Turpentine, in machinery oils, detection, 33, 117—Turpentine monatomic alcohols derived from, 53, 131—Turpentine, preparation of nitrobenzene with, 2, 83—Turpentine, purification, 22, 207—Turpentine, transformation into terpene, 53, 60, 109—Turpentine, use of, 62, 273—Unsaponifiable, in greases with a lime base, 75, 174—Valerian, researches on essential, 1, 20—Valerian, volatile carbides of, 69, 26—Vegetable, in mineral oils, 84, 62—Vitreol, detection of gaseous impurities in, 17, 75—Vitreol, manufacture, 24, 237, 249—Vitreol, manufacture, sources of sulphur used in, 17, 225—Vitreol, poisoning by, 1, 180—Vitreol, residual phenomenon of electrolysis of, 47, 277—Volatile and fixed, of fruit of samphire, 14, 85—Volatile, of bark of *Cinnamomum pectiniferum* of Fiji, constituents, 88, 251—Volatile, of leaves of *Ocimum viride*, 97, 154—Walnut, 59, 279—Wells, American, 6, 119, 161, 175, 228, 252, 300—Wells of Pennsylvania, 2, 204; 4, 164—Wells, of Pennsylvania and Ohio, 2, 312—Wine, 44, 122—Wood, 34, 85—Wintergreen, as antiseptic, 43, 292—Wintergreen, and birch oil, chemical composition, 62, 67, 75, 91—Wormwood, 28, 253—Wormwood, essential, 29, 80

- Wormwood experiments with, 9, 187. **Yang**, 70, 18, 47.
- ON** 38, 39, 39, 39—Acetone as de-naturalising agents, 79. —Acetone, estimating a composition of, 79, 133. —Acetone, from dry distillation of pyrolytic lime as a source of methylpropyl ketones, 79. —Acetone, testing a composition of, 80, 1. —Acidity, determination of, 63, 237. —Acidity, in detection, 25, 167. —Acids, in, determination, 28, 107, 48. —Action of metals on, 47, 1. —Action of sulphur and sul-phur chloride on, 57, 207, 133. —Action of sulphur chloride on, 57, 113; 58, 2, 82, 133. —Action on metals, 42, 107. —Action with polarised light, 57, 13. —Adulteration, 55, 113. —Adulteration, detection, 53, 292. —Analysis, 43, 107, 73, 3. —And esters, saponification, 67, 61. —And fats, bromine heat-ing of, 73, 87. —And fats, examina-tion, 51, 17. —And food fats, deter-mination of acidity, 62, 284. —Animal and vegetable, in mineral oils, 74, 63. —Animal, manufacture, improve-ments in, 6, 202. —Assay of commer-cial, 34, 134. —Assay, pullet for, 41, 1. —Behaviour of sulphuric acid re-cently heated to 100 degrees with, 43, 133. —Bleaching, 68, 18. —Bleach-ing and refining, 5, 96. —Boiled, and varieties, 23, 107, 207. —Calcing and extracting from ironstone and other materials, 11, 22. —Character-istic properties of common, 27, 212. —Coal, 202. —Coal-tar, aniline and its homologues in, 29, 284. —Coal-tar, isomeric xylenes and cumens met with in, 21, 154. —Coal-tar, solubility of sulphur in, 19, 202. —Coal-tar, treatment of violet colours from, 9, 8. —Coal-tar, which boil at about 200° C., 20. —Cod liver, phos-phorus and iron in, 45, 175. —Deodorising, 78, 12, 24. —Deodorising, 8, 23, 220; 22, 211; 30, 294. —Dis-solving alkaloids in, 7, 80. —Drying, 18, 202, 274. —Drying, oxidation of, 84, 1. —Drying, oxidation of, condi-tions for accelerating, 49, 260. —Dry-ing properties of, 24, 299; 53, 156. —Empyreumatic, determination, 55, 141. —Empyreumatic, removal from pyro-ligneous acid, 11, 168. —Essential, 24, 283; 53, 307; 54, 323; 88, 216. —Essential, alcohol in, 45, 288. —Es-sential, and terpenes, 79, 179. —Essen-tial, behaviour to iodine and bromine, 5, 107, 117, 131, 148, 189, 211. —Essential, detection of adultera-tion in, 6, 11, 101; 60, 178, 236, 237, 238. —Essential, detection of adulteration with oil of turpentine, 11, 301. —Essential, determination, 74, 12. —Essential, determination of odoriferous, 50, 295. —Essential, examina-tion, 61, 64, 230. —Essential, iodine absorption of, 60, 239, 241, 281, 282. —Essential, new alcohol found in, 88, 71. —Essential, oxidation, 30, 272; 32, 188; 34, 127, 135; 39, 279. —Essential, recovery from their watery solution, 9, 10. —Essential, solvent for, 17, 98, 109, 278. —Essential, stan-nous chloride with, 75, 71. —Essential, test for, 59, 1. —Essential, testing for adulteration with alcohol, 26, 205. —Essential, water in, 26, 288. —Essen-tial, yield of, 14, 96. —Estimation of free phosphorus in, 80, 135. —Ethe-real, 51, 275. —Ethereal, alcohol in, 60, 107. —Ethereal, and starch in adulterated cases, 74, 49. —Ethereal, and terpenes, 53, 25. —Ethereal, con-stituents of, 50, 279. —Ethereal, de-tection of alcohol in, 38, 71; 42, 318. —Ethereal, detection of fatty oils in, 26, 82; 29, 28. —Ethereal, detection of resin in, 50, 46. —Ethereal, examina-tion, 52, 118. —Ethereal, separation of allyl and propenyl compounds in, 69, 312. —Ethereal, spectroscopic beha-viour, 61, 229. —Eucalyptus, sesqui-terpene of, 85, 3. —Examination, 56, 120, 108, 188, 208. —Examining mix-tures, 58, 15. —Explosive, 13, 239. —Ex-traction from shoddy, or refuse wool, skins, etc., 8, 83. —Ex-traction by means of bisulphide of carbon, 17, 142. —Fats, and allied sub-stances, examination, 62, 27, 51, 75, 125, 179, 215, 251, 288. —Fatty acids contained in, 42, 211. —Fatty, action on copper, 36, 200. —Fatty, action on metallic copper, 34, 176, 200, 213. —Fatty, behaviour of coal gas with, 1, 167. —Fatty, bleaching of fixed, 21, 36. —Fatty, characteristic differences and tests for detection, 19, 252. —Fatty, estimation of acid in, 27, 269. —Fatty, from crucifera seeds, 21, 45, 47. —Fatty, in balsam of copaiva, 74, 110. —Fatty, in ethereal oils, de-tection, 26, 82; 29, 28. —Fatty, in mineral oils, detection, 52, 206. —Fatty, in olives, 21, 35. —Fatty, spec-trum analysis of, 23, 107. —Fatty, spontaneous heating of, 71, 153. —Fatty, testing, 22, 95; 26, 252. —Fixed, action on copper, 36, 238. —Fixed and volatile, resistance of, 16, 161. —Fixed, in plants, detection, 20, 121. —Fixed, new facts relating to, 14, 113. —For burning, flash-point of, 70, 40. —For machinery, 20, 300; 22, 191. —For reds, constitution, 69, 277. —Free fatty acids in, 60, 34. —From fruit of sapphire, 14, 85. —Fusel, de-tection, 56, 219. —Fusel, origin, 90, 256. —Germanium, adulteration, 40, 176. —Heavy, from tar, purifying, 10, 35. —Hydrocarbon, improvements in treating, 14, 108. —Hydrocarbon, manufacture, 7, 8. —Hydrocarbon, manufacture from peat, 6, 221, 243. —Hydrocarbon, ozonisation, 19, 260. —Hydrocarbon, separation from fat oils, 44, 161. —Lubricating, 18, 190. —Lubricating, electric treatment of, 68, 202. —Lubricating, fluidity of, 70, 42. —Lubricating, testing, 55, 203. —Lubricating, viscosity, 62, 288. —Manufacture from schists, residues from, 43, 95. —Mineral, 17, 146; 21, 47. —Mineral and vegetable, mixture of, mineral oil in, 86, 51. —Mineral, deodorising, 9, 202. —Mineral, de-tection and determination of heavy, 42, 39. —Mineral, detection of fatty oils in, 52, 206. —Mineral, determination, 57, 81. —Mineral, determining flash-point, 62, 311. —Mineral, flash-point and point of danger, 67, 201. —Mineral, for heating boilers, 20, 237. —Mineral, for lamps, testing, 17, 82; 21, 2. —Mineral, in pine oils, detection, 57, 231. —Mineral, lubricat-ing, agent for thickening, 53, 299. —Mineral, lubricating, examination, 41, 25. —Mineral, of Java, 5, 158. —Mineral, of Buxière-la-Grue and of Cordes, 28, 22. —Mineral, new blow-pipe for, 64, 125. —Mineral, paraffin and distillation of brown coals in Saxony, history and statistics of manufacture of, 22, 191. —Mineral, testing, 13, 21. —Mineral, treatment, 7, 250. —Mineral, vegetable and animal oils in, 74, 62. —Mustard, action of ethyl carbamate on esters of or-ganic acids and, 99, 116. —Mustard, action on ethyl esters of malonic and cyanacetic acids, 97, 129; 99, 81. —Neutral refined, 44, 275. —Non-sicca-tive, 59, 180. —Obtained by distilla-tion of bones, 7, 10. —Of citrus series, 90, 252. —Of 118 species of eucalyptus, refractive indices, etc., 92, 167. —Olive, alimentary, falsifications of, 52, 237. —Olive and sweet almond, detecting adulteration, 19, 11. —Olive, characters of, 55, 117. —Olive, detecting, new method, 63, 61. —Olive, detecting sophistication, 63, 37. —Olive, sophistications, 57, 170. —Oxidation, 12, 106, 288; 76, 24. —Oxi-dation, spontaneous, 2, 90. —Palm, estimation of oleic and palmitic acids in, 44, 299. —Palm, of commerce, 21, 300. —Paraffin, production, 43, 285. —Petroleum and paraffin, rendering unflammable, 20, 250. —Petroleum, apparatus for combustion of, 24, 312. —Petroleum, inflammability for lighting purposes, 28, 10. —Petroleum, of the Bas Rhin, 24, 145. —Purifying, 4, 26; 8, 134; 19, 311. —Reaction with H₂SO₄, 23, 145. —Reactions, 60, 62. —Resin, 28, 249; 63, 106. —Resin, de-termination, 50, 206. —Resin, hydro-carbons accompanying diterebenthyl in, 57, 180. —Resin, occurrence of ben-zene in light, 33, 199. —S.T.R. of, 70, 293. —Saponification, apparatus for, 79, 50. —Saponified, action of solvents on, 43, 267. —Sophistication, 42, 175. —Specific gravity and their coefficients of expansion, 25, 148. —Spectrum analysis, 51, 229. —Steam generating power, 21, 264. —Sulphona-tion, 70, 244. —Sulphur in, 71, 296. —Sulphuretted, possessing insecticide properties, 37, 282. —Tests for, 40, 46. —Tests for detection, 19, 238. —Ther-mostat for use in connection with refractometric examination of, 89, 80. —Tolyl-mustard, 40, 217. —Vegetable and animal, determining value, 29, 138, 149, 158, 170. —Vegetable, fatty, action of air on, 11, 136. —Vegetable, oxidation of fatty, 12, 106. —Vegetable, process for extracting, 12, 276. —Vis-cosimeters for, 69, 37. —Viscosity of, 50, 210. —Volatile, colouring prin-ciple of, 8, 245. —Volatile, connection of chemical compounds in, 37, 275. —Wood ketones of, 83, 118.

- Orange and yellow colours in wines**, detection, 53, 297—Aniline (see Aniline)—Anthracen (see Anthracen)—Bitter, proximate principles of bark of, 53, 142—Compound, conversion of mineral antimonite into, 65, 234—Flower water distilled by steam, 26, 60—Flowers, essences of, characteristics from the 1901 crop, 85, 107—Lead, 22, 207, 312—Methyl, 120—Methylorange—Peel, cellulosic constituents, 87, 220—Peel oil (see Oil)—Peel, sugar in, 78, 278—Pigment of *Uraster rubens*, composition, 83, 170—Red, black appearing, 46, 203—Tree, diseased, analysis of ashes of, 18, 234—Tree, Mandarin, production and distribution of organic substances in, 90, 244—Test for, 28, 265
- Orangeite**, 90, 149
- Orawioza**, mineral from, analysis, 29, 100, 165
- Orchardson, J. Q. and C. Weizmann**, Some derivatives of naphthoylbenzoic acid and naphthacenequinone, 93, 20—Orchella weed and products obtained therefrom, 15, 77—Weed, estimation of orcinol in, 97, 286
- Orchids**, perfumes of, 67, 146
- Orchil**, adulteration with aniline-red, 47, 118—Artificial, 33, 211—Extract and paste, manufacture, 34, 72—In wines, detection, 45, 36; 46, 123; 53, 287—Paste, latest novelty in, 22, 12—Valuation, 23, 204, 228
- Orcine**, 11, 225; 46, 220—Amido-derivatives of, 23, 292; 27, 49—Chlorinated compounds from, 27, 133—Colouring matters derived from, 18, 150—Combinations, 18, 225; 19, 259—Derivatives, 41, 80—Dinitro- (see Dinitro-orcin)—Dinitroso- (see Dinitroso-orcin)—History of, contributions to, 23, 103; 25, 1; 27, 49; 29, 53; 43, 83—Iodo-derivatives, 26, 279; 29, 53—Isomer, 46, 36—Methyl, ethyl, and amyl derivatives, 16, 208—Nitro-substitution compounds, 22, 98—Pentabrom- (see Pentabromorcin)—Product of action of aqua regia upon, 44, 204—Synthesis, 25, 215, 262; 26, 83, 144
- Orcinetricarboxylate, triethyl (see Triethyl)**
- Orcinol compounds**, production, 96, 267—Condensation of chloral hydrate with, 77, 207—Derivatives, 41, 287, 290—Derivatives from diacetylacetone, 82, 228—In orchella weed, estimation, 97, 286—Production, 66, 208
- Orcinotricarboxylic esters (see Esters)**
- Ordnance**, rifled, influence of rotation of earth on deviation of projectiles from, 24, 152
- Ordonneau, C.**, Acidity of green grapes, 64, 288—Action of iodine upon methylated spirit, 45, 221—Calcium tartrate, 67, 111—Composition of wine-brandies, 53, 73, 239—Determination of calcium tartrate, 67, 113—Malates and tartrates, 81, 226
- Ordway, J., and E. Kopp (see Kopp, E.)**
- Ore, bismuth (see Bismuth)—Chrome (see Chrome)—Chrome-iron (see Chrome-iron)—Copper (see Copper)—Deposits and their distribution in depth**, 94, 130, 154—Fahl (see Fahl-ore)—Flotation, physics of, 92, 288, 295—Gold (see Gold)—In sight, 86, 198—Iron (see Iron)—Manganese (see Manganese)—Nickel (see Nickel)—Reducer slag, determination of copper in, 35, 259—Reduction Company, 13, 24—Selenium (see Selenium)—Silver (see Silver)—Tin (see Tin)
- Ores**, analysis, 78, 227, 230, 205—And their gangues, separating, 10, 168—Antimony (see Antimony)—Antimony in, determination, 81, 178, 184—Arsenic in, estimation, 53, 302—Auriferous, and sodium amalgam, 13, 204—Auriferous, examination, 76, 322—Auriferous, gold from, 75, 149—Auriferous, treatment of, 70, 242—Bismuth (see Bismuth)—Cadmiferous-zinc, 81, 173—Chocolate nickel, (see Chocolate nickel)—Chrome (see Chrome)—Chrome iron (see Chrome)—Cobalt (see Cobalt)—Complex, containing zinc, metallurgical treatment, 42, 201—Containing metals, obtaining products therefrom, 4, 251—Containing metals, treatment, 5, 95—Copper (see Copper)—Copper in, 19, 185, 207, 221; 20, 107—Extraction of precious metals from, 46, 121—Gold (see Gold)—Gold telluride (see Gold telluride)—Hematite (see Hematite)—Iron (see Iron)—Iron in, determination, 46, 40; 47, 107; 56, 279—Lead (see Lead)—Lead in, determination, 30, 187; 87, 40, 52, 66; 98, 105—Manganese (see Manganese)—Mutual attraction of, 45, 265—New Caledonian, cobalt in, 82, 66—Nickel (see Nickel)—Nickel in, estimation, 54, 300—Phosphorus in, determination, 66, 324—Platinum (see Platinum)—Process for finding traces of chromium in, 11, 130—Refractory, electrical furnace for reducing, 52, 245; 53, 64—Separation and determination of arsenic and antimony in, 80, 259—Silver (see Silver)—Smelting, 7, 34—Smelting, oven for, 22, 47—Sulphide (see Sulphide)—Sulphur (see Sulphur)—Sulphur in, detection, 28, 227—Sulphur in, estimation, 74, 180, 224; 78, 254—Tantalum (see Tantalum)—Telluride (see Telluride)—Tellurium (see Tellurium)—Tellurium in, 28, 227—Tin (see Tin)—Tin in, estimation, 2, 142—Treating, 1, 33; 8, 21—Treating, by electrolysis, 49, 69—Treating to obtain metallic oxides for dyeing, printing, and painting, 1, 189—Treating to obtain metallic substance, 1, 176—Tungsten in, estimation, 85, 184—Unroasted, oxygen in, 67, 86—Uranium (see Uranium)—Vanadium (see Vanadium)—Vanadium in, detection, 55, 191—Working, 6, 215—Zinc (see Zinc)—Zinc in, determination, 45, 264; 63, 36
- Oreide**, 19, 96
- Organic appearances in colloid silica obtained by dialysis**, 17, 175, 195—Base containing phosphorus, 88, 59—Base from sugar, 25, 299—Base, in animal organism, 38, 244—Bases, action on ethyl esters of olefinic dicarboxylic and olefinic-8-ketocarboxylic acids, 87, 115, 247—Bases, action on olefinic ketonic compounds, 90, 182, 250—Bases and chloride of bismuth, compounds, 85, 20—Bases and haloid salts of mercury, compounds, 43, 257—Bases and mercuric chloride, compounds, 38, 35—Bases and oxygenated salts, combinations, 77, 213—Bases and their salts, electrocapillary properties, 85, 312—Bases, behaviour of cerium, lanthanum, neodymium, praseodymium, thorium, and zirconium toward, 89, 15, 27—Bases for colouring matters, 22, 180—Bases in commercial amylic alcohol, 46, 268—Bases, investigation with, 66, 33—Bases, iodides of, 17, 83—Bases, new series, 9, 188—Bases, periodides of, 11, 220—Bases, phosphotungstic acid as a precipitate for, 29, 74—Bases, precipitation and separation by weak, 89, 43, 63, 76, 88, 103—Bodies, absorption spectra, 43, 126—Bodies, action of chloro-chromic acid on, 35, 55—Bodies, action of the couple on, 28, 323—Bodies, action of high temperatures and vapours of carbolic acid on, 40, 215—Bodies, action of mercury oxide on, 83, 167—Bodies and electrolytes, determinations of dielectric constants of, 77, 13, 25, 37—Bodies and hydroferrocyanic acid, compounds, 88, 59—Bodies, capacity for combining with mercuric sulphates, 78, 242—Bodies, chemical constitution, 41, 208; 43, 82, 83; 45, 188, 208—Bodies considered in a gaseous state, refraction of, 37, 264—Bodies containing halogens or nitrogen, analysis, 39, 228—Bodies containing nitrogen, analysis, 40, 308; 41, 191—Bodies, decomposition by effluve, 48, 59—Bodies, detection and discrimination by means of their optical properties, 9, 212, 220, 283, 296—Bodies, detection of nitrogen in, 51, 84—Bodies, determination of nitrogen in, 48, 118—Bodies, estimation of halogen elements in, 89, 82—Bodies, fused, variations of temperature accompanying solidification of, 85, 144—Bodies, influence on iodometric determinations, 58, 197—Bodies, maximum density of aqueous solutions of, 90, 111—Bodies, melting point, 42, 36—Bodies, metallisation to render them fit to receive galvanic deposits, 34, 9—Bodies, molecular refraction of liquid, 54, 213—Bodies, oxidation, 14, 247—Bodies, phosphorescent, 35, 95, 124—Bodies, rotatory polarisation power of, relation existing between, 25, 38—Bodies, solubility, 43, 25—Bodies, study of, 66, 161—Bodies, sulphur in, detection, 41, 101—Bodies, sulphur in, oxidation, 62, 48—Bodies, synthesis, 9, 196—Bodies,

- vapour densities of, **40**, 142 — Calcareous substances (*see* Calcareous) — Combustions, improvements in, **62**, 281 — Compound (*see* Compound) — Halogen compounds (*see* Compounds) — Haloid derivatives, **65**, 204 — Impurity in water, determination, **6**, 307 — Matter (*see* Matter) — Nitrogenous compounds (*see* Nitrogenous) — Nutrients in animal body, substitution values, **49**, 242 — Preparations (*see* Preparations) — Products, natural and artificial, distinction between, **32**, 83 — Products, natural, molecular dyssymmetry of, **5**, 107, 119, 133, 149, 160, 203, 231, 248, 266 — Reactions (*see* Reactions) — Silico- (*see* Silico-organic) — Solids (*see* Solids) — Solvents (*see* Solvents) — Substances (*see* Substances) — Syntheses (*see* Syntheses) — Synthes- (*see* Synthesis) — Systems, binary fusion-point of, **64**, 224 — Thio-compounds (*see* Thio-compounds)
- Organism**, animal (*see* Animal) — Arsenic in, **87**, 130 — Human (*see* Human) — Nitrifying, in soil, distribution of, **54**, 288, 320 — Nitrifying, isolation of, **61**, 115 — Pathogenic, **68**, 86 — Presence of alcohol in, **36**, 183
- Organisms**, action of argon on, **71**, 269 — Animal (*see* Animal) — Living, behaviour of azoimide with, **64**, 276, 288, 300 — Micro- (*see* Microorganisms) — Vegetable, estimation of fatty bodies in, **63**, 19; **65**, 126 — Vegetable, methyl methylanilate in, **86**, 233
- Organic acetones** (*see* Acetones)
- Organo-halogen-magnesian derivatives**, action of oxygen on, **90**, 11
- Organo-magnesium bromides**, effect of anhydrides on, **90**, 276 — Compounds, action of ethyloxalyle on, **87**, 209 — Compounds, action of sulphur on, **89**, 227 — Compounds, action on amides, **88**, 188 — Compounds, action on bodies with a nitrated function, **88**, 188 — Compounds, action on bromophenol, **89**, 262 — Compounds, action on ketonic ethers, **85**, 221 — Compounds, action on 2-methyl-4-pentane, **100**, 84 — Compounds, action on phthalimide and phenylphthalimide, **89**, 244; **90**, 70 — Compounds, aromatic, **83**, 276 — Compounds, formation of peroxides in oxidation of, **99**, 264 — Compounds, mixed, **83**, 154 — Compounds, mixed, action of ethers of monobasic fatty acids on, **83**, 118 — Compounds, mixed, action of phosgene on, **87**, 226 — Compounds, mixed, action on amine compounds, **87**, 192 — Compounds, mixed, action on ethers of ketonic acids, **86**, 245 — Compounds, mixed, action on imides, **94**, 195 — Compounds, mixed, action on trioxymethylene, **85**, 71 — Compounds, mixed, decomposition, **87**, 311 — Compounds, mixed, use in analytical operations, **89**, 139 — Compounds of mono- and di-halogen aromatic hydrocarbides, action of sulphur on, **89**, 251 — Compounds, reactions of, **83**, 202 — Compounds, secondary reaction of halogen, **92**, 105 — Derivatives, action of imino-ethers and imino-chlorides on, **93**, 187 — Derivatives, action on acetol and its ether salts, **88**, 293 — Derivatives, aromatic, abnormal fixation of trioxymethylene on to, **88**, 244 — Derivatives, aromatic, action of chlorides of phosphorus on, **90**, 281 — Ethers (*see* Etheroorganicmagnesium) — Halides (*see* Halides)
- Organo-metallic bodies**, **2**, 25 — Bodies, forming, new method, **13**, 113 — Bodies of the C_nH_{2n} series of hydrocarbons, **29**, 118 — Compounds, **67**, 311; **70**, 50; **92**, 190 — Compounds, action of ethers of bilasic acids on, **83**, 202 — Compounds, new class, **95**, 163 — Compounds of magnesium, **83**, 202 — Compounds of magnesium, action of chlorides of acids and anhydrides of acids on, **83**, 179 — Compounds, reducing properties, **97**, 167 — Derivatives, **78**, 12 — Derivatives, action on ether salts, **83**, 142 — Derivatives, reactions, **83**, 60, 142; **85**, 37, 155 — Radicles (*see* Radicles)
- Organo-tin compounds containing halogens**, **87**, 253
- Organo-zinc compounds**, action on nitriles and their analogues, **41**, 270 — Action on quinones, **39**, 261; **41**, 170
- Orient**, geological studies concerning, **22**, 202
- Oriental jargon** (*see* Jargon)
- Orientation of living bacteria**, influence of induction currents on, **73**, 233
- Origanene**, **97**, 235
- Origanum hirtum oil** (*see* Oil)
- Orioli, M.**, Bleaching of wood pulp, **19**, 9 — Hypochlorite of alumina, **2**, 215
- Orion**, spectrum of great nebula in, **11**, 136
- o-Orionis**, origin of certain lines in spectrum of, **100**, 8
- Orlaf, N. A.**, Existence of the blue or green modification of sulphur, **87**, 215
- Orlof, E.**, Use of sulphate of hydrazine in analysis, **88**, 257
- Orlow, Georg**, Preparation of ethylene from carbon monoxide and hydrogen, **99**, 240
- Orlowski, A.**, Detection of cadmium in presence of copper, **47**, 13 — Detection of cuprous oxide in presence of cupric oxide, **47**, 24 — Replacement of hydrogen sulphide by ammonium hyposulphite in systematic qualitative analysis, **48**, 118
- Ormandy, W. R., and T. Ewan** (*see* Ewan, T.)
- Orme, T. A.**, Double iodides and chlorides, **30**, 205 — Equivalence and quantivalence, **19**, 236 — "Matriculation Chemistry" (review), **66**, 183 — "Rudiments of Chemistry" (review), **53**, 190
- Ormerod, Ernest**, Interaction of nitroformazyl, carbonbisulphide, and potassium hydroxide, **94**, 59 — Note on preparation of ethyl acetonediacarboxylate, **94**, 59
- Ormerod, E., and P. F. Frankland** (*see* Frankland, P. F.)
- Orndorff, W. R., and E. Salkowski**, "Laboratory Manual of Physiological and Pathological Chemistry" (review), **90**, 9
- Ornithine**, formation of putrescine from, **80**, 196
- Orometric dial** (*see* Dial)
- Orosolun**, **30**, 83
- Oroxilin**, **83**, 295
- Orpiment**, analysis, **66**, 6 — Commercial, **53**, 178
- Orr, J. B.**, Curious actinic phenomenon, **44**, 12
- Orr, T. W., G. G. Henderson, and R. G. J. Whitehead** (*see* Henderson, G. G.)
- Orsat, M.**, Apparatus for analysis of gaseous mixtures, **28**, 227 — Apparatus for gas analysis, **33**, 43
- Orsat's apparatus** for analysis of chimney gases, **64**, 74
- Orsman, W. J., jun., and W. J. Russell**, Relation of cobalt to iron, **59**, 93
- Orthite** from Swampscot, Massachusetts, **6**, 15
- Orthamidobenzoic acid** (*see* Acid)
- Orthamidoparasulphotoluic acid** (*see* Acid)
- Orthaminophenol**, new colouring matter from, **40**, 46
- Orthamidosulphonic acid** (*see* Acid)
- Orthamidobenzoic acid** (*see* Acid)
- Orthaminophenol**, diacetyl- (*see* Diacetylorthosaminophenol)
- Orthoanisidin and amidodimethylhydroquinone**, **44**, 83 — Dinitro- (*see* Dinitro-orthoanisidine) — Paranitro- (*see* Paranitroorthoanisidine)
- Orthoantimonates of potassium** (*see* Potassium)
- Orthoarsenic acids** (*see* Acids)
- Orthozobenzoic acid** (*see* Acid)
- Orthoazophenetol, nitro.** (*see* Nitroorthoazophenetol)
- Orthobenzoin aldehyde** (*see* Aldehyde) — Sulphinide (*see* Sulphinide)
- Orthobenzoquinonediazides**, action of hydroxylamine on, **95**, 309
- Orthobenzoyl, dimethylamidodithethyl-amido-** (*see* Dimethylamidodithethylamidobenzoyl)
- Orthobenzylated dyes** (*see* Dyes)
- Orthobenzylbenzoic acid** (*see* Acid)
- Orthobetaoxynaphthyl acid** (*see* Acid)
- Orthobromophenols**, **97**, 116
- Orthobromotoluol, sulphoacids of**, **23**, 95
- Orthobutylate of calcium** (*see* Calcium)
- Orthocarbonyl azoics** (*see* Azoics)
- Orthochloroaniline**, preparation, **83**, 117
- Orthochlorobenzoic acid** (*see* Acid)
- Orthoclase**, weathering of, **45**, 142
- Orthocresol carbonate**, transformation into a homologue of phthalein of orthocresol, **79**, 47, 227
- Orthoceanobenzenesulphonic acid** (*see* Acid)
- Orthocyclohexanediol and derivatives**, **87**, 119
- Orthocymene derivatives**, **92**, 233
- Orthodiamines**, action of quinones on, **93**, 91 — Condensation of cetic ether with, **85**, 155
- Orthodiamine compounds**, preparation, **98**, 47
- Orthodiazine**, synthesis, **87**, 118
- Orthodibenzoylbenzene, amide derivatives**, **97**, 288
- Orthodiketones**, coloured reactions, **57**, 222
- Orthodimethoxybenzoin**, preparation, **83**, 222
- Orthonitro compounds**, **35**, 39
- Orthodinitrobenzol**, **31**, 109
- Orthoditolyltartaric acid** (*see* Acid)
- Orthoformic ether** (*see* Ether)
- Orthohydroxyacetophenone in Chione glabra**, **78**, 313
- Orthohydroxyphenylazoisimide**, **96**, 231
- Orthoidotoluene dichloride**, action of heat on, **95**, 78
- Orthomonochlorobenzoic acid** (*see* Acid)
- Orthomonoiodobenzoic acid** (*see* Acid)
- Orthonitril derivatives**, **40**, 216
- Orthonitroaniline**, action of quinones on, **93**, 91
- Orthonitrobenzoic aldehyde** (*see* Aldehyde)
- Orthonitrobenzoylactic acid** (*see* Acid)
- Orthonitrobenzoyl chloride**, preparation of crystallised, **83**, 252
- Orthonitrobenzoylacetylene ethers** (*see* Ethers)
- Orthonitrobenzyl alcohol** (*see* Alcohol)
- Orthonitrocinamic acid** (*see* Acid)
- Orthonitrodichlorophenol and isomeric dichlorophenol**, **20**, 180; **21**, 252
- Orthonitrodiphenylmethane**, alkaline reduction, **99**, 96
- Orthonitrooxyphenylacetic acid** (*see* Acid)
- Orthonitroparasulphamide-1.2.4, toluene-** (*see* Tolueneorthonitroparasulphamide-1.2.4)
- Orthonitrophenol, benzeneazo-** (*see* Benzeneazoorthonitrophenol)
- Orthonitrophenoxylacetic acid** (*see* Acid)
- Orthonitrophenylhydrazin**, action of alkalis on, **71**, 95
- Orthonitrotoluene**, oxidation, **90**, 148
- Orthonitrotoleol**, **22**, 23, 202
- Orthooxyazo-compounds**, bromination, **83**, 32
- Orthoparamidophenol, benzoyl derivatives**, **35**, 124
- Orthoparadinitrosulphobenzoic acid** (*see* Acid)
- Orthoparatoluidin derivatives**, **41**, 251
- Orthopervanadates**, **100**, 108
- Orthophenoxycarbonate of phenyl** (*see* Phenyl)
- Orthophenoxycarboxylic acid** (*see* Acid)
- Orthophenylendiamine**, action of ferri chloride upon, **50**, 189
- Orthophosphate, acid monosodic**, **85**, 191 — Of aluminium (*see* Aluminium) — Of barium (*see* Barium) — Of didymium (*see* Didymium) — Of potassium (*see* Potassium)

- Oxazolone, triphenyl- (see Triphenyl-oxazolone)
- Oxen, composition, **3**, **296**, **326**
- Oxobenaminin, **58**, **203**
- Oxethyl, strychnine- (see Strychnine-oxethyl)
- Oxethylcrotonic acid (see Acid)
- Oxford, Chemical Professorship at, **12**, **254**, **277**—Science scholarships at, **30**, **273**—University, **8**, **157**; **10**, **138**; **12**, **143**; **13**, **106**; **29**, **73**; **34**, **185**; **44**, **149**; **46**, **127**; **50**, **151**; **52**, **143**; **56**, **118**; **58**, **136**; **60**, **136**; **62**, **140**; **64**, **128**; **66**, **124**; **68**, **112**; **70**, **124**; **72**, **113**; **74**, **124**; **76**, **122**; **78**, **110**; **80**, **98**; **82**, **134**; **84**, **110**; **86**, **110**; **88**, **110**; **90**, **121**; **92**, **117**; **94**, **109**; **96**, **109**; **98**, **133**; **100**, **133**
- Oxydriles, phenolic, influence of, **82**, **107**
- Oxichloride, mercuric, crystalline, **63**, **226**
- Oxidability of tin (see Tin)
- Oxidants, action on nitrified bodies, **77**, **225**
- Oxidase, **73**, **293**
- Oxidases, chemical constitution, **76**, **35**
- Oxidation, **76**, **34**, **82**—And hydration under influence of free oxygen and light, **80**, **243**—And reduction, change of weight accompanying, **23**, **231**; **32**, **60**—Atmospheric, influence of radium radiations on, in presence of iron, **90**, **168**—Atmospheric, of β -methylhydrindone, **99**, **82**—By chromic acid in presence of other acids, **88**, **221**—By fluorine set free by electrolysis, **88**, **210**—By means of charcoal, **15**, **183**—By means of manganese, active influence of albumenoid matter on, **89**, **83**—Catalytic, of hypophosphorous acid by copper, **99**, **168**—Direct, investigations on hydroxylation by, **48**, **104**—Electrolytic, **94**, **44**—Experiments, **71**, **294**; **73**, **59**—In presence of iron, **80**, **166**—In soils (see Soils)—Lecture experiment to illustrate simultaneously three stages of, **99**, **146**—Limited, quantitative analysis by, **15**, **44**—New method, and new explosive, **27**, **219**—Of certain compounds, **36**, **254**—Of side-chain, influence of substitution in the nucleus on rate of, **89**, **80**; **95**, **283**—Phenomena of, **1**, **58**—Phenomena produced by iodine and bromic acids, **97**, **299**—Physiological, **46**, **208**—Products of pinene, **97**, **93**—Products of sitosterol, **98**, **267**—Rapid, behaviour of metals when subjected to, **39**, **217**, **238**—Rapid, new application, **40**, **13**—Reactions, acceleration by prussic acid, **93**, **166**—Researches on hydroxylation by, **48**, **183**—With nitric oxide, **94**, **256**
- Oxidations and reductions, table of, **38**, **227**; **39**, **41**—By means of electric current, **59**, **293**—Due to air, **94**, **36**—Of hydrocarbons of benzene series, **98**, **241**—Slow, in presence of moisture, **93**, **90**—With silver peroxide, **93**, **31**
- Oxide, action on solutions of salts of other metals, **84**, **36**—Conversion of cadmium into, **1**, **266**—Determining presence in qualitative analysis, **90**, **33**—Determination, **71**, **108**—Removal from melted copper and copper alloys, **75**, **97**—Spent, analysis, **69**, **2000**—Spent, recovery of sulphur from, **48**, **204**—Spent, valuation, **29**, **30**
- Oxide, argentous, **46**, **11**; **47**, **81**—Salts of, **63**, **236**
- Oxide, arsenious, compounds, **59**, **58**—In Paris green, determination, **85**, **15**—Solutions, **64**, **27**
- Oxide, auroso-auroic, solubility in water, **91**, **222**
- Oxide, aurous, salts of, **48**, **57**
- Oxide, benzylethylpropylsilicil (see Benzylethylpropylsilicil)
- Oxide, bichlormethyl (see Bichlormethyl)
- Oxide, bismuthous, cubical form, **59**, **57**
- Oxide, bromcarbon (see Bromcarbon)
- Oxide, carbonic, absorption by alkalis, **5**, **144**—Absorption by means of blood, **45**, **288**—Absorption by melted hydrogen, **15**, **31**—Action of metallic powders on, **88**, **215**—Action of steam on, **52**, **314**—Action on alkaline alcohols, **13**, **83**—Action on barium-ammonium, **89**, **14**—Action on dissolved ferrocyanide of potassium, **81**, **3**—Action on ferrocyanide of potassium in solution, **87**, **55**—Action on manganese-cobaltic, chromo-, and platino-cyanides of potassium, **87**, **124**—Action on palladous chloride, **77**, **140**—Action on plants, **47**, **191**—Action on sodium ethyl, **12**, **303**; **13**, **42**—Action on water-vapour at a red heat, **94**, **36**—And hydrogen, affinity manifested in slow oxidation under influence of platinum-black, **35**, **116**—And hydrogen, condensation by electric effluvia, **27**, **233**—And

- hydrogen, relative affinity of oxygen for, 36, 230; 40, 11—And iron, compounds, 83, 228—And iron, volatile compound of, 63, 301; 64, 20—And other elements, compounds, thermic formation, 38, 231—And oxygen, explosion, 46, 151—And silver, 83, 35—As an agent for preservation of meat, 42, 122—Cementation of iron by, 10, 105, 206—Combustion in oxygen under great pressure, 18, 220—Compressibility between one atmosphere and half an atmosphere of pressure, 89, 86—Condensation, 37, 40—Conversion into carbonic acid, 77, 212—Dangers and detection, 5, 237—Decomposition, 79, 95, 117, 190, 306; 80, 34, 269—Decomposition in blast furnace, 89, 180—Density, 76, 315—Dissociation, 10, 285; 11, 2, 90—Do leaves of plants exhale? 11, 44—Effect of metallic substances on, 23, 258, 267—Electric decomposition, 27, 178—Estimating, 79, 117, 241—Explosion, 46, 151—Explosion of chlorine peroxide with, 75, 259—Formation, 8, 288—Fractional combustion, 88, 244—Haemoglobin, 45, 67—In air, detection and estimation, 5, 209; 74, 188; 77, 188; 93, 56, 81—In air, detection, chloride of palladium for, 77, 212—In air, determination, 45, 288—In products of combustion of coal gas, 41, 146—Poisoning by, 12, 58—Poisonous action, and presence in houses, 45, 244—Poisonous effects, 5, 212—Preparation, 20, 60; 43, 23—Reaction of reagents on, 77, 200—Reactions of, 75, 276—Reactions of sulphate and sulphide of lead with, 6, 107—Reduction of carbonic acid to, 29, 153—Reduction of iron oxide by, 91, 58—Solution in acid cuprous chloride, 40, 88—Sources of, 33, 170
- Oxide, chlorocarbonic, action of ethylene glycol on, 49, 113—Action on derivatives of sulphonic and sulphinic acids, 73, 17
- Oxide, chromic, 39, 106—Chromate of, 22, 288—Crystalline, 16, 24—Detection, 59, 109—Determination, 66, 193
- Oxide, cupreous, 25, 4
- Oxide, cupric, ammoniacal, 85, 312—Ammoniacal, displacement of strong bases by, 86, 36—Decomposition by heat, 50, 213—Detection of cuprous oxide in presence of, 47, 24—Oxidising action, 40, 180—Use of, 33, 5
- Oxide, cuprous, detection in presence of cupric oxide, 47, 24—Determination, 64, 225—In alkaline electrolytes, electromotive behaviour, 100, 287—In copper, 36, 241—In copper and its alloys, 100, 233—Preparation, 68, 308
- Oxide, cyclohexanediol-1,2-ethylene (see Cyclohexanediol-1,2-ethyleneoxide)
- Oxide, dimethyl ethylene, symmetric, 96, 161
- Oxide, diphenyl silicon (see Diphenyl)
- Oxide, diphenyleneketone- (see Diphenyleneketoneoxide)
- Oxide, diphenyl- (see Diphenyloxide)
- Oxide, ethyl ether- (see Ethyl)
- Oxide, ferric, and alumina, mutual action at incipient white heat, 84, 305; 85, 24, 47—And alumina, separation, 25, 277; 44, 226; 51, 165—And alumina, separation from manganese, 40, 33—And its hydrates, 87, 84—And lime, precipitation by ammonia, 35, 238—And lime, separation, 25, 277—And magnesia, separation, 25, 277—And phosphoric acid, separation, 25, 277—And potassa and soda, separation, 48, 110, 111—Determination, 28, 44; 54, 73; 58, 72; 60, 98; 61, 181; 62, 249; 63, 146; 65, 234—Determination of alumina in presence of, 46, 12—Estimation of ferrous oxide in presence of, in siliceous minerals, 22, 2—Estimation of iron as, 38, 157—Hydrated, 47, 70—Hydrated, saline impurities retained by, 37, 26—Ignited, dissolution, 38, 11—Magnetic, 7, 209—Properties at high temperatures, 35, 12—Reactions upon certain sulphates at high temperatures, 50, 272; 51, 50—Rehydration of, 47, 239
- Oxide, 2,1-ferroferrie, 95, 299
- Oxide, ferrous, determination, 46, 12; 47, 49—In siliceous minerals, estimation in presence of ferric oxide, 22, 2—In hydrochloric solution, volumetric determination by means of permanganate, 48, 119—In magnetite, determination, 100, 90—In potassium sulphocyanide, 60, 71—In silicates, determination, 39, 135—In silicates, estimation, 30, 169—In substances insoluble in acids, 22, 57
- Oxide, graphitic, formation, 99, 263
- Oxide, haemoglobin carbon (see Haemoglobin)
- Oxide, magnetic, coating on iron surfaces, new method, 39, 212
- Oxide, manganic, composition of hydrates of, 44, 71—Determination, 34, 19—Hydrate of, composition, 44, 71
- Oxide, mercuric, action on aqueous solutions of metallic salts, 83, 300—Dissociation, 79, 191—Reaction of iodine with, 86, 105—Reciprocal displacements of acids combined with, 46, 34—Use in analysis, 70, 192, 203
- Oxide, mercurous, 71, 269
- Oxide, mesitylenic, conversion into mesitylene, 17, 307
- Oxide, metallic, 8, 175, 183—Coating iron with, 37, 22—Reducing, new method, 68, 3
- Oxide, methylic, and hydrochloric acid, 32, 34
- Oxide, nickel carbon (see Nickel)
- Oxide, nitric, absorbents for, 47, 13—Absorption by ferrous bromide, 73, 217—Absorption by ferrous salts, 40, 143; 52, 189; 77, 268, 290—Absorption by sulphuric acid, 55, 28—Absorption in gas analysis, 78, 314—Action of electric sparks on mixtures of, 58, 130—Action on chromic dichlorhydride, 80, 292—Action on chromous salts, 90, 233—Action on ferrous chloride, 73, 59—Action on metals and metallic oxides, 66, 11, 24—Action on metallic chlorides, 72, 61—Action on nitrogen peroxide, 79, 234—Action on sodium ethylate, product of, 70, 264—And ferric chloride, addition derivatives of, 71, 294—And formene, liquefaction and solidification, 51, 202—And haematin, combination, 55, 272—And mercurous nitrate, reaction between, 52, 8—Ozone and hydrogen peroxide, thermic relations between, 95, 215—And potassium permanganate, behaviour, 47, 84—And silver nitrate, interaction, 78, 314—Autooxidation and oxidation with, 94, 256—Behaviour of stannous chloride towards, 52, 8—Behaviour with potassium permanganate, 47, 84—Compounds, 59, 277—Decomposition, 58, 155—Decomposition by pyroallate of potash, 35, 191—Density, 87, 151—Preparing, 45, 159; 71, 16; 83, 33—Reaction of copper-zinc couple on, 47, 277—Reactions of, 60, 121—Reduction, 73, 95—Reduction by moist iron or zinc, 71, 293—Thermic formation, 94, 172
- Oxide, nitrous, 23, 228, 239; 71, 173—Action, 47, 11—Action on metals and metallic oxides, 71, 173—And ethane, mixtures of, 71, 266—Analysis, 50, 300, 323—Boiling point, 67, 190—Decomposition, 47, 49—Density, 76, 315; 90, 153—Determination, 71, 108—Physical properties of pure, 69, 265—Preparation, 51, 72—Reduction by metals in presence of water, 71, 305—Salts, 37, 270—Salts, existence and formation, 23, 206—Solidification, 27, 103; 28, 170
- Oxide, phosphoric, preparation, 67, 106—Phosphorus, preparation, 84, 36—Sesquioxide (see Sesquioxide)—Silicio, composition of hydrates of, 44, 71—Silver per- (see Silver)—Silver sub- (see Silver)—Stannic, and tungstic acid, separation, 59, 73—Stannic, combinations, 55, 93—Stannic, composition of hydrates of, 44, 71—Stannic, precipitation, 46, 286—Stannic, solubility in hydrochloric acid, 40, 25—Stannic, variation of acid function in, 59, 289—Stannous, action of acid solutions on, 45, 152—Stannous, action of saline solutions on, 45, 163—Tellurous, reduction by grape sugar, 22, 312—Thallic, crystalline hydrate of, 60, 113—Titanic, distribution, 65, 65; 76, 221—Toluol di- (see Toluol)—Toluylen- (see Toluylenoxide)—Triaminotriphenylarsine (see Triaminotriphenylarsine)—Tri- (see Trioxide)—Tribenzylphosphine (see Tribenzylphosphine)—Triethylphosphine (see Triethylphosphine)—Uranic, and phosphoric acid, separation, 23, 315—Uranic, basic salts of, fluorescent relations, 29, 179—Uranic, preparation of pure, 11, 179—Uranic, recovery of pure, from test residues, 11, 179—Uranous, 86, 305—Uric, solubility in dilute hydrochloric acid, 17, 175—Xanthic, in guanos containing no uric acid, 6, 16
- Oxidehaemoglobin, carbonic- (see Carbonicoxidehaemoglobin)
- Oxides, acidic, action on salts of hydroxy-acids, 72, 266; 74, 253—Acidic, influence on specific rotations of lactic acid and potassium lactate, 85, 225—Action of potassium bimolybdate on, 46, 35—Action of sulphur on, 47, 190; 48, 12—Action of ultra-violet light on, 88, 263—Action on dissolved zinc and manganese chlorides, 57, 105—Action on salts, 37, 246; 39, 183; 44, 259—Alcoholic, preparing, 99, 118—Aluminic, and ferric, in manufacture of superphosphate, 25, 255, 268—And basic cinder in manufactured iron, 43, 100—And elements, densities of, 24, 21—And salts, hydration of, 44, 209—Anhydrous, action of carbon chloride on, 55, 81—At high temperatures, behaviour of, 61, 116; 69, 118—Basic, in iron, 43, 100—Chromic and ferric, and alumina, separation and determination, 44, 85—Cuprous, action of nitrous acid on, 3, 253—Determining, new way, 30, 121—Disulph- (see Disulphoxides)—Earth (see Earth)—Halogen ether (see Halogen)—Higher, action of hydrogen peroxide on, 5, 129—Higher, manufacture of salts of, 78, 165—Hydrated, chemical composition, 45, 131—Hydration, 44, 209; 49, 220—In cerite, samarskite, gadolinite, and fergusonite, 69, 17, 46, 55, 66—Magnetic, action of high temperatures on, 69, 26—Magnetic, constitution, 67, 42—Metallic, absorption by plants, 46, 224—Metallic, action of ammonia persulphate on, 88, 83—Metallic, action of chlorine on, 5, 131—Metallic, action of halogens at high temperatures on, 37, 270—Metallic, action of sulphur chloride on, 99, 108—Metallic, action of sulphuretted hydrogen on, 94, 70—Metallic, action of sulphurous acid on, at high temperatures, 3, 282—Metallic, action on methyl alcohol, 100, 160—Metallic, action on primary alcohols, 98, 59, 83, 96—Metallic, and glycerin, compounds, 35, 197—Metallic, as oxidising catalysts, 94, 36—Metallic, auto-reduction in

- oathode light vacuum, and volatility of corresponding sulphides **97**, 48—Metallic, behaviour towards fused boron anhydride, **88**, 279—Metallic, crystallisation, **20**, 70—Metallic, determining presence in qualitative analysis, **91**, 11—Metallic, direct fixation, **72**, 281—Metallic, electrical conducting power, **23**, 281—Metallic, for dyeing, printing, and painting, treating ores to obtain, **1**, 180—Metallic, method for reducing, **68**, 3—Metallic, new series, **8**, 248—Metallic, oxidation of sulphurous acid to dithionic acid by, **84**, 287—Metallic, process for dissolving, **74**, 9, 109—Metallic, reducibility of, **79**, 110—Metallic, reduction by aluminium carbide, **92**, 244—Metallic, reduction by hydrogen, **31**, 143; **41**, 92—Metallic, reduction of refractory, by aluminium, **81**, 219—Metallic, reduction with calcium hydride, **56**, 242—Metallic, rehydration of dehydrated, **40**, 238—Metallic, solubility in solutions of alkaline citrates, **8**, 260—Metallic, solution in fused caustic alkalis, **11**, 242—Metalloidal, action of sulphuretted hydrogen on, **94**, 70—Nitric, and formene, liquefaction and solidification, **51**, 202—Nitric, compounds of, **71**, 136—Nitric, determination in commercial iron mordant, **31**, 261—Nitric, formation of hyponitrites from, **51**, 188—Nitrous and nitric, action on alkaline ammoniums, **69**, 181—Of elements, **68**, 1—Of magnesium series, **61**, 115—Of platinum group, dissociation of, **38**, 188—Of rare earths, **79**, 35, 143; **80**, 47—Rare, abundant source of some, **73**, 145—Reduction, **92**, 271—Reduction by hydrogen, **19**, 129—Reduction by means of metallic calcium, **95**, 206—Reduction of refractory, by carbon, **93**, 230—Sesquioxide, *see* Sesquioxides—Stability, **69**, 118—Sulph. (*see* Sulphoxides)—Transformation into chlorides, **89**, 2
- Oxidised nitrogen (*see* Nitrogen)
- Oxymer for hydroquinone, **96**, 11
- Oxidising agents, action on alkaline iodides, **82**, 35—Agents, action on aromatic compounds, **79**, 106—Agents, action on metals, **92**, 38—Agents, action on nitrogen compounds, **79**, 48—Agents, action on organic compounds in presence of excess of alkali, **17**, 127—Agents, action on silicohydroform, **99**, 209—Agents, magnesium permanganate as, **94**, 167—Agents, tincture of guaiacum as a test for, **79**, 11—And reducing agent, **27**, 105—Bacterium (*see* Bacterium)—Catalysts (*see* Catalysts)—Substances, new class of, **76**, 170—Value of alkaline persulphates and peroxide of hydrogen, **83**, 48
- Oxime, acet. (*see* Acetoxime)—Benzyl-phenylhydrazide (*see* Benzylphenylhydrazide)—Camphor. (*see* Camphor oxime)—Camphoryl. (*see* Camphoryloxime)—Formation and decomposition, **95**, 309—Formation in ketones, velocity of, **91**, 157—Hydroxylaminodihydroumbellone. (*see* Hydroxylaminodihydroumbelloneoxime)—Of amorphous phosphorus (*see* Compounds of phosphorus)—Of camphor, **95**, 309—Of camphorylhydrazide, *see* Camphoryloxime—Of glucose (*see* Glucose)—Of indigo (*see* Indigo)—Of mesoxamide (*see* Mesoxamide)—Of xanthone (*see* Xanthone)
- Oximes, **91**, 277—Bromocamphoryl (*see* Bromocamphoryloxime)—Formation, **85**, 112—Heat of formation, **91**, 158—Of benzaldehyde (*see* Benzaldehyde)—Of quinone. (*see* Quinone oximes)
- Oximide compounds, action of oxides of nitrogen on, **88**, 227—Compounds, preparation, **88**, 237
- Oximidobutyrate, ethyl di. (*see* Ethyl)
- Oximidoacetic ethers (*see* Ethers)
- Oximidoacetate, ethyl di. (*see* Ethyl)
- Oximine, hydrindon. (*see* Hydrindonoxamine)
- 4-Oximino-cyclo-hexane carboxylic acid (*see* Acid)
- α -Oximino-lactic acids. (*see* Acids)
- Oximino-group, configuration of, **93**, 307
- Oxalal nitroso. (*see* Nitrosooxalal)
- Synthesis, **38**, 9
- Oxisoacrylic acid (*see* Acid)
- Oxland, R. Ammoniacal manufacture of soda, **38**, 219—Beet root sugar, **17**, 84—Gun-cotton explosion, **24**, 111—Mandioea, **6**, 155—Purification of tin ores by means of wolfram, **18**, 251
- Oxonium derivatives, periodides of substituted, **82**, 238—Salts, anomalous inorganic, **96**, 305
- Oxonium dibromide, ether. (*see* Ether-oxonium)
- Oxuvitic acid (*see* Acid)
- Oxyacanthone, **4**, 41
- Oxyacetone, di. (*see* Dioxycetone)
- Oxyacid of sulphur (*see* Sulphur)
- Oxyacids, action of inorganic compounds on, **92**, 58—Electrolysis, **83**, 107—Ethers of, action of isocyanate of phenyl on, **85**, 49; **87**, 71—Ethers of non-saturated, action of benzylidene on, **79**, 203—Free, action of isocyanate of phenyl on, **88**, 47—Of glycolic series, oxidation of secondary, **35**, 241—Of iodine (*see* Iodine)
- α -Oxyacids, transformation into aldehydes, **97**, 119
- Oxyacrylic acid (*see* Acid)
- β -Oxyalcoyl and β -oxyalcohol ethylene acetones (*see* Acetones)
- β -Oxyalcoylised ethylenic ethers (*see* Ethers)
- Oxamidodisulphonates, **60**, 268
- Oxammonia, **13**, 182—Preparation, **21**, 57
- Oxammonias and phosphine bases, **26**, 256
- Oxyanthrachinon, *see* Anthracene—Oxyanthrachinon
- Oxyanthraquinon carbonic acid (*see* Acid)
- Oxyazocompounds, bromination, **82**, 31—Ortho. (*see* Orthooxyazo-compounds)
- Oxy-base of cyanmethine (*see* Cyanmethine)
- Oxybenzylbenzimidazole, **79**, 104
- Oxybenzaldehyd, par. (*see* Paroxybenzaldehyd)
- Oxybenzenes, di. (*see* Dioxibenzenes)
- Oxybenzoates, **95**, 215
- Oxybenzoic acid (*see* Acid)
- Oxybenzoin, de. (*see* Deoxybenzoin)—Des. (*see* Desoxybenzoin)—Orthodimeth. (*see* Orthodimethoxybenzoin)
- Oxybenzophenon, di. (*see* Dioxibenzo-phenon)
- Oxybenzylphosphinic acid (*see* Acid)
- Oxybromide, cupric, **63**, 75—Of magnesium (*see* Magnesium)—Of mercury (*see* Mercury)—Of phosphorus (*see* Phosphorus)
- Oxybromochloride of phosphorus (*see* Phosphorus)
- Oxybutyric acid (*see* Acid)
- Oxycamphene, benz. (*see* Benzoxycamphene)
- Oxycannabin, **24**, 77—From Indian hemp, **77**, 114
- Oxycarbide of cerium (*see* Cerium)
- Oxycarbanil and its alkyl derivatives, absorption spectra, **81**, 307
- Oxycellulose, **76**, 194, 249—Acetyl derivatives of, **82**, 219—And phenylhydrazine, **49**, 257—Colour reactions of, **80**, 11—Of cotton (*see* Cotton)—Of flax (*see* Flax)—Of hemp (*see* Hemp)—Of rush pulp (*see* Rush pulp)—Use for analytical purposes, **65**, 47
- Oxycelluloses, **86**, 306—Natural, **69**, 236
- Oxycellulosic osazones (*see* Osazones)
- Oxychloride and silicate cements, **90**, 194—Carbonic, preparation, **18**, 7—Crom. (*see* Cromoxychloride)—Ferric, crystalline, **64**, 250—Ferric, crystalline hydrate, **61**, 277—Mercuric, **95**, 67—
- Process, decolorisation by, **99**, 95—Sulphuric, action of ethylene on, **17**, 83
- Oxychlorides, **19**, 263; **50**, 296—And tungsten chlorides, **40**, 102—Hydrated cupric, from Cornwall, **11**, 114
- Oxychloro, derivatives of benzene (*see* Benzene)
- Oxyinchonine, **9**, 64; **59**, 265; **71**, 49
- Oxycobaltamines and anhydroxycobaltamines, **77**, 201
- Oxy compounds, colouring matters from aromatic, **31**, 31
- Oxyerconic acid (*see* Acid)—Lactone (*see* Lactone)
- Oxyecyclohexane rosanilines, tetra. (*see* Tetraoxycyclohexane)
- Oxycymol and thiooxymol, **23**, 20
- Oxydase, schin. (*see* Schinoxydase)
- Oxydases, chemical, **92**, 101—Manganous salts as, in presence of a colloid, **89**, 110
- Oxydase phenomena produced by colloidal iron ferrocyanide, **98**, 280
- Oxydibenzalacetone, **79**, 122
- Oxydimorphine, detection, **53**, 24
- Oxydiphenylmethan, di. (*see* Dioxidiphenylmethan)
- Oxyethers, ethylamine produced from, **3**, 35
- Oxyethylamines, preparation, **79**, 117
- Oxyethylendisulphonic acid (*see* Acid)
- Oxyferrocyanide of ammoniacal copper, **39**, 277
- Oxyferrocyanides, **92**, 57
- Oxyflavone, synthesis of, **79**, 106
- Oxyfumaric ethers (*see* Ethers)
- Oxygon, **10**, 21, 44, 49, 73, 97; **45**, 125; **49**, 105; **87**, 161—Absorbent for, **51**, 238—Absorption by alkali vanadates, **91**, 224—Absorption by leaves detached from plants, **69**, 49, 71—Absorption by pyrogallate of potash, **77**, 249—Absorption spectra of, **52**, 319; **54**, 19; **55**, 45; **58**, 163; **60**, 75—Action of electric effluve upon, **49**, 189—Action of light on moist, **60**, 255—Action on acid chlorides and analogous compounds, **37**, 195, 203—Action on alcoholic liquors, **74**, 184—Action on aliphatic amines in presence of copper, **93**, 117—Action on ammonia in contact with oxides, **5**, 89—Action on anatomic elements, **37**, 123—Action on aniline, **3**, 98—Action on animals, **9**, 71—Action on barium-ammonium, **89**, 14—Action on benzene, **44**, 219—Action on caesium-ammonium, **92**, 10—Action on dibenzyl ketone, **80**, 239—Action on dissolved formic aldehyd, **77**, 45—Action on nitrate of copper in state of tension, **25**, 193—Action on organo-halogen-magnesium derivatives, **90**, 11—Action on perchloride of phosphorus, **3**, 47—Action on pyrogallic acid, **25**, 299; **26**, 181—Action on rubidium-ammonium, **98**, 47—Action on selenurea, **51**, 311—Action on sodammonium and potassium-ammonium, **68**, 13—Action on sulphide of carbon, **77**, 248—Action on vegetable infusions, **25**, 275—Action on wine, **8**, 249—Activation of, **48**, 105—Active and ordinary, difference between, **10**, 73—Active, in air, **20**, 35—Active, in barium binoxide, **41**, 215—Active, in organic persulphates, determination, **90**, 233—Activity of, **46**, 121—Affinity for chlorine, bromine, and iodine, **27**, 283—Affinity for metals, **38**, 120—Affinity for sulphur, selenium, and tellurium, determination, **27**, 305—Affinity of bromine for, **27**, 321—Affinity of hydrogen for, **25**, 34—Affinity to hydrogen and carbonic oxide, **36**, 230—Alcoholic ferments in med'a free from, **35**, 164—Analogy of cyanogen to, **33**, 141—And air, combustion of sulphur in, **96**, 236—And air, electrolysis of, as a means of producing ozone, **21**, 298—And argon, isothermal distillation, **93**, 67—And carbon and hydrogen, chemical equilibrium between, **21**, 143, 169, 214—And carbon

and hydrogen, thermo-chemical relations, 93, 37; 98, 46, 82—And carbon combination-heats, 48, 117—And carbon dioxide, simultaneous development among the Cactaceae, 63, 188—And carbon monoxide, action of ultra-violet light on moist and dried mixtures of, 92, 297—And carbon monoxide, combining volumes of, 89, 223—And carbon monoxide, union, 88, 287—And carbonic oxide, condensation, 37, 40—And carbonic oxide, explosion, 46, 151—And chlorine, heat evolved when boron combines with, 21, 70—And chlorine, heat evolved when silicon combines with, 21, 82—And chlorine gases, obtaining, 8, 168—And concentration, influence on fermentation, 65, 116—And dry carbon monoxide, influence of nascent state on combination, 81, 114—And fluorine, causes of the analogy between, 89, 49—And halogens, 90, 191—And halogens, reciprocal displacements of, 39, 199; 60, 251—And halogens, relative affinities and reciprocal displacements of, combined with metals, 37, 152—And halogens, valency of, 85, 133—And heat, combustion of organic matter under double influence of, 34, 9—And hydrazic, simultaneous action on selen-urea, 51, 311; 52, 47—And hydrocarbons, interaction of well-dried mixtures, 93, 149—And hydrochloric acid, action of a mixture of, on metals, 89, 33—And hydrochloric acid, chlorating properties of a mixture of, 86, 35—And hydrogen and silicon, compounds, 8, 171, 182—And hydrogen, combination, 67, 195—And hydrogen, combination under influence of electric eflaves, 44, 315—And hydrogen, combination under influence of silent discharge, 45, 186—And hydrogen combination, influence of finely divided platinum on, 81, 292—And hydrogen compounds, combination-heats of, 50, 235—And hydrogen occlusion by palladium, 76, 317—And hydrogen, occlusion by platinum black, 72, 33—And hydrogen, heat evolved by union in closed vessels, 25, 241—And hydrogen, properties, 23, 60—And hydrogen, ratio of atomic weights of, 79, 268—And hydrogen, relative densities, 57, 73; 65, 200, 206—And hydrogen, relative values of weights of, 58, 7, 17, 33, 83—And hydrogen, union, 85, 128—And nitrogen, coefficients of absorption of, in distilled water and sea-water, 99, 250—And nitrogen compounds, 80, 83—And nitrogen compounds, additive compounds of anhydrous magnesium bromide with, 90, 21—And nitrogen in atmospheric air, results for mean ratio of oxygen to sum of, 45, 283—And nitrogen, insulating power of liquid, 52, 70—And nitrogen, isothermal distillation, 93, 67—And nitrogen, mixtures of liquid, 94, 256—And nitrogen, twofold spectra, explanation, 71, 169—And nitrogen vapour, specific volumes at boiling point of oxygen, 85, 73—And other gases, influence of silent discharge on, 68, 151—And oxyhydrogen gas, 25, 274—And phosphorus, reaction between, 88, 253—And pyrogallol, reactions developed between, 78, 71—And silicon, compounds, 8, 171—And silver, union, 83, 35—And sulphur, 90, 191—And sulphur, affinity for metals, 36, 120—And sulphur and the halogens combined with hydrogen, reciprocal displacement between, 38, 264—And sulphur, fixation on benzoin and toluen, 37, 203—And sulphur dioxide, combination, 81, 114—And water, mutual behaviour of, 29, 176—Apparatus for preparation of pure, 95, 58—As antidote for ether and chloroform, 2, 72—Asymmetric, 89,

295—Atmospheric, action on para-coutchouc, 93, 128—Atmospheric, function in destruction of animal and vegetal substances after death, 7, 280—Atomation at elevated temperatures, 49, 237—Atomic volume, 53, 274—Atomic weight, 23, 72; 49, 37; 53, 245, 272; 62, 283; 63, 197; 65, 311; 66, 149; 71, 263; 89, 261; 91, 219; 93, 55; 93, 69; 100, 278—Atomicity of, 9, 117, 157—Basic properties, 89, 205; 90, 251—Basic properties at low temperatures, 91, 103, 197—Behaviour of fluorine to wards, in arc and induction spark, 99, 240—Boiling, use as a refrigerating agent, 50, 69—Boiling-point under pressure, 49, 255—Burning in hydrogen or coal-gas, 19, 154—Cheap, 25, 143—Combinations of Grignard and Baeyer, isomerism in, 95, 58—Combustion in ammonia, 38, 227; 58, 27—Combustion of carbon by, 25, 81—Combustion of hydrogen and carbonic oxide in, 18, 62—Compounds, chemistry of, 93, 187; 95, 249—Compounds of molybdenum, 63, 200—Compounds of nitrogen, 29, 82—Compounds of nitrogen, formation in production of ozone, 100, 160—Compounds of nitrogen in atmospheric air, 4, 285—Compounds of phosphorus, 62, 296—Compounds, reduction, 64, 216—Compounds, thermal constants of organic, 97, 253—Compressed, impurities of, and their effect on combustions in calorimetric bomb, 86, 293—Compressed, use of, 65, 119—Compressibility, 42, 294—Compressibility between one atmosphere and half an atmosphere of pressure, 89, 86—Consumption of, and excretion of carbonic acid in man, 36, 104—Containing ethyl compounds, 25, 263—Contributions to knowledge of, 11, 25—Conversion into ozone, 93, 187—Cost of, 3, 192—Critical point of, 48, 117—Cure of gangrene by, 7, 306—Density, 62, 98; 64, 84; 74, 292; 90, 82—Determination, 74, 199—Discovery of, 14, 251; 53, 250—Discovery of, and the "Encyclopædia Britannica," 75, 311—Disengagement from green twigs submerged in water and exposed in the sun, 37, 251—Displacement of halogen elements by, 79, 34—Dissolved, estimating in fresh water, sea-water, sewage effluents, etc., 82, 163—Dissolved in rain and Seine waters, quantity, 26, 312—Dissolved in water, action on reducing agents, 27, 293—Dissolved in water, determination, 41, 215—Dissolved in water, estimating, 60, 59; 61, 57; 65, 79; 77, 237; 85, 250—Effect on phenol and anisole, 100, 68, 81, 94—Electrolysed, experiments relating to, 10, 91—Electrolytic, action on glycerin, 32, 84—Electrolytic, action on methylic alcohol, 31, 99—Electrolytic, action on vinic alcohol, 31, 72—Emission by certain crassulaceae, 38, 306—Emission by chromophyllic cellulose, 62, 77—Equivalent of coconut oil, 95, 288—Estimation, 49, 73—Evolution from green twigs exposed to solar light in water previously boiled, 35, 221—Evolution from nitric and sulphuric acids, 20, 71—Excitement by nascent hydrogen, 40, 300—Excretion from vegetable cells, 47, 11—Experiments on, 13, 180, 193—Explosion of acetylene with, 74, 268—Extraction from air, 19, 225—For pharmaceutical purposes, 24, 181—Formation, 58, 260—Free, absorption by normal urine, 82, 207—Free, analysis, 29, 27—Free, and ethylen, combination, 45, 173—Free, and potassium pyrogallate, heat evolved during reaction between, 84, 256—Free, determination of, 19, 253—Free, estimation of, 65, 49—Free, estimating, apparatus for, 39, 132—Free, estimating, new process, 26, 204—Free, in gaseous mixtures,

determination, 40, 33—Free, in urine, determination, 32, 103—Free, in water, determining, 36, 24, 39; 42, 266, 218, 221—Free, in water, estimation, 54, 9—Free, in well-water, estimation, 37, 7—Free, of atmosphere, 70, 223—Free or dissolved, estimation by means of a titrated solution of hydrosulphite of soda, 26, 106—Free, sensitive reagent for, 29, 62—Gas, action on cobalticyanide of potassium, and on chromous salts, 84, 243—Gas and nascent hydrogen, behaviour, 49, 125—Gas, constant production, 48, 265—Gas, illumination, 26, 265—Gas, manufacturing, 5, 96; 7, 34—Gas, metallic copper as an absorbent for, 45, 287—Gas prepared from potassium chlorate, cause of chlorine present in, 47, 83—Gases, influence of silent discharge on, 63, 151—Gaseous, compressibility of, 58, 183—Gaseous, rate of oxidation in, 92, 150—Higher valences of, 89, 205—History of, 2, 191; 5, 114—Hydrogen cell, potential of, 90, 293—In air, determination, 62, 155—In air, determining amount, 45, 259—In air, increase of proportion, 50, 67—In air, insensibility from want of, 47, 158, 176—In air of forests, 55, 58—In air, oxidation, 85, 167—In air, variation in proportion of, 40, 184, 199—In atmospheric air, proportion of, 53, 85—In a balloon, employment of, 29, 241—In Bessener steel, 37, 48—In blood, estimation, 27, 153—In coal-gas, 80, 56—In copper, estimation, 54, 38; 80, 86; 83, 203—In earth's atmosphere, origin, 68, 45—In fatty series, substitution of sulphur for, 37, 154, 155—In gaseous mixtures, gasometric determination, 64, 45—In gaseous mixtures, estimating quantity, 27, 70—In gases escaping from leaden sulphuric acid chambers, 27, 306—In hydrocarbons, detection, 2, 36, 47—In metallic copper, estimation, 58, 269—In metallic silver, 37, 81—In metals and their alloys, 52, 95—In organic matters, estimation, 4, 27—In peroxide of hydrogen and other liquors, determining, 27, 234—In peroxides, determination, 63, 280—In sea-water, 76, 37—In steel, 82, 188—In sun, 40, 32—In sun's atmosphere, 69, 25, 49, 61—In unroasted ores, 67, 86—In urine, 32, 103—In water, estimation, 38, 184—In water, estimation of dissolved, 85, 259—In water, supersaturation, 67, 87—In xanthene series, basic properties and tetravalence of, 85, 36—Indifference towards iron in presence of water, and effect of admission of carbonic acid, 93, 232, 304—Influence of access of, on fermentation, 43, 280—Influence of radicals on character of complementary valencies of, 95, 35—Liquefaction, 36, 281; 37, 1, 49, 41; 47, 193, 236; 48, 193; 51, 229—Liquid, and liquid nitrogen and their mixtures, densities of, 93, 265—Liquid, density of, 37, 74; 43, 13, 279; 49, 125—Liquid, refraction and dispersion of, 72, 154—Liquid, variation with temperature of surface-tensions and densities of, 85, 260—Loss of, sustained by plants in micro-spectrum, 54, 177—Magnetic, properties of liquid, 67, 210—Making, Webster's process, 6, 218, 268, 287, 299, 310—Manufacture, 2, 315; 6, 192; 56, 210, 220—Manufactured on large scale, 21, 84—Measuring, 62, 263—Mixed with atmospheric air, employment for respiration, 29, 275—Nascent, tests for aniline, 5, 71—Natural water containing excess of, 19, 276—Need of bacteria for, 31, 218—Negative, 3, 98—Neutral, 3, 98—Neutral, chemical polarisation during slow combustion of ether, 1, 254—Neutral, chemical polarisation during slow combustion of phosphorus, 1, 109—

- Notes on, 62, 179—Observed during decomposition of cupric metaborate, evolution of, 92, 47—Obtaining, 8, 168—Obtaining spaces free from, 38, 298—Obscured, in steels, 36, 19—Occurrence, preparation, and application for illuminating purposes, 23, 25—Of air, extraction by means of solution at low temperature, 82, 158—Of air, oxides of iron considered as a means of conveying to combustible matters, 1, 13—Of air, utilising, 62, 297—Of natural waters, 44, 288—Organic substances containing, additive compounds of bodies with, 91, 103, 197—Ozonised, 4, 74—Ozonised, oxidising properties, 72, 91—Part played by, in cremacausis and fermentations, 8, 103—Positive, 3, 298—Preparation, 41, 248, 253, 12, 138, 14, 15, 151, 15, 200, 17, 191, 20, 225; 36, 168; 46, 221; 54, 208, 62, 257, 77, 11, 85, 243—Preparation, action of peroxide of manganese on chlorate of potassa in, 21, 298—Preparation, Fleitmann's method, 13, 204—Preparation of a continuous current of, at constant pressure, 95, 311—Preparation, rapid, 47, 10—Prevention of a violent escape, 66, 36—Production, 16, 82; 17, 142; 18, 76—Production for industrial purposes, 20, 44—Pure, generating in quantity, 58, 207—Pure, ozone from, 55, 244—Pure, production without heat, oxygenesis for, 9, 126, 143—Pyranic, basicity of, 91, 293; 92, 212—Quadrivalence of, 79, 283; 80, 34; 92, 243—Quadrivalent, 91, 47, 163—Rays of solar spectrum, origin, 59, 281—Reaction on molten iron, 16, 70—Reactions of, 3, 253—Refraction and dispersion, 100, 297—Refractivity of, 77, 1—Relative affinity for hydrogen and carbonic oxide, 40, 11—Rendered active by slow oxidation, 27, 281—Rescue apparatus, 93, 230—Retarding effect on rate of interaction of chlorine and hydrogen, 99, 247—Salts, transformation into chlorides, 89, 203—Separation from atmosphere, 59, 99—Separation of media free from, 37, 31—Solid, densities of, 89, 203—Solidification, 49, 13—Solubility in molten silver, 22, 191—Specific gravity at boiling-point, 82, 241—Spectra, 57, 181; 69, 297, 292; 76, 255—Spectral lines of, 76, 265, 288—Spectrum of, 40, 208; 58, 244—Spectrum, law of absorption of bands of, 72, 11—Spectrum, photographic observations of, 40, 44—Study of, 76, 281—Substitution of fluorine for, in polyisidic compounds, 87, 44—Sulphur in, temperature of ignition and slow combustion of, 88, 243—Supposed nature of air prior to discovery of, 8, 113, 186, 246; 9, 14, 26, 80, 242; 10, 74, 195, 268; 11, 38, 74, 161, 201; 12, 62, 74, 293; 14, 51, 15, 312; 16, 29, 43—Tetravalency of, 99, 185—To burn in hydrogen or coal-gas, 19, 154—Transference by burning potassium, 94, 243—Transferers, 58, 63—Transformation into ozone, 42, 293; 45, 129—Transformation of inactive into active, 2, 191—Use at high pressure in physiological investigations, 35, 275—Vegetation without, 68, 259—Vitalising and de-vitalising, 55, 259—Weights of, 76, 304; 92, 172, 213—With sooty flames, combustion, 23, 60—Withdrawal by platinum, 90, 317
- Oxygen-ster, 54, agreement with stere of chlorine, bromine, and iodine, 41, 203
- Oxygenated acids (*see* Acids)—Bases, 20—Haloal compound of fatty acids—action of ethylchlorocarbonate on, 37, 275—Salts (*see* Salts)—Water (*see* Water)
- Oxygenesis for instantaneous production of pure oxygen without heat, 9, 126, 143
- Oxygenised platinum (*see* Platinum)
- Oxygenous base derived from alcohol, 43, 46—Nitriles (*see* Nitriles)—Salts (*see* Salts)
- Oxygluconic acid (*see* Acid)
- Oxyhematine, 68, 26
- Oxyhemoglobine, behaviour in magnetic field, 84, 288—Formation, 65, 257—Of pig, 48, 160—Process for obtaining, 67, 301
- Oxyhalide derivatives of chromium, preparation, 59, 184
- Oxyheptic acid (*see* Acid)
- Oxyhydric illumination, 26, 288
- Oxyhydrogen accumulator (*see* Accumulator)—Blowpipe, 21, 264; 26, 47—Flame, effects of, 17, 293—Flame, spectrum of, 57, 53—Furnace, hot blast, 56, 29—Gas and oxygen, 25, 274—Gas Company, New York, 23, 24—Illumination, 20, 33; 21, 215—Lantern, decomposition cell for, 19, 192, 204—Light, 5, 222; 19, 226, 249; 21, 130; 25, 23, 59; 27, 245—Light, experiment at Beauvais, 22, 48—Light in the streets of Paris, 25, 23—Light, substance replacing magnesia in, 17, 286
- Oxyiodide of bismuth (*see* Bismuth)—Of calcium (*see* Calcium)—Of phosphorus (*see* Phosphorus)
- Oxyisobutyric acid (*see* Acid)
- Oxyisocaproic acid (*see* Acid)
- Oxyisopropylphosphorous acid (*see* Acid)
- Oxyisopropylphosphinic acid (*see* Acid)
- Oxyisovalerianic acid (*see* Acid)
- Oxyketones, synthesis by introduction of acid radicals into phenols, 36, 255
- Oxyliden, 20, 226
- Oxylidine, red, 20, 178
- Oxylith, 85, 240
- Oxylithoxyamic acid (*see* Acid)
- Oxylutidine, amido. (*see* Amidooxylutidine)—Nitro. (*see* Nitrooxylutidine)
- Oxymaleic acid (*see* Acid)
- Oxymels, clarifying, 16, 186, 210
- Oxymercaptans, 34, 218
- Oxymereuric perchlorates (*see* Perchlorates)
- Oxymethandisulphonic acid (*see* Acid)
- Oxymethanphenylmethylphenylamine, phenylamidoethane. (*see* Phenylamidoethaneoxymethanphenylmethylphenylamine)
- Oxymethansulphonic acid (*see* Acid)
- Oxymethylene and formaldehyd, 48, 305—Tri. (*see* Trioxymethylene)
- Oxymethylenecamphor, condensation with primary and secondary amino-compounds, 99, 82
- Oxymethylenecyanacetate, methyl. (*see* Methyl)
- Oxymetric action, Schützenberger's photo-chemical reaction of, 53, 191
- Oxymiazine, 61, 86
- β -Oxy- α -naphthoic aldehyde (*see* Aldehyde)
- Oxynarcotine, 33, 39
- Oxynaurine and betaine, identity, 21, 203
- Oxynitrate, silver per. (*see* Silver)
- Oxynitriles ROCH_2CN , preparation, 94, 290
- Oxynitrocellulose, action of potash on, 79, 35
- Oxynitrososulfuric acid, 37, 263
- Oxyolefines, benz. (*see* Benzoxylefines)
- Oxyoxalylchloride, ethyl. (*see* Ethyloxyoxalylchloride)
- Oxyphenic acid (*see* Acid)
- β -Oxyphenol and β -oxalacetyl ethylenic acetones (*see* Acetones)
- β -Oxyphenol ethylenic amides (*see* Amides)
- Oxyphenoxycetic acids (*see* Acids)
- Oxyphenylacetic acid (*see* Acid)
- Oxyphenylendisulphonic acid (*see* Acid)
- Oxyphenyl glycolines, 50, 116
- Oxyphosphinic acids (*see* Acids)
- Oxyphosphorous acid (*see* Acid)
- Oxyphthalic acid (*see* Acid)
- Oxypicolines, amido. (*see* Amidooxypicolines)—Nitro. (*see* Nitrooxypicolines)
- Oxypicric acid (*see* Acid)—Ether (*see* Ether)
- Oxypivalic acid (*see* Acid)
- Oxypropanolamines, orthotolyl. (*see* Orthotolyl-oxypropanolamines)
- Oxypotamine, 77, 140; 80, 72
- Oxypyridine derivatives, 71, 206
- Oxypyrotartaric acid (*see* Acid)
- Oxyquinoline derivatives, 48, 249
- Oxyquinon and rufigallie acid, 43, 80
- Oxyrhodanid, mercuric, 33, 180
- Oxysalicylic acid (*see* Acid)
- Oxysalts and sulphide of carbon, sulphuretted hydrogen, and hydrochloric acid, reaction between, at a high temperature, 14, 142—Of alkaline (*see* Alkaline)—Of mercury (*see* Mercury)
- Oxyselenide, 81, 225; 82, 8
- Oxystearic acid (*see* Acids)
- Oxysulphate of lead (*see* Lead)—Silver per. (*see* Silver)
- Oxysulphide, carbonic, 17, 143—Of calcium (*see* Calcium)—Of carbon (*see* Carbon)
- Oxysulphides of osmium (*see* Osmium)—Organic, and sulphone compounds, action of chlorine upon, 48, 204
- Oxysulpharsenite of barium (*see* Barium)
- Oxysulphobenzid, diamido. (*see* Diamido-oxyulphobenzid)
- Oxysulphobenzidamid, nitro. (*see* Nitro-oxyulphobenzidamid)
- Oxysulphobenzide, 14, 184; 19, 250—Derivatives, 21, 180; 23, 83
- Oxysulphocarbonate of iron (*see* Iron)
- Oxysulphonic acids (*see* Acids)
- Oxysulphuret of antimony (*see* Antimony)—Of calcium (*see* Calcium)
- Oxytetrachloride of sulphur (*see* Sulphur)—Sulphoselen. (*see* Sulphoselen-oxytetrachloride)
- γ -Oxytetrolic acid (*see* Acid)
- Oxythymoquinon, 34, 271
- Oxytolidine, 20, 226
- Oxytolyllic acid (*see* Acid)
- Oxytriene phenylstyrenyl. (*see* Phenylstyrenyl-oxytriazole)
- Oxytriazoles, formation, 77, 162—Formation of substituted, 75, 44
- Oxytriazoline, diphenyl. (*see* Diphenyl-oxytriazoline)
- Oxytrineotine, 49, 10
- Oyster liquor, 11, 204—Panic, 71, 65—Shells, analysis, 71, 161
- Oysters, cause of green colour in, 69, 38, 49—Phosphorus in, 4, 268—Sewage in, 44, 52
- Ozanam, M., Oxygen as antidote for ether and chloroform, 2, 72
- Ozobenzene, 27, 142; 71, 293
- Ozokerite, 22, 203; 51, 35; 98, 210—Candles (*see* Candles)—Chemical composition, 40, 148—Purification, 46, 243
- Ozonator, 39, 157; 77, 274, 286
- Ozone, 1, 232; 4, 193; 5, 350; 12, 181; 13, 159; 14, 81, 246; 15, 109, 200; 16, 60, 70, 220; 17, 48, 60, 203; 18, 51, 202, 236, 250; 19, 35; 21, 118, 154, 180, 204; 22, 24; 23, 203, 272; 25, 82, 166, 242; 26, 205; 38, 5; 42, 119, 176; 43, 270; 45, 163, 208; 46, 12, 183, 268; 47, 246; 61, 38; 64, 74; 68, 98; 88, 22; 92, 23—Absorption in water, 26, 21; 28, 84—Absorption spectrum, 42, 268; 43, 36; 45, 163; 69, 289—Absolute properties, 97, 72—Action on absolute alcohol, 27, 256—Action on animal matter, 33, 33—Action on benzene, 44, 219—Action on colouring matters of plants, 40, 86—Action on ethane, 89, 273—Action on explosive substances, 21, 130—Action on germs in air, 44, 93—Action on iodine, 37, 183—Action on metallic silver and mercury, 96, 50—Action on metals, 100, 304—Action on noble metals, 41, 54—Action on organic matters, 1, 38—Action on organic substances, 8, 222—Action on pyrogallol, 27, 303—Action on sensitive photographic plates, 14, 321—Action on substances containing a triple bond, 97, 59—

Action on sulphate of indigo and on arsenious acid, **26**, 105 — And antozone, **11**, 120, 168; **13**, 154; **14**, 39, 50; **17**, 32; **22**, 35—And atmosphere, **38**, 224, 235, 243, 249, 257 — And cholera, **17**, 70—And electric effluve, **39**, 63—And hydrogen peroxide, **41**, 163, 182; **42**, 34—And hydrogen peroxide, formation, **42**, 17—And hydrogen peroxide, literature of, **50**, 215 — And hydrogen peroxide, separation, **74**, 180—And nitric oxide and hydrogen peroxide, thermic relations between, **95**, 215—And nitrogen, **13**, 305—And oxygenated water, **26**, 118—And phosphorescence, **75**, 11 — And plants, **25**, 118—And splitting up of carbonic acid into ozonised oxygen and carbonic oxide, under influence of electricity, **12**, 288—And sulphurous acid, **21**, 297—And water, reciprocal behaviour, **29**, 37 — Anomalous production, **25**, 87—Antiseptic value, **69**, 61—Argentio peroxide of, formation, **18**, 189—As a concomitant of oxidation of essential oils, **29**, 161—At salt-works, **25**, 202 — Atmosphere, on Mont Blanc, **75**, 170—Atmospheric, **4**, 166; **13**, 5; **26**, 144; **70**, 197; **71**, 37—Atmospheric, laws of, **18**, 245 — Behaviour with water, **27**, 322—Behaviour with water and nitrogen, **30**, 242—Bleaching of sugar syrups by, **40**, 86 — Box, **6**, 186 — Can it be found by lowering the temperature of flame? **63**, 142—Chlor. (see Chlorozone) Concentrated, as a reagent upon organic substances, **27**, 142—Concentrated, decolourising effect, **26**, 82—Considered as an oxidising agent, **90**, 110—Conversion of oxygen into, **93**, 187—Decolourising property of, **31**, 250—Decomposition of casein by, **92**, 202 — Decomposition of paracoutchouc by means of, **90**, 95 — Density, **16**, 49; **75**, 59—Density and molecular weight, **84**, 33—Density, determination, **19**, 104—Detection, **94**, 172—Determining in presence of chlorine and nitric oxide, **29**, 284—Determining percentage in gases not dissociated by moderate heat, **89**, 201 — Development, **18**, 23—Does it combine with free nitrogen in presence of alkalis to form nitrous compounds and nitrates? **35**, 44—Does it exist in air? **12**, 274—Emission from plants, **27**, 185—Estimation, **26**, 70; **84**, 232; **89**, 243—Exhaled by plants, **8**, 93—Experiments on, **7**, 248; **74**, 95; **97**, 275—Explosion of picric acid by, **22**, 60—For bleaching cotton, flax, and rags for paper making, **27**, 34 — For maturing and mellowing alcoholic liquids, **25**, 118—Formation, **8**, 39; **21**, 107; **25**, 70; **46**, 171; **67**, 284; **84**, 279; **97**, 46—Formation and properties, **28**, 236 — Formation by atmospheric oxidation of phosphorus **41**, 76 — Formation by contact of plants with peroxide of hydrogen, **34**, 204—Formation by ultra-violet light, **92**, 141; **100**, 107—Formation during combustion, **22**, 13, 24, 57—Formation during electrolysis, **37**, 82—Formation during slow oxidation of phosphorus, **40**, 307—Formation in decomposition and formation of water, **31**, 207—Formation in a flame, **21**, 299—Formation of iodic acid by action of, on iodine, **36**, 256 — Formed by resin oils, **23**, 32—From pure oxygen, **55**, 244—Gas, high percentage, **94**, 137—Generating apparatus, **24**, 253—Generator, **27**, 308—History of, **26**, 281, 294—History of, lines of discovery in, **41**, 138—Identity of the body in atmosphere which decomposes iodide of potassium with, **17**, 32—In air, **20**, 35; **32**, 42—In air, detection, **37**, 262—In air, determining, differential apparatus for, **45**, 141 — In air of Libyan Desert, proportion of, **38**, 153—In America, application, **26**, 118

—In atmosphere, **19**, 179; **38**, 224, 235, 243, 249, 257; **74**, 180—In atmosphere, influence of confers on temperature and amount of, **35**, 46—In atmosphere, origin of, **97**, 288—In atmosphere, ponderable determination of, **36**, 54 — In country air, **25**, 178 — In evaporation of different liquids, **42**, 175 — In gas mixtures, detection, **98**, 65—In the light of periodic system, **69**, 55—In mineral kingdom, **2**, 298—In nature, **41**, 292—Industrial uses, **97**, 275—Influence of nature of electrolytes and material of the electrodes on, **91**, 177—Liberation by plants, **29**, 145 — Liquefaction, **42**, 179, 294; **45**, 233 — Liquid, boiling-point of, **78**, 29—Luminescence of Sidot's blende under influence of, **90**, 233—Magnetism of, **43**, 129—Medical use of, **76**, 47—Molecular weight, determining, **85**, 204—Nature of, **21**, 57—Non-production in crystallisation of acetic acid, **40**, 257 — Oxidation of iodine with, **100**, 328—Permanent source of, **4**, 69—Phosphorescence, **62**, 61—Phosphorescence on first contact with fluids, **62**, 39—Producing by means of charcoal, **26**, 312—Producing, electrolysis of oxygen or air as a means of, **21**, 298 — Production, **8**, 45; **14**, 57; **42**, 304—Production, apparatus for, **26**, 113—Production by decomposition of water by means of fluorine, **81**, 277—Production by electric action, **27**, 208—Production by electrolysis of alkali fluorides, **93**, 47—Production by flames, **61**, 119—Production by means of electrophoric discharge, **33**, 76—Production during atmospheric oxidation of phosphorus, **40**, 96—Production during combustion of coal-gas, **41**, 98—Production during decomposition of water, **80**, 230—Production during nebulisation or pulverisation of water, **33**, 211—Production, formation of oxygen compounds of nitrogen and their metallic compounds in, **100**, 160—Production in interaction between hydrogen dioxide and sulphur dioxide, **99**, 307—Reactions of, **48**, 118—Solubility, **70**, 306—Solubility in water, **41**, 35—Specific gravity, **21**, 276—Specific magnetism, **43**, 129—Stability, **37**, 83 — Test-papers not coloured by oxygenated water, **17**, 130—Thermal decompositions, **98**, 230—Thermic formation, **34**, 8, 93; **94**, 172—Transformation of oxygen into, **42**, 293; **45**, 129—Tubular generator for supersaturation with, **73**, 280—Use for, **5**, 110—Volumetric relations of, **8**, 191

- Paracetate of phenyl (*see* Phenyl)
- Paramidoorthosulphotoluyllic acid (*see* Acid)
- Paramidophenol, ortho- (*see* Orthoparamidophenol)
- Paramidophenylethyllic alcohol (*see* Alcohol)
- Paramino benzoic acid (*see* Acid)
- Paraminopropiophenone, propionyl- (*see* Propionylparaminopropiophenone)
- Pararabin, 35, 210
- Parabenzoic acid (*see* Acid)
- Parazophenetol, nitro- (*see* Nitroparazophenetol)
- Parabanic acid (*see* Acid)
- Parabenzeneazobenzene aldehyde (*see* Aldehyde)
- Parabenzole series, 10, 133
- Parabenzoquinone, quinol, and quinhydrone, absorption spectra, 99, 200—Constitution, 99, 20
- Parabenzylphenol and derivatives, 53, 178
- Parabolas, instrument for drawing, 55, 240
- Parabolic mirror (*see* Mirror)—Reflectors (*see* Reflectors)
- Parabromaniline, 42, 97—Behaviour with sodium, 48, 305
- Parabrombenzyl compounds, 36, 40
- Parabromorthoamido phenol, 52, 213
- Parabromtoluic acid (*see* Acid)
- Paracaoutchouc, action of atmospheric oxygen on, 93, 128—Decomposition by means of ozone, 90, 95
- Paracelsus, weapon-salve of, 21, 136
- Parachlorobenzylchloride and derivatives, 38, 59
- Parachloride, hexachlorobenzene (*see* Hexachlorobenzene)
- Parachlorobenzoic acid (*see* Acid)
- Parachlorotoluidine, 20, 107; 21, 46
- Paracholesterin from *æthelium septicum*, 44, 83
- Paracinnamic acid (*see* Acid)
- Paracresol, 40, 109
- Paracresol sulphoxide and sulphide, 95, 307
- Paracresols, derivatives of, 29, 282
- Paracyanogen, production and transformation into cyanogen, 17, 211, 238, 251—Radiée, 54, 190
- Paradiamidotoluene and toluquinon, 35, 217
- Paradiamines, diazo-derivatives of monoacylated aromatic, 91, 276—Oxidation, 60, 56
- Paradiazoimides and aromatic amines, interactions of, 96, 232
- Paradiazoiminobenzene, derivatives, 97, 127
- Paradibrombenzols, dinitro- (*see* Dinitroparadibrombenzols)
- Paradichlorobenzoic acid (*see* Acid)
- Paradimethylamidoorthobenzoic acid (*see* Acid)
- Paradimethylbenzol, 29, 176
- Paradinitrodibenzyl, preparation, 56, 37
- Paradinitrodiphenyl, 35, 64
- Paradiisopropylbenzol and derivatives, 39, 163
- Paraditolyltartaric acid (*see* Acid)
- Paraditolylethane, di- (*see* Diparaditolylethane)
- Paradox, electro-dynamic, 42, 119—Hydrostatic, 16, 172
- Paraethoxybenzoic acid (*see* Acid)
- Paraethoxyphenylurethane, 50, 110
- Paraethoxyquinoline, 72, 306
- Paraf, M., Luteoline, 4, 150—New aniline black, 13, 51
- Paraffin, 19, 156; 98, 210—Action of alkalis on, 86, 244—Action of heat and pressure on, 26, 35—Action of nitric acid on, 30, 156—Adulteration of wax with, 4, 83—And naphthalin, 24, 230—And paraffin oils, production, 43, 285—And petroleum oils, 24, 144—And what is got from it, 39, 72—At high boiling-point, 25, 35—Compounds, 26, 28, 107—Deodorising, process for, 8, 229—Economic history of, 3, 219, 231—Excicator, 48, 47—Having a high melting point, 24, 187—Hip- (*see* Hipparaffin)—In candles sold as stearin, 28, 157—In crude petroleum, 60, 18—In fatty bodies or waxes, determination, 59, 108; 63, 165—In mineral oils, determination, 63, 232—In stearine candles, 25, 166; 26, 157; 27, 16—Industry, 73, 56—Lamps, 16, 314; 72, 174—Liquid as a reagent, 55, 248—Lubricants, 16, 243—Manufacture, 22, 191—Manufacture from peat, 6, 221, 243—Matches, 5, 224—Melting-point, experiments on, 26, 262—Oil (*see* Oil)—Olefines produced from, 23, 124—Oxidation, products of, 21, 203—Patent case, 2, 273; 9, 249, 262, 273—Patents for, 7, 262—Preservation of frescoes by means of, 13, 118—Preserving meat with, 14, 130—Purification, 1, 144; 22, 274—Refining, 25, 35—Residues and crude paraffin, estimation of water in, 30, 57—Series, nitro-compounds of, action of alkalis on, 82, 251—Shale deposit in Servia, 49, 107—Solubility, 8, 223; 14, 168; 60, 109—Source of, 2, 270—Stearic acid in, 16, 62, 78—Treating compounds or products containing, 8, 167—Wax, specific gravity of, 47, 221
- Paraffin carbides, number of isomeric, 78, 71
- Paraffins, 50, 254—And other homologous hydrocarbons found in lava from Etna, 35, 156—And other hydrocarbons, action of fuming nitric acid on, 78, 262—Boiling-points, 89, 265—Conversion into benzol series, 36, 140—Endiometric analysis of mixtures, 37, 226—In commercial water-gas, 37, 187—In leaf of tobacco, 84, 9—Normal, 25, 101, 133, 202; 40, 241, 280; 47, 2—Normal, action of sulphur at high temperatures on, 36, 114—Preparation, 48, 237—Ratio of specific heats of, 68, 39—Solidification-point, 79, 67—Specific volumes, 67, 80
- Paraffinic aldoximes (*see* Aldoximes)
- Paraffinoid compounds, melting-point, 67, 117
- Paraformaldehyde, action on sesquiterpenes, 89, 298—Solubility in solutions of sulphate of soda, 87, 275
- Paragallactine, 59, 277
- Paragenesis and derivation of copper, 24, 229
- Paragluconic acid (*see* Acid)
- Paragonite from Virgental, Tyrol, 20, 119
- Paraguay tea, amount of theine in, 4, 111
- Parahomosalicylaldehyd, 38, 35
- Parahydroxyazo- compounds, constitution, 92, 301—Salts of, with mineral acids, 67, 67
- Parahydroxydiphenylamine, bromination, 97, 92
- Parahydroxyphenylethylamine, isolation and synthesis, 99, 296—Synthesis, 100, 252

- Paraionacetanilide dichloride, action of heat on, 95, 78
- Paraionacetophenone dichloride, action of heat on, 35, 78
- Paraionbenzenesulphonic acid (*see* Acid)
- Paraoctadecanone dichloride, action of heat on, 95, 78
- Paraoctadecylphenylsulfonic acid (*see* Acid)
- Paralactic acid (*see* Acid)
- Paraldehyde, 47, 11—Detection, 48, 11—In serum transudates, 25, 110
- Paraldehyde, action of, binoxide of sodium on, 88, 157—Action of sulphuric acid on, 99, 33—And butyric chloral, 94, 11—And mandelic, 94, 11—Bromination of, 92, 33
- Paraldol, 34, 83—And aldol, action of heat on, 49, 33
- Paraleucanilin in the magenta melt, 41, 11
- Parallax of sun (*see* Sun)—Solar, 96, 50—Stellar, 96, 33
- Parallel striae presented by surface of carbonado variety of diamond, 36, 11
- Paralysis caused by saproline, 16, 200
- Paralytic, bones of, chemical composition, 22, 200
- Paramethoxyxytoluic acid (*see* Acid)
- Paramethoxycinnamic aldehyde (*see* Aldehyde)
- Paramethoxyhydratropic acid (*see* Acid)
- Paramethylcyclohexane, syntheses of tertiary alcohols prepared from, 93, 141
- Paramethylisic acid (*see* Acid)
- Paramide, phenyl, *see* Phenylparamide
- Paramidobenzoic acid (*see* Acid)
- Paramonochlorobenzoic acid (*see* Acid)
- Paramylum, products of oxidation, 29, 275
- Parana and Uruguay, composition of rivers of, 38, 28
- Paranephros, producing pure solution of effective principle of, 99, 80
- Paranitroaniline, chlorination, 98, 255
- Paranitrobenzaldehydesulphonic acid (*see* Acid)
- Paranitrobenzoic acid (*see* Acid)
- Paranitrobenzophenone, alkaline reduction of, 95, 47
- Paranitrobenzoyleacetic acid (*see* Acid)
- Paranitrobenzoylacetic ethers (*see* Ethers)
- Paranitroindanidiphenylmethanes, transforming into fuchsins, 76, 145
- Paranitroorthanisidine, 78, 315
- Paranitrophenylacetic acid (*see* Acid)
- Paranitroacetanilide, 97, 177
- Paranitrosodimethylaniline, absorption spectrum of, 90, 200
- Paranitrotoluene, action of sodium on, 82, 35—And derivatives, action of caustic alkalis on, 96, 316; 98, 243—Determination, 58, 220—Two isomeric sulphonic acids from, 35, 263
- Paranitrotoluenesulphonic acid (*see* Acid)
- Paraoxybenzoate of calcium (*see* Calcium)
- Paraoxybenzoic acid (*see* Acid)—Aldehyde (*see* Aldehyde)
- Paraoxyhydratropic acid (*see* Acid)
- Paraoxybenzoic methylester (*see* Methyl-ester)
- Paraphenetidine, detection, 64, 244; 65, 10, 38
- Paraphenyldiamine, 40, 11
- Paraphenylenediamine, 57, 262; 58, 244—Dimethyl—(*see* Dimethylparaphenyldiamine)—Ethyl—(*see* Ethylparaphenyldiamine)—Sulphuretted colouring matter from, 41, 81
- Parapseudopropyl-naphtheneic acid (*see* Acid)
- Parapyruvic acid (*see* Acid)
- Pararquinones, method of preparing, 71, 150
- Pararosanine, 88, 137—And rosaniline, distinguishing, 80, 208—Synthesis, 73, 12—Trimethyl—(*see* Trimethyl-pararosanine)
- Parasites, destruction, 11, 25, 101, 105—Destruction of germs of, 46, 57—On fishes, 22, 71
- Parasitic fungi (*see* Fungi)
- Parasols, improvements in manufacture, 1, 81
- Parasorbic acid (*see* Acid)
- Parastannyl chloride, 76, 195
- Parastyrin, 3, 128
- Parasulphamidesulphonic acid (*see* Acid)
- Parasulphamide-1,2,4, tolueneorthonitro- (*see* Tolueneorthonitroparasulphamide-1,2,4.)
- Parasulphanilic acid (*see* Acid)
- Parasulphobenzoic acid (*see* Acid)
- Parasulphochloride of toluene (*see* Toluene)
- Parasulphoxide, phenol—(*see* Phenol-parasulphoxide)
- Paratartric acid (*see* Acid)
- Paratartrate of sodium (*see* Sodium)
- Parathionic acid (*see* Acid)
- Paratoluenesodimethylaniline, 76, 254
- Paratoluenes of normal fatty acids, melting-points, 97, 261
- Paratoluidine, 20, 100; 93, 66—Action of ethyl pyruvate on, 98, 96—Action on resorcinol and hydroquinone, 53, 203—And aniline and orthotoluidine, separation, 50, 46—And bromotoluol, 21, 46, 107—Bromo—(*see* Bromoparatoluidine)—Derivatives, 41, 251—Determination, 57, 262; 66, 109—Determination in presence of orthotoluidin, 30, 166—Dinitro—(*see* Dinitroparatoluidine)—2-Nitro—(*see* 2-Nitroparatoluidine)—Of isopropyl (*see* Isopropyl)—Ortho—(*see* Orthoparatoluidine)—Oxidation, 68, 274—Oxidation, products of, 41, 269—Preparation, 97, 131
- Paratoluidine monohydrate, 96, 268
- Paratoluidine sulphate as a reagent for nitric acid, 49, 14; 50, 168
- Paratolunitrile and benzonitrile, hydrogenation, 61, 222
- Paratolul sulphate of barium (*see* Barium)
- Paratoluinadine, tetrahydro—(*see* Tetrahydroparatoluinadine)
- Paratoluylic amide (*see* Amide)—Nitrile (*see* Nitrile)
- Paratolylguanidine, di—(*see* Diparatolylguanidine)
- Paratolylloxamethan, action of phosphoric pentachloride on, 35, 75
- Paratolylphenylacetic acid (*see* Acid)
- Paratolylphenylketon, 36, 247—Derivatives, 34, 270
- Paratungstate of potassium (*see* Potassium)
- Paratungstates, action of tellurous and telluric acids on, 50, 187—Of sodium (*see* Sodium)
- Paratungstic acid (*see* Acid)
- Paraurazine, synthesis from carbamide, 99, 80
- Paraxanthine, 48, 106
- Paraxylenic acid (*see* Acid)
- Paraxylidin, 39, 34
- Paraxylidic acid (*see* Acid)
- Paraxylilketon, di—(*see* Diparaxylilketon)
- Parchment, 10, 40—Paper, 3, 16, 270; 28, 109—Vegetable, 44, 263

 Pharmacology, relation of British Pharmacopoeia to, 9, 198, 211
 Pharmacopoeia and Chemical Society, 14, 11—British, 6, 299; 9, 37, 38, 52, 60, 65, 72, 76, 86, 99, 117, 120, 123, 134,

- 163, 177, 187, 201, 211—British, and its weights, 6, 21, 82, 222—British changes of names in, 9, 120—British relation to pharmacology, 9, 128, 211—British, sources from, 6, 231, 273, 282—Committee, complaint against, 10—See also *Pharmacology* 11, 120, 128, 130, 131, 132, 133, 134, 135, 136, 137, 138, 139, 140, 141, 142, 143, 144, 145, 146, 147, 148, 149, 150, 151, 152, 153, 154, 155, 156, 157, 158, 159, 160, 161, 162, 163, 164, 165, 166, 167, 168, 169, 170, 171, 172, 173, 174, 175, 176, 177, 178, 179, 180, 181, 182, 183, 184, 185, 186, 187, 188, 189, 190, 191, 192, 193, 194, 195, 196, 197, 198, 199, 200, 201, 202, 203, 204, 205, 206, 207, 208, 209, 210, 211, 212, 213, 214, 215, 216, 217, 218, 219, 220, 221, 222, 223, 224, 225, 226, 227, 228, 229, 230, 231, 232, 233, 234, 235, 236, 237, 238, 239, 240, 241, 242, 243, 244, 245, 246, 247, 248, 249, 250, 251, 252, 253, 254, 255, 256, 257, 258, 259, 260, 261, 262, 263, 264, 265, 266, 267, 268, 269, 270, 271, 272, 273, 274, 275, 276, 277, 278, 279, 280, 281, 282, 283, 284, 285, 286, 287, 288, 289, 290, 291, 292, 293, 294, 295, 296, 297, 298, 299, 300, 301, 302, 303, 304, 305, 306, 307, 308, 309, 310, 311, 312, 313, 314, 315, 316, 317, 318, 319, 320, 321, 322, 323, 324, 325, 326, 327, 328, 329, 330, 331, 332, 333, 334, 335, 336, 337, 338, 339, 340, 341, 342, 343, 344, 345, 346, 347, 348, 349, 350, 351, 352, 353, 354, 355, 356, 357, 358, 359, 360, 361, 362, 363, 364, 365, 366, 367, 368, 369, 370, 371, 372, 373, 374, 375, 376, 377, 378, 379, 380, 381, 382, 383, 384, 385, 386, 387, 388, 389, 390, 391, 392, 393, 394, 395, 396, 397, 398, 399, 400, 401, 402, 403, 404, 405, 406, 407, 408, 409, 410, 411, 412, 413, 414, 415, 416, 417, 418, 419, 420, 421, 422, 423, 424, 425, 426, 427, 428, 429, 430, 431, 432, 433, 434, 435, 436, 437, 438, 439, 440, 441, 442, 443, 444, 445, 446, 447, 448, 449, 450, 451, 452, 453, 454, 455, 456, 457, 458, 459, 460, 461, 462, 463, 464, 465, 466, 467, 468, 469, 470, 471, 472, 473, 474, 475, 476, 477, 478, 479, 480, 481, 482, 483, 484, 485, 486, 487, 488, 489, 490, 491, 492, 493, 494, 495, 496, 497, 498, 499, 500, 501, 502, 503, 504, 505, 506, 507, 508, 509, 510, 511, 512, 513, 514, 515, 516, 517, 518, 519, 520, 521, 522, 523, 524, 525, 526, 527, 528, 529, 530, 531, 532, 533, 534, 535, 536, 537, 538, 539, 540, 541, 542, 543, 544, 545, 546, 547, 548, 549, 550, 551, 552, 553, 554, 555, 556, 557, 558, 559, 560, 561, 562, 563, 564, 565, 566, 567, 568, 569, 570, 571, 572, 573, 574, 575, 576, 577, 578, 579, 580, 581, 582, 583, 584, 585, 586, 587, 588, 589, 590, 591, 592, 593, 594, 595, 596, 597, 598, 599, 600, 601, 602, 603, 604, 605, 606, 607, 608, 609, 610, 611, 612, 613, 614, 615, 616, 617, 618, 619, 620, 621, 622, 623, 624, 625, 626, 627, 628, 629, 630, 631, 632, 633, 634, 635, 636, 637, 638, 639, 640, 641, 642, 643, 644, 645, 646, 647, 648, 649, 650, 651, 652, 653, 654, 655, 656, 657, 658, 659, 660, 661, 662, 663, 664, 665, 666, 667, 668, 669, 670, 671, 672, 673, 674, 675, 676, 677, 678, 679, 680, 681, 682, 683, 684, 685, 686, 687, 688, 689, 690, 691, 692, 693, 694, 695, 696, 697, 698, 699, 700, 701, 702, 703, 704, 705, 706, 707, 708, 709, 710, 711, 712, 713, 714, 715, 716, 717, 718, 719, 720, 721, 722, 723, 724, 725, 726, 727, 728, 729, 730, 731, 732, 733, 734, 735, 736, 737, 738, 739, 740, 741, 742, 743, 744, 745, 746, 747, 748, 749, 750, 751, 752, 753, 754, 755, 756, 757, 758, 759, 760, 761, 762, 763, 764, 765, 766, 767, 768, 769, 770, 771, 772, 773, 774, 775, 776, 777, 778, 779, 780, 781, 782, 783, 784, 785, 786, 787, 788, 789, 790, 791, 792, 793, 794, 795, 796, 797, 798, 799, 800, 801, 802, 803, 804, 805, 806, 807, 808, 809, 810, 811, 812, 813, 814, 815, 816, 817, 818, 819, 820, 821, 822, 823, 824, 825, 826, 827, 828, 829, 830, 831, 832, 833, 834, 835, 836, 837, 838, 839, 840, 841, 842, 843, 844, 845, 846, 847, 848, 849, 850, 851, 852, 853, 854, 855, 856, 857, 858, 859, 860, 861, 862, 863, 864, 865, 866, 867, 868, 869, 870, 871, 872, 873, 874, 875, 876, 877, 878, 879, 880, 881, 882, 883, 884, 885, 886, 887, 888, 889, 890, 891, 892, 893, 894, 895, 896, 897, 898, 899, 900, 901, 902, 903, 904, 905, 906, 907, 908, 909, 910, 911, 912, 913, 914, 915, 916, 917, 918, 919, 920, 921, 922, 923, 924, 925, 926, 927, 928, 929, 930, 931, 932, 933, 934, 935, 936, 937, 938, 939, 940, 941, 942, 943, 944, 945, 946, 947, 948, 949, 950, 951, 952, 953, 954, 955, 956, 957, 958, 959, 960, 961, 962, 963, 964, 965, 966, 967, 968, 969, 970, 971, 972, 973, 974, 975, 976, 977, 978, 979, 980, 981, 982, 983, 984, 985, 986, 987, 988, 989, 990, 991, 992, 993, 994, 995, 996, 997, 998, 999, 1000.
- Pharmacopoeial nomenclature, 23, 160
Pharmaceuticals, 31, greenstone at Terras Mine, 34, 10
Pharmacy and Chemistry Congress, 91, 100—And College of Physicians, 7, 1—Bill, 9, 188, 220, 10, 216—Bills, additional clauses for, 11, 216—Bills, select committee on, 11, 240—Calamine of, 14, 137—Contribution to history of, 25, 182—Conversations at Melbourne College of, 72, 234—Exhibition of objects relating to, 13, 135—Leaves and flowers used in, 8, 135—Metaphenetic spirit in, 17, 135—Of American War, 15, 206—Past and present, 23, 46—Schools of, 28, 133, 56, 120, 58, 147, 60, 147, 148, 62, 182, 64, 143, 144, 66, 147, 68, 148, 183, 70, 147, 72, 148
Pharmakolite, production, 57, 187
Phase measurement of small differences, 90, 258—Perception of difference by two ears, 75, 274—Rule, application to perception of colours, 89, 258
Phase-turning apparatus for use with electrostatic voltmeters, 82, 242
Phasometers, theory of, 92, 222
Phelps, Earle B., Determination of small quantities of copper in water, 94, 212
Phelps, I. K., Combustion of organic substances in wet way, 76, 246, 256—Combustion of organic substances in aqueous solution, 77, 213—Determination of carbon dioxide, 74, 62—Determination of nitrates in absence of air, 90, 114—Titrimetric estimation of nitric acid, 87, 212—Use of ferrous sulphate in estimation of chlorates and bromates, 90, 195
Phelps, I. K., and C. D. Deming, Preparation of formamide from ethyl formate and ammonium hydroxide, 97, 86
Phelps, I. K., and F. A. Gooch (see Gooch, F. A.)
Phelps, I. K., and J. L. Hubbard, Esterification of succinic acid, 96, 144—Use of succinic acid as a standard in alkalimetry and acidimetry, 96, 44
Phelps, I. K., and M. A., Preparation of a standard by action of ammonium hydroxide and ethyl acetate, 97, 104—Use of zinc chloride in esterification of succinic acid, 97, 112
Phelps, I. K., and L. H. Weed, Concerning certain organic acids and acid anhydrides as standards in alkalimetry and acidimetry, 100, 3
Phenacetone, identification, 66, 173—In acetanilide, detection, 58, 257—Peracetylation of, 60, 48—Preparing, 62, 272—Reaction, 61, 229
Phenacetyl diethyl tartrates, 82, 46
Phenacetylmaleonic ether (see Ether)
Phenacetic, artificial production, 58, 24
Phenacetic acid (see Acid)
Phenacetylthylamide, 48, 95
Phenamine, 3, 383
Phenanthraquinone, acetone (see Acetone)—Acetophenone, and ammonia, 58, 241—Compounds with metallic salts, 60, 301—Condensations with ketonic compounds, 90, 291
Phenanthraquinone dicyanide, 91, 229
Phenanthrene, 28, 35—Action of chromyl chloride on, 90, 250—And anthracene, 27, 168—Constitution, 39, 163, 40, 21—Derivatives, 35, 163—From toluol, 29, 155—New hydrocarbon from coal-tar, 27, 209—Nitro- (see Nitrophenanthrene)—Or anthracene, detection of small quantities of fluorine along with, 38, 229—Synthesis, 27, 118—Synthesis by naphthoic acid, 79, 276
Phenanthrene-carbonic acid (see Acid)
Phenanthrene hydrides, 91, 209
Phenanthrene-quinone, 35, 64; 39, 163—Action of phosphorus chlorides on, 48, 213—And acetacetic ether, condensation product of, 48, 204—Behaviour with ammonia, 41, 203
Phenanthrenequinone ether, condensation-product, 48, 204
Phenanthridine, 63, 188
Phenanthrol, 36, 41—2- and 3-, derivatives of, 94, 212
Phenanthrone, 76, 249
Phenate of ammonia (see Ammonia)—Of isopropyl (see Isopropyl)—Of potassium (see Potassium)
Phenates, camphor- (see Camphor-nitrophenates)—Of amido-bases, 47, 116—Pentachloro- (see Pentachlorophenates)
Phenatidine, dimethylmeta- (see Dimethylmetaphenatidine)
Phenazine, 55, 70; 56, 48
Phenazethionium, 8 phenyl- (see 8 phenylphenazethionium)
Phenethiodioxyacetic acid (see Acid)
Phenethyl and anisole, synthesis, 79, 71
Phenethylamine dextrocamphorsulphonate, dextrolevo- (see Dextrolevo-phenethylamine)
Phenetidine, meta- (see Metaphenetidine)—Para- (see Paraphenetidine)
Phenetidines, chlorinated, bromised, and nitrated derivatives, 80, 159
Phenetyl, antimonial derivatives of, 78, 24—Azo- (see Azophenetol)—Azo-phenols, derivatives, 76, 78—Bromo- (see Bromophenetol)—Nitro- (see Nitrophenetol)—Nitroorthoazo- (see Nitroorthoazophenetol)—Nitropara-azo- (see Nitroparaazophenetol)—Preparation, 47, 306
Phenethylsulphonic acids (see Acids)
Phenethylsulphuric acid (see Acid)
Phenic acid (see Acid)—Alcohol (see Alcohol)—Vinegar (see Vinegar)
Phenicated water (see Water)
Phenicin, 20, 285
Phenine, kva- (see Kyaphenine)—Nitro- (see Nitrophenine)
Pheno- α -aminoheptamethylene, resolution into its optical isomerides, 85, 140
Phenochinon and similar compounds, 26, 252
Phenocycloheptene, 87, 81
Phonoelectroscope, 19, 167
Phenoketoheptamethylene, synthesis, 80, 31
Pheno- α -ketoheptamethylene and its derivatives, 83, 198
Phenol, 29, 284; 35, 185—A probable source of indigo, 29, 110—Acids of (see Acids)—Action of allylic iodide on, 47, 304—Action of amides on, 28, 181—Action of benzotrichloride on, 35, 40—Action of chlorosulphoanhydride on, 20, 24—Action of lead oxide on, at high temperatures, 30, 9—Action of sulphuric acid on, 96, 221—Action on mercurous iodide, 72, 306—Alcohols (see Alcohols)—Amido- (see Amidophenol)—Amidoacetate of, 24, 313—Amidodiimide (see Amidodiimidephenol)—Amidosulpho- (see Amidosulphophenol)—Analysis, 37, 203—And allied bodies, 58, 1, 15, 28—And carbonic acid, unstable compound of, 46, 149—And carbonic acid, polybasic acid derived from, 36, 183—And chloral hydrate, molecular combination, 52, 189—And diazobenzene, limit of union, 89, 311—And kreosol, 23, 121—And neutral salts of quinine, compounds, 33, 139—And sulphurous anhydride, compound, 46, 149—And water, and amylic alcohol and water, reciprocal solubility, 36, 20—Behaviour with cinchonine alkaloids, 34, 153—Benzeneazo- (see Benzeneazophenol)—Benzeneazooorthonitro- (see Benzeneazooorthonitrophenol)—Benzeneortho-nitro- (see Benzeneorthonitrophenol)—Benzol- (see Benzolphenol)—Benzoyl- (see Benzoylphenol)—Benzyl- (see Benzylphenol)—Benzyl- (see Benzylphenol)—Benzylated, 25, 167; 28, 99—Benzylated derivatives, 27, 267—Benzylated, formation, 33, 75—Bromine water test for, 26, 24—Bromonitrosulpho- (see Bromonitrosulphophenol)—Butyl- (see Butylphenol)—Chlor- (see Chlorophenol)—Chloronitro- (see Chloronitrophenol)—Chryso- (see Chrysophenol)—Compounds, 33, 261—Constituents of blast-furnace tar, 52, 247—Conversion into alkaloids, 25, 81—Cumol- (see Cumophenol)—Cyano- (see Cyanophenol)—Derivatives, 16, 12—Derivatives, chemistry of, 74, 251; 78, 249—Derivatives containing a mobile nitro-group, synthesis with, 99, 297—Derivatives, electrolysis of, 34, 118—Derivatives, thermo-chemical examination, 38, 206—Desyl- (see Desylphenol)—Detection, 24, 217; 40, 141; 57, 102—Detection of organic acids in, 47, 84—Determination, 38, 174; 41, 222; 46, 196; 54, 74; 65, 178, 249—Di- (see Diphenol)—Di-acetylorthothioamino- (see Diacetylorthothioaminophenol)—Dibromonitroso- (see Dibromonitrosophenol)—Dichlor- (see Dichlorophenol)—Dichlorazo- (see Dichlorazophenol)—Dichloronitro- (see Dichloronitrophenol)—Diiodated, 86, 93; 87, 94—Di-iodo- (see Di-iodophenol)—Dinitro- (see Dinitrophenol)—Direct production from benzene, 44, 209—Effect of light and oxygen on, 100, 68, 81, 94—Estimation, 26, 264—Ethers of morphine considered as a, 44, 106—Ethyl- (see Ethylphenol)—Ethylid- (see Ethylidphenol)—From oxybenzoic acid, 20, 276—Group, contribution to history of, 16, 24—Hexachloro- (see Hexachlorophenol)—Homologues, action on animal organisms, 34, 270—In creosote, detection, 46, 244—In creosote oil, determination, 50, 57—In crude carbolic acid, proportion of, 57, 92—In Pinus sylvestris, 49, 93—In soaps and disinfective preparations, 74, 197—In urine, detection, 46, 281—Indo- (see Indophenol)—Iodo derivatives, 83, 202—Iodonitrosulpho- (see Iodonitrosulphophenol)—Molecular combinations, 19, 191—Molecular lowering, 64, 285—Monochloro- (see Monochlorophenol)—Monochlorodinitro- (see Monochlorodinitrophenol)—Mononitro- (see Mononitrophenol)—Nitrochlor (see Nitrochlorophenol)—Nitro- (see Nitrophenol)—Nitro derivatives, chemical and physical properties, 31, 50—Nitroso- (see Nitrosophenol)—Of sodium (see Sodium)—Or carbolic acid, 43, 150—Orthoamido- (see Orthoamidophenol)—Orthonitrodichloro- (see Orthonitrodichlorophenol)—Orthoparamido- (see Orthoparamidophenol)—Oxidation, 25, 190; 52, 166; 100, 68, 81, 94—Parabenzyl- (see Parabenzylphenol)—Parabromorthoamido- (see Parabromorthoamidophenol)—Pentachloro- (see Pentachlorophenol)—Perchlor- (see Perchlorophenol)—Phthalein (see Phthalein)—Poisonous properties, 41, 24—Preparation of cyclohexanol and cyclohexanone from, 89, 33—Product derived from, similar to oxidation blue of Boletus cyanescens, B. luridus, etc., 25, 201—Product of combination of ortho-nitrobenzoic aldehyde with, in presence of hydrochloric acid, 91, 154—Products of conversion, 22, 288—Propylamido- (see Propylamidophenol)—Quinoline (see Quinoline)—Reaction on ammonia, 21, 250—Reaction, sensitive, 49, 202—Reactions, 20, 126; 22, 46; 24, 209; 41, 294—Reactions of sulpho-conjugated acids of, 24, 207—Reagents, 29, 207, 208—Red colouration of, 68, 163—Reddening, 59, 181—Series, isomeric change in, 31, 182; 54, 321; 60, 60—Solution, esters in, 92, 244—Solution, fatty acids and their derivatives in, 88, 275—Sulpho-acids of,

- 15, 292—Sulpho-acids, isomeric, and action of chloride of benzoyl on potassa salt of that acid, 20, 24—Sulpho-acids, salts derived from, 21, 60—Sulpho-derivatives, 15, 292—Synthesis, 20, 166; 21, 274; 25, 22—Synthesis by acetylene, 79, 47—Tetra- (see Tetraphenol)—Tetrachloro- (see Tetrachlorophenol)—Thio- (see Thiophenol)—Titration, 54, 85; 83, 51—Triamido- (see Triamidophenol)—Trichloro- (see Trichlorophenol)—Triiodine (see Triiodine)—Trinitroacetamino- (see Trinitroacetaminophenol)—Trinitroacetylaminophenol—Trinitroacetylaminophenol—2:3:5-Trinitro-4-amino- (see 2:3:5-Trinitro-4-aminophenol)—Variable caus- ticity, 60, 120
- Phenol allyl ethers, dibromides of, 95, 252
- Phenol amido-acetate, 24, 313
- Phenol-amido propionic acid (see Acid)
- Phenol biiodide, 20, 251
- Phenolbrome, tribromo- (see Tribromophenolbrome)
- Phenolbromide, tribromo- (see Tribromo phenolbromide)
- Phenolbromogluco-side, 88, 218
- Phenol carbaminate, 21, 95
- Phenol carbonate, 21, 23
- Phenol chlorocarbonate, 21, 95
- Phenolevane, 27, 295
- Phenoldicarboxylic acid (see Acid)
- Phenoldiethylphonic acid (see Acid)
- Phenol ethers, 19, 299; 20, 130—Con- densation of mesoxalic ethers with, 99, 216—Nitration, 47, 259—Substi- tution products, 47, 225
- Phenolglycolic acid (see Acid)
- Phenolglyoxylic acid (see Acid)
- Phenolhydroxyl groups, quantitative determination, 97, 180
- Phenolhydroxyres, reactions, 24, 115
- Phenol monochloracetate, 24, 313
- Phenolnaphthylcarbazol, 42, 61
- Phenol parasilphuric acid, 95, 307
- Phenolphosphosulphuric acid (see Acid)
- Phenolphthalcin, 53, 141; 52, 18, 29—Adulteration, 52, 233—Alkaline solu- tions of, behaviour, 55, 133, 143—And limbus, lakmoid and other in- dicators, 52, 18, 29—Application in volumetric analysis, 51, 274—As an indicator, 51, 160, 201—Behaviour in presence of bicarbonates and of alka- line carbonates, 89, 27—Behaviour with ammonia, 59, 214—Bismarck quinon from, 38, 254—Constitution, 89, 141—Derivatives, 71, 126—Dioxo benzophenon from, 38, 254—Nitro derivatives, 67, 92—Salts, constitu- tion of, 96, 266—Test papers, 55, 129—Use in illustrating the dissociat- ing action of water, 74, 32
- Phenolsulpho acid (see Acid)
- Phenol sulphone, amethylcampho- (see Amethylcamphosphonol sulphone)
- Phenolsulphopotasium, action of chloro sulphoanhydride on, 20, 24
- Phenolsulphuric acid (see Acid)
- Phenoltolylate, 41, 36
- Phenoltrisulphuric acid (see Acid)
- Phenols, 27, 168; 52, 224; 53, 96—Acetals of, 81, 168—Acid sulphuric ethers of, 83, 227—Action of alkalis on, 53, 96—Action of benzoylchloride and benzotrichloride on, 41, 284—Action of bromine on, 78, 12—Action of chlorocarbonic ethylethers upon, 43, 48—Action of ethylidene chloride on, 81, 252—Action of ferment of mushrooms on, 74, 161—Action of hydrate of hydrazine on, 80, 48—Action of hydrogen peroxide on, 51, 154—Action of iodine on, 98, 316—Action of nitrous acid on, 29, 264—Action on ethyl phenylpropionate and ethyl acetylenedicarboxylate, 82, 238—Action on halogen-substituted fatty acids, 42, 36—Amido- (see Amidophenols)—And alcohols, trans- formation into amines, 45, 237—And aldehyde and aromatic hydrocarbons, combinations, 27, 47—And aldehydes, combinations, 25, 58, 101—And allied compounds, action of iodine on, 68, 87, 99, 131, 153, 166, 181, 195, 203, 214, 227—And amido-bases com- pounds, 48, 224—And aromatic acids, 43, 84—And choline compounds, 48, 305—And disulphopyrrol salts, union, 88, 317—And ethylic alcohol, separation, 74, 110—And oxybenzoic acids, conduc- tivities of, 61, 192—And phos- phorus pentachloride, reaction be- tween, 97, 143—And phthalic acid compounds, 34, 206—And piperidine compounds, 76, 313—And tertiary aromatic bases, formation of colour- ing matters by action of benzotrichloride on, 38, 220—And their ethers dissolved in benzene and *m*-xylene, dielectric constants of, 92, 6—As re- agents for carbohydrates, 51, 114—Azo (see Azophenols)—Benzoic, and quinone, combination, 53, 262—Boil- ing-points, 70, 161—Bromamido- (see Bromamidophenols)—Bromination, 78, 266—Bromonitro- (see Bromonitrophenols)—Bromised, 49, 287—Camphosulpho- (see Camphosulpho- phenols)—Chlorinated, and nitric acid, behaviour, 23, 179—Chloronitro- (see Chloronitrophenols)—Chloro- (see Chlorophenols)—Chloro- (see Chloro- phenols)—Compounds of tetrazodi- tollylsulphite of sodium with, and transformation into azoic colouring matters, 85, 264—Condensation of acetylenic amides with, 93, 223—Con- densation of acetylenic nitriles with, 93, 141—Condensation of epichlorohy- drin with, 97, 236—Condensation with aniline benzylidene, 90, 45—Conden- sation with esters of acetylene series, 82, 239; 83, 117, 297; 84, 263—Conden- sation with esters of unsaturated acids, 85, 130; 85, 251—Condensation with ethyl phenyl propiolate, 81, 295—Conversion into nitriles, 48, 237—Derivatives of, 47, 115—Detection, 67, 253—Determination, 66, 37—Diazo (see Diazo-phenols)—Dihydric, behavi- our towards *p*-toluidine, α -naphthyl- amine, and picric acid, 92, 268—Dilute aqueous solutions of, certain regular relations observed in distilla- tion of, 85, 157—Dinaphthopyranic, 89, 119—Dinitro- (see Dinitrophenols)—Diphenylurea as a reagent for, 95, 298—Displacement of alkyls from, by nitration, 84, 23—Estimating, Mes- singer and Vortmann's method, 93, 66—Etherification, 42, 164—Ethylidene (see Ethylidene)—Formation, 87, 83—Formation when chloride of zinc acts on camphor, 20, 263—Freezing-point curves for, 87, 268—Furfuran derivatives from, 80, 19—Heat of combustion, 88, 233—Higher, in coal-tar, 51, 118—In disinfectants, estimation, 79, 182—In liquid con- dition, association of, 95, 67—Indo- (see Indophenols)—Inhibiting effect of etherification on substitution in, 82, 45—Iodine-derivatives of, 88, 9—Iodo- (see Iodophenols)—Iodonitro- (see Iodonitrophenols)—Isomeric, 18, 31—Melting-point, 69, 289—Metallic derivatives, combinations with mer- curous and cuprous chlorides, 57, 70—Methylation, 48, 117—New class of colouring matters from, 42, 39, 44, 60—New fact on, 25, 227—Nitrile- (see Nitrilephenols)—Nitro- (see Nitrophenols)—Nitrochloro- (see Nitrochlorophenols)—Octochloro- (see Octochlorophenols)—Of a complex function, 52, 213—Of iodine (see Iodine)—Orthobromo- (see Ortho- bromophenols)—Oxidation, electro- lytic, 89, 92—Phenetolazo- (see Phenetolazophenols)—Poly- (see Poly- phenols)—Polyatomic, bromo-substi- tutions of, 51, 165—Pyranic, 92, 10—Reactions, 24, 299; 61, 217—Substi- tuted, 23, 155—Substituted, reduction, 48, 237—Sulph-etheric acids of, 39, 163—Sulpho-conjugated, 61, 192; 62, 40; 63, 142—Toluenazo- (see
- Toluenazophenols)—Transformation into amines, 45, 237—Transformation into symmetrical diphenylised py- rones, 91, 22—Ultraviolet absorption spectra, 92, 7—Volatile, 43, 25—With carbohydrates, coloured reactions of, 53, 15
- Phenolates, mercuric, 69, 276
- Phenolic carbonates (see Carbonates)—Chlorocarbonates (see Chlorocarbon- ates)—Colouring matters (see Colour- in)—Compounds, bromination, 89, 272—Derivatives, 47, 236—Ethers (see Ethers)—Hydrogen (see Hydrogen)—Oxydriles (see Oxydriles)—The- tines (see Thetines)
- Phenological observations for 1882, 46, 300
- Phenomena, extraordinary, 19, 286—Pro- duced by heat of electric arc, 68, 76, 90
- Phenomorpholones, electrolytic reduction, 87, 247
- Phenonaphthacridines, synthesis, 96, 20, 277—Trimethyl, (see Trimethyl- phenonaphthacridines)
- Phenone, 79, 179—Aceto- (see Aceto- phenone)—Aminoaceto- (see Amino- acetophenone)—Aminobenzo- (see Aminobenzenophenone)—Benzalaceto- (see Benzalacetophenone)—Benzalpro- pio- (see Benzalpropionophenone)—Benzo- (see Benzenophenone)—Benzylideneaceto- (see Benzylidenacetophenone)—Bromaceto- (see Bromaceto- phenone)—Cyanaceto- (see Cyano- acetophenone)—Desylaceto- (see Desyl- acetophenone)—Dialkylaceto- (see Dialkylacetophenone)—a β Dibromo- benzylaceto- (see a β -Dibromobenzyl- acetophenone)—Dioxibenzo- (see Dioxibenzophenone)—Hexahydro- aceto- (see Hexahydroacetophenone)—Monalkylaceto- (see Monalkylaceto- phenone)—Monochloraceto- (see Monochloracetophenone)—Orthoxy- aceto- (see Orthoxyacetacetophenone)—Paranitrobenzo- (see Parani- trobenzenophenone)—Propio- (see Propi- ophenone)—Propionylparaamino- propio- (see Propionylparaaminopro- pionophenone)—Reactions, 87, 71—Tetra- methylidiamidobenzo- (see Tetra- methylidiamidobenzenophenone)—Tri- alkylaceto- (see Trialkylacetophenone)
- Phenone dichloride, paraidoaceto- (see Paraidoacetophenone dichloride)
- Phenones, benzoylaminomethylbenzo- (see Benzoylaminomethylbenzenophenes)—Triacoholaceto- (see Triacoholaceto- phenones)
- Phenothalmitrope, 22, 71
- Phenoquinone, tetra-bromide- (see Tetra- bromodiphenoquinone)
- Phenoresorcin, medicinal, 47, 203
- Phenosafuranic, 57, 141—Anilido- (see Anilidophenosafuranic)
- Phenose, 13, 161
- Phenotripyridine, 71, 174
- Phenoxime, aceto- (see Acetophenoxime)
- Phenoxyacetone, orthoxy- (see Orthoxy- phenoxyacetone)
- Phenoxybenzoate phenylortho- (see Phenylorthophenoxybenzoate)
- Phenoxyethylmalonic acid (see Acid)
- Phenoxyhexane, di- (see Diphenoxy- hexane)
- Phenoxylic acid (see Acid)
- Phenyl, action of ammonia on, 29, 212—And para-tolyl-oxamethan, action of phosphoric pentachloride on, 35, 75—Brown, 21, 59—Butyl, (see Butyl- phenyl)—Compounds of elements of phosphorus group, 91, 34—Di- (see Diphenyl)—Dihydroxydi- (see Di- hydroxydiphenyl)—Group in aniline, methylation, 24, 133, 226—Group, migration in aromatic iohydrides, 96, 220—Iodine- (see Iodinephenyl)—Isocyan- (see Isocyanphenyl)—Isola- tion, 5, 177—Mercuriodi- (see Mer- curiodiphenyl)—Mercury (see Mer- cury)—Monochlor- (see Monochloro- phenyl)—Mustard oil, chlorinised, 31, 130—Nitrotetramethylidi- (see Nitro-

- tetramethyldiphenyl)—Oil of mustard, chlorinated and iodated, **25**, 156
 Paradiiodotri- (see Paradiiodotriphenyl Series, isomerism in, **7**, 267
 —Stannum tri-ethyl- (see Stannum)—Substituted fatty acids, **71**, 15
 Sulfide- (see Sulfophenyl)—Tin- (see Tin phenyl—Tin triethyl- (see Tin triethylphenyl)—Tolyl- (see Tolyphenyl)—Transpositions in iodo-lyl- and aromatic glycols, mechanism of, **97**, 52
 Phenylacetaldehyde, **91**, 59
 Phenylacetate, action of chloride of acetyl on, **77**, 246—Menthyl formyl- (see Menthyl)—Menthyl hydroxy- (see Menthyl)—Potassium- (see Potassium phenylacetate)
 Phenylacetic acid- (see Acids)
 Phenylacetate, ethyl-acetoxy- (see Ethyl-acetoxyphenylacetate)
 Phenylacetone, methylbromo- (see Methylbromophenylacetone)
 Phenylacetonitrile, action of zinc ethyl on, **41**, 201
 Phenylacetylchloramine, **82**, 46
 Phenylacetylene, ethyl- (see Ethylphenylacetylene)—Hexahydro- (see Hexahydrophenylacetylene)
 5-Phenylacridine and halogen derivatives, action of bromine on, **96**, 231
 2-Phenyladenine, **90**, 46
 Phenylaldehydeoxycyanamides (see Ethers)
 Phenylaldehydeoxycyanate acids (see Acids)
 Phenylalloxan, 1:3-di- (see 1:3-Diphenylalloxan)
 Phenylallyl, **28**, **8**, **29**, 274
 Phenylallylcarbinol, **68**, 68
 Phenylallylmethylammonium, benzyl- (see Benzylphenylallylmethylammonium)
 Phenylamide, silico- (see Silicophenylamides)
 Phenylamidoethoxy-methanophenyl-iminephenylamine, **95**, 142
 Phenylamine, methyl-di- (see Methyl-di-Phenylamine—Parahydroxydi- (see Parahydroxydiphenylamine)
 Phenylamine magnesium iodide, action of ethereal salts of α -iodo fatty acids on, **96**, 46
 Phenylamines and phenols, compounds of benzoylchloride with, **47**, 200—Di- (see Diphenylamines)—Tolyl- (see Tolyphenylamines)
 Phenylanthracene, di- (see Diphenylanthracene)—Tri- (see Triphenylanthracene)
 Phenylanthracene dihydride, tetra- (see Tetraphenylanthracene)—Tri- (see Triphenylanthracene)
 Phenylanthrone, di- (see Diphenylanthrone)
 Phenylanthrones, tetraacetyldiamidodihydrates (see Tetraacetyldiamidodiphenylanthrones)
 Phenylarsine oxide, triaminotri- (see Triaminotriphenylarsine)
 Phenylate of potassium (see Potassium)
 Phenylated anilidophenosafuran (see Anilidophenosafuranine)
 Phenylazide, methylhydroxy- (see Methylhydroxyphenylazide)—Orthohydroxy- (see Orthohydroxyphenylazide)
 Phenylazoisovaleric acid (see Acid)
 Phenylbenzene, metadi- (see Metadi-phenylbenzene)
 Phenylbenzoic acid (see Acid)
 Phenylbenzyl, di- (see Diphenylbenzyl)
 Phenylbenzoxetazine groups, labile isomerism among, **99**, 178
 Phenylbenzoxetazone and related derivatives, **96**, 200
d- and *l*-Phenylbenzylmethyl ethyl ammonium salts, **89**, 69
 Phenylbetain, preparation, **41**, 122
 Phenylbisdiazaminobenzene, di- (see Diphenylbisdiazaminobenzene)
 Phenylboron, **93**, 137
 Phenylbromide of magnesium (see Magnesium)
 Phenylbutadiene, dibenzoyl-di- (see Dibenzoyldiphenylbutadiene)
 Phenylbutanediol, tetra- (see Tetraphenylbutanediol)
 Phenylbutylen, synthesis, **27**, 46
 Phenylcamphene, **93**, 137
 Phenylcamphomethane, di- (see Diphenylcamphomethane)
 Phenylcarbamide, action on diphenyl, diallyl, and diaphenyl diamines, **83**, 48
 Phenylcarbamides, dinitrodi- (see Dinitrodi-phenylcarbamides)
 Phenylcarbazide and phenylhydrazine, acid and alcohol compounds, **83**, 118—Di- (see Diphenylcarbazide)
 Phenylcarbazinate of phenylhydrazine, **85**, 203
 Phenylcarbazone, di- (see Diphenylcarbazone)
 Phenylcarbinol, diamino-tri- (see Diaminotriphenylcarbinol)—Diethyl orthoxy- (see Diethylorthoxyphenylcarbinol)—Tri- (see Triphenylcarbinol)
 Phenylcarbinols, di- (see Diphenylcarbinols)
 Phenylcarbodiimide, di- (see Diphenylcarbodiimide)
 Phenylcarbazone, chloridised derivatives, **77**, 246—Chloruration in presence of antimony chloride, **89**, 251—Chloruration in presence of iodine, **89**, 248
 Phenylcetone, bromomethyl- (see Bromomethylphenylacetone)—Diethylchloro- (see Methylchlorophenylacetone)
 Phenylchloracetate and its reactions, **81**, 106
 Phenylchloride, perchloro- (see Perchlorophenylchloride) Tetrazodi- (see Tetrazodiphenylchloride)
 Phenylchloromethane, tri- (see Triphenylchloromethane)
 Phenylchloroacetylchondriamides, isomeric, **83**, 115
 1-Phenylchloroacetic acid (see Acid)
 Phenylchloroacides, sulphur- (see Sulphurphenylchloroacides)
 Phenylchloroamide acid (see Acid)
 Phenylchloroamide acid (see Acid)
 Phenylcyanamides, nitro- (see Nitrophenylcyanamides)
 Phenylcyanate, synthesis with, **62**, 38
 Phenylcyanoglutamate, ethyl methyl (see Ethyl)
 Phenylcyanite, **51**, 214
 Phenylidiacetic acid (see Acid)
 Phenylidiacetylmethane, dinitro- (see Dinitrophenylidiacetylmethane)
 Phenylidamine, 23, 204—Monodi- (see Monodiphenylidamine)—Para- (see Paradi-phenylidamine)
 Phenylidamines, di- (see Diphenylidamines)
 Phenylidanthranaltetramethyldiamide, tetraacetyldiamidodihydrates (see Tetraacetyldiamidodiphenylidanthranaltetramethyldiamide)
 Phenylidazaminobenzene, substitution derivatives, **90**, 243
 Phenylidazamine, formation and nitration, **67**, 35
 Phenylidimide, silico-di- (see Silicodiphenylidimide)
 Phenylidimidonaphthol, di- (see Diphenylidimidonaphthol)
 Phenylidisoocyanate, di- (see Diphenylidisoocyanate)
 Phenylidimethylallylammonium compounds, **89**, 177
 Phenyl-2:4-dimethylcyclopentane, 1:3:5-tri- (see 1:3:5-Triphenyl-2:4-dimethylcyclopentane)
 Phenylidinitroethylene, di- (see Diphenylidinitroethylene)
 Phenylidiazaminobenzene, di- (see Diphenylidiazaminobenzene)
 Phenylidiodide, di- (see Diphenylidiodide)
 Phenylidithienyl, **62**, 50
 Phenyllester, action of sodium mercaptide on, **52**, 110
 Phenyllethane, di- (see Diphenylethane)—Diamidodi- (see Diamidodiphenylethane)—Hexa- (see Hexaphenylethane)—Penta- (see Pentaphenylethane)— α -Phenyl- α -4-hydroxy- (see α -Phenyl- α -4-hydroxyphenylethane)—Tetramethyldiamidodi- (see Tetramethyldiamidodiphenylethane)
 Phenylether, **21**, 216; **22**, 214
 Phenylethylamine hydrochlorate, decomposition, **40**, 192
 Phenylethylamine, parahydroxy (see Parahydroxyphenylethylamine)
 Phenylethylamine, **91**, 199
 Phenylethylamines, salts of, **88**, 252
 Phenylethylene and derivatives, phenyl migration, **86**, 36—Tetra- (see Tetraphenylethylene)
 Phenylethylenediamines, di- (see Diphenylethylenediamines)
 Phenylethyl alcohol (see Alcohol)
 Phenylethylketone, condensation with benzalacetophenone, **87**, 88
 Phenylfurfuran, acetylmethyl- (see Acetylmethylphenylfurfuran)—Di- (see Diphenylfurfuran)
d-Phenylglucosazone, melting-point, **96**, 278
 Phenylglyceric acid (see Acid)
 Phenylglycidate of sodium (see Sodium)
 Phenylglycines, oxy- (see Oxyphenylglycines)
 Phenylglycol, hydrocarbon from, **39**, 171
 Phenylglycolate reactions, **81**, 106
 Phenylglycolic acid (see Acid)
 Phenylglycolic acid (see Acid)
 Phenylglyoxazol, di- (see Diphenylglyoxazol)
 Phenylglyoxylic acid (see Acid)
 Phenylguanidin, di- (see Diphenylguanidin)—Silico-tri- (see Silico-triphenylguanidine)—Tetra- (see Tetraphenylguanidin)—Tri- (see Triphenylguanidine)
 Phenylhexatriene, di- (see Diphenylhexatriene)
 Phenylhydantoin, 37, 7—Di- (see Diphenylhydantoin)
 Phenylhydantoins, transformation of amide acids into, **82**, 235
 Phenylhydrate and carbonic acid combinations, **19**, 237
 δ - β -Phenylhydrazidobutyric acid (see Acid)
 Phenylhydrazine, **70**, 49—Action of acetylchloro- and acetylchromo-anilobenzene on, **83**, 116—Action of chloroform and alcoholic potash on, **78**, 24—Action of ethylic aldehyde on, **77**, 236—Action of formic aldehyde on, **74**, 120—Action of hydrate of chloral on, **76**, 35—Action on acetylacetone, **58**, 244—Action on alcoholic bromides, chlorides, and iodides, **88**, 72—Action on alcoholic bromides and iodides, **88**, 117—Action on anhydrides of pyrocinehonic acid, α -dichloro- α -dimethylsuberic acid and α -dichloropropionic acid and on pyrocinehonic acid chloride, **63**, 249—Action on camphoric anhydride and ethers, **67**, 168—Action on chloranilic acid, **79**, 22, 227—Action on dithiobenzoylacetone, **81**, 226—Action on β -ketonic nitriles, **63**, 11—Action on mono- and di-carboxylic acids, **67**, 36—Action on organic anhydrides, **53**, 131—Action on oxidised compounds of selenium and tellurium, **89**, 131—Action on phenols, **64**, 112—Action on two isomeric methylbutyrylacetylacetates, **83**, 239—Action on unsaturated diketone, **57**, 60—Action on ureas and derivatives, **57**, 168—And alcoholic iodides, combinations, **79**, 155—And bisulphite of sodium, combination, **80**, 183—And cerium, **89**, 34—And ferric salts, **89**, 35—And halogen salts of alkaline-earth metals, combinations, **79**, 23—And metallic acetates, compounds, **76**, 240—And metallic chlorides, compounds, **76**, 11—And metallic nitrates, compounds, **76**, 95—And metallic salts, combinations, **78**, 316—And another organic base, mixed compounds with metallic salts, **79**, 311—And oxycellulose, **49**, 257—And phenylcarbazide, acid and alcohol compounds, **83**, 118—And sodium phenylglycidate, interaction, **90**, 277—

- And thorium, **89**, 64—As a reagent for sugar in animal fluids, **55**, 260—As a reagent for sugar in urine, **52**, 118—Coloured reaction of, **77**, 116—Dissymetric substituted, **78**, 24—Estimation, **77**, 232—Ethylic derivatives, **38**, 10—Hydrochlorate of urea from, **85**, 166—Orthonitro- (see Orthonitrophenylhydrazine)—Oxidation by Caro's acid, **97**, 177—Reactions with metallic cyanides and other salts, **98**, 34—Reduction by means of, **73**, 186—Salts, **58**, 39—Solubility, **71**, 65—Urea from, action of saccharine on, **84**, 232—Use of, **63**, 225
- Phenylhydrazindiphenylglyoxazol, action of chlorine hydrate on, **75**, 299
- Phenylhydrazine hydrochloride, hydrolysis, **89**, 77
- Phenylhydrazine iodides, **76**, 47
- Phenylhydrazine phenylcarbazinate, **85**, 203
- Phenylhydrazine tartrate, **73**, 245
- Phenylhydrazines, chlorinated, **63**, 81; **67**, 237—Triethylenedi- (see Triethylenediphenylhydrazines)
- Phenylhydrazinic compounds of metallic hyposulphites, hyposulphates, and hypophosphites, **80**, 147—Salts (see Salts)
- Phenylhydrazone, acetaldehyde- (see Acetaldehydephenylhydrazone)—Benzaldehyde- (see Benzaldehydephenylhydrazone)—Camphorquinone- (see Camphorquinonephenylhydrazone)—Of alloxane (see Alloxane)—Of benzylic aldehyde, action of chloride of tetrazodiphenyl on, **79**, 144—Of xanthone (see Xanthone)
- Phenylhydrazones and osazones of α -diketones, **96**, 28—Of aldehydes (see Aldehydes)—Of glucose (see Glucose)—Of ketones (see Ketones)
- Phenylhydroxylamine, action on aniline and on sulphuric acid, **79**, 216
- α -Phenyl- α -4-hydroxyphenylethane, re-Phenyl-1-hydroxy-3-pyrazolone-5, **80**, 196 solution, **93**, 124
- 2-Phenyl-hyoxanthine, **90**, 46
- Phenylimid, amidodi- (see Amidodiphenylimid)—Carbodi- (see Carbodiphenylimid)—Silico- (see Silicodiphenylimid)
- Pheniliminephenylamine, phenylamidoethaneoxymethane- (see Phenylamidoethaneoxymethanephénylimine-phenylamine)
- Phenylindoles, formation, **59**, 249
- Phenyl iodochloride, **79**, 191
- Phenylene, nitroso- (see Nitrosophenylene)
- Phenylodionium nitrate, di- (see Diphenylodionium nitrate)
- Phenylisindazol, derivative, **75**, 167
- Phenylisobutyric acid (see Acid)
- Phenyl isocyanate, action on bibasic acids, **81**, 202—Action on cetonio acids, **81**, 264—Action on ethers of oxyacids, **86**, 269; **87**, 71, 130—Action on free oxyacids, **88**, 47—Action on univalent alcohols, **90**, 58, 70
- Phenyl isothiocyanate, action on bibasic acids, **81**, 202
- Phenylisoxazolone derivatives, **97**, 240—Indigoid colouring matters derived from, **99**, 156
- Phenylketone, di- (see Diphenylketone)—Ethyl- (see Ethylphenylketone)—Methyl- (see Methylphenylketone)—Parafolyl- (see Parafolylphenylketone)—Propyl- (see Propylphenylketone)
- Phenylactic acids (see Acids)
- Phenylmagnesium bromide, action of sulphur and selenium on, **89**, 239—Action on anthraquinone, **89**, 130—Action on ethers of dialcylamido-benzoylbenzoic acids, **94**, 96—Action on second methyl ether of paradimethylamidomethylbenzoic benzoic acid, **97**, 276
- Phenylmethane, amidotri- (see Amidotriphenylmethane)—Azodi- (see Azodiphenylmethane)—Bromdi- (see Bromdiphenylmethane)—Di- (see Diphenylmethane)—Dinitrodi- (see Dinitrodiphenylmethane)—Diphenyl- (see Diphenylphenylmethane)—Dimethoxydi- (see Dimethoxydiphenylmethane)—Dioxydi- (see Dioxydiphenylmethane)—Hamethyltri- amidotri- (see Hamethyltriimidotriphenylmethane)—Orthonitrodi- (see Orthonitrodiphenylmethane)—Hexa- (see Hexaphenylmethane)—Hexamethyltriimidotri- (see Hexamethyltriimidotriphenylmethane)—Tetra- methyldiaminodiphenylene- (see Tetramethyldiaminodiphenylene-phenyl-methane)—Tri- (see Triphenylmethane)—Triamidotri- (see Triamidotriphenylmethane)
- Phenylmethanes, parantitrodiamidotri- (see Parantitrodiamidotriphenylmethanes)—Phenyl substitution in, **88**, 46
- Phenylmethanoloxydi, di- (see Diphenylmethanoloxydi)
- Phenylmethane, di- (see Diphenylmethane)
- Phenylmethyl, tri- (see Triphenylmethyl)
- Phenylmethylacridol, constitution, **91**, 127
- Phenylmethylbromide, tri- (see Triphenylmethylbromide)
- Phenylmethylbutanoic acid (see Acid)
- Phenyl-2-methylcyclopentane, 1:3:5-tri- (see 1:3:5-Triphenyl-2-methylcyclopentane)
- Phenyl-naphthalene, **44**, 237
- β -Phenyl-naphthalene, **59**, 245; **70**, 254
- Phenyl-naphthalenes, **68**, 253
- Phenyl-naphthalin, synthesis, **40**, 264; **41**, 80
- Phenyl-naphthoquinoleindiacarboic acid (see Acid)
- Phenyl-naphthyl, hydrocarbon (see Hydrocarbon)
- Phenyl-naphthylcarbazol, synthesis, **41**, 146
- 2-Phenyl-1:3-naphthylene-diamine, derivatives, **96**, 22—Formation of methyl derivatives of, from tolylacetonitriles, **99**, 104
- Phenyl-nitrosamine, di- (see Diphenyl-nitrosamine)
- Phenyl-octatetrene, di- (see Diphenyl-octatetrene)
- Phenyl-orthophenoxybenzoate, transformation of diphenylcarboic ether into, **91**, 22
- Phenyl-oxaphacetic acid (see Acid)
- Phenyl-oxanthranol, tetramethyldiamido- (see Tetramethyldiamidophenyl-oxanthranol)—Tetramethyldiamino- (see Tetramethyldiaminophenyl-oxanthranol)
- Phenyl-oxazolone, tri- (see Triphenyl-oxazolone)
- Phenyl-oxide applications, **5**, 19—Di- (see Diphenyl-oxide)
- Phenyl-oxoacetic acids (see Acids)
- Phenyl-oxohomocampolic acid (see Acid)
- Phenyl-oxotriazole, di- (see Diphenyl-oxotriazole)
- Phenyl-paracetate, preparation, **77**, 236
- Phenyl-paramide, **52**, 309
- 8-Phenylphenazothionium derivatives, **97**, 10; **98**, 243
- Phenyl-phosphate and ethyl-phosphate, mixed, **79**, 47
- Phenyl-phosphine, **35**, 217
- Phenyl-phosphoric acid (see Acid)
- Phenyl-phthalimide, action of organo-magnesium compounds on, **89**, 244; **90**, 70
- Phenyl-propane, di- (see Diphenyl-propane)
- Phenyl-propargylidene chloride, **83**, 83
- Phenyl-propiolate, ethyl (see Ethyl)
- Phenyl-propionic acids (see Acids)
- Phenyl-propionyl chloride, action on ketonic compounds, **92**, 236; **93**, 164
- Phenyl-pseudoazimidobenzol, production of substituted derivatives of, **85**, 166
- Phenyl-pyrones, di- (see Diphenyl-pyrones)
- 1-Phenylpyrrolidine-2:5-dicarboxylic acid (see Acid)
- Phenylpyrrolone, diketodi- (see Diketodiphenylpyrrolone)
- Phenylquinoline, **71**, 174
- Phenyl-semicarbazide, formation of substituted oxytriazoles from, **75**, 44
- Phenylsilicol, tri- (see Triphenylsilicol)
- Phenylsilicon oxide, tri- (see Triphenylsilicon)
- Phenylstibinesulphide, tri- (see Triphenylstibinesulphide)
- Phenylstyrenyloxytriazole, **75**, 153
- Phenylsuccinic acid (see Acid)
- Phenylsulphate, hydrogen (see Hydrogen)
- Phenylsulphide, isophos- (see Isophosphorylsulphide)
- Phenylsulphocarbamide, di- (see Diphenylsulphocarbamide)
- Phenylsulphurea, di- (see Diphenylsulphurea)
- Phenylsulphydrate, conversion into phenylbisulphide, **22**, 35
- Phenylsulphocarbaminic acid (see Acid)
- Phenylsulphopropionic acid (see Acid)
- Phenylthiocarbamates, **73**, 82
- Phenylthiocarbamic acid (see Acid)
- Phenylthiocarbamide, optical properties, **56**, 257
- Phenylthiocarbimide, action of acetic acid on, **63**, 224—And acetic acid, interaction, **63**, 245
- Phenylthiophene, **60**, 269
- Phenyltoluene, meta- (see Metaphenyltoluene)
- Phenyltolylamine, **10**, 266
- Phenyltolylate, **41**, 36
- Phenyltriamine, carbetri- (see Carbetriphenyltriamine)
- Phenyltriazene, camphoryl- (see Camphorylphenyltriazene)
- C-Phenyl- δ -triazole, **91**, 210
- Phenyltribromomethan, **52**, 315
- Phenyltrisulphuric acid (see Acid)
- Phenylurea, di- (see Diphenylurea)—Mono- (see Monophenylurea)—Sulpho- (see Sulphophenylurea)
- Phenylurethane, parathoxy- (see Parathoxyphenylurethane)
- Phenylurethanes of ethers and nitrates of oxyacids, **78**, 243—Of sugar (see Sugar)
- Phenyl-xanthogenamide, **22**, 214
- Phenylxylan, action of heat on, **20**, 206
- Phenylene, azo- (see Azophenylene)—Metasulphocyanate of, **35**, 64
- Phenylene-diamine, **34**, 256; **38**, 48—Diaz compounds of, **77**, 166—Dimethylpara- (see Dimethylparaphenylene-diamine)—Ethylpara- (see Ethylparaphenylene-diamine)—Griess's, **27**, 117—Meta- (see Metaphenylene-diamine)—Nitro- (see Nitrophenylene-diamine)—Ortho- (see Orthophenylene-diamine)—Oxidation products, **90**, 118—Para- (see Paraphenylene-diamine)
- Phenylene-diamines, benzenesulphophenyl- (see Benzenesulphophenylene-diamines)—Interaction of benzoin with, **80**, 19
- Phenylendisulphide, di- (see Diphenylendisulphide)
- Phenylenketon, di- (see Diphenylenketon)
- Phenyleneketoneoxide, di- (see Diphenyleneketoneoxide)
- Phenylene-methan, di- (see Diphenylene-methan)
- Phenyleneoxaminic acid (see Acid)
- Phenylenephenylmethane, di- (see Diphenylenephenylmethane)—Tetramethyldiaminodi- (see Tetramethyldiaminodiphenylenephenylmethane)
- Phenylene-phosphoric acid (see Acid)
- Phenylene sulphide, di- (see Diphenylene)
- Phenylene acetate (see Acetate)—Chloro-carbonates (see Chlorocarbonates)—Ether (see Ether)—Migration, **89**, 244; **94**, 255
- Philadelphia College of Pharmacy, **76**, 60—Museums, **73**, 96; **75**, 312; **77**, 72—Water supply, **61**, 278
- Philip, Arnold, Action of water on lead, **46**, 170—Electro-plating and Electro-refining of Metals- (review), **85**, 281—Fellowship of the Chemical Society, **62**, 189
- Philip, James Charles, Dissociation constants of triazooacetic and α -triazopropionic acids, **97**, 259—Freezing point curves for binary systems, **88**, 106—Freezing-point curves for some binary mixtures of organic substances, chiefly phenols and

- amines, 87, 268—Influence of non-electrolytes and electrolytes on solubility of gases in water, 95, 162; 96, 3—Influence of various sodium salts on solubility of sparingly soluble acids, 92, 6—Refraction and dispersion of triazo compounds, 97, 259

- Phipson, T. L., Abundant source of some rare oxides, 73, 145—Accidental formation of sulphide of silver (argyrose), 12, 160—Actinic phenomenon, 43, 84, 283; 44, 73—Actinium, 44, 138, 180, 191; 45, 61—Action of *Aspergillus glaucus* on citric ether, 49, 198—Action of electric current on the organs of the senses, 30, 271; 32, 29—Action of natural organic compounds on iron plates, 62, 264—Action of sunlight on natural waters, 83, 25—Again, by Dr. Odling, 13, 59—Allotropic condition of silicon and carbon in cast-iron, and their influence on production of steel by Bessemer process, 11, 278—Alterations in densities of minerals, 11, 288—Aluminium weights, 22, 187—Analyses of manganese oxides, 34, 39—Analyses of sewage, 10, 313—Analyses of waters, 40, 1—Analysis of air by a mushroom, 74, 247, 292—Analysis of artificial manure, 5, 228—Analysis of biliary concretions, and a new method of preparing biliverdin, 16, 7—Analysis of black silk dress, 76, 188—Analysis of diluvial soil of Brabant, etc., known as the Limon de la Hesbaye, 6, 229—Analysis of fresh water fossil from coal measures, 12, 255—Analysis of new phosphatic rock, 12, 219—Analysis of peroxide of manganese, 33, 243—Analysis of pyrites residue, 18, 29—Analysis of a recently imported mineral substance, 13, 1—Analysis of red rain deposit which fell in Victoria, Australia, on December 26, 1896, 83, 253—Analysis of a silurian limestone rock, 84, 283—Anthracenamine, 27, 97—Argentiferous gossan of Cornwall, 6, 205—Arsenic in commercial products, 83, 61—Arsenical waters of Court St. Etienne, 60, 67—Arseniferous sulphur from solfatara of Naples, and preparation of selenium, 5, 337—Artificial formation of populine, 6, 278—Artificially-coloured wines, 20, 229—Atomic considerations, 60, 299—Atomic weights, 84, 2—Biracemate of potash as an after-deposit in red wines, 13, 61—Black stones which fell at Birmingham in 1858, 10, 160—Blunders in medical chemistry, 70, 120—"Boiler Deposits" (review), 17, 131—Brown crystals of calcite, 33, 56—Calculus in horses, 34, 151—Cane-sugar and citric acid, 72, 257—Catalytic force and the nascent state, 41, 208—Cause of odour of soil after a summer shower, 63, 170—Chemical constitution of atmosphere, 67, 135; 70, 148—Chemical history of atmosphere, 68, 75—Chemical names in botany, 84, 183—Chemical phenomena of respiration of plants, 50, 37, 288—"Chemistry for Photographers" (review), 9, 271—Chrysenine, 30, 69—Cinnamic acid, 63, 275—Citric acid from cane-sugar, 71, 296; 72, 100—Citric acids and tartaric acids from cane-sugar, 72, 100—Coal-dyes in 1818, 20, 284—Colouring matter and alkaloid contained in *Agaricus ruber*, 46, 109—Colouring-matter of *Palmella cruenta*, 40, 100—Colouring matter (rhamsanthine) extracted from bark of buckthorn (*Rhamnus frangula*), 3, 256—Commercial and scientific ana-

- lyses, 12, 277 — Composition and nature of red rain, 83, 159—Composition of gas-refuse, 7, 169—Composition of native peroxides of manganese, 33, 259—Composition of peculiar substance which exudes from a tertiary rock in Australia, 6, 218—Composition of specimen of fossil wood from the green sand of the Isle of Wight, 6, 194—Constant increase of organic matter in the cultivated soil, 8, 176—Constant production of oxygen gas, 48, 205 — Cosmos and the poisoning by mercuric methide, 12, 289—Crystallised platinum, 5, 144—Cyanogen in bromine, 28, 51—Determination of manganic oxide, 34, 19—Determination of phosphoric acid, 56, 251 — Determination of specific gravity of mineral substances, 5, 246—Distribution and determination of thallium, 29, 174—Existence of aniline in certain fungi, etc., 6, 194—Experiments and observations on part played by oxygen in emaciation and fermentations, 8, 103—Experiments with the Cheavin filter, 76, 267—Explanation of the Röntgen rays, 74, 260—Explosion by heat, and disruption of bodies independently of their chemical composition, 85, 147—Explosion of sodium bottles, 65, 75—Explosions in veins of lead ore, 12, 193—Fall of temperature produced by admixture of certain metals, 13, 262—“Familiar Letters on Mysteries of Nature and Discoveries of Science” (review), 34, 247—Fluorine, 4, 215—Fossil wood containing fluorine, 66, 181, 208 — Free oxygen of the atmosphere, 70, 223—Friction in vacuo, 17, 23—Gas obtained from cyanogen which appears to be identical with argon, 81, 231—Gold ore of Nova Scotia, 24, 99 — Grains of silica and micrococci of atmosphere, 43, 28—“Health Notes and Curiosities of Medical Science” (review), 78, 264—Identity of cascarrine with Rhamnoxanthine, 66, 208—Identity of regianine and juglone, 52, 39—Infusoria and nitrates, 34, 33—Infusorial earth in Ireland, 86, 283—Intermittent ebullition, 31, 177 — Iodine and bromine, 87, 23—Ironstone of the Weald, 75, 207—James Barwick Jackson, Obituary notice 25, 177—Koenig and Stas, 67, 51 — Magnesium, 9, 219—Magnetic elements found in rocks and minerals, 66, 308—Magnetisation of ilmenite (titanic ironstone), 32, 162 — Manganic acid, 30, 145—Measurement of chemical action of solar light, 30, 33 — Medicinal muds of Island of Ischia, 10, 186; 13, 21 — Mellilotol, 37, 196 — Mellilotol, 32, 25 — Metallic dust in atmosphere, 34, 93 — Migration of salts, 65, 122 — Mineral densities, 10, 252 — Mineral from San Paolo, 21, 13 — Musical sounds produced by carbon, 8, 163—Nascent state of bodies, 40, 184, 257—Native zinc and native tin, 6, 47—Nature of nitrogen, 69, 207—Nature of supposed new element present in atmosphere, 71, 91 — New harmonica chemica, 5, 116 — New hemostatic agent, 7, 252—New metal, vesium, 65, 217—New method of measuring chemical action of sun's rays, 8, 135—New mineral white pigment, 38, 105—New sulphide of chromium, 4, 125—New way of observing absorption spectra, 31, 255 — Nickel in Cornish manganese, 42, 241—Nitrosalicylic acid, 35, 243 — Noctilucina, 26, 130; 32, 220—Note on bicarbonate of ammonia, 7, 79—Note on characine, 40, 86—Note on extraordinary sample of water, 70, 3—Note on possibility of determining the age of sandstone by chemical analysis, 18, 133—Note on some Chinese dyed silks, 57, 203—Note on vegetable ivory, 8, 232—Note on zinc conium, 12, 171—Nucitannic acid, 20, 83—Observations on some xanthates, separation of nickel and cobalt, 35, 270—“Observations on the Agricultural Chemistry of the Sugar-cane” (review), 28, 80 — Origin of nitric acid, 70, 283—Origin of oxygen in earth's atmosphere, 68, 45—Oxalates of iron, 3, 48, 359—Oxidation blue of Boletus cyanescens, Boletus luridus, etc., and on a similar product derived from phenol, 25, 301—Palmelline and aspergilline, 63, 165—Palmellin and characin, 41, 22 — Peridotite meteors, 18, 237, 262 — Phenol as a probable source of indigo, 29, 110—Phenolcyanine, 27, 299 — Phosphorescence of organic bodies, 35, 145—Phosphorescence of potassium and sodium, 17, 108—“Phosphorescence, or Emission of Light by Minerals, Plants, and Animals” (review), 6, 237—Phosphorescent matter of the ray, 2, 227—Potabilisation of sea-water by electric current, 5, 322 — Potash in chromate of lead, 21, 253—Preparation of sulphovinic acid and its salts, 30, 221; 31, 103—Presence of cafetaninic acid, etc., in the Virginia Creeper, 52, 65 — Presence of columbite in wolfram, 16, 160—Presence of copper in sulphate of soda crystals, 42, 241—Presence of gold in silver ores, 73, 71—Presence of lime as dolomite in cultivated soils, 86, 148 — Presence of metallic silver in galena, 29, 174—Presence of tin in certain kinds of sugar, 59, 255—Presence of xanthic oxide in guanos containing no uric acid, 6, 16—Preservation of solutions of palmellin, 41, 216—Production of heat by chemical action, 37, 262 — Production of nitrous ether by means of sulphovinic acid, 31, 75—Properties of chloral hydrate, 25, 257 — Quadroxalate of iron, 2, 251 — Red hematites of Waldeck, 11, 203—Reduction of auric chloride, 41, 13 — Reduction of sulphuric acid and other substances, 93, 110—Regianic acid, 24, 119—Reply of Dr. Hofmann to, 13, 35—Reply of Dr. Odling to, 13, 84—Reply to Dr. Hofmann, 13, 23—Reply to Dr. Odling, 13, 71 — “Researches on Past and Present History of Earth's Atmosphere” (review), 84, 277—Researches on past and present history of earth's atmosphere, 88, 284—Rhimanthin, 58, 99—Röntgen rays in ordinary sunlight, 73, 223—Ruberine, 47, 23, 47—Rusting of iron, 42, 286—Salicylcol, 35, 225—Sandalina oil as a product of decomposition of glucosides, 86, 13 — Separation of carbon, 91, 268 — Separation of nickel and cobalt, 36, 150—Sesquisulphide of iron, 30, 139 — Silicon in cast-iron, 13, 178 — Somberrite, 6, 48—Sombbrero guano and other natural phosphates, 9, 28 — Some waters of the Dart which destroyed fish, 40, 54—Spontaneous decomposition of chloride of lime, 2, 262 — Stibiconise, natural oxide of antimony from Borneo, 5, 74—Substance obtained from root of strawberry, 38, 135—Substances extracted from walnut, 20, 116—Sulphocyanide of ammonium, 18, 109—Sulphocyanide of ammonium and sulphocyanogen, 29, 160—Sulphovinic acid, 31, 210 — Thermometers, 74, 75—Tinkalite (borate of lime) from Peru, 4, 182 — Toxic properties of mercuric methide, 13, 47—Transformation of citric, butyric, and valeric acids, 5, 122—Tripolite of Barbadoes, 34, 108 — Urea and crenate of ammonia in spring-waters, 37, 233—Valuations of density produced by heat in mineral substances, 9, 270—Vanadium ochre, 7, 210—Vegetable hematine, 63, 188 — Vegetation in an atmosphere devoid of oxygen, 68, 259—Vegetation in hydrogen, 67, 303—Water analysis, 39, 62—Xanthates of nickel and cobalt, 82, 94—Zinc green, 8, 47 — Zinc in water, 76, 313
- Phisalix, C., Action of porcelain filter on the poison of the viper, 74, 12—Red pigment of Pyrocoris apterus, 69, 301
- Phisalix, C., and J. Bertram (see Bertram, J.)
- Phisalix, C., and Gabriel Bertrand (see Bertrand, G.)
- Phlegms, rectification of industrial, 56, 67
- Phlobaphene, 19, 203; 42, 96
- Phlogiston, 17, 101; 23, 215, 243, 256
- Phlorein, 32, 147
- Phloretic acid (see Acid)
- Phloretin, 36, 153—Derivatives, 30, 167; 76, 250
- Phloretinic acid (see Acid)
- Phloridize, 22, 287—Constitution, 10, 311—Iso- (see Isophloridize)
- Phlorizin, 36, 153; 55, 270
- Phloroglucine, 30, 10—Action of bromine on, 36, 247—Isomers of, 41, 262 — Micro-chemical detection, 57, 71 — Pretended reaction for, 58, 24 — Sulphuretted tannic acid from, 27, 71—Trioxime of, 53, 227
- Phloroglucinal and derivatives, absorption spectra, 86, 44—Derivatives, 76, 251—Dynamic isomerism of, 93, 207 — Formation by interaction of ethyl malonate with its sodium derivative, 88, 302—Synthesis, 76, 249
- Phloroglucol, chlorination, 51, 199
- Phloron and its derivatives, 20, 166 — And xyloquinon, 44, 122
- Phlorose, 37, 263
- Phocæna communis, juice contained in muscles of 23, 155
- Phoenix melanocarpa, fruits of, 74, 281
- Phoenix mine, mineral from, 34, 10
- Phoneidoscope, 41, 292
- Phoneidoscopic process by means of coloured rings, 41, 48
- Phonograph, 38, 189, 199, 209
- Phormium, means of distinguishing from hemp, flax, etc., 30, 176—Tenax, analysis of the seed of, 11, 112
- Phornicochroite and crocoite, synthesis, 65, 154
- Phorone, nature and constitution, 31, 111—Of camphoric acid, synthesis, 81, 118
- Phosgene, 20, 285—Action on amides, 22, 144—Action on ammonia, 40, 238 — Action on mixed organo-magnesium compounds, 87, 226 — Action on zinc methyl, 22, 299 — Ether and iodide of ethyl, action of sodium on, 26, 288—Fluid, action on amides, 25, 119—Fluid, action on organic compounds, 22, 24—Gas, action on aromatic hydrocarbons, 22, 48—Reaction, 85, 108
- Phospham, 30, 64—Reactions, 76, 182
- Phosphamide, 20, 251—Chlor- (see Chlor-phosphamide)
- Phosphamides, 20, 275, 298
- Phosphate, amino-magnesian, 89, 34—Ammonio-calcic, 81, 240 — Ammonio-calcic, 86, 54—Ammonio-magnesia, insolubility in dilute ammonia, 47, 9, 71—Ammonio-magnesian, estimation of phosphoric acid as, 31, 274; 32, 5, 12, 70—Ammonio-magnesian, estimation of phosphoric acid as, 22, 227—Ammonium magnesium, 54, 297—And arseniate, distinction between, 24, 119—Bicalcic, decomposition by water, 44, 93—Bicalcic, properties, 42, 37—Bicalcic, solubility in pure water, 85, 71—Bicalcic, solubility in solutions of phosphoric acid, 65, 132, 227—Bone (see Bone)—Chromic, 38, 22; 52, 194—Cupric, from Cornwall, 24, 239 — Dicalcic, 89, 203—Estremadura, 14, 67—Ferric, basic, 90, 34—Ferric, composition, 36, 132—Ferric, precipitation with calcium sulphate, 47, 203—From the Grand Connettable, 71, 12—Ground mineral, as a fertiliser, 74, 4—Hypo- (see Hypophosphate)—In Italy, deposits, 55, 220, 271—Insoluble, rapid estimation, 73,

- 25, 47, 71, 94—Magnesium ammonium in human urine, 48, 105.
 Manganic, violet ammoniacal, 87, 23.
 Meta- (see Metaphosphates)—Metallic, electrolysis of, 61, 18. Method for estimation of manganese and cobalt, 83, 37. Methylaminomagnesian, 89, 34—Mon-acid, and di-acid, in urine, determination, 68, 282—Monomanganous, preparation, 81, 135—Monomanganous, decomposition, 80, 147—Of dimercurammonium series, 91.
 Ortho- (see Orthophosphates)—Phenyl- (see Phenylphosphates)—Precipitated and reverted, value, 42, 259—Process for utilisation in sewage, 23, 101, 111.
 Pyro- (see Pyrophosphates)—Redonda, 41, 58, 102; 49, 116—Reverted, 28, 31—Reverted, agricultural value, 54, 326; 55, 249—Rock, 18, 238, 250—Rock, determination of iron oxide and alumina in, 74, 111, 112—Sesquiphosphate, 85, 101—Sewage process, 23, 298—Sewage reaction, 23, 31—Soluble, estimation, 71, 67. Super- (see Superphosphates)—Tricalcic, converting into phosphorous chlorides, 47, 129—Tricalcic, decomposition by water, 27, 117—Tricalcic, solubility, 13, 221—Tricalcic, solubility in solutions of phosphoric acid, 65, 132, 227—Tricalcic, solubility in water, 78, 291—Tricalcic, transforming into chlorinised compounds of phosphorus, 46, 302—Trimethylaminomagnesian, 89, 34. Urine, estimation of phosphoric acid as, 27, 199—West Indian, 13, 1.
 Phosphates, 37, 63; 39, 94; 47, 223; 51, 251, 54, 281, 80, 88. Acetopyrophosphates (see Acetopyrophosphates)—Action in culture of cereals, 59, 33, 60, 12. Action of hydrochloric acid gas upon, 81, 122—Action of sulphuric acid upon, 41, 220—Action of sulphuric acid on, 41, 220—Action of sulphurous acid on, 23, 136—Action on calcareous soils, 35, 156—Action on iron and manganous soils, 45, 109—Ammoniacal magnesian, 31, 240; 89, 34. Ammonioearthly, 32, 200—Analysis, 26, 205; 30, 227; 45, 252—Analysis of commercial, 38, 101, 111, 112—And arsenates and vanadates, analogous, 54, 294—And arsenates, mineral, analysis, 26, 18—And arsenates, new series of, 44, 180—And chromates, 23, 101. Annual production in the world, 71, 185—Assimilability of, 27, 142—Behaviour in the soil, 45, 131—Behaviour with ammonium citrate, 46—Biometallic, 54, 323—Biological history, 76, 217—Calcareous, of Département du Lot, 28, 23—Cane, 27, 117—Certain double yttrium and potassium or sodium, 58, 232—Commercial, and potash salts, 31, 270—Constitution, 33, 9—Containing silica and fluorine, analysis, 41, 101—Conversion of metaphosphates into, 25, 275—Crystalline, 47, 190—Crystalline, native, 21, 168—Crystalline, production, 22, 27—Crystallised, 3, 62—Crystallised, production, 10, 25—Decomposition by potassium sulphate, 46, 280—Detection, 40, 111—Detection of alumina in, 74, 309—Double, of yttrium and potassium, and of zirconium and potassium, 54, 23—Double titanium, tin, and copper, 62, 74—Earthy, 56, 23—Enriching with a carbonated gangue, 39, 104—Estimation, 11, 49; 17, 156—Estimation by conversion into phosphides, 17, 286—Estimation of iron and alumina in, 28, 208—Estimation of phosphoric acid in, 80, 188; 81, 105; 85, 124—Ferrous- (see Ferropyrophosphates) Fossil, analysis, 26, 48—Glycerol- (see Glycerophosphates)—In agriculture, 18, 240—In Bohemia, distribution of, 52, 225—In Burton ales and Dublin porter, 38, 215—In Cambrian rocks, 31, 202—In different elements of blood, 39, 218—In manures, estimation, 20, 77, 108, 135—In potable waters, determination, 84, 60, 78—In soils, 1, 29—In sugar cane, localisation, 86, 278—In superphosphates of lime, determination, 15, 84—In Thomas's slags, 75, 170—Influence on fermentation of glucose by yeast juice, 91, 292—Influence on putrefaction, 31, 282—Influence on vinous fermentation, 49, 101—Insoluble, 48, 103—Insoluble, estimation, 59, 150—Insoluble, effect of lime on, in soils, 85, 157—Insoluble, formation, 84, 24—Insoluble, method of testing value, 43, 209, 222—Manganic, 84, 60—Manufactory at Blanchard, 26, 71—Manure (see Manure)—Manurial, experiments with, 55, 18—Meta- (see Metaphosphates)—Metallic, action of carbon dioxide on, 88, 243—Metallic, electrolysis, 61, 18—Methylaminomagnesian, 89, 34—Mineral, analysis, 10, 1—Mineral, and organic phosphates in manure, 34, 154—Mineral, and pure fertilisers, Dr. Morfit's work on, 27, 73, 104, 123—Mineral, and superphosphates of lime, 34, 48, 55—Mineral, iodine in, 15, 3, 35—Mineral, lime, alumina, and iron in, 76, 111—Mineral, of lime, 1, 10—Mineral, revision of, 10, 145, 157, 217, 208—12, 184; 16, 150—Mineral, value of, 25, 255, 268—Natural, 56, 28, 45, 55—Natural, analysis of, 12, 209—Natural, determination of phosphoric acid in, 28, 19—Natural, effect of decomposing organic matter on, 68, 20—Natural, employed in agriculture, analysing, 28, 124—Natural, genesis of, 67, 314; 69, 13—Natural, manurial experiments on action of, 46, 125—Natural, rare or novel, 67, 288—Neutral to litmus, 45, 111—New double, in magnesian series, 58, 12—New, isoclase and kollophane, 22, 106—Nodular, of South Carolina, 20, 82—Occurrence of, 61, 96—Of Algeria, 72, 172—Of bone-ash, solubility in water holding carbonic acid, 23, 93—Of earthy alkaline bases, decomposition in presence of water, 49, 46—Of phenyl (see Phenyl)—Of Quercy, of Lot, etc., 28, 240—Of the south, 27, 267—Organic and mineral, in manure, 34, 154—Organic phosphorus compound formed by yeast-juice from soluble, 95, 120—Ortho- (see Orthophosphates)—Oxide of iron and alumina in, 76, 150—Price of high class, 63, 204—Pyrenean, agricultural value of nitrogen of black matter in, 85, 114—Pyro- (see Pyrophosphates)—Reduced, estimating amount, 20, 111—Retrograde, 45, 84, 85—Reversion in superphosphates used in agriculture, 41, 160—Reverted, determination, 46, 18, 31—Reverted, determination, Gladding's method, 48, 117—Reverted, valuation, 41, 83—Rock, of animal origin, 67, 240—Sedimentary, identity of certain, 62, 38—Of sesquioxide of iron and alumina, 30, 295—Solubility, 31, 10—Soluble, action on rootlets of plants, 53, 24—Soluble and insoluble, action on barley, 48, 170—Soluble, by-products containing, 20, 240, 264—Soluble, cause of high and low estimations, 23, 220—Soluble, in cotton-fibre, seeds, etc., presence of, 15, 223—Soluble, retrogression in mixed manures, 92, 77—Soluble, in seeds, 20, 121—Soluble, reversion in ammonium citrate, 41, 173—Soluble, used in agriculture, 29, 273—Solution in soil by plants, 45, 88—Springly soluble, application on mineral soils, 47, 225—Super- (see Superphosphates)—Thiohypo- (see Thiohypo-phosphates)—Trimetallic, 56, 23—Used in medicines, 1, 170—Valuation of, 30, 194, 184, 204—Valuation of commercial, 53, 133—Wheat, 76, 278
 Phosphated bread (see Bread)—Compound, 21, 119
 Phosphatic chalk (see Chalk)—Formation, origin, 20, 82—Guano (see Guano)—Limes (see Limes)—Manure (see Manure)—Mineral (see Mineral)—Nodules (see Nodules)—Raw materials, sampling cargoes of, 21, 21—Rock (see Rock)
 Phosphazine, synthesis, 79, 191
 Phenylether, 35, 217
 Phenylsulphide, 180- (see Isophenylsulphide)
 Phenylsulphochloride, synthesis, 43, 11
 Phenyllic acid (see Acid)
 Phosphide, cuprous, 68, 209—Cuprous, crystalline, 68, 85—Nitrogenchloro- (see Nitrogenchlorophosphide)—Sesqui- (see Sesquiphosphide)—Tetra-nickelous, 28, 323—Tin sulpho- (see Tin)—Triferrous, 27, 292
 Phosphides, estimation of phosphates by conversion into, 17, 286—Metallic, 3, 273; 40, 24; 77, 227—Phosphorus in, 78, 63—Sulpho- (see Sulphophosphides)
 Phosphine, 34, 67—Action on mercuric cyanide, 34, 167—Action on selenium dioxide, 66, 271—And oxy-ammonia bases, 26, 256—Methyl- (see Methylphosphine)—Of methyl series, 24, 34—Phenyl- (see Phenylphosphine)—Preparation, 71, 381—Reducing action, 34, 14—Triethyl- (see Triethylphosphine)
 Phosphine oxide, tribenzyl- (see Tribenzylphosphine)—Triethyl- (see Triethylphosphine)
 Phosphine oxides, tertiary, compounds with acids and salts, 93, 91
 Phosphines, action of chlorides of platinum, palladium, and gold upon, 22, 58—Action of zinc ethyl, 47, 294—And arsines and amines, production of mixed, 2, 331—Aromatic, 25, 131—Mixed tertiary, 58, 22
 Phosphite, hypo- (see Hypophosphite)—Of baryta (see Baryta)
 Phosphites, acid, of alkaline metals, 57, 211—Acid, of primary cyclic amines, 93, 304—Composition, 34, 272—Constitution, 15, 258—Glycerol- (see Glycerophosphites)—Hypo- (see Hypophosphites)
 Phosphoammoniomolybdic salt (see Salt)
 Phosphobenzene, 35, 217
 Phosphochromates, 69, 73
 Phosphocyanogen, 34, 203
 Phosphododekamolybdic acid (see Acid)
 Phosphoglycerate of lime (see Lime)
 Phosphoglycerates, acid, 77, 285; 78, 255—Estimation, 77, 141, 237, 298—Organic, 79, 35
 Phosphoguanano, mono- (see Monophosphoguanano)
 Phosphoidides of boron (see Boron)
 Phosphomolybdate, ammonic, determination of phosphoric acid as, 39, 42
 Phosphomolybdic acid (see Acid)
 Phosphonitrated bases, 89, 215
 Phosphonitril, 15, 154
 Phosphonium and arsenium compounds, 44, 83—Compounds, 83, 48—Iod- (see Iodphosphonium)—Tetramethyl- (see Tetramethylphosphonium)
 Phosphonium bromide, dissociation, 64, 301
 Phosphonium chloride, formation, 94, 36
 Phosphonium sulphate, 60, 246
 Phosphoryl chloride, action of hydrogen sulphide and selenide on, 75, 95
 Phosphopalladic compounds, 66, 98—Ethers (see Ethers)

- Phosphoplatinic compound from telluride, **26**, 23—Compounds, **22**, 22, 34, 191; **26**, 145, 180; **43**, 222
- Phosphoplatinous chloride (*see* Chloride)
- Phosphoprotein, reaction distinguishing from nucleoprotein, **98**, 243
- Phosphoral trifluoride, **60**, 254
- Phosphor-bronze (*see* Bronze)
- Phosphorchromite, **22**, 60
- Phosphor-copper, structure of, **97**, 238
- Phosphor-salt and borax, substances crystallised in fused beads of, **24**, 109—Beads, crystals in, **22**, 60
- Phosphorescence, **4**, 274; **39**, 184; **45**, 65; **61**, 74—Action at temperature of boiling liquid air, **70**, 252—Cathode, of binary systems, law of optimum of, **99**, 71—Cathode, of complex systems, **96**, 36—Cathodic, of erbium diluted with lime, **94**, 46—Cathodic, of terbium and dysprosium diluted in lime, spectra of, **94**, 79—Caused by β -rays of radium, **91**, 240—Examination of the light in certain cases of, **18**, 30—Extinction, **48**, 22—History of, **44**, 94—Ionisation by phosphorus and, **98**, 305—Mineral, **63**, 165—Nature of, **69**, 307—Of alumina (*see* Alumina)—Of arsenic (*see* Arsenic)—Of decaying organic matter, **4**, 201—Of diamond (*see* Diamond)—Of lophine (*see* Lophine)—Of organic bodies, **35**, 145, 165—Of ozone (*see* Ozone)—Of phosphorus (*see* Phosphorus)—Of potassium (*see* Potassium)—Of rare earths (*see* Earths)—Of sea (*see* Sea)—Of sodium (*see* Sodium)—Of strontium sulphide (*see* Strontium sulphide)—Of sulphides (*see* Sulphides)—Of sulphur (*see* Sulphur)—Phenomena of, **41**, 252; **81**, 21; Preparation of calcium sulphide having a violet, **54**, 213—Produced by frictional electricity, **24**, 288—Radiations emitted by, **73**, 141—Scintillating, of Sidot's blende, **88**, 37—Spectra (*see* Spectra)
- Phosphorescent alumina (*see* Alumina)
- Bodies, action of light on, **43**, 270
- Diamonds (*see* Diamonds)—Jewels (*see* Jewels)—Light (*see* Light)—Materials, **89**, 245—Matter (*see* Matter)—Mixtures formed by sulphide of strontium, **78**, 71—Phenomena, theory, **48**, 237—Pork (*see* Pork)—Powders, production and application, **40**, 289—Spectra (*see* Spectra)—Substances, loss of light from, **42**, 302—System, antianodic, **75**, 312
- Phosphorescing substances, **90**, 208
- Phosphoretic hydrogen (*see* Hydrogen)
- Phosphoric acid (*see* Acid)—Amidines (*see* Amidines)—Anhydride (*see* Anhydride)—Chloride (*see* Chloride)—Diethers (*see* Diethers)—Esters (*see* Esters)—Ether (*see* Ether)—Glass (*see* Glass)—Iron (*see* Iron)—Oxide (*see* Oxide)—Pentachloride (*see* Pentachloride)—Perchloride (*see* Perchloride)—Poisoning, variations of urea in cases of, **41**, 283—Steels (*see* Steels)—Sulphide (*see* Sulphide)—Sulphochloride (*see* Sulphochloride)
- Phosphoriferous gypsum (*see* Gypsum)
- Phosphorised air (*see* Air)—Silver (*see* Silver)—Substance in blood corpuscles, **33**, 237
- Phosphorite beds in Austria, **31**, 207—Beds of Estremadura, **38**, 175—Deposits, **24**, 167—From Estremadura, **29**, 165
- Phosphorites, Belgian, **39**, 239—Estimation of phosphoric acid in, **22**, 227—Mineral, transformation of phosphoric acid of, **36**, 246—New type of, **67**, 265
- Phosphorography applied to photography of the invisible, **54**, 164—Of ultra-red region of solar spectrum, **47**, 93
- Phosphoroscope, **60**, 64
- Phosphoroselenic acid (*see* Acid)
- Phosphorous acid (*see* Acid)—Oxide (*see* Oxide)
- Phosphorus, **83**, 289, 307; **90**, 227—A reagent for metals, **18**, 130—A test for iodates, **28**, 288—Absorbent power, **26**, 217—Acids of (*see* Acids)—Action of ammonia on, **19**, 191; **24**, 241; **98**, 11—Action of haloid compounds of, on iron, nickel, and cobalt, **74**, 84—Action of hydrogen peroxide on, **93**, 256—Action of light on, **61**, 214—Action of magnesium alkyl compounds upon the halogen derivatives of, **90**, 255—Action on acetanilide, **57**, 255—Action on alkaline metallic solutions, **27**, 52—Action on copper, **65**, 258—Action on gold, **75**, 167—Action on hydriodic and hydrobromic acids, **42**, 329—Action on metallic chlorides, **74**, 37—Action on platinum, **75**, 35—Alleged transformation into arsenic, **81**, 304—Allotropic modifications, **79**, 211—Allotropic states of, **100**, 184—Allotropic states of, reciprocal conversion, **24**, 181, 204—Allotropic transformation, **27**, 46, 70; **92**, 94—Amorphous, **6**, 154—Amorphous, action of hydrogen gas on, **71**, 245—Amorphous, for safety matches, **21**, 168—Amorphous, new variety, **13**, 133—Amorphous, phosphorus in a condition analogous to that of, **27**, 59—Amorphous, reductions with, **95**, 100; **96**, 221—Amount of arsenic in, **22**, 276—And arsenic, analogy between the allotropic states of, **47**, 246—And arsenic and antimony series, silver bases of, **3**, 78—And arsenic test, **54**, 289—And compounds, thermal behaviour, **95**, 145—And copper compounds, **12**, 172—And hypophosphorus acid and their salts, reducing power, **28**, 285—And iodine in cod-liver oils, **45**, 175—And iodoform, **25**, 286—And iron and carbon, mutual relations when together in cast-iron and steel, **82**, 221, 233—And iron, separation, **40**, 150, 160—And manganese, ferromagnetic compounds, **95**, 227—And match manufacture, origin and progress, **4**, 16, 31, 45, 77, 89—And oxygen, reaction between, **88**, 253—And phosphorescence, ionisation by, **98**, 305—And phosphorus sesquisulphide, mixtures, **93**, 269—And platinum compounds and derivatives, halogen, **91**, 131—And sulphur, **89**, 54—And sulphur, dissemination of, **58**, 177—And sulphur group, action of substances of, on solutions of metals, **6**, 43, 71—And sulphur in crucible steels, **74**, 76—And sulphur mixtures formed below 100°, **86**, 108—Animal charcoal, an antidote for, **25**, 214—Aqueous solution of, **29**, 208—Association with vanadium in rocks, **31**, 166; **32**, 34—Atomic volumes, **96**, 232; **98**, 256—Atomic weight, **93**, 55; **99**, 69; **100**, 24, 278—Bases, **25**, 232, 245, 278—Black, **11**, 207, 280; **21**, 201; **46**, 155; **81**, 257—Black, producing, **29**, 122—Carbon in, estimation, **50**, 257—Cause of emission of light by, **21**, 190—Chemical polarisation of neutral oxygen during slow combustion of, **1**, 109—Combinations, **16**, 74; **19**, 275—Combinations, in which it appears to be present in an allotropic state, **27**, 33—Compound in wheat bran, **90**, 112—Compound, new organic, **21**, 203—Compound, organic, formed by yeast-juice from soluble phosphates, **95**, 129—Compounds, **23**, 252; **28**, 21—Compounds, aromatic, **27**, 322; **28**, 84—Compounds, constitution, **26**, 156—Compounds containing nitrogen, **18**, 282—Compounds, organic, **66**, 98; **89**, 116—Conversion, **26**, 228—Conversion into arsenic, **81**, 257—Crystallisation, **14**, 118; **30**, 194, 205; **39**, 115, 144—Crystals of, **30**, 168—Decomposition of water by,
- under influence of nitric acid, **9**, 242—Derivatives of benzene, **35**, 163—Detecting by hydrogen compound, **10**, 163—Detection, **3**, 50—Detection and estimation in cases of poisoning, **1**, 207—Detection by means of magnesium, **19**, 179—Detection, Hoffman's test, **6**, 264—Detection in presence of fatty bodies, **28**, 325—Detection, toxicological, **28**, 33—Determination by molybdate of ammonia, **35**, 115—Determination by molybdenum, **62**, 25—Determination, colorimetric, **56**, 160—Determination in chemico-legal investigations, **75**, 281—Disease, antidote to, **4**, 123—Dissociation spectra, **77**, 88—Effect of blows on, **93**, 200—Elimination in Bessemer converter, **39**, 219—Emanations, **87**, 46—Estimation in form of phospho-ammoniomolybdate salt, **35**, 1, 43, 67—Expansion, **31**, 197; **64**, 112—Experiments tending to show compound nature of, **40**, 179—Extracting from bones, **3**, 270—Formation of ozone during slow oxidation, **40**, 307—Forming organic compounds of, **96**, 257—Free, detecting, **82**, 205; **86**, 58—Free, estimation in oils and fatty bodies, **80**, 135—Free, in Saline Township meteorite, **87**, 66—From fossil bones, **52**, 214—Glwk., **61**, 140—Group, phenyl compounds of the elements of, **91**, 34—Heat of combustion, **87**, 154—Holder, **19**, 285—In ancient iron, **40**, 138—In ashes of coals and coke, **27**, 118; **75**, 8—In atmosphere, **2**, 310—In basic steel, estimation, **84**, 108—In cast-iron and steel, **7**, 87—In cast-iron, estimation, **8**, 59; **18**, 252—In cast-irons, densimetric determination, **65**, 239—In coke and coal, **82**, 8—In combustible substances, determination by means of calorimetric bomb, **100**, 232—In iron, estimation, **83**, 122—In steel, estimation, **82**, 55—In Cleveland iron-stone, **38**, 14, 29—In cod-liver oils, **45**, 175—In condition analogous to that of amorphous phosphorus, **27**, 59—In crude iron and steel, determination, **55**, 248—In hematite pig-iron, estimation, **91**, 69—In iron, **17**, 254; **38**, 14, 29, 39, 145—In iron, cast-iron, and steel, sources of error in determination of, **98**, 270—In iron and iron ores, determination, **49**, 208—In iron and iron ores, estimation, **42**, 87—In iron and iron ores, estimation by molybdate of ammonia, **2**, 227—In iron and steel, **19**, 58, 95, 117—In iron, steel, and ores, determination, **66**, 324—In iron and steel, determination, **45**, 284; **46**, 23; **47**, 253; **53**, 223, 235; **55**, 236; **56**, 67; **58**, 163; **65**, 52—In iron and steel, estimation, **13**, 170; **19**, 71; **37**, 68, 80—In iron, determination of, **45**, 195; **60**, 20; **62**, 28—In iron ore, **38**, 39—In iron wire, etc., **9**, 180—In iron and steels, determination, **67**, 101—In lucifer matches, substitution of sodium for, **19**, 148—In ores, pig-iron, and steel containing arsenic, determination, **82**, 8—In organic compounds, estimation, **3**, 67; **80**, 280—In organic matter, determining, **97**, 258—In oysters, **4**, 268; **71**, 281—In phosphides, **78**, 63—In pig-iron, estimation, **22**, 144; **54**, 174, 200—In pig-iron, steel, and iron ore, **62**, 220, 231—In pig-iron, steel, and malleable iron, estimation, **23**, 76—In pig-iron, steel, and wrought-iron, estimation, **23**, 36—In plants, etc., condition and determination, **57**, 31—In rural and domestic economy, **51**, 106—In spiegeleisen, determination, **36**, 275—In steel, **77**, 117—In steel, iron, and iron ores, **76**, 200—In steel, estimation, **43**, 147, 186, 209, 230, 256, 278; **52**, 279; **83**, 122, 154, 216—In steels, determination, **72**, 173—In urine, determination, **62**,

- 240—In urine in cases of poisoning, 42, 259; 43, 108—In vegetable soils, determination, 65, 66; 68, 68—In vegetation, 57, 140—Influence of low temperature on, 70, 180—Influence on estimation of chromium in iron and steel, 57, 153—Liquid, 78, 40—Lucifer matches without, 25, 106—Luminosity, 6, 188; 22, 240—Luminous nature, 41, 92—Manufacture, 19, 181; 39, 147—Matches, 4, 60—Matches free from, preparation, 10, 282—Microchemical analysis, 64, 172—Mineral in vegetables, 2, 203, 204, 205—Modification, 63, 81—Moist, and air, conduct towards carbon dioxide, 48, 100; 49, 142—Moist, products of ozonisation of air by, 43, 97, 127—Organic, 77, 116—Organic bases containing, 88, 50—Organic derivatives, preparing, 90, 269—Origin in its various deposits, 40, 227—Oxidation, 20, 161; 46, 92; 92, 52; 96, 137—Oxidation, atmospheric, 43, 149, 249—Oxidation, atmospheric, formation of ozone by, 41, 76—Oxidation, products of slow, 17, 142; 41, 76—Oxidation, rate of, 70, 90—Oxygen compounds of, 62, 206—Phosphorescence of, 30, 68; 46, 92; 91, 130—Pigment, 5, 171—Pigments, resolution in microscopic examination of urinary sediments, 48, 171—Poisoning by, 9, 206; 24, 253—Poisoning by, process to prove, 1, 17—Poisonous action, 16, 102—Precaution in use, 22, 287—Preparation, 6, 48; 69, 230—Pulverisation, 11, 87; 13, 228—Qualitative reaction, 93, 305—Question, 41, 123—Reciprocal trans-formation of two allotropic conditions of, 25, 156—Red, 68, 66; 97, 312—Red, action of soda-ammonium in excess on, 78, 184—Red, action of sulphur on, 51, 142—Red, action on sulphur, 9, 260—Red, analysis of compound, 26, 261—Red, heat of combustion, 29, 206—Red, solubility in alcoholic aqueous potash, 89, 263—Regeneration, apparatus for, 11, 175—Removal from iron, 25, 237—244—Salts of lead in detection of, 48, 292—Separated from crude iron, 23, 237—Series, certain of (see Btain)—Spectrum, 7, 220, 11, 9; 24, 232—Spectrum in fused salts, 74, 41, 49—Spitting of gold and silver in vapour of, 50, 23—Steel containing, mechanical properties, 21, 142, 276—Structural changes in, 20, 10—Substitution of amorphous for normal, in preparation of hydrobromic and hydriodic ethers, 3, 344—Supercooling, 80, 183—Test, Hofmann's, 11, 53—Tests for, in cases of poisoning, 6, 163, 211—Thermo-chemistry of, 99, 2—Transmutation into arsenic and antimony, 82, 166—Urinary, 79, 35—Various, of, space configuration, 83, 101—Vapour density, 22, 106—White, 48, 201—White, detecting small quantities, 93, 252—White, heat of transformation into red, 87, 178—White, liberated from phosphorus sulphide, 91, 303—White, nature of, 12, 251—White or ordinary, detection in igniting composition of lucifer matches, 99, 141—Yellow, 74, 318—Yellow, and copper in aqueous solution, reaction between, 91, 190—Yellow and red, non-existence of a common solvent for, 97, 35—Yellow, dissolved in essence of ter-phenethene, causes of allotropic trans-formation, 97, 179—Yellow, effect of heating in ammonia gas, 99, 206—Yellow, transformation of solutions of, into red, 97, 118
- Phosphorus anhydride, action of sunlight on, 48, 173—Alleged decomposition by sunlight, 48, 224**
- Phosphorus bromides, 10, 9**
- Phosphorus bromochloride, 25, 57—Action on chloral, 25, 22**
- Phosphorus bromonitride, 66, 24**
- Phosphorus bronze, 24, 46**
- Phosphorus chloride, acid, 100, 265—Action of ammonia on, 90, 118—Action on metallic sulphides, 7, 72—Action on pyruvic acid, 22, 47—And other chlorides, compounds, 7, 72—And sulphobenzid, reaction between, 14, 153—And sulphur, combination, 21, 25—Decomposition by water, 24, 35; 25, 166—Gold (see Gold)—Type of, 13, 85**
- Phosphorus chlorides, 10, 60—Action on aromatic ethers of glycerin, 84, 264—Action on aromatic organo-magnesium derivatives, 90, 281—Action on phenanthrenequinone, 48, 213—And boron bromide, compounds, 83, 62—And gold chlorides, combination 50, 105—Converting tricalcic phosphate into, 47, 120—History of, 24, 135**
- Phosphorus chloronitride, 94, 71**
- Phosphorus chloronitrides, 76, 308, 311**
- Phosphorus chlorosulphide, 5, 41—Action on alcohol, 21, 88**
- Phosphorus cyanide, 11, 104**
- Phosphorus disulphide, existence of, 100, 60**
- Phosphorus fluoride, 32, 232, 258—Thermo-chemical researches on, 51, 60**
- Phosphorus fluorides, physical constants, 89, 215**
- Phosphorus halides and alcohols, interaction, 92, 245**
- Phosphorus haloids, action on dihydroresorcin, 86, 302; 87, 175—Action on platinum metals, 100, 1**
- Phosphorus hydride, preparation and properties of solid, 100, 208—Solid, 15, 136**
- Phosphorus iodates, test for, 28, 288**
- Phosphorus iodide, action on glyceric acid, 6, 179**
- Phosphorus iodides, action of boron bromide on, 83, 95—Equivalent of, 46, 113**
- Phosphorus iodosulphide, 67, 24**
- Phosphorus nitride, 96, 23—Heat of formation, 96, 59**
- Phosphorus oxide, 61, 212; 64, 304; 75, 202; 77, 20—Preparation, 84, 36**
- Phosphorus oxides, compounds of, 63, 102—Lower, 82, 103—Toxicity, 53, 25**
- Phosphorus oxybromide, 97, 174**
- Phosphorus oxybromochloride, crystallisation, 24, 217**
- Phosphorus oxychloride, action of water on, 76, 326—Action on acids, 26, 12—Action on ethers and chlorhydrines of silicic acid, 63, 233—And phosphoric anhydride, reaction between, 24, 264—And trichloride, distinguishing, 61, 120—Crystallisation, 24, 217—New, 24, 117—Preparing, 48, 149; 49, 70**
- Phosphorus oxyfluoride, 53, 297—Preparation, 62, 310**
- Phosphorus oxyiodide, 44, 268**
- Phosphorus pentabromide, action on azoxybenzene, 22, 144—Action on ethers, 22, 82—Action on mercaptans, 99, 59—Action on phenol alkyl ethers, 95, 47**
- Phosphorus pentachloride, action of isopyruvic acid on, 88, 281—Action on acetamide, 32, 152—Action on acetanilide, 55, 309—Action on aciamides, 25, 155—Action on acroleine, products of, 44, 193—Action on amides of acids, 35, 32; 46, 255—Action on aniline, 76, 42, 54—Action on benzamide, 99, 247—Action on benzoylphenylhydrazine, 71, 117—Action on chloroethylalcoholate, 23, 273—Action on ethers, 22, 82—Action on fenchene, 76, 251—Action on hydroxytrimethylsuccinic ester, 96, 268—Action on hyposulphite of lead, 22, 47—Action on isopyruvic acid, 88, 281—Action on meconic acid, 52, 308—Action on mercaptans, 99, 59—Action on methylene ethers of catechol derivatives, 97, 128; 98, 278; 99, 166; 100, 230—Action on nitrophenylthaleine, 25, 57—Action on phenol alkyl ethers, 95, 47—Action on saccharine substances, 19, 215—Action on salicylic acid, 52, 84; 57, 90—Action on tartaric acid, 1, 8—Action on tertiary cyclic amines, 91, 95—Action on tetrachlorobenzoylbenzoic acid, 86, 186—Action on tetrachloroquinone, 70, 98—Action on trimethylhydroresorcin, 93, 264—And phenols, reaction between, 97, 143—And tungsten trioxide, 70, 210—Decomposition of ammoniacal, 65, 292**
- Phosphorus pentafluorochloride, 64, 60**
- Phosphorus pentafluoride, 34, 153—Action at a red heat on platinum sponge, 63, 273—Combination with hyponitric acid, 62, 12—Gaseous, analysis, 55, 23—Physical properties, 53, 35**
- Phosphorus pentasulphide, 54, 12; 92, 191; 97, 168—Action on tetrachloride of carbon, 25, 190—And ammonia, reaction between, 94, 47**
- Phosphorus pentoxide, quantity of moisture that remains in a gas after desiccation by, 58, 37**
- Phosphorus perchloride, 1, 34; 7, 38—Abnormal density, 26, 205—Action of hydrogen, oxygen, and chlorate of potash on, 3, 47—Action on aromatic ethers, 50, 295—Action on arsenious and arsenic acids, 1, 118—Action on bichloride of aldehyde, 24, 230—Action on elements, 4, 333—Action on ethyl oxalate, 65, 73—Action on hydrocarbons, 53, 263—Action on iodoform, 21, 250—Action on methyl-naphthylacetones, 65, 37—Action on phenol-parasulphonic acid, 28, 99—Action on pyromucic and isopyromucic acids, 86, 24—Action on pyruvic acid, 28, 98—Action on sulphochlorides, 26, 277—And other chlorides, compounds of, 7, 72—And oxychloride, action on cinchonine hydrochlorate, 42, 106—Vapour density, 19, 273; 22, 106; 27, 142; 40, 222, 233, 282, 294**
- Phosphorus platinum compounds, chemical constitution, 22, 215**
- Phosphorus protochloride, action of bromine on, 25, 100**
- Phosphorus sesquisulphide, 47, 269, 305; 88, 173—And its behaviour with Mitscherlich's test, 85, 309—And phosphorus mixtures, 93, 269—And sulphur, action of heat and light on mixtures of, in carbon disulphide solution, 89, 130—Experiments with, 88, 278—Sulphur salts produced with, 44, 214**
- Phosphorus suboxide, 92, 94**
- Phosphorus suboxide, 84, 300; 89, 263—Non-existence of, 80, 240; 84, 264**
- Phosphorus subsulphides, 47, 305**
- Phosphorus sulphide, liquid, 43, 270—White phosphorus liberated from, 91, 303**
- Phosphorus sulphides, 40, 169, 217; 48, 12; 50, 57; 93, 127, 269—Formation in the cold, 89, 130**
- Phosphorus sulphobenzid and chloride, reaction between, 14, 154**
- Phosphorus sulphobromide, 24, 217; 29, 116—Decomposition by water and alcohol, 25, 57**
- Phosphorus sulphobromochloride, 25, 57**
- Phosphorus sulphochloride, action of ammonia on, 10, 302—Action on aqueous and alkaline solutions of phenols, 79, 191—Action on aromatic amines, 84, 48**
- Phosphorus tetrachloride and phosphorus oxychloride, action of water upon, 76, 326—Platinic derivatives, 26, 36**
- Phosphorus tetroxide, 54, 257—Experiments on, 80, 10**
- Phosphorus tribromide, action of ammonia-gas on, 93, 44**
- Phosphorus trichloride, action on aniline, 50, 220—Action on aromatic ethers of glycerol, 88, 251—Action on glycerin, 86, 221; 88, 35—Action on glycol, 86, 221; 87, 192—Action on magnesium nitride, 71, 25—Action on organic acids and water, 62, 191—Preparation, 85, 273**
- Phosphorus trifluoride, 50, 225; 51, 24;**

- 52, 36—Action of bromine on, **52**, 11—Action of induction-spark on, **50**, 295—Preparation and analysis, **51**, 117
- Phosphorus triiodide, action of ammonia-gas on, **93**, 44
- Phosphorus trisulphide, non-existence, **94**, 66
- Phosphorus trithiocyanate, action on alcohol, **85**, 9
- Phosphorus chloride, action of water on, **75**, 300—Action on pyromucic and isopyromucic acids, **86**, 24—Organic derivatives, **83**, 104
- Phosphotrimetungstic acid (*see* Acid)
- Phosphotungstic acid (*see* Acid)
- Phosphuret, nitrogen chloro- (*see* Nitrogen)—Of iron (*see* Iron)
- Phosphuretted copper (*see* Copper)—Hydrogen (*see* Hydrogen)—Hydrogen gas (*see* Gas)
- Photobromide of silver (*see* Silver)
- Photochemical combinations, waves of ether in, **37**, 142—Electricity, **63**, 49, 105 — Notices, **65**, 234 — Reaction of iron peroxalate, **45**, 236 — Reaction of Schützenberger's oxy-metric action, **53**, 191—Researches, **63**, 97—Researches on use of gaseous developing agents, **28**, 60
- Photochemically active chlorine (*see* Chlorine)
- Photochemistry of silver, **42**, 186
- Photocrystallisation, **80**, 216, 225, 236
- Photo-electric apparatus, **4**, 239
- Photo-engraving, **90**, 160
- Photogenic gas (*see* Gas)
- Photogram, **86**, 284
- Photograph, colour, a remarkable, **97**, 139—Of lightning flashes, **59**, 299
- Photographs, aerial (*see* Aerial)—By Boulton and Watt, supposed, **13**, 176, 177—Cause of the light border in, **45**, 235—Colour, **93**, 230—Colour, of living insects, **87**, 308—In colours, **13**, 252—In human pathology taken with X-rays, utility of, **73**, 61, 186, 210—In relief with Röntgen rays, **73**, 155—Lightning, **60**, 10—Micro- (*see* Microphotographs)—Of accurate values, obtaining, **59**, 254—Of arc spectra, **93**, 231—Of different woods, **91**, 301—Of electrical discharges, **93**, 230, 303—Of flames, **70**, 10—Of microscopic diamonds, **95**, 232—Of moon, **70**, 61—Of moving objects, possibility of systematic error in, **84**, 163—Of natural colours, **10**, 276 —Of thin liquid films, **94**, 89—On copper plates, **13**, 179—On opaline glass, **13**, 6—On season tickets at Great Exhibition, **15**, 59—Stereoscopic, **93**, 303 — Stereoscopic, obtained with X-rays, **73**, 210—Toning and fixing, employment of sulphocyanides, **17**, 263 — With natural colours, **13**, 5, 78
- Photographers to the Shah, **28**, 110
- Photographic action at temperature of boiling liquid air, **70**, 252—Action of α -particles emitted from radioactive substances, **100**, 326—Action of radium rays, **89**, 58—Action of stationary light waves, **70**, 254—Action studied spectroscopically, **47**, 243—Appointment, **18**, 262—Arc spectrum of iron meteorites, **69**, 89 —Ashes, reduction, **9**, 171—Baths, determining strength, **11**, 276 —Competition, **67**, 289—Conference of Camera Club, **69**, 97; **71**, 136—Convention, **62**, 50—Dark chamber, **28**, 60—Developer, **60**, 163—Development, reversibility of, and retarding action of soluble bromides, **92**, 235—Enlargement for astronomical observations, **29**, 229—Exhibition, **22**, 225; **44**, 262; **77**, 87; **95**, 260—Figures on glass, preparation, **21**, 180—Image, **62**, 28—Image, action of certain substances on undeveloped, **78**, 187—Image, invisible, **24**, 263—Image, invisible, nature of, **12**, 101—Image, transformations by prolongation of luminous action, **42**, 119—Images, effects of reversal of
- by prolongation of lamination, **42**, 35—Lens testing bench, **92**, 203 —Lenses, properties of images produced by, **22**, 191—Mosaics, **13**, 82—Operations, chemical changes attending, **65**, 181—Paper, chemical action of sunlight on, **13**, 114 —Phenomena connected with Colson-Russell effect, **79**, 302 — Pictures, producing photographically indelible, **11**, 32—Plane-table, **21**, 54—Plate, action exerted by metals on, **75**, 302; **77**, 167 — Plate, action of living structures on, **78**, 186 —Plate, action of wood on, in dark, **90**, 104 — Plate, action of zinc on, **74**, 61 — Plates, action of ozone on sensitive, **16**, 321 — Plates, determining sensitiveness, **63**, 33 —Plates, electric splashes on, **98**, 269 —Plates, electrical discharges on, **100**, 302—Plates, pictures produced on, in the dark, **80**, 288—Post, **23**, 191—Prints, formation of positive, **9**, 187, 214, 230—Prints in natural colours, **93**, 303—Processes, theory of, **92**, 227, 239—Proofs for engraving, produced on wood, **30**, 197 —Proofs obtained in darkness, **73**, 119 —Proofs, suppression of halos, **61**, 205—Properties of haloids of copper, **10**, 221 — Reproduction of colours, **63**, 111 — Reproduction of solar spectrum in its own colours, **63**, 120 — Researches on phosphorescent spectra, **80**, 49 — Revolver, principle of a new, **45**, 169—Shutter, efficiency, **74**, 280—Shutters, testing, **99**, 287—Society, Royal, **77**, 47; **99**, 132—Spectrum of comet b. 1881, **44**, 81—Spectrum of Sirius, **62**, 38 —Surfaces, rendering more sensitive for green, yellow, and red rays, **50**, 285—Transparencies, three colour, illumination by spectrum colours, **89**, 212—Yellow glass, substitute for, **10**, 252
- Photographing objects in relief and depression, **74**, 72—On enamel, **19**, 82
- Photography, application of aniline to, **28**, 60—Application of potassium-ammonium chromate to, **9**, 296; **10**, 28—Application to solution of problems in chemistry, **94**, 161—Applications, **64**, 50—As applied to eclipse observations, **33**, 143—Astronomical, **12**, 50, 64—By artificial light, **70**, 150—By Röntgen rays, **73**, 98, 189 —Celestial, in America, **9**, 159 —Colour, **63**, 87; **73**, 213; **74**, 275, 285 —Copper, **10**, 144—In 1878, **75**, 249 —In colours, **73**, 213—In connection with the Abyssinian expedition, **18**, 292, 300—In interior of Crookes tube, **73**, 232—In natural colours, **71**, 233—Investigation by means of, of the ultra-violet spark-spectra emitted by metallic elements, **48**, 195—Micro- (*see* Microphotography)—Natural colour, **96**, 150 — New application of, **9**, 171 — New processes in, **16**, 146—Of Bunsen flame reactions in ultra-violet spectrum, **70**, 103, 148—Of chromosphere, **42**, 66 — Of colours, **63**, 87 —Of colours by dyeing layers of coagulated albumen, **44**, 70 —Of fluoroscopic image, **76**, 158—Of highest rays of the spectrum, **71**, 228, 248—Of light rays of the smallest wave-lengths, **66**, 306; **71**, 118; **81**, 267—Of luminous rays, **68**, 46, 56, 63, 81, 100, 133, 158, 164, 180, 194, 201, 229, 239, 252, 262, 272, 289, 300; **69**, 9, 34, 41 — Of metallic objects through opaque substances, **73**, 85, 133, 144—Of metallic spectra, **62**, 299—Of ripples, **75**, 115 —Of solar spectrum, **58**, 311—Polychromic, **28**, 106, 171—Radio- (*see* Radio-photography)—Recent discoveries in, **12**, 210—Regeneration of waste silver solutions used in, **23**, 261—Review of, **64**, 12; **76**, 182—Spectro- (*see* Spectro-photography)—Spectrum, **80**, 273—Theory of, **8**, 220,
- 231, 255, 303—Use in chemistry, **68**, 222—Use of coloured glasses in, **60**, 121—Use of sodium sulphite in, **59**, 157—With dark light, **73**, 73, 74, 110, 121, 133, 269—With electric current, **63**, 131
- Photoiodide of silver (*see* Silver)
- Photolithography, **28**, 109
- Photometer, **25**, 228; **67**, 300; **96**, 31—Chemical, **41**, 122, 252 — Flicker, physiological principles underlying the, **100**, 266—Heli- (*see* Heliophotometer)—Human eye as an automatic, **41**, 179—Improved, **21**, 83—Portable, **92**, 264—Simman-Abady Flicker, **88**, 303—Spectral, **72**, 236—Spectro- (*see* Spectrophotometer)—Watt, **92**, 264
- Photometers, spectro- (*see* Spectrophotometers)
- Photometric apparatus (*see* Apparatus)
- Comparison of sources of light of different colours, **44**, 214 — Experiments, **21**, 202; **22**, 96—Method, **69**, 72 — Powers of electric light at Boston, **8**, 193—Researches, **23**, 107—Standard with acetylene, **73**, 59 —Standards, report on, **54**, 243 —Studies, **10**, 83, 192, 287; **22**, 107
- Photometry, **24**, 124; **67**, 300—Colour, **53**, 121, 153; **58**, 10; **64**, 295—Colour phenomena in, **93**, 266—Of coal gas, **24**, 37—Of colour, **58**, 10—Solar, **47**, 9—Unit of light for, **36**, 103—With nitrogen iodide, **60**, 248
- Photomicrographic apparatus (*see* Apparatus)—Camera (*see* Camera)
- Photomicrographs, **93**, 230
- Photophone, application to study of the sun, **42**, 270—Construction, **43**, 43—Selenium and its application to the, **44**, 1, 18
- Photophonic experiments, **42**, 234
- Photopolymerisation of vinyl bromide, **43**, 235
- Photosalts of silver (*see* Silver)
- Photosantonio acid (*see* Acid)
- Photosensitive solutions (*see* Solutions)
- Phototropy, **100**, 265
- Photozincography process, **28**, 250
- Phraseology employed in teaching fundamental facts in chemistry, **28**, 25
- Phrenosine, **45**, 87
- Phthalalcohol, **40**, 77
- Phthalamic acid (*see* Acid)
- Phthalamide, acetanhydride of (*see* Acetanhydride)—Action of acetanhydride on, **96**, 24
- Phthalate of bismuth (*see* Bismuth)
- Phthalates, **59**, 144
- Phthalein, hydroquinon- (*see* Hydroquinonphthalein) — Of hæmatoxylin (*see* Hæmatoxylin)—Of hydrochinon (*see* Hydrochinon) — Phenol- (*see* Phenolphthalein)—Salts, constitution, **90**, 166
- Phthalicins, **96**, 242 — Of mellitic and pyromellitic acids, constitution, **98**, 254—Of pyrogallie acid, **38**, 96—Of tertiary aromatic bases, **34**, 270; **35**, 241—Salts of, constitution, **98**, 253; **99**, 311
- Phthalen, nitro- (*see* Nitrophthalen)
- Phthalic acid (*see* Acid)—Alcohol (*see* Alcohol)—Aldehyde (*see* Aldehyde)—Anhydride (*see* Anhydride)—Esters (*see* Esters)—Green, **76**, 106; **77**, 44; **88**, 256
- Phthalide, **54**, 109—Ditolyl- (*see* Ditolylphthalide)
- Phthalimide, absorption spectra, **95**, 62—Acetyl and benzoyl derivatives, **93**, 198 — Action of organo-magnesium compounds on, **89**, 214; **90**, 70 —Phenyl- (*see* Phenylphthalimide)
- Phthaline, colo- (*see* Colophthaline)
- Phthalimides, substituted, **40**, 157
- Phthaliodide, ethyl- (*see* Ethyl-phthaliodide)
- Phthalonic acid (*see* Acid)
- Phthalyl, **22**, 59—Di- (*see* Diphtalyl)
- Phthalyl acetic acid (*see* Acid)
- Phthalyl dithiocarbimides, derivatives, **71**, 278
- Phthalyl ether, **48**, 238
- Phycocerythin, **99**, 233

- Phycocyanin, action of X-rays on, 73, 210
- Phyllocyanate of copper (*see* Copper)
- Phylloxanthin, use as a reagent, 33, 120
- Phylloxy, atomic (*see* Atomic)
- Phylloxera, 28, 240, 263; 39, 64, 184; 54, 81, 64, 122—Destruction, 28, 82; 56, 121—Destruction on, cubes or prisms of M. Robert for, 38, 33—In California, 43, 71—Invasion of, means of counteracting, 30, 52—Measures to be taken against, 30, 58—Of the oak, reproduction, 28, 263—Of vine, destruction, 28, 263—On vine, sulphide of carbon to destroy, 28, 240, 293—Ova of, vitality of, 35, 10—Peculiarities relative to winged form of, 28, 213—Production, rapidity of, 28, 213—Remedy for, 40, 81—Struggle against by means of muzz, 57, 141
- Vastatrix, influence of spring heats on, 29, 286—Vastatrix, report on investigations relating to, 28, 19—Vines tainted by, 28, 213—Xanthate of potash as a remedy for, 33, 75
- Phylloxerised vines (*see* Vines)
- Physical and analytical weighings, normal weights for, 68, 258—And chemical bench, 88, 244—And chemical properties of soil, influence on evaporation, 51, 202—And Chemical Society of University College, 36, 253; 37, 118; 38, 270; 44, 193; 51, 22, 48, 80, 130, 127, 151, 237, 292; 53, 130; 54, 224; 56, 5; 67, 74; 69, 89; 70, 219, 244, 292—Bases for theory of errors, 60, 230—Basis of solar chemistry, 4, 61—Calculations, reform in, 71, 123, 108; 72, 7, 104, 143; 76, 283; 97, 201; 99, 229—Apparatus (*see* Apparatus)—Chemistry (*see* Chemistry)—Condition of bodies, 21, 110—Constants, *see* Constants—Crystallography (*see* Crystallography)—Equilibrium of molecular systems, 81, 34—Forces (*see* Force)—Geography, 23, 55; 30, 11, 26—Geography and geology, researches on, 2, 13, 20, 44, 55, 79, 90, 138, 152, 164, 176, 200, 243, 258, 259—Geography of Southern Ocean, 17, 250—Isomerism of monochlorised camphor, 47, 34—Laboratory, National, report, 91, 14—Law, new, 25, 49—Measurement, apparatus as a standard of, 2, 178—Molecular equivalents, 52, 232—Phenomena observed during bursting of hollow cast-iron projectiles, 21, 13—Phenomena, currents, 43, 84—Problems investigated at solar physics observatory, 81, 31—Properties and atomic weights of elements, relations between, 80, 282, 214—Properties and chemical constitution, relation between, 36, 110—Properties of liquid compounds, 54, 97—Properties of matter in liquid and gaseous state under varied conditions of temperature and pressure, 32, 43, 53—Properties of soil in a dense and in a loose state, 46, 125—Quantities, dimensional analysis, 87, 223—Quantities, dimensions of, 87, 224—Quantities, relation of dimensions to directions in space, 66, 22—Quantities, suppressed dimensions of, 58, 265—Science, College of, 36, 32, 42; 46, 133—Science, modern, 17, 168—Scenes, classification of, 8, 69—Society, address to, 89, 91—Society, annual general meeting, 33, 71; 95, 92—Society, exhibition, 95, 22; 96, 282; 98, 282; 100, 238—Society, proposed new, 19, 296—Society, report of council, 91, 81; 93, 61; 99, 107—Society of Liverpool (*see* Liverpool)—Weights, normal weights for, 68, 258
- Physican on educational exam, 63, 34
- Physicians and Naturalists, German Congress, 65, 240; 66, 48; 68, 42, 282; 72, 55; 73, 185
- Physician's cane, 1, 132
- Physico-chemical analyses of soils, 42, 14, 247—Constants (*see* Constants)—Forces (*see* Force)—Laboratory of Leipzig University, communications from, 52, 71; 53, 37—Measuring apparatus (*see* Apparatus)—Notes, 50, 285—Research, methods of, 33, 188—Society, Russian (*see* Russian)
- Physico-geometrical models, 59, 96
- Physics and chemistry, approximations between, 54, 61—And chemistry of life (*see* Life)—Apparatus for students' practical work in, 94, 252—Application of fundamental laws of, to chemistry, 48, 206—Applications to seismology, 74, 304—Historical notes on, 46, 230—Instruction in, at South Kensington, 32, 124—Molecular, 9, 232; 72, 317—Molecular and cosmic, principles of, 21, 96—Molecular, in high vacua, 39, 153—Nobel prize for, 90, 300—Of ore flotation, 92, 288, 295—Review of, 33, 221; 34, 51; 36, 82, 91—Solar, 28, 125—Solar, Observatory, physical problems investigated at, 81, 214
- Physiological action and chemical constitution, relation between, in substituted aminoalkyl esters, 98, 254—Action of induced currents, difference according to nature of the metallic wire forming the induced battery, 29, 30—Action of muscular bases, 66, 24—Action, relation to chemical constitution, 17, 129—Activity of super-oxygenated molecules, 45, 227—Chemico- (*see* Chemico-physiological)—Chemistry (*see* Chemistry)—Ferments (*see* Ferments)—Fundamental colours, 30, 150—Oxidation (*see* Oxidation)—Phenomena in high regions of atmosphere, 29, 287—Study of Persian cyclamens, 73, 291
- Physiology and chemistry of the Agaricus oreades, 25, 155—Mechanical, 21, 215—Of invertebrata, 65, 312—Of plants and animals, 94, 61—Of some organs of alimutary canal of Blatta periplaneta, 52, 195—Vegetable, chemical aspects of, 37, 150—Vegetable, experiments in, 53, 156
- Physometer, an instrument for purpose of determining variable volumes of air, etc., 26, 277; 27, 216, 230
- Physostigmine, 15, 149
- Physotype, 89, 308
- Phytochemical processes, 35, 185
- Phytolacca decandra in wines, detection, 53, 287
- Phytolaccic acid (*see* Acid)
- Phytosterin, 37, 263
- Piallat, M., Rapid analysis of butters sophisticated with margarine, 52, 37
- Piazine-derivatives, 58, 265; 68, 134, 208

- Plant-life, action of ferrous sulphate on, **49**, 234
- Plants, absorption of iodine by, **81**, 110 — Absorption of ammonia of atmosphere by, **30**, 64 Absorption of metallic oxides by, **46**, 224—Absorption of nitrogen by, **67**, 33, 148 — Absorption of oxygen by leaves detached from, **69**, 49, 61—Absorption of selenium by, **39**, 213—Absorption of silice acid by, **35**, 220—Action of carbonic oxide on, **47**, 191—Action of light and water in liberating the peroxides, **73**, 194—Action of ozone on colouring matters of, **40**, 85—Action of poisons on, **13**, 128; **52**, 192—Action of rain, dew, and watering on, **43**, 118—Action of spectral rays in decomposition of carbonic acid in, **27**, 133—Action of various radiations of solar spectrum on, **73**, 36—Albumen in, **42**, 67 — Alcoholic and acetic fermentation of fruits, flowers, and leaves of, **34**, 142—Alumina in, **71**, 113—Alumina in ash of, **74**, 30 — Ammonia in, **44**, 37 — Analysis of, **36**, 142; **41**, 259, 267 — And animals, equivalent substitution of mineral matters in, **34**, 114—And animals, iron in ash of, **74**, 30 — And atmosphere, exchanges of carbonic acid and oxygen between, **66**, 294, 318—And atmosphere, gaseous exchange between, **82**, 255 — And ozone, **25**, 118—And soil, behaviour of salts of zinc with, **52**, 83—And soils, influence of industrial gases and waste waters on, **45**, 88—Angiospermous, assimilation products of leaves of, **53**, 49—Aqueous exhalation of, in air and carbonic acid, **28**, 314—Assimilation of carbonic acid by, **67**, 278—Assimilation of nitrogen by, **44**, 215—Assimilation of nitrogenous substances by, **31**, 6 — Australian, alkaloids of, **81**, 242 — Banks and Solander, illustrations of, **92**, 167 — Behaviour of the readily oxidisable constituents of sap in, **49**, 203 — British, colouring matters in, **74**, 278 — Caoutchouc in, **59**, 109 — Chemical phenomena of respiration of, **50**, 27, 288—Chemical studies on skeleton of, **44**, 315; **51**, 61—Chemico-anatomical researches on cell contents of, **47**, 115—Chlorine in, **89**, 55 — Chinchona (*see* Chinchona) — Colour, relation to richness of the soil, **60**, 174—Constituents of, **3**, 128; **5**, 236, 282, 298, 314, 324 — Cultivated, enemies of, and their destruction, **39**, 23—Cultivated, influence of different depths of sowing on, **50**, 296—Cyanogenesis in, **85**, 301; **88**, 15—Detection and presence of laccase in, **72**, 73—Detection and presence of rennet in, **87**, 106 — Detection of asparagine and glutamine in juices and extracts of, **48**, 118 — Detection of fixed oils in, **20**, 121 — Dicotyledonous, **22**, 71 — Direct absorption of ammoniacal salts by, **64**, 147 — Distribution of soda and potash in, **20**, 321; **27**, 256—Effects of cold on, **21**, 300—Electricity of, **20**, 289; **21**, 339; **26**, 259—Elements of milk-sugar in, **53**, 167, 186 — Equivalent substitution of mineral matters in, **34**, 131—Etherification in, mechanism of, **84**, 147—Experiments on respiration of, **9**, 192—Experiments on, with coloured light, **35**, 210—Fibre-yielding, of India, **1**, 293, 304—Fixation of atmospheric nitrogen by, **58**, 96 — Fixity of composition of, **42**, 24 — Fixity of composition of, analysis of Soya hispida, **41**, 283—Fodder, Australian indigenous saline, **57**, 33 — Fodder, hydrogen cyanide in, **87**,
- 270—Fodder, of New South Wales, salt-lush and native, **44**, 78, 89—Formation of nitrates in, **61**, 73—Formation of ozone by contact of, with peroxide of hydrogen, **34**, 4—Formation of saltpetre in, **50**, 234—Function of lime in life of, **42**, 211—Fungoid, diseases in, **65**, 240—Gases given off by, under influence of light, **5**, 98—Germination, accelerating, **28**, 59 — Gramineae (*see* Gramineae) — Green, assimilation of carbon monoxide by, **88**, 1 — Green, experiments, **71**, 38, 101—Green, hydrogen peroxide in, **70**, 98—Growth during night and day, **13**, 189—Growth under special conditions, **47**, 27—Herbaceous, metamorphosis and migrations of the immediate principles in, **21**, 22—Hydrocyanic acid in, **78**, 60—Hydrogen in juices of, **33**, 75—Identification of principal acids in, **73**, 295—In their dependence upon heat, **38**, 298 — Indigo-yielding, determination of indigo in, **94**, 9; **95**, 244 — Influence of electric light on, **66**, 208—Influence of heat and light on, **49**, 246; **50**, 248—Influence of manner of distribution of manures on, **69**, 168 — Influence of moisture of soil on production of, **52**, 2—Influence of pressure of gases on, **67**, 215—Influence of radiant heat on, during growth, **48**, 280—Influence of surface of leaves on evaporation of, **37**, 133—Influence of uninterrupted illumination on, **43**, 118—Influence of weather on, **51**, 214—Iron in ash of, **74**, 306—Juices of, detection of asparagine and glutamine in, **48**, 118—Leaves of, chemical composition and functions, **37**, 142 — Leguminous, tubercles of, **74**, 270—Living, carbonates in, **52**, 88; **53**, 109 — Living, chemical processes of, **27**, 31—Living, excretion of carbonic acid by, **19**, 229—Localisation of normal arsenic in, **87**, 312—Manganese in, **50**, 24; **77**, 108—Marine, gold in, **75**, 139—Medicinal, **95**, 153—Medicinal, cultivation of, **15**, 127; **17**, 140—Medicinal, therapeutic value, **1**, 64—Metamorphoses and migrations of compounds of linalol group in, **82**, 59—Mineral constituents of, **5**, 109 — Mineral matter of, **25**, 190—Mono- and dicotyledonous, action of light on tissues of, **22**, 154 — Moss- (*see* Moss-plants)—Nitrogen in, source of, **52**, 25—Nitrogen of, sources of, **2**, 145 — Nitrogenous compounds for growth of, **48**, 226 — Nitrogenous nutrition of, **39**, 264 — Non-leguminous, effects of nitrogen-fixing bacteria on growth of, **99**, 245—Nutrition of, **25**, 214; **54**, 201 — Nutrition, influence of atmospheric electricity on, **38**, 58, 69—Of gramineae, invertase in, **81**, 142 — Oleaginous, **20**, 250 — Organic principles of, **35**, 265—Origin of carbon of, **37**, 153—Oxygenated water in organisms of, **39**, 149—Ozone exhaled by, **8**, 93 — Papaver, opium from, **22**, 192 — Parasitical, physiology of, **63**, 177 — Pectic compounds in, **60**, 221—Pentaglycoses in, **65**, 11—Physiology of, **94**, 61—Pigments of, **88**, 249 — Poisoning of, **47**, 131 — Poisonous, Mexican, **20**, 275—Power possessed by roots of, of rejecting poisons, **4**, 21, 315—Presence of soda and potassa in divers parts of, **21**, 22—Production, **36**, 247—Reduction of nitrates by, **74**, 37—Respiration of, **9**, 192; **50**, 37; **65**, 227, 240—Sensitiveness as reagents, **62**, 74—Silica in, **65**, 106; **66**, 185—Silicon compounds occurring in, **38**, 47—Soda in, **21**, 22; **27**, 256—Soda in, distribution, **20**, 321; **25**, 22—Soda in ashes of, **29**, 275 — Static diffusion of gases and liquids, and their significance in natural processes occurring in, **81**, 289—Submitted to influence of sodium nitrate, mechanism of chemical reactions in, **85**, 300—Supposed libera-

- tion of ozone by, 29, 145—Swamp and water, quantity of respiration in, 40, 226—Synthesis of gases in, 35, 99 —Tannins in, 75, 300—Treatment of vermin hurtful to, 52, 12—Useful, 11, 204—Utilisation of nitrogen in air by, 94, 102—Utility of odours to, in relation to radiant heat, 26, 202, 239, 263—Which serve as the basis of the different curacures, 41, 79 —Woody, papilionaceous, chemical researches on, 42, 95
- Planta, A., Detection of honey sophisticated with starch sugar, 42, 271
- Planta, A. von (*see* von Planta, A.)
- Planta-Reichenau, A. von (*see* von Planta-Reichenau, A.)
- Plantamour, M., and M. Hirsch (*see* Hirsch, M.)
- Plantamour, P., Periodic movements of the ground, 43, 129
- Planté, G., Bead lightning, 34, 134 — Effects of the rheostatic machine, 37, 164; 40, 88—Electro-silicic light, 35, 231—Engraving on glass by means of electricity, 37, 51—Formation of hail, 33, 86—Formation of secondary elements of lead plates, 46, 159 — Globular thunderbolts, 34, 92 — Lignites of clay of the Paris basin, 20, 263—Peculiar properties of the electric current produced by the rheostatic machine, 52, 11—Phenomena produced by electric currents of high potential, 32, 84—Phenomena produced in liquids by electric currents of high tension, 31, 250—Production of ozone, 14, 57—Solar spots, and on physical constitution of the sun, 33, 191—Spiral nebulae, 32, 249—Wandering electric spark, 38, 152
- Planté, G., and N. Breguet (*see* Breguet, N.)
- Planté's "Researches on Electricity," 39, 123
- Plaseuda, M., and T. Zincke, Benzyltoluol, 38, 98
- Plasma, 14, 159
- Plasmata or glycerine ointment, 4, 6
- Plaster, baking of, 47, 305—Casts, prize for hardening, 34, 39—Hardening and the German Government, 35, 36—Hardening, new process, 51, 166—In wine, determination, 48, 22 — Manufacture, 5, 39
- Plaster of Paris, 16, 52; 17, 182; 59, 61, 74; 90, 184—Experiments, 88, 58, 71 —Method in blowpipe analysis, 77, 15—Nature of changes involved in production and setting of, 95, 296
- Plasters, roasting, etc., 38, 140
- Plastered wine (*see* Wine)
- Plastering musts (*see* Musts)
- Plastic cement (*see* Cement)—Crystal of Dinax, 36, 82—Materials, 22, 120; 90, 209—Sulphur (*see* Sulphur)
- Plasticity of solid bodies and connection with formation of rocks, 82, 248, 260
- Plate, aluminium (*see* Aluminium) — Glass (*see* Glass)
- Plates, collodion (*see* Collodion)—Copied readily and rapidly, 22, 191—Copper (*see* Copper) Earthenware (*see* Earthenware)—Fogging in tropical climates, 94, 209, 243—Interior distribution of magnetism in a bundle of, 30, 8—Iron (*see* Iron)—Lead (*see* Lead)—Metallic, decarburization by evaporation in vacuo, 88, 1—Sensitive, producing ultra-violet, 84, 32, 40, 54, 67, 77—Thin fluid, tension of, 21, 287
- Plateau, F., Prehistoric times in Belgium, 26, 119
- Plateau, J., Application of accidental images, 42, 330—Equilibrium figure of a liquid mass, 21, 179—Equilibrium figures, 22, 227 — Preparation of glycerine soap liquid, 14, 290—Researches on equilibrium figures exhibited by a fluid mass without gravity, 22, 240
- Plateau, production of laminary systems of, 37, 237
- Plated ware, removing silver from, 1, 288
- Plath, H., Madder colouring matters, 35, 185
- Platinate, chloro- (*see* Chloroplatinate)—Nitrosachloro- (*see* Nitrosachloroplatinate)—Of barium (*see* Barium)—Tetrachloro- (*see* Tetrachloroplatinate)
- Platinates, chloro- (*see* Chloroplatinates)—Compound, and a new platinum-potassium salt, 41, 118—Formation, 60, 72
- Platinocyanides, hydrated, results of cooling in liquid air, 99, 231; 100, 2
- Plating baths, analysis of, 51, 207 — Bright, 44, 37—Electro- (*see* Electroplating)—Gold- (*see* Gold plating)—Nickel (*see* Nickel)—Pyro- (*see* Pyroplating)—Silver (*see* Silver)
- Platinic acid (*see* Acid)—Chloride (*see* Chloride)—Compounds, new series, 26, 48—Derivatives of terchloride of phosphorus, 26, 36
- Platinichlorhydric acid (*see* Acid)
- Platinichloride, dissociation, 77, 79 — Methylenehydride (*see* Methylenehydride)—Of potassium (*see* Potassium)
- Platinichlorides, formation of abnormal, 96, 117
- Platinidcyanides, composition of, 1, 183
- Platiniferous residues, process for extraction of metals from, 8, 106
- Platiniridium for standard kilogrammes, 52, 71
- Platinised electrodes (*see* Electrodes) — Glass (*see* Glass)—Magnesium (*see* Magnesium)
- Platinising brass (*see* Brass) — Copper (*see* Copper) — Glass (*see* Glass)—Metals (*see* Metals)—Porcelain (*see* Porcelain)—Yellow metal (*see* Yellow Metal)
- Platino-carbon (*see* Carbon)
- Platinochloride, glucino- (*see* Glucino-platinochloride)—Of glucinum (*see* Glucinum)—Of potassium (*see* Potassium)
- Platinochlorides, methods of obtaining, 70, 259
- Platinocyanide of barium (*see* Barium)—Of hydrazine (*see* Hydrazine) —Of hydroxylamine (*see* Hydroxylamine)—Thallous, 35, 272
- Platinocyanides, colouration exhibited by some, 21, 106—Fluorescence, 98, 141 —New, 93, 19—Of potassium (*see* Potassium)—Preparing, 89, 274
- Platinoid, thermo-electric position of, 60, 77
- Platinopotassic chloride (*see* Chloride)
- Platinous chloride (*see* Chloride)—Hypophosphite (*see* Hypophosphite)—Salt (*see* Salt)
- Platinum, 3, 136; 21, 298; 64, 123; 65, 86—Absorption of gases by, 45, 262 —Absorption of light in, 69, 205—Action of hydrochloric acid in, 90, 10—Action of light on, 78, 263 —Action of phosphorus on, 75, 35 —Action of silicon on, 60, 5; 74, 73—Action of sulphuric acid on, 94, 14—Action on acetylene and ethylene, 82, 94—Action on hydrocarbons, 28, 125 —Action on hydrocarbons of benzenic series, 31, 239—Action on oxidising solutions, 14, 107—Action on phosphorus fluorides at a red heat, 53, 191—Alkyl compounds of, 99, 178—Alloy assays, 39, 89 — Alloys with cadmium, zinc, and magnesium, 80, 185—Aluminium chloride of, 29, 265 —American, 1, 36 — Ammonia compounds, 21, 269, 289; 22, 10; 37, 209, 231 — Ammoniacal compound, 16, 37; 90, 83 — And arsenic, separation, 58, 172 — And glass forceps for manipulating in acid and other solutions, 18, 155 — And gold alloys, ligation of, 61, 111 — And gold cells, electromotive forces of, 65, 176—And gold, separation, 56, 133; 81, 195; 82, 70—And hydrogen, reduction with, 97, 312—And iridium, separation, 92, 29—And iron alloys, 31, 172—And iron and copper alloys,
- 55, 81—And its associated metals, 1, 5 — And lead alloy, 22, 263 —And oxygen and tin, compound of, analogous to the purple of Cassius, 32, 157—And palladium alloys with cadmium, zinc, and magnesium, 80, 185—And phosphorus compounds and derivatives, halogen, 91, 131 — And tellurium compounds, 78, 160 — And thallium alloys, 97, 264—Apparatus, 14, 179—Atomic weight, 19, 302; 43, 252; 44, 82; 93, 55; 99, 69; 100, 278 —Attack by sulphuric acid, 93, 271 —Attack on exposure to flame, 44, 169—Attackability, 68, 77—Attacked by melting alkaline carbonates, 41, 25—Barium in, 14, 34—Bases, 21, 203; 24, 73—Bases, ammoniacal, 25, 47; 286, 311—Bases, new series of double chlorides belonging to, 21, 24—Bases, obtaining, 13, 231—Black, absorption of hydrogen by, 28, 213 — Black, affinity manifested in the slow oxidation of hydrogen and carbonic oxide under the influence of, 35, 116 — Black, preparation, 1, 107; 67, 242—Black, preparation by means of glycerin, 33, 261—Black, preparation of pure, 1, 179—Black, ready method of forming, 26, 208—Brittle, composition, 85, 94—Cast, 2, 24—Cleaning, 2, 286—Coating earthenware with, 20, 58—Coating for porcelain crucibles, 4, 13—Coinage, 26, 288 — Colloidal, catalytic reductions with, 98, 186—Colloidal, effect on mixtures of Caro's persulphuric acid with hydrogen peroxide, 90, 262—Combustion tubes, 34, 67, 81—Compounds, 17, 191; 19, 179; 22, 107; 38, 20; 45, 62—Compounds, acetylacetic, 86, 270—Compounds, ammoniacal, 90, 83 — Compounds, electromotive force of, 99, 251—Compounds, hydroxylammoniated, 83, 155 —Compounds, preparation, 36, 183—Compounds, volatile, 63, 307—Condensation of air on surface of, 31, 55 —Crucibles, 35, 77—Crucibles, correction of weight of, 29, 27—Crucibles, deterioration from calcination of ammonio-magnesian phosphate, 87, 102 —Crucibles, loss of weight by continual ignition, 22, 275—Crucibles, mending, 38, 65 — Crucibles, patching, 49, 274—Crucibles, preservation, 2, 256—Crucibles, protective capsules for, 72, 85 — Crucibles, removal of fused masses from, 59, 121—Crucibles, substances which should neither be heated nor melted in, 8, 12—Crystallised, 5, 144, 168—Decomposition by an alternating current, 97, 62—Decomposition of water by, 33, 74—Detection of small quantities, 43, 75, 180—Determination, 74, 38—Diffused through metallic beds or in Alpine rocks of Dauphiny and Savoy, 5, 7—Dihydroxytetrammino- (*see* Dihydroxytetramminoplatinum) — D-solution by sulphuric acid, 93, 102—Double chlorides, 17, 60—Double chlorides, analysis of organic, 47, 249 — Ebullition, 93, 93 — Electrochemical, reduction, 6, 126 — Electrodeposition, 62, 33, 40 — Electrodes, polarisation of, 68, 263 — Electrolytic solution in sulphuric acid, 91, 162 — Electromotive force of, 21, 129 — Electromotor force developed by, 20, 321—Emanations, intensification of chemical action by, 88, 178—Estimation and detection of thallium in, 55, 241—Estimation, volumetric, 81, 71—Evaporation in evacuated glass vessels, 99, 110—Extracting from chloroplatinates, 35, 134—Ferri-ferrous, and artificial laurite, 40, 203—Filtering bulb, 53, 194—Finely divided, influence on combination of hydrogen and oxygen, 81, 292—Forceps (*see* Forceps) — Fulminating, preparation, 100, 256—Fusibility by blowpipe, 23, 33—Fusibility in blowpipe flame, 22, 268—Fusibility in carbon blast furnace, 73, 235—Fusion, 21, 94; 27, 224, 246 —Group metals, action of binoxide

- of sodium on 85, 123—Group metals, action on chlorine water, peroxide of hydrogen, etc., 13. — Group metals, action of heat on double nitrites of 78, 255—Group metals, separation, 83, 19—Group, new metal of, 40. — Group, oxides of, dissociation, 38, 188—Hot, permeation by gases 76, 188—Hot, positive ionisation produced by, in air at low pressures, 87, 31—In Lapidary, 22, 57—In platinum ores, estimation, 84, 216—In Scotland, discovery of, 19, 184—In standard pure form, 98, 210—In sulphuric acid during industrial process of concentration, 32, 284—In wollastonite, 90, 77—Incandescent, non-transparency of, 36, 204—Incandescent, radiation of, 39, 83—Iridium. (*see* Iridium-platinum)—Light, 21, 35—Lost, 75, 142—Melting-point, 99, 168—Melting-point re-determination, 91, 250, 262, 274, 287—Metallic, coating glass, porcelain, or earthenware with, 20, 58—Metallurgy of, 6, 150; 38, 43—Metals, 2, 179; 3, 130, 148, 194, 257; 7, 61, 78, 87, 118, 141, 9, 121; 11, 8, 121; 16, 107—Metals, action of phosphorus hydride on, 100, 10—Metals, alloys of, 56, 10—Metals, and their separation from each other, 10, 279, 301—Metals and tin, crystalline alloys of, 55, 308—Metals, chemistry of, 43, 292—Metals, cyanides of, 5, 323—Metals, explosive alloys of, 46, 10—Metals, extraction as practised in German refineries, 37, 112—Metals in chemicals used for assaying, 98, 104—Metals in meteorites, 87, 92—Metals, properties of, 1, 83; 4, 390—Metals, separation, 21, 39; 63, 292—Metals, trivalent oxidation, 100, 304, 308—Metals which accompany, separating, 82, 303—Method for attack of, 77, 19—Misuse of, 70, 227—Native magnetic, analysis, 33, 231—Nuggets, structure of, 75, 139—Ore, magnetic property, 48, 249—Ore, Russian, from the Oural Mountains, 35, 88—Ores, analysis, 1, 15—Ores, estimation of platinum and iridium in, 84, 216—Oxidation, 35, 25, 97, 107—Oxygenated, effects of, 36, 107—Pure, specific gravity, 32, 284—Purification, 13, 145—Reduction by hydrogen gas, 28, 70—Reduction of gold by hydrogen in presence of, 41, 116—Reduction of perchloride of iron by, 4, 30—Pinning, 66, 140—Recrystallisation of, 86, 49—Rendered insoluble by battery, property possessed by, to produce gaseous combinations, 4, 118—Residues, utilisation, 28, 280—Retorts, 25, 207—Robbery, 62, 214—Salt, estimation of potassium as, 44, 77, 86, 97, 129—Salts, 44, 83; 54, 213—Salts, action of hot sulphuric acid on, in presence of ammonium sulphate, 93, 178—Salts, complex, 79, 229; 80, 63; 83, 147; 86, 259; 87, 122—Salts, ethylen and protochloride of, iridium compounds analogous to, 24, 280—Salts, idonitric and bromonitric, 64, 284—Salts, nitrogenous, 66, 61—Salts of organic bases, analysis, 20, 107—Separation from tin and antimony, 4, 284—Series, metals of, preparation, 39, 175—Silicidation of, 33, 148—Smelting, 28, 227—Solution, electrolytic, 89, 274; 90, 310—Solution in sulphuric acid, 37, 237; 42, 61—Specific-heat and melting-point, 36, 151—Spiral, 87, 288—Spiral, incandescence of, 52, 82—Spongy, manipulation, 27, 308—Standard kilogrammes, 5, 64—Thermometer (*see* Thermometer)—Tubes, porosity of, 7, 294—Use in ultimate analysis of carbon compounds, 33, 127—Utensils and apparatus, catalogue of modern forms, 70, 234—Vessels, soldering, 51, 181, 238, 248—Volatility in chlorine gas, 41, 81—Volatility in chlorine gas at high temperatures, 40, 244—Water pyrometer, 47, 171—Wire, action on hydrocarbides, 38, 287—Wire, incandescent, action on gases and vapours, 58, 187, 223—Wire, drawing, 36, 182—Withdrawal of oxygen by, 90, 317
- Platinum amalgam, property of, 95, 166
Platinum bichloride, action of nitrate of silver and protonitrate of mercury on, 11, 173
Platinum bichloride, anhydrous, 60, 291
Platinum blue, 97, 244
Platinum bromide, 42, 126
Platinum bromonitrites, 63, 177
Platinum carbides formed at comparatively low temperatures, 51, 97
Platinum chloride, 23, 83—Action of light on, 78, 263—Action of sulphurous acid on, 20, 189, 322; 24, 109—Action on phosphines and arsines, 52, 58—Aluminium (*see* Aluminium chloride of platinum)—And ammonium molybdate, recovery of, 46, 243—Behaviour towards lime and baryta water, 22, 178—Contamination with gold chloride, 43, 25—Crystalline combinations with hydrochloric acid, 63, 284—Gold chloride in commercial solutions of, 44, 47—Potassium (*see* Potassium)—Preparation, 11, 168; 50, 34—Recovery of waste, 75, 224
Platinum cyanide, thallium. (*see* Thallium-platinum)
Platinum hypophosphite, 43, 234
Platinum monochloride, production, 77, 79
Platinum oxalates and chlorides, complex salts of, 79, 136
Platinum phosphate, 71, 256
Platinum phosphide, 48, 285
Platinum-phosphorus compounds, chemical constitution, 22, 215
Platinum protochloride and oxide of carbon, 21, 262—And triethylphosphine, 21, 225
Platinum sesquichloride, 96, 107, 138—And copper chloride, double, 96, 138
Platinum silver alloys, 75, 273
Platinum subchloride, probable existence of, 70, 259
Platinum sulphide, oxidised, composition and properties, 35, 197
Platinum sulphides, properties considered from an analytical point of view, 36, 100
Platinum sulphocarbide, 62, 178
Platinum sulphocyanide, 42, 166
Platinum sulphurea base, salts of a new, 68, 223
Platinum tetrabromide, 86, 48
Platinum tetrachloride, 65, 165
Platinum tetraiodide, electrical conductivity in ethyl alcohol, 100, 150
Platinum trioxide, 100, 212
Platodonitrites, 38, 49
Platonitrates, 34, 270—Di. (*see* Diplatonitrates)
Platonitrite, potassium (*see* Potassium)
Platonitrites, 37, 31—Di. (*see* Diplatonitrites)
Platooxalonitrite of potassium (*see* Potassium)
Platooxalonitrites, 87, 122—Reactions of, 86, 259
Platooxalonitrous acid (*see* Acid)
Platooxalic acid (*see* Acid)
Platt, C., and A. B. Griffiths (*see* Griffiths, A. B.)
Platter, H., and L. Pfandler (*see* Pfandler, L.)
Platner's charcoal blocks, 23, 143
Platte, H. C., Ammonia-soda process, 31, 95
Plaut, H. C., Determination of acidity of milk, 65, 311
Playfair, David, Detection of rare metals in pyrites flue dust, 39, 245
Playfair, Lord, 18, 23—Address to British Association, 52, 121—Course of six lectures on some of chemical arts with reference to their progress between the two great Exhibitions of 1851 and 1862, 5, 302, 327, 343; 6, 8, 37, 79—Constitution of salts, 7, 233—Food of man in relation to his useful work, 11, 221, 234, 246, 258—Monohydrate of sulphuric acid, 4, 26—Monohydrated sulphuric acid, 3, 19—Numerical relations between specific gravities of diamond, graphite, and charcoal forms of carbon and its atomic weight, 2, 1, 18—Obituary, 77, 261
- Playfair, Lord, and J. A. Wanklyn, Method of taking vapour densities at low temperatures, 3, 122
Playthings, arsenical, 19, 103
Pleonaste (Ceylonite), 93, 232
Plessy, E. M., Acetic solution of the alkaline hyposulphites, 52, 50—New chrome green, 7, 64—New process for preparing oxamide and oxamic acid, 60, 245—New reagent for cane sugar and pyrogallol acid, 60, 282—Transformation of melted ammonium nitrate, 62, 153
Pleurisy patients, ptomaine extracted from urine of, 70, 199
Pleurites, study on fluid secreted in, 26, 60
Plicque, J. F., Artificial ultramarine, 27, 52, 94—Experiments relative to formation of ultramarine, 36, 204—Ultramarines at the Paris Exhibition, 38, 161
Plimmer, R. H. A., "Chemical Changes and Products Resulting from Fermentations" (review), 87, 202—"Chemical Constitution of the Proteins" (review), 99, 117—Proteins of egg-yolk, 98, 231—Separation and estimation of silver cyanide and silver chloride, 89, 19
Plimmer, R. H. A., and F. H. Scott, Reaction distinguishing phosphoprotein from nucleoprotein, and the distribution of phosphoprotein in tissues, 98, 243
Plimmer, R. H. A., and G. von Bunge (*see* von Bunge, G.)
Plimpton, R. T., Active amylin, 43, 166—Metallic derivatives of acetylene, 65, 295—Preparation of glycolic acid, 37, 110
Plimpton, R. T., and J. C. Chorley (*see* Chorley, J. C.)
Plimpton, R. T., and M. Travers, Mercuric acetylidy, 69, 81

- Potain, M., and R. Drouin (see Drouin, R.)
- Potash, 6, 219; 95, 149—Acid obtained by action of, 55, 153—Action on albumen, 47, 87—Action on benzoquinone, 72, 221—Action on lead oxide, 45, 248—Action on metamidobenzoic acid, 74, 254—Action on oxynitrocellulose, 79, 35—Action on stearic acid, 20, 178—Action on sulphuretted derivatives of carbides of hydrogen, 20, 153—Action on sulphuretted derivatives of hydrocarbons, 21, 274—Action on tantalite, gases evolved during, 94, 266—Alcoholic, 37, 203—Alcoholic, action on bromoform, 38, 243—Alcoholic, action on chloroform, 37, 52—Alcohol c, action on monobromoglutaric ester, 81, 10—Alcoholic, action on phenylhydrazine, 78, 24—Alcoholic, action on urea, etc., 53, 251; 54, 50—Alcoholic aqueous, solubility of red phosphorus in, 89, 263—Analysis, 53, 138—And humus in soils, determination, 61, 154—And its salts, 7, 142—And lead nitrates, behaviour to solu-
- tion of basic acetate of lead, 14, 34—And magnesia, separation, 8, 69 — And oxide of cadmium, compound, 14, 106—And soda, action on antimony oxide, 67, 34—And soda, detection by blowpipe vesiculation, 20, 78—And soda, direct manufacture from their chlorides, 37, 52—And soda, estimation, 36, 143—And soda, estimation, indirect, 10, 182; 29, 159, 195—And soda, estimation of mixtures of, 1, 287—And soda in plants, distribution of, 25, 22; 27, 256—And soda in plants, repartition, 24, 252 — And soda in potash, determining, 47, 59—And soda, separation, 25, 110, 158—And soda, separation from ferric oxide, 48, 110, 111—And sulphate of lime, 20, 50—As a manure, 29, 230—Assimilability of, 70, 160—Bases produced by distillation of cinchonine with, 43, 145—Beds, Stassfurt analysis of metals, chemical preparations, and minerals from, 75, 151—Bulbs, 85, 112; 98, 38—Caustic, 3, 128; 26, 289; 45, 33—Caustic, action of fusing, on benzoic acid, 26, 156—Caustic, action of fusing, on braunkohlen, 25, 179—Caustic, action of fusing, on sulphoxybenzoic acid, 24, 193—Caustic, action on aniline, 100, 219—Caustic, action on lorneol, camphor, and isoborneol, 99, 216—Caustic, action on quercite, 38, 33—Caustic, decomposition of bromethylacrylic acid by, 43, 83—Caustic, fusion of isopilocarpine with, 89, 81—Caustic, poisoning by, 16, 197—Caustic, products of action of, on sulphomesitylenate of potassium, 39, 228—Caustic, pure, 39, 162 — Caustic, vanadium in, 61, 20; 63, 7—Compounds, manurial experiments with, 38, 175—Crude, analysis of, 22, 215—Detection and determination, 34, 85, 122, 216—Detection by blowpipe vesiculation, 20, 78—Estimation, 17, 199, 216, 244; 29, 26; 50, 186; 52, 107; 53, 202, 206; 54, 188; 55, 39; 57, 28; 66, 5; 68, 263; 69, 198; 74, 11; 79, 135, 154, 178—Estimation as perchlorate, 79, 269, 281—Estimation in presence of soda, 14, 58—Estimation, Lindo-Gladding method, 77, 263, 275—Estimation of potassa and soda in, 47, 50—Estimation, volumetric method, 37, 122; 46, 233; 52, 201—Extraction from marl, 10, 86—Extraction from the suint, 23, 8—For attainment of antichlores, 4, 11—From bamboo, 45, 158—Fused, action on camphoric acid, 69, 203—Fused, action on fluorene, 88, 137—Fused, products of action on dihydroxystearic acid, 81, 202—In agricultural substances, estimation, 44, 316 — In chloride of potassium and in Stassfurt salts, estimation, 38, 11 — In chromate of lead, 21, 253 — In clay of arable soils, 41, 70 — In commercial fertilisers, estimation, 56, 163—In commercial fertilisers, separation and determination, 51, 29—In commercial products, estimation, 32, 150, 172, 185, 193, 200, 208, 223; 35, 259, 268; 36, 17, 38, 47; 38, 54, 63, 90—In fertilisers, estimation, 83, 209 — In fodder, 75, 209—In manures, estimation, 46, 212; 70, 140, 172—In manurial salts, 74, 318—In minerals, estimation, 40, 227—In plants, 21, 22—In plants, condition of, 56, 249—In plants, distribution, 20, 321; 25, 119, 275; 27, 256—In plants, significance of, 59, 240—In plants, state of, 56, 239—In presence of soda, estimation by blowpipe, 32, 237—In soils, 73, 83—In soils, condition of, 56, 249—In wine, 47, 60—In wine, estimation, 8, 108, 173—Industry, 25, 143; 35, 188—Liquid, 3, 108—Made from Kyathour bamboo, analysis, 46, 51—Manufacture, 3, 239; 8, 37, 133—Manufacture from its chloride, 37, 52—Manures, experiments with,

- 48, 118—Melt of rhamnetin, 40, 301—
Minerals at Stassfurt, combustible
gases in, 40, 76—Obtaining, 7, 95—
Obtaining from suint, 1, 293—
Poisoning by, 8, 62—Precipitant for,
17, 183—Preparation, 5, 268—Propor-
tion to soda in natural waters, 45, 57—
Reactions with nitric and hydro-
chloric acids, 3, 31—Report on, 66,
251, 263—Soap, production of neutral,
7, 80—Solubility of silica in, 3, 393—
Sources of, 25, 227; 44, 224—Sources
of error in employment of picric acid
and to detect presence of, 3, 180—
Substitution of soda for, 25, 58—
Test, 13, 131, 142; 34, 231, 250; 45,
46—Testing commercial, 40, 55—
Potashes, analysis of, 26, 27—Assay of,
determination of soda in, 15, 217—
Potassa (*see* Potash)
Potassammonium, action of oxygen on,
68, 13—Action on arsenic, 80, 230—
Action on selenium, 80, 123—Action
on tellurium and sulphur, 80, 135—
Formation heat, 61, 25—
Potassio-ammonium chromate, applica-
tion to photography, 9, 296—
Potassio-cobaltic nitrite (*see* Nitrite)
Potassio-mercuric iodide (*see* Iodide)
Potassio-tartrate of soda (*see* Soda)
Potassium, 25, 203; 64, 32—Acid-oxalate
of, composition, 22, 14—Action on
benzol, 27, 22—Action on bichloro-
acetic acid, 25, 118—Action on Dutch
liquid, 19, 211—Action on hydro-
carbons, 14, 249—Action on tetraalkyl
ammonium iodide, 58, 22—Action on
triphenylmethane, 60, 121—Amalgam,
24, 145—And ammonium, double and
triple ferrocyanides of magnesium,
aluminium, and cerium with, 100, 31—
And haloid salts of silver, 45, 173—
And lithium, separation, 55, 18, 29,
40, 56, 73—And other bases, repro-
duction of double silicates of, 74,
270—And rubidium and cesium, in-
vestigation with, 73, 105—And rubi-
dium, trihaloid compound of, 66, 198—
And sodium, absorption spectra at
low temperatures, 29, 268—And
sodium alloys, formation of liquid,
69, 59—And sodium alloys, liquid,
69, 20—And sodium amalgams, 82,
84—And sodium, combination, 60,
317—And sodium salts, solubility and
specific gravity of, 25, 249—And
sodium, separation, 74, 227—As a
plant poison, 53, 2—Atomic weight,
93, 55, 184; 94, 290; 95, 209; 95, 133,
145, 156, 170; 99, 60, 180; 100, 258—
Boiling point, 59, 237—Compounds in
living vegetables, 93, 105—Com-
pounds in trunk and bark of oak
trees, 93, 116—Compounds in wood
charcoal, 93, 44—Compounds, re-
agents for, 50, 67—Crystallised, 1,
244—Decomposition in carbonic acid,
air, and pure hydrogen, 34, 92—
Derivatives of quinone and hydro-
quinone, 72, 160—Detection of sul-
phur by means of, 19, 179—Detection
spectroscopically, 65, 22, 32—Dis-
sociation-spectra of, 74, 12—Effect of
blows on, 93, 200—Estimation, 30,
71; 38, 227; 44, 144; 47, 59; 56, 47;
57, 214; 59, 109; 60, 109; 67, 181;
74, 38; 75, 256; 76, 194; 80, 248—
Estimation as acid tartrate, 34, 231,
242, 240; 35, 20—Estimation as
platinopotassic chloride, 41, 11—
Estimation as platinum salt, 44, 77,
86, 97, 129—Estimation of two rays
of, 57, 140—Estimation, volumetric,
81, 93—Estimation, volumetric, as
the cobalt-nitrite, 97, 124—Fusion
of substances with, 21, 166—In ashes
of plants, etc., estimation, 50, 174—
In potassium sulphate, estimation,
45, 35—In saline mixtures, separa-
tion and estimation of small quan-
tities, 86, 258—In soils, cobalt-nitrite
method of estimation, 99, 7—
Iodised, and ammonium carnallites,
production, 81, 213—Lecture experi-
ments with, 29, 197—Lustre and
colour of, 38, 71—Manufacture, 8,
217—Non-refraction of X-rays
by, 74, 97—Obtaining, new
method, 26, 33—Oxidation,
17, 59—Phosphorescence of, 17,
108—Reagent for, 34, 216; 91, 116—
Reduction by sodium, 3, 21, 66—Salts,
action of ammonia on solutions of,
52, 48—Salts, action of voltaic pile
on, 5, 326—Salts of solvated pile on,
optical relationship, 73, 104—Salts
as manure for beetroot, 46, 159—
Salts, crude, from fermented
molasses juice, 20, 299—Salts, deter-
mination of potash in, 44, 290—
Salts, employment in agriculture,
17, 130; 44, 193—Salts, Fremy's sul-
phazotised, identification and con-
stitution, 81, 129—Salts from sea-
water, 22, 112—Salts, haloid, 45, 173—
Salts, manurial experiments with,
45, 78—Salts, manuring with, 44,
192—Salts, neutral mineral, 63, 225—
Salts, production, 28, 23—Salts,
radio-activity of, 100, 172—Salts,
solubility and specific gravity, 25,
249—Sodium- (*see* Sodium)—Spec-
trum, 18, 1—Test for, 54, 266—
Vapour, absorption spectrum, 100,
266—Vapour densities of, 27, 121;
49, 293—
Potassium acetate, action of chloropierin
and chloroform on, 11, 89—Elec-
trolysis, 24, 157; 64, 272—Solubility
of lead sulphate in concentrated
solutions of, 99, 236—
Potassium alcoholate, 54, 60, 73—
Potassium alkyl tartrate and dialkyl
tartrate in aqueous solutions, rela-
tionship between solution-volume and
rotation, 90, 20—
Potassium alloethylic camphorate, elec-
trolysis, 71, 208; 73, 254—
Potassium alum, decomposition of
molten, in sealed tubes at 100°, 35,
142—Decomposition of solutions of, at
100°, 35, 76—Manufacture from
felspar, 47, 5, 23—
Potassium aluminate and sodium alumi-
nate, carbonated, 47, 202—And
sodium aluminate in solution, 42, 29—
Potassium amide, 69, 143—
Potassium-ammonium, action on barium
bromide, 91, 268—
Potassium-ammonium-sulphate and a
bromide-bromate mixture, reaction
between, 97, 102—
Potassium ammonozincate, 96, 310—
Potassium benzoate, action of chlori-
nitrobenzene on, 82, 160—
Potassium bicarbonate and magnesium
bicarbonate, limit of combination of,
51, 310—And neutral magnesium car-
bonate, combination, 52, 237—And
spirit of nitrous ether, 21, 144—Pre-
paration, 33, 75—Solubility and dis-
sociation, 32, 9—
Potassium bichromate, 4, 156; 20, 216,
228; 25, 132, 143—And binoxide of
chromium, combination, 25, 214—
Antiseptic properties, 35, 155—
Battery (*see* Battery)—Conversion of
sulphate of chromium into, 1, 119—
Estimation of iron by, 48, 245—
In milk, determination, 97, 143—
Oxidising value, 41, 21—Reduction
by oxalic acid, 56, 276—Reduction
by sulphurous acid, 87, 138—
Potassium bimolybdate, action on
oxides, 46, 35—
Potassium biniodate, 74, 197—
Potassium biniodide, 3, 47—
Potassium biracemate as a deposit in
red wines, 13, 61—
Potassium bisulphate and essential oil
of mustard, compound of, 21, 275—
As a condensation agent, 48, 105—
For distillation of natural sulphides,
29, 217—Hydrated, 61, 109—
Potassium bisulphite, spontaneous de-
composition, 24, 181—Use as test
for galena in all its mixtures, 28,
262—
Potassium bitartrate, adulteration, 38,
167—Solubility, 46, 233; 63, 131—
Potassium bromide, 21, 82; 24, 276—
Commercial, 10, 245—Crystallisation,
12, 95—Detection of chloride in com-
mercial, 18, 58—Determination of
chlorine in, 42, 283—Examination,
50, 176—Mixed with chloride, esti-
mation, 21, 143—Preparation, 2, 47;
34, 154—Purifying, 20, 190, 215—
Solutions, bromine in, 92, 9—
Potassium carbonate, 3, 383; 49, 116;
77, 126—Action on isobutylaldehyde,
41, 34; 43, 12—Action on soap
bubbles, 55, 16—And peroxide of
cerium, double, 79, 263—And sodium
carbonate, double, 58, 53—Crystals,
composition, 5, 115—Crystallised, 11,
190—Hydration, 100, 160—Manu-
facture, 40, 227; 45, 120—Preparation,
43, 196—Preparation from potassium
chloride, 46, 267—Pure, 30, 235—
Potassium carbonylferrocyanide, syn-
thetic method of forming, 78, 35—
Potassium carlinat and carlinic acid,
29, 298—
Potassium carnallite, iodised, production,
81, 213—
Potassium chlorate, 4, 156; 53, 56; 69,
254—Action on perchloride of phos-
phorus, 3, 47—And hydrogen
chloride, interaction, 68, 267—And
iodide of potassium, mutual action
within the animal economy, 14, 81—
And iodine, interaction, 66, 277—And
nitric acid as an oxidising mixture,
21, 195—And perchlorate, action of
copper zinc couple on, 33, 156—And
perchlorate, decomposition, 55, 67—
Apparatus for making, 34, 139, 151—
Behaviour of stannous chloride
with, 42, 210—Catalysis, 58, 247, 309—
Causes of chlorine present in oxy-
gen gas prepared from, 47, 83—
Crystallisation by fusion, 22, 275—
Decomposition, 52, 248; 55, 91; 59,
63; 61, 117—Decomposition at a low
temperature in presence of peroxide
of manganese, 7, 157—Decomposition,
mechanical facilitation of, 83, 295—
Decomposition, substances which aid,
24, 204, 252—Decomposition when
employed for making oxygen, 24, 85—
Electrolytic formation, 81, 168—
Electrolytic reduction, 87, 262; 88,
70—Explosion of, 80, 315—Explosive
properties, 80, 270—In nitrate of
ammonium explosives, 80, 11—Manu-
facture, pink liquors in, 34, 183—
Method for oxidation of organic
matters in detection of mineral
poisons, 1, 30—Obtained by elec-
trolytic method, impossibility of
primary formation, 82, 24—Oxidis-
ing value, 41, 21—Peculiar reaction
of stannous chloride with, 42, 166—
Poisonous action, 45, 57—Theory of
acidity, 34, 268—Use in presence of
oxides of manganese, 86, 9—Valua-
tion, 8, 87—
Potassium chloride, action in the soil,
45, 142—Action of carbonic acid on,
52, 71—And ammonium chloride,
paramorphism of, 3, 96—And molyb-
denum chloride, double, 88, 290—
And potash solutions, chloride of
silver and oxide of silver, equi-
librium of solution between, 90, 59—
And sugar, combination, 27, 117—
And sugar, influence of surfusion on
congelation-point of solutions of, 76,
323—Behaviour in presence of
metallic vapours, 19, 9—Colloidal,
99, 119—Copper (*see* Copper)—
Crystalline form, 3, 95—Decomposi-
tion, 19, 298—Deposit of, 24, 240—
Determination of potassa in, 38, 11—
Electrolysis, 81, 70—Solution, in-
fluence of cane-sugar on conductivity,
23, 223—
Potassium chloroiridate, analysis, 100,
150—
Potassium chloroplatinite, preparation,
79, 161—
Potassium chlororuthenate, 82, 292—
Potassium chromate manufacture, 22,
274—Neutral, application of, 55, 248—
Neutral, separation of barium from

- strontium and calcium by, 47, 58—
Pure, 13, 196
- Potassium chromicum oxalate, blue,
absorption spectrum of, 51, 152
- Potassium chromovanade, 45, 22—
Action of carbonic oxide on, 87, 124
- Potassium cobalticyanide, action of
oxygen on, 84, 243—Action of
carbonic oxide on, 87, 124
- Potassium cobaltocyanide and deriva-
tives, preparation, 39, 33—Oxidation,
68, 295
- Potassium cyanate, action of chloroxy-
carbonic ether on, 52, 34—Action on
amidoacids, 19, 16—And urea, 32, 99
Isomeric, 23, 226
- Potassium cyanide, action of aqueous, on
gold and silver in presence of oxygen,
71, 73—Action of cyanogen on,
90, 37—Action of hydrogen peroxide on,
95, 23—Action of iodine on con-
centrated solution of, 2, 71—Action
of permanganate upon, 42, 115—
Action of potassium permanganate
on, 41, 48—Action on ammoniacal
copper chloride, 65, 262—Action on
bichloroacetic acid, 28, 264—Action
on bismuthous nitrate, 44, 239—
Action on bromotoluenol, 23, 131
—Action on chloral, 27, 117—Action
on croton chloral, 29, 136—Action on
dichlorglycid, 29, 73—Action on fatty
aldehydes, 83, 152—Action on gold
and other metals and minerals, 69,
262, 268, 280—Action on halogen-
ated compounds, 34, 218—Action on
iodide of allyl, 26, 60—Action on
mesityl oxide, 90, 251—Action on
metallic electrodes, 91, 111—Action
on oxides, 14, 75, 59—Action on
pulegone, 94, 264—And alcoholic
potassa, behaviour of tetrachloro-
ether and acetylchloral alcoholate
with, 37, 274—And metadinitro-
benzene, reaction between, 80, 211—
And soda, action on chlorodiamyl-
amine, 65, 144—Assay of lead ores,
63, 30, 73, 145—Behaviour of
epichlorhydrine towards, 20, 275—
Commercial, 66, 122—Decomposition,
51, 15—Decomposition of benziloid
bodies by, 48, 238—Electromotive
power of metals in, 35, 224—Estima-
tion of copper by means of, 1, 25;
25, 255, etc.—In blast furnaces, 20,
28—In silver baths, 30, 177—In
soldering metals, 3, 127—Manufac-
ture, 62, 255—Poisoning by, 3, 260;
8, 74, 122—Preparation of pure, 8,
21—Sale of, 10, 204—Selective action
for gold, 76, 281—Solution, action
on different metals, 91, 67
- Potassium cyanides, assay of impure
commercial, 9, 123
- Potassium cyanosulphite, 39, 184
- Potassium cyanurate, formation, 72, 161
- Potassium dichromate, action on
potassium iodide, 47, 48—And
halogens joint action on organic
matters, 48, 188—And succinic acid,
interaction, 94, 226—Determination,
47, 19—Manufacturing, new process,
51, 23—Toxic action and thera-
peutical use, 48, 170
- Potassium ethyl, preparation, dangers
in, 13, 14
- Potassium ethyl dipropyl malonate,
electrolysis of, 93, 290
- Potassium ferriicyanide, action of
halogens on, 34, 217—Action on
methyl morphine iodide, 41, 220—
And acetates, simultaneous action
on indigo, 38, 10—And potassium
ferrocyanide, chemical equilibrium
between, in presence of alkalis, 89,
254—And potassium iodide, velocity
and mechanism of reaction between,
in neutral aqueous solutions, 87, 222
—As a test for cobalt, nickel, and
manganese, 23, 260—Decomposition
by sunlight, 23, 179—New applica-
tion of, 61, 133—Oxidation of allan-
toin by, 27, 265—Preparation, 21,
71; 26, 82—Preparation by means of
lead peroxide, 43, 280—Reaction on
- morphia, 6, 96—Sensitiveness for
light, 23, 142, 156
- Potassium ferridecyanide, alkaline, action
on colours obtained from madder
and its derivatives, 35, 115—And
sesquisulphate of iron as a test, 16,
233—Reduction, 48, 73
- Potassium ferrite, hydrates of, crystal-
lised in dry way, 58, 71
- Potassium ferrocyanide, action of
alkaline hypobromite on, 38, 305—
Action of light on, 93, 243—Action
of light on solutions of, treated
with peroxide of hydrogen, 82, 290
—Action on monochloroacetic ether,
17, 204—And calcium and ammonium
ferrocyanides, double, 96, 208—And
nitrates of potash and soda, com-
pound, 14, 58—And potassium ferri-
cyanide as reagents, 78, 269—And
potassium ferriicyanide, chemical
equilibrium between, in presence of
alkalis, 89, 254—And potassium
ferriicyanide, use for detection of
nickel and cobalt, 32, 44—And
sulphuric acid, reaction between,
80, 300—Behaviour of metals with a
solution, 26, 264—Composition of the
black matter obtained on calcining,
33, 117—Dissolved, action of car-
bonic oxide on, 81, 3—Determination
of zinc with, 47, 219; 76, 6, 15, 20,
38, 51—In chemical analysis, 3, 17,
274, 287—In solution, action of car-
bonic oxide on, 87, 55—Oxidation,
electrolytic, influence of nature of
anode upon, 90, 328—Quinine re-
action with, 50, 68—Reactions of
iodine and palladium chloride with,
33, 184—Urea from, 4, 269
- Potassium ferrous oxalate, reducing
properties of, 43, 12; 46, 12
- Potassium fluochromate, effect of heat
on, 52, 15
- Potassium fluophosphate, 77, 165
- Potassium fluoride, 34, 164, 185—Action
on anhydrous chlorides, 65, 102—
Employment of fluohydrate of, in
analysis, 10, 49—Preparation, 57, 111
- Potassium fluorides and oxyfluorides,
73, 197—Formation-heat, 48, 71, 223
- Potassium fluosilicate, 77, 165
- Potassium formate, decomposition in
carbonic acid, air, and pure
hydrogen, 34, 92
- Potassium hydrate, water expelled from,
by boracic and silicic acids, 3, 368
- Potassium hydrates, thermometric
examination of solid, 84, 72
- Potassium hydride, action on ethyl
iodide and methyl chloride, 85, 132—
And carbon dioxide, combination,
87, 191—Preparation and properties,
85, 60
- Potassium hydrosulphides, sulphides,
and polysulphides, 79, 283
- Potassium hydroxide, action of alcoholic,
on 3-bromo-1:1-dimethyl-hexahydro-
benzene, 94, 228—Action of fused,
on cholesterol, 97, 261; 98, 242—
Action on orthoamidobenzoic acid,
81, 11—Hydrate of, 67, 249—
Nitroformazyl and carbon bisulphide,
interaction, 94, 59—Solution, influ-
ence of cane-sugar on conductivity,
83, 223
- Potassium hyposulphite, 33, 107
- Potassium iodate, action on animal sys-
tem, 23, 300—In potassium iodide,
74, 197—Preparation, 18, 73—Titra-
tions with, 88, 214
- Potassium iodide, 12, 155, 169, 295; 13,
81—Absorption, 13, 167—Action of
certain substances on, 96, 162—Action
of light and carbonic acid on aqueous
solutions of, and on ozonoscopic
paper, 36, 110—Action of permangan-
ate of potash on, 6, 131—Action of
potassium dichromate on, 47, 48—
Action of sulphuric acid on, 47, 277
—Action of sunlight on, 20, 276—
Action on bromanil and chloranil, 91,
223—And bismuth iodide, double, 61,
300—And chlorate of potash, mutual
- action within the animal economy,
14, 81—And iodine combinations, 3,
51—And lead iodide, double, 77, 191
—And potassium ferriicyanide, velo-
city and mechanism of reaction be-
tween, in neutral solutions, 87, 222—
And starch mixture, nitrite solution
of, 45, 287—And sulphate of lead,
reciprocal action, 35, 75—And thio-
carbamide, compound of, 94, 219—
And water, solution of iodine in, 20,
60—Aqueous, nature of a solution of
iodine in, 89, 176—Assay of, 48, 83;
55, 296—Behaviour of hydrogen-per-
oxide with, 43, 47—Decomposability,
51, 17—Decomposition, 52, 236—De-
tecting bromide in, 25, 299—Detect-
ing potassium iodate in, 74, 197—
Determining, 51, 284—Determining
value of commercial, 47, 25; 48, 118
—Double salts of, with mercuric
iodide and dimercuroidocamphor in
organic solvents, 98, 314—Examina-
tion, 61, 229—In solution, action on
mercurous iodide, 80, 177—Manufac-
ture, 39, 118—Manufacture from the
mother-liquors of kelp, 26, 183; 28,
241—New form of, 3, 32—Potassium
iodate in, 74, 197—Plumbiferous con-
centrated solutions of, and hydrogen
sulphide, behaviour, 40, 24—Prepara-
tion, 2, 47; 5, 205; 34, 154—Prepara-
tion from cuprous iodide, 30, 108—
Reaction of concentrated sulphuric
acid on, 2, 11—Reaction of nitrites
with, 17, 144—Reaction of sulphuric
acid on, 17, 203—Reaction with sul-
phurous acid, 39, 19—Titration, 81,
71
- Potassium iodochromate, 24, 45
- Potassium iodohydrargyride test for
methyl alcohol, 12, 164
- Potassium iodomercurate, action of
water on, 80, 23—Dissociation by
water, 80, 315
- Potassium iridichloronitrite, 92, 95
- Potassium lactate, influence of acidic
oxides on specific rotation of, 85, 225
- Potassium lactate, influence of molyb-
denum and tungsten trioxides on
specific rotations of, 87, 81
- Potassium lead periodide, composition
and formula, 97, 247
- Potassium lye, 77, 24—Detection of car-
bonic acid in, 60, 37
- Potassium manganate, use in analysis,
59, 301
- Potassium manganites, 56, 35—Hydrated,
65, 62
- Potassium manganocyanide, action of
carbonic oxide on, 87, 124
- Potassium mercuric iodide, estimation
of alkaloids by, 45, 114, 123
- Potassium mercuriiodide solutions, aque-
ous, 39, 237
- Potassium metabisulphite, 84, 208
- Potassium metatungstates, rotatory
power of crystals of, 99, 203
- Potassium methyl preparation, dangers
in, 13, 14
- Potassium monochromate, alkalinity of,
45, 248
- Potassium muriate, analysis of German,
44, 80
- Potassium myronate, 3, 370
- Potassium nitrate, action on ammonium
chloride, 43, 241—And acetate of
soda, explosive property of a mix-
ture, 26, 264—And ferrocyanide of
potassium, compounds, 14, 58—And
potassium nitrite, solubility of
mixed, 81, 103—And soda nitrate,
separation, 20, 190—And sodium ni-
trite, solubility of mixed, 81, 103—
Behaviour towards a solution of
basic acetate of lead, 14, 34—Decom-
position, 27, 153—Estimating per-
chlorate in, 78, 41—Manufacture, 1,
20; 3, 239; 37, 56—Manufacture
without heat, 13, 276—Preparation,
5, 293—Separation of iron and chro-
mium by fused, 89, 183—Substances
which yield, 24, 35—Transformation
of nitrate of soda into, 13, 192

- Potassium nitrite, action on nitranilide and acetanitrilide, 37, 113—And potassium nitrate, solubility of mixed, 81, 103—And ruthenium nitrite, double, 80, 95—In brown powder residue when powder is burnt in air under ordinary pressure, 80, 221—Preparation, 14, 48—Production, 63, 290
- Potassium nitrohydroxymidosulphates, 84, 129
- Potassium nitroprussiate, employment as a test for alkalinity, 18, 6
- Potassium nitrosulphate, 71, 241—Isomerism of, 72, 254
- Potassium oleate solution, use for determination of hardness of waters, 90, 55
- Potassium orthoantimonates, basic, 77, 71
- Potassium orthophosphate and barium orthophosphate, double, 47, 164, 282
- Potassium osyloxalate, 86, 201
- Potassium oxalate, acid, 22, 14—Antimony (see Antimony)—Basic glucinum, 48, 270—Ferrous, molecular condition in solution, 91, 55—Solubility in water, 22, 244
- Potassium oxalurate, and determination of alkalies in salts of acids belonging to uric acid group, 30, 53
- Potassium oxides, 34, 203
- Potassium paratungstate, action of ammonia on, 74, 84—Action of metallic sulphates on, 79, 11, 242
- Potassium pentathionate and potassium sulphite, action between, 97, 262
- Potassium perborates, 99, 240
- Potassium percarbonate, 77, 65
- Potassium perchlorate and ammonium perchlorate, isomorphism of thallium-perchlorate with, 14, 242—Solubility in water, 33, 15
- Potassium permanganate, 1, 154, 300; 2, 94; 14, 228; 51, 250; 58, 269—Action in converting albuminoid matters into urea, 24, 288—Action of reducing agents on, 37, 36—Action on asparagine, 20, 177—Action on bacteria in raw Thames water, 75, 171—Action on cinchonine, 20, 81, 203—Action on cupric bromide, 75, 287—Action on hydroxylamine salts, 91, 163—Action on iodide of potassium, 6, 131—Action on metals, 15, 204—Action on oxalic acid, 39, 18—Action on potassium cyanide, 41, 48—Action on quinine, 20, 226; 21, 132—Action on sodium hyposulphide, 54, 84—Action on tartaric acid, 25, 286—Action on urea, ammonia, and acetamide, in strongly alkaline solutions, 16, 254—Action on venoms, virus, and zymotic diseases, 46, 114—Action with organic matters, 71, 200—Against GORYZA, 22, 202—Alkaline (see Alkaline)—And chlorine, iodine, and bromine, behaviour, 20, 48—And hydrochloric acid, interaction in presence of ferric chloride, 93, 50—And indigotin, reaction between, 97, 312—And manganese sulphate, reaction between, in acid solution, 100, 266—And milk-sugar, behaviour, 26, 229—And nitric oxide, behaviour, 47, 84—And organic matter in water, 17, 192—And oxalic acid, speed of reaction between, 89, 96—And sulphuric acid, behaviour, 22, 24—As a test for distinguishing chlorine, iodine, and bromine, 20, 167—As test for morphia, 100, 220—Bacterial action of, 74, 184—Chlorine generated by, 99, 115—Crystals, 27, 47—Decomposition by oxygenated water, 41, 195—Decomposition of albumen by, 25, 46—Determination of ferrous oxide in hydrochloric solution by means of, 48, 119—Determination of formic acid with, 94, 242—Determination with hydrogen peroxide, 56, 279—Distillation, 73, 122—Estimation in presence of potassium persulphate, 91, 210—Estimation of manganese by, 79, 47—Estimation of thallium by means of, 8, 102—Germicidal action, 94, 119—In water, 17, 192—Light reflected by, 37, 247—Manufacture, 18, 200—Oxidation of nitrogenous compound by means of, 38, 211—Oxidation product obtained from strychnine on treatment with, 48, 207—Preparation, 4, 69—Process for determination of iron, application to analysis of hematite iron ores, 29, 246—Solutions, electric conductivity, 77, 224—Solutions, oxidising power, 25, 26, 47—Standardisation of, 70, 186—Titration of mercurous salts with, 96, 154—Use for quantitative estimation of sulphurous acid and sulphites, 25, 214—Use in dyeing, 83, 268—Use in galvanic battery, 25, 142—Use to detect impurities of alcohols, 60, 121
- Potassium peroxide, 53, 289—Action of fused, on cholesterol, 97, 261—Action of gases on, 4, 264
- Potassium perselenate, 84, 2
- Potassium persulphate, 86, 222, 256, 306—And hydriodic and phosphoric acids, reaction between, 88, 173—And hydrogen peroxide, reaction between, 93, 290—Estimation of hydrogen peroxide in presence of, 89, 177—Influence on estimation of hydrogen peroxide, 90, 275
- Potassium phenate, action of chloroform on, 28, 181
- Potassium phenylacetate, electrolysis of, 31, 30
- Potassium phenylate, a test for water in ether, 21, 166
- Potassium phosphate, deposits, 72, 73
- Potassium picrate, decomposition, 44, 106
- Potassium platnichloride, production, 72, 253
- Potassium platinocchloride, determination of potassium as, 43, 251, 273
- Potassium platinocyanide, action of carbonic oxide on, 87, 124
- Potassium platinum chloride, reduction, 67, 205
- Potassium platonitrite, acid, 67, 60
- Potassium platocxalonitrite, 80, 63
- Potassium polymetalanthanate, mono- (see Monopotassium)
- Potassium polysulphide, 79, 283
- Potassium polysulphides, behaviour of nitrogenous organic bodies with, 74, 189
- Potassium prussiate, manufacture, 8, 177; 9, 31; 60, 178—Manufacture, analysis of products of, 38, 115—Manufacture of yellow, 2, 335—Manufacture, utilising suint for, 27, 181
- Potassium prussiates, 4, 156
- Potassium pyrogallate, absorption of oxygen by, 77, 249—Action on bin-oxide of nitrogen, 40, 133—And free oxygen, heat evolved during reaction between, 84, 256—Decomposition of nitric oxide by, 35, 191
- Potassium pyrosulphate, behaviour of indigo white with, 40, 301
- Potassium pyrrole, action of silicochloroform on, 99, 18
- Potassium racemate, 53, 96
- Potassium selenate, 75, 272
- Potassium selenide and sodium selenide, 53, 167
- Potassium selenotritionate, crystalline forms, 21, 180
- Potassium sesquicarbonate, 48, 204
- Potassium silicate, 24, 46—Application for solidifying fossil bones, 21, 250
- Potassium silicofluoride, behaviour in blowpipe flame, 22, 275—Solubility in dilute hydrochloric acid, 49, 180
- Potassium-silver carbonate, double, 56, 259
- Potassium sodium alloy, photoelectric properties, 98, 268
- Potassium-sodium carbonate, 57, 181
- Potassium sulphantimonites, 76, 47
- Potassium sulphate, 33, 221—And iridium sulphate, double, 47, 257; 94, 47—Behaviour of epichlorhydrine towards, 20, 275—Decomposition by
- nitrate of soda, 27, 56—Decomposition of phosphates by, 46, 280—Determination of potassium in, 45, 35—Heats of dissolution, 50, 255—In ergot, 19, 103—In kainite, determination, 44, 71—Lead- (see Lead-potassium)—Manufacture, 1, 277—Manufacture of pure, 26, 195—Neutral, 63, 248—Plate, 21, 150—Preparation, 4, 176—Tribo-luminescence of, 91, 268
- Potassium sulphates, acid, 98, 96—Crystallography of normal, 69, 305
- Potassium sulphide, 79, 283—Action on mercury sulphide, 49, 277—And iron sulphide, double, 20, 70; 21, 285
- Potassium sulphite, action on bodies containing CCl_3 , 25, 202—Action on potassium tetrathionate in aqueous solution, 96, 232—Action on quinos, 36, 224—And potassium pentathionate, action between, 97, 262—And sodium sulphite, isomerism of double, 96, 275—Pyrogenous decomposition, 49, 36
- Potassium sulphocarbonate, dissociation in presence of ammoniacal salts, 22, 8
- Potassium sulphocarbonates, assays of, 47, 10
- Potassium sulphocyanide, 14, 109; 83, 61—Impure, 63, 130—Isomeric modification, 23, 180—Manufacture, 27, 179
- Potassium sulphomesytelenate, products of action of caustic potassa on, 39, 228
- Potassium sulphhydrate, action on acetic ether, 10, 283—Action on aromatic nitriles, 27, 307; 28, 264—Action on chloride of cyanbenzyl, 80, 24
- Potassium superferriocyanide, 35, 208
- Potassium tartrate, 4, 176—Acid, as original standard in acidimetry and alkalimetry, 65, 107—Determination in crude argols and wine-lees, 52, 311
- Potassium tellurocyanate, 49, 157
- Potassium tetrachromate and ammonium tetrachromate, 44, 71
- Potassium tetroxalate as a standard in acidimetry, 71, 307
- Potassium tetrathionate, action of potassium sulphite on, in aqueous solution, 96, 232
- Potassium tetroxalate, use in titration, 90, 91
- Potassium thiosulphate, 67, 73
- Potassium triiodide, 34, 222
- Potassium trinitride, electrolysis of a solution of, in hydronitric acid, 99, 254, 290—Separation of thorium from other rare earths by means of, 74, 314
- Potassium trithionate, crystalline forms, 21, 180
- Potassium tungstates, action of organic acids on, 33, 251
- Potassium ultramarine, preparation and analysis, 40, 109
- Potassium xanthate, as a remedy for the phylloxera, 33, 75—For determination of sulphide of carbon, salts of copper, and caustic alkalies in presence of alkaline carbonates and sulphuretted compounds, 36, 156
- Potassium xanthogenate for quantitative determination of carbon bisulphide, copper, and caustic alkali in presence of alkaline carbonates, 37, 63
- Potato, determination of starch in, 56, 12—Disease, 16, 153—Disease, coal-tar to prevent, 5, 42—Diseases, suppression, 59, 254—Powder, 18, 24, 36—Spirit, detection of, 53, 36—Starch, adulteration of wheat flour and starch with, 2, 95—Starch, comparison of the products of hydrolysis of, with those obtained from cereal starches, 89, 127—Starch, composition, 89, 132—Starch, determination of water in, 51, 207—Starch extraction, 1, 10—Starch, or corn, detection of adulteration of arrowroot with, 10, 318—Starch paste, action of malt diastase on, 88, 179, 302—Starch, transformation in human stomach, 59, 241—Sugar, injurious action of, 44, 192

- Sweet, cane-sugar in, **62**, 63 —
Tubers, consumption and deposition
of reserve matter in, **35**, 220
- Potatoes and beets, artificial manuring
for, **45**, 88—And grain, determination
of starch in, **53**, 33—And liming, **51**,
49 — Applying artificial manure to,
43, 178—Composition, **38**, 28; **54**, 201;
76, 241—Cult., **88**, 149—Deleterious
effect of light on, **4**, 327—Determination
of fecula in, **42**, 175—Determination
of starch in, **25**, 166; **74**, 306
— Diseased, **26**, 1003; **100**, 132 —
Diseased, ash of, **28**, 91—Effect of
temperature on growth, **34**, 155 —
Examination of sweet, **42**, 8 — Frozen,
sweet principle of, **17**, 162—Historical
facts about, **22**, 95—How to pre-
serve, **1**, 312—Influence of manuring
on chemical composition, **84**, 258 —
Influence of manuring with kainite
on proportion of starch in, **48**, 83—
Influence of sodium nitrate on, **48**,
260 — Manurial experiments on, **48**,
280; **49**, 235; **54**, 62—Nitrogenous
substances in, **20**, 191 — Peeling,
machine for, **21**, 215—Preservation of,
23, 191, 209—Quantity of starch in
different varieties, **26**, 216—Solanine
in, **21**, 216—Sound and diseased, in-
organic constituents of, **27**, 147 —
Starch yielded by, **1**, 96—Sulphate of
iron as manure for, **71**, 15—Testing,

Proctor, Charles, Estimation of saccharin, **91**, 102
Proctor, R. A., "Light Science for Leisure Hours" (review), **23**, 208—"New Star Atlas for the Library, the School, and the Observatory" (review), **26**, 34—"Spectroscope and its Work" (review), **36**, 244—"Stereochemical of Mars, with a Chart of Mars on Mercator's Projection, and Descriptive Remarks on the Stereograms" (review), **20**, 100—"Sun, Ruler, Fire, Light, and Life of the Planetary System" (review), **23**, 140
Professor, what is a? **15**, 64
Professorship, Berlin, **9**, 182
Projectiles, experiments on, **16**, 182
Prollius, F., Value of isinglass, **50**, 68
Propanal, action of fuming sulphuric acid on, **86**, 60
Propane and ethane, **51**, 126—Derivatives, **19**, 104, 298; **20**, 322; **21**, 11; **57**, 111—Dibenzoyl- (see Dibenzoylpropane)—Diphenyl- (see Diphenylpropane)—Physical properties, **91**, 304—Tribromo- (see Tribromopropane)—Trichloro, **45**, 142
Propanetetracarboxylate, dimethyl- (see Dimethylpropanetetracarboxylate)—Ethyl (see Ethyl)—Ethyl dibromo- (see Ethyl)
Propanolamines, orthotolyl- (see Orthotolylpropanolamines)
Propanols, cyclo- (see Cyclopropanols)
Propanone, action of fuming sulphuric acid on, **86**, 60
Propargyl, di- (see Dipropargyl)
Propargyl-alcohol, **26**, 36
Propargyl ether, preparation, **25**, 191
Propargyl carbinol, **97**, 299—Methyl ethers of, **95**, 298
Propargylic acid (see Acid)
Propene, cyclo- (see Cyclopropene)—Dibromo-1,3 (see Dibromo-1,3 propene)
Propenyl and allyl compounds in etheral oils, separation, **99**, 312
Propenylalcohol ketones, **89**, 179, 275
Propenylcarboxylic acid (see Acid)
Propionamide, di- (see Dipropionamide)
Propionate, ethyl phenyl- (see Ethyl)
Propionate, ethylbromo- (see Ethylbromopropionate)—Ethylacetate (see Ethylacetatepropionate)—Ethyl-β-iodo- (see Ethyl)—Ethyl nitroso- (see Ethyl)—Ethylpropionyl (see Ethylpropionylpropionate)—Iodo- (see Iodopropionate)—Methylthio- (see Methylthiopropionate)
Propionates, metallic, **55**, 188
Propione, oxidation products, **13**, 280
Propionic acid (see Acid)—Coumarin (see Coumarin)—Ester (see Ester)—Ethers (see Ethers)—Preparation from lactic acid, **26**, 59—Studies, **26**, 118
Propionine, sulphocyan- (see Sulphocyanpropionine)
Propionitrile, **87**, 152—Dichloro- (see Dichloropropionitrile)—Preparing propionic acid from, **35**, 105
Propionylbromide, **20**, 35
Propionylcarbinol and its derivatives, **91**, 280
Propionylchloride, **21**, 215
Propionylidide, **20**, 35; **21**, 215
Propionylparaaminopropiophenone, isomeric change of dipropionilide into, **87**, 223
Propionylpropionate, ethyl- (see Ethylpropionylpropionate)
Propionylquinine, **44**, 48
Propiophenone, **23**, 106—Benzal- (see Benzalpropiophenone)—Propionylparaamino- (see Propionylparaaminopropiophenone)
Propiopropanic ether (see Ether)
Propoxyacetic acid (see Acid)
Propyl, bichlorodiiso- (see Bichlorodiisopropyl)—Compounds derived from propyl alcohol of fermentation, **19**, 198—Derivatives, **27**, 59, 168; **28**, 8, 239—Diiso- (see Diisopropyl)—Group in the cumyl and cymol series, **53**, 275—Group, transpositions within, **53**, 263—Iso- (see Isopropyl)
Propyls, stanno- (see Stannopropyls)
Propylacetamide, nitroso- (see Nitroso-propylacetamide)
Propylacetone, diiso- (see Diisopropylacetone)
Propylacetylene, ethyl- (see Ethylpropylacetylene)
Propyl alcohol (see Alcohol, propylic)
Propylamide, maldi-*n*- (see Maldi-*n*-propylamide)
Propylamides, derivatives, **70**, 73
Propylamidophenol, **67**, 25—Derived from camphor, **66**, 282
Propylamine, **20**, 129—And trimethylamine, their therapeutical use, **27**, 276—Di- (see Dipropylamine)—In hering-pickle, **4**, 27
Propylamines and derivatives, **65**, 191—Normal, **54**, 73—Preparation, **55**, 201—Preparation and purification, **66**, 185
Propylbenzene, dichloromethenedioxy- (see Dichloromethenedioxypropylbenzene)—Formation and preparation, **83**, 83—Nitration, **62**, 49
Propylbenzenesulphonic acids (see Acids)
Propylbenzol, action of bromine on, **16**, 74—Paradi- (see Paradiisopropylbenzol)
Propylbenzyl ketone, isomeric additive products with benzylidene aniline, **85**, 310
Propylbetaine tri- (see Tripropylbetaine)
Propylbromide, action of bromine on, **73**, 279—Conversion into isopropylbromide, **41**, 172
Propylcarbinol, dimethyliso- (see Dimethylisopropylcarbinol)—Dimethyl-

pseudo- (see Dimethylpseudoisopropylcarbinol)
Propylchloride, **24**, 181
Propyldihydroresorcin, iso- (see Isopropyldihydroresorcin)
Propylfluoride, iso- (see Isopropylfluoride)—Preparation, **59**, 120
Propylglycol, active, **43**, 166—Biochemical oxidation, **79**, 106—Oxidation by bromine water, **80**, 95—Oxidation by Mycoderma aceti, **84**, 84—Preparing, **37**, 238
Propylhexamethylene, 2:6-diketo-4-iso- (see 2:6-Diketo-4-isopropylhexamethylene)
Propylidenecyclohexanone, 4-iso- (see Isopropylidenecyclohexanone)
Propylidide, action on disodium derivatives of diacetylacetone, **94**, 44—Action on pure trimethylamine in aqueous solution, **65**, 216—Preparation, **48**, 34
Propylisopropylbenzol, **33**, 211
Propylketone, dipseudo- (see Dipseudo-propylketone)—Ethyliso- (see Ethylisopropylketone)—Methyl- (see Methylpropylketone)—Methyl iso- (see Methyl)
Propylmalonic acid (see Acid)
Propylphenyl keton, **27**, 304
Propylpiperidonium iodide, ethyl- (see Ethylpropylpiperidonium iodide)
Propylpyridines, **70**, 270
Propylpyridine, transformation of conicine into, **49**, 277
Propylpyrocatechin, **81**, 154
Propylpyrocatechin carbonate, **89**, 143
Propylsilicane, benzylethyl- (see Benzylethylpropylsilicane)—*dl*-Benzylethylethyl- (see *dl*-Benzylethylethylpropylsilicane)
Propylsilicil oxide, benzylethyl- (see Benzylethylpropylsilicil oxide)
n-Propyltartrate, rotation values at different temperatures, **89**, 259
Propylthiocarbamide, dibromo- (see Dibromopropylthiocarbamide)
Propyl tin dextrobromocamphorsulphonate, dextromethyl- (see Dextromethylpropyl-Tin iodide, dextromethyl ethyl-*n*- (see Dextromethylpropylurea and diphenylurea, symmetric, **67**, 49—Mono- (see Monopropylurea)—Tetra- (see Tetrapropylurea)
Propylate of sodium (see Sodium)
Propylene, **35**, 263—Acetyl- (see Acetylpropylene)—Addition of hypochlorous acid to, **85**, 264—And hydrazides, union, **32**, 104—Behaviour of haloid compounds of, with hydriodic acid, **22**, 299—Bichlorated, third, **26**, 58—Chlorated, **33**, 95—Chlorated, derived from methyl chloroacetol, **24**, 216—Chloriod- (see Chloriodpropylene)—Compounds, **24**, 34—*aa*-Dichloro- (see *aa*-Dichloropropylene)—Glycerin from, **28**, 44—Monobromated, transformation into a new hydrocarbon, **4**, 153—Researches on products in, **14**, 1—Researches on, **69**, 276—Synthesis, **9**, 61—Transformation of trimethylene into, **81**, 192
Propylene bromide, preparation of normal, **35**, 28

- Quinine monohydrate, dinitro- (*see* Dinitroquinine)
- Quinine picrate, **48**, 119; **19**, 108, 132
- Quinine saccharinate, basic, **84**, 232
- Quinine sulphate, assay of, **47**, 191; **50**, 201; **55**, 296; **56**, 180—Commercial,

detection of accessory alkaloids in, 44, 61—Commercial, 12, 163; 77, 298—Composition, 52, 167—Determination, 42, 318—Determination of presence of sulphates of cinchonine and quinine in commercial, 5, 258—Light, 21, 263—Official, assay and analysis, 55, 69—Soluble, 26, 216—Sophistication, 47, 110—Testing, 19, 258

Quinine sulphocarbonate, crystallisation, 22, 276

Quinine urate, 1, 170

Quinio, or rough quinine, 1, 149

Quinizarin, methyl- (see Methylquinizarin)

Quinke's method of calculating surface tensions, 51, 310

Quinoacetate of calcium (see Calcium)

Quinoidine, animal, 13, 197—Purification, 14, 82, 173

Quinol, quinhydrone, and parabenzquinone, absorption spectra, 99, 20

Quinoic acids, 77, 212—Bases and hydrides, 78, 304—Group, syntheses in, 94, 195, 206

Quinoic bases, action of bromosuccinic and bibromosuccinic acid on, 89, 34

Quinoline, 9, 37; 46, 114—Action of bromine on, 46, 57—Action on chloroform and iodoform, 48, 106—Action of monohalogen acids of fatty series on, 83, 131—And pyridine, ammonium derivatives of acid ethers of, 53, 110—Bases, action of phthalic anhydride on, 48, 204, 237—Bases, action on bromosuccinic and dibromosuccinic ethers, 90, 328—Combinations with haloid salts of silver, 67, 49—Derivatives, mechanism of synthesis of, 96, 12—Derived from cinchonine, 45, 176—Di-iodine derivative of, 78, 326—Di- (see Diquinoline)—Dimethyltolu- (see Dimethyltoluquinoline)—Ethyl tartrate in, 99, 107—Iso- (see Isoquinoline)—Oxy- (see Oxyquinoline)—Paraoxy- (see Paraoxyquinoline)—Phenyl- (see Phenylquinoline)—Preparation, 70, 122—Preparation with metallic salts, 75, 312—Reactions, 47, 249—Tetrahydro- (see Tetrahydroquinoline)—Tetrahydroiso- (see Tetrahydroisoquinoline)

Quinoline hydrazines, 66, 288

Quinoline phenol, 47, 142

Quinoline urethanes, tetrahydro- (see Tetrahydroquinoline urethanes)

Quinolines, 1-benzyltetrahydroiso- (see 1-Benzyltetrahydroisoquinolines)—Naphtho- (see Naphthoquinolines)

Quinolium camphorsulphonate, benzyl- (see Benzylquinolium)

Quinolium chloride, benzyl- (see Benzylquinolium)

Quinoliphthalin salts, constitution, 96, 266

Quinone, 8, 63; 41, 208; 71, 150—Action of nitrous acid on, 85, 167—Amino-anthra- (see Aminoanthraquinone)—And benzoic phenols, combinations, 53, 262—And hydroquinone, potassium derivatives of, 72, 160—Anthra- (see Anthraquinone)—Benzo- (see Benzoquinone)—Bibromonaphtho- (see Bibromonaphthoquinone)—Blue dye obtained from, 74, 236—Bromoso- (see Bromosoquinone)—Camphor- (see Camphoroquinone)—Carboxy derivatives, 57, 117—Derivatives, 68, 254; 69, 203—Derivatives, conversion of para- into ortho-, 67, 93—Dimethyl-naphtho- (see Dimethylnaphthoquinone)—Diorthomidoanthra- (see Diorthomidoanthraquinone)—Di-orthonitroanthra- (see Diorthonitroanthraquinone)—Formation of cinchomeronic acid from, 40, 295—Halogen derivatives, 65, 294—Hydro- (see Hydroquinone)—Hydrotolu- (see Hydrotoluquinone)—Hydroxylamido-anthra- (see Hydroxylamidoanthraquinone)—Metabenzobioxanthra- (see Metabenzobioxanthraquinone)—Naphtho- (see Naphthoquinone)—Naph-

thacene- (see Naphthacenequinone)—Naphtho- (see Naphthoquinone)—Nitrosoanthra- (see Nitrosoanthraquinone)—Nitrotolu- (see Nitrotoluquinone)—Ortho- (see Orthoquinone)—Oxy- (see Oxyquinone)—Oxythymo- (see Oxythymoquinone)—Parabenzo- (see Parabenzquinone)—Phenanthra- (see Phenanthraquinone)—Phenanthren- (see Phenanthrenquinone)—Polymers of, 48, 47—Preparation, 38, 152—Propionyl- (see Propionyl)—Tecto- (see Tectoquinone)—Tetrabromodipheno- (see Tetrabromodiphenoquinone)—Tetrachlorhydro- (see Tetrachlorhydroquinone)—Tetrachlorised, transformation of penta-chlorophenol into, 86, 221—Tetrachloro- (see Tetrachloroquinone)—Thymo- (see Thymoquinone)—Tolu- (see Toluquinone)—Xylo- (see Xyloquinone)

Quinonechlorimide, trichloro- (see Trichloroquinonechlorimide)

Quinonediazides, orthobenzo- (see Orthobenzoquinonediazides)

Quinonedimethylether, nitrohydro- (see Nitrohydroquinonedimethylether)

Quinonediketones, 88, 108

Quinonediothoaminobenzoic acid (see Acid)

Quinoneoximes, 77, 285—Use in steam styles, 69, 8

Quinonephenylhydrazones, camphor- (see Camphoroquinonephenylhydrazones)

Quinonophthalin, hydro- (see Hydroquinonophthalin)

Quinones, 36, 223; 93, 89—Action of acetic hydriodic acid on, 92, 105—Action of ammonia on, 40, 160—Action of ammonia and the amines on, 40, 301—Action of organo-zinc compounds on, 39, 261; 41, 170—Action on *o*-diamines, *o*-nitroaniline, *m*-nitroaniline, and 2-nitro-*o*-toluidine, 93, 91—And hydroquinones, 46, 269; 77, 11—And hydroquinones preparation, 36, 254—And metanitriline and nitroparatoluidine, interaction, 68, 268; 69, 291—And ortho-nitriline and nitroparatoluidine interaction, 68, 261, 271—Aromatic, hydrogenation, 97, 179—Benzo- (see Benzoquinones)—Chlorinated, action of amines on, 36, 242—Derived from benzene, estimation, 80, 208—Dialcylamidoanthra- (see Dialcylamidoanthraquinones)—Dialcylamidodichloranthra- (see Dialcylamidodichloranthraquinones)—Dibromanthra- (see Dibromanthraquinones)—Formation by chlorochromic acid, 35, 126—Hydroxanthra- (see Hydroxanthraquinones)—Of high molecular weights, heat of formation, 77, 262—Ortho- (see Orthoquinones)—Para- (see Paraquinones)—Reactions with derivatives of malonic acid, 69, 48—Reactivity of substituted, 93, 152—Tetrahalogenated, action of pyridic bases on, 84, 224, 215

Quinonoid body found in a species of agaric, 38, 9—Theory of colour, 96, 266

Quinopieric acid (see Acid)

Quinoxaic acid (see Acid)

Quinoic acid (see Acid)

Quinovine, 48, 305

Quinquand, M., Analytical function of the liver, 35, 31—Determination of glucose, 55, 19—Determination of urea, 34, 166; 45, 211—Hæmoglobin in zoological series, 28, 142—Respiration of submerged aquatic vegetation, 28, 97—Variations of hæmoglobin in disease, 28, 125

Quinquand, M., and N. Grehant (see Grehant, N.)

Quinivalent nitrogen (see Nitrogen)

Quinquina, report on a formula for ferruginous syrup of, 14, 177

Quinquinas, alkaloids of, 4, 327; 87, 83, 93

Quintanes, contribution to our knowledge on, 24, 157

R

R-CO-O $\text{Cl} > \text{CH}_3$ and R-CO-O $\text{R-CO-O} > \text{CH}_3$, compounds of the form, 87, 175

Raab, A., Derivatives of cuminic aldehyd, 35, 64—Quantity of starch contained in different varieties of potatoes, 26, 210

Raabe, F. F., Determination of paratoluidine in commercial toluidines, 66, 109

Rabaut, C., Action of benzyl chloride on orthotoluidin, 64, 61—Saponification of benzonitrile, 81, 215—Some derivatives of the thiocresols, 87, 94

Rabaut, C., and M. Prudhomme (see Prudhomme, M.)

Rabdonite, 22, 24—And an asbolan containing lithia, 22, 239

Rabe, P., Synthesis of phenanthrene and hydrogen derivatives of phenanthrene by α -naphthoic acid, 79, 276

Rabbits, effect of injection of intracellular constituents of bacteria on serum of, 100, 20

Rabies, cases of, 21, 178—Poison, principal cause of attenuation of, 60, 107—Protection from, 66, 245—Treatment, 40, 78

Rabichong, J., Action of chloride of diazobenzene on the substituted oxyfumaric ethers, 90, 71—Action of diazo chlorides in excess in alkaline solution on oxalacetic ether, 90, 70—Action of diazo chlorides on the oxalacetic ethers, 90, 70—Action of tetrazoic chlorides on oxalacetate of ethyl, 87, 143

Rabourdin, H., Assay of the peppers of commerce, 50, 153—Extraction of quinine and estimation of alkaloids of quinquinas, 4, 327

Rabuteau, A., Counteracting effects of insufficient food, 22, 166—Estimation of ammoniacal salts, 25, 214—Influence which coffee and cacao exert as food, 23, 155—Localisation of copper in the organism after ingestion of a salt of this metal, 35, 106—Opium alkaloids, 25, 262—Quantitative estimation of ammoniacal salts, and causes for these salts existing in the human organism in infinitesimally small quantity, 22, 21—Researches on antiferment properties and physiological action of silicate of soda, 26, 180

Raby, L., New reactions of codeine and esculine, 50, 188

Race, J., and R. Ross (see Ross, R.)

Race, characteristics of, 14, 128—Human, antiquity of, 2, 258, 282

Racene, M., Detecting carbon monoxide in air, 59, 313

Racemates, splitting-up of the sodium ammonium and sodium potassium, 53, 167

Racemic acid (see Acid)—Alcohols (see Alcohols)—Camphol (see Camphol)—Character, proof of, 90, 95—Compounds, characterisation of, 78, 313; 79, 152—Compounds in liquid state, 98, 256—Compounds, triboluminescence of, 98, 83—Erythrite (see Erythrite)—Fenone (see Fenone)—Liquids, characterisation of, 80, 264—Modifications, melting-points, 71, 146

Racemics, 79, 276

Racemisation by alkali as applied to resolution of 1-maleic acid into its optically active isomerides, 96, 268—Occurring during formation of benzylidene, benzoyl, and acetyl derivatives of dextro-*ac*-tetrahydronaphthylamine, 81, 167—Of malate of ammonium, 78, 304—Of bromocamphor, 83, 106—Of optically active tin compounds, 81, 261—Partial, 79, 287—Phenomena during hydrolysis of optically active methyl and bornyl esters by alkali, 91, 278—Phenomena observed in study of 1-benzoin and derivatives, 100, 241—Spontaneous, 79, 179

- Racemism and pseudoracemism, 75, 307
—Of *p* mandelate, 100, 31—Pseudo-
—(see Pseudoracemism)
- Racemy, 78, 83
- Raczkowski, S. de (see de Raczkowski, S.)
- Rad, A. von (see von Rad, A.)
- Radan, R., Influence of motion of a source of sound or light upon the sound or light emitted from the object in motion, 21, 288—Review of physics, 33, 221; 34, 31, 36, 82, 41

- Rademaker, C. J., Amount of arsenic in phosphorus, 22, 276—Crystallisation of sulphocarbonate of quinine, 22, 276—Reaction between nitrous ether and bicarbonate of potassa, 21, 144
- Radenhausen, P., and A. Danilewsky (see Danilewsky, A.)
- Radenhausen, P., and N. Gerber (see Gerber, N.)
- Radial cursor (see Cursor)
- Radient energy (see Energy; Heat; see Heat)—Heating (see Heating)—Matter (see Matter)
- Radiation, absorption through bodies, and its application in quantitative analysis, 37, 1—And absorption with reference to colour of bodies, etc., 13, 163—Attraction and repulsion resulting from, 31, 1, 11, 23, 32, 33, 53, 180, 215—Bolometer for absolute measurement of, 91, 242—Constant, determination, 91, 242—Electric, compensation, 69, 250—Electric, from bent antennae, 94, 249—Electric, in copper filings, 68, 219—Electric, meter, 60, 230—Electromagnetic, action on films containing metallic powders, 68, 277—Electromagnetic, measurement, 62, 6—Emitted by radio-active bodies, properties of, 85, 96—From radio-active bodies, 81, 121—Influence of temperature on, 88, 224—Mechanism of, 83, 299—Of heat—Heat—Of mesodense platinum (see Platinum)—Of radio-active substances, 88, 169—Of silver (see Silver)—Of thorium (see Thorium)—Pressure, 91, 81—Pyrometer, 95, 232—Repulsion resulting from, 33, 121, 131, 141; 34, 23, 165, 175, 187, 209, 219, 229, 241, 253, 263; 35, 179, 211, 223, 233, 248, 248; 36, 14, 14, 28, 38, 43, 55, 58; 37, 162—Researches on, 51, 128—Röntgen, 93, 114—Röntgen, energy of secondary, 89, 178—Röntgen, polarised, 91, 97—Solar, 9, 169; 20, 285; 30, 30; 66, 119—Solar, action on chloride of silver in presence of hydrogen, 84, 36—Solar, at high elevations, 16, 183—Solar, influence on earth's rotation, 41, 292—Solar, measuring the thermic intensity of, 52, 116—Sun's calorific, permanence of intensity in, 30, 8—Terrestrial, 47, 97—Thermal, temperature and efficiency of, 92, 246—Through earth's atmosphere, 7, 101
- Radiations, absorption across bodies, 37, 46—Effect on Brush discharge, 99, 153—Of spectrum, 75, 312—Solar and other, colouration of glass by, 91, 73—Solar, which have traversed coloured glasses, evaporation of water under influence of, 40, 55—Thermic, insulating the, 48, 225—Transparency of coloured flames for their own, 37, 237
- Radiators in wireless telegraphy, 95, 233
- Radical, acetylic, 13, 194—Ammonium (see Ammonium)—And salt, 17, 306—C₃H₅ in eugenol, constitution, 35, 199—Of radicle? 9, 13, 14, 19, 19, 200, 54, 47, 71, 88, 200—Organic, metallic character of, 100, 72
- Radicals, acid, sulphocyanates of, 33, 18, 65—Acid, sulphocyanates of, action of compound ammonias on, 33, 181—
- Acid, two new sulphureas with, 36, 153—Acidulous, detection and separation, 66, 27—Alcohol, action of chlorides of, on primary monamines, 32, 147—Alcohol, action of chlorides of, on secondary monamines, 31, 140; 32, 146—Alcohol, amido-acids with, 41, 12—Alcohol, halogen compounds of, action of water on, 35, 194; 36, 223—Alcohol, haloid compounds of, action of water on, 35, 232; 40, 43—Alcohol, iodides of, 26, 83—Alcohol, nomenclature, 26, 108—Alcohol, recognition of, 47, 59—Alcohol, substitution of, for the hydrogen of phosphuretted hydrogen, 23, 180—Condensation, 31, 47—In organic compounds, identification, 27, 99—Mercurial, reactions of argon and nitrogen on, 81, 46—Metallic, new class of compound, 13, 119, 139, 218, 230—Organo-metallic, 1, 133, 145, 157; 6, 203, 271—Sulphuretted, 11, 274
- Radicle benzoyl (see Benzoyl)—Camphor (see Camphor)—Cyanogen (see Cyanogen)—Metallic, 49, 285—Or radical? 9, 143, 166, 191, 204; 54, 36, 71, 83, 260
- Radicles, acetylo-metallic, 84, 35—Acidic, distribution, 67, 191—Alcoholic, 64, 250—Alkaline, distribution, 67, 191—Alkyl (see Alkyl)—Cupreammonia, 86, 149—Cyclic, influence on optical activity, 88, 277—Dinaphthyl and xanthyl, introduction into electro-negative molecules, 94, 96—Electro-negative, tautomerism occurring amongst thioanates of, 83, 140—Hydrocarbon (see Hydrocarbon)—Hydroxyl, estimation, 89, 19—Metallic, compound, 80, 315—Non-saturated, and molecules, influence of combination on rotatory power, 90, 56—Organic, containing sulphur, compounds of gold with, 92, 201
- Radiferous mineral (see Mineral)
- Radigue, M., and D. Tommasi, New battery with electrodes of coke, 50, 80
- Radio-active barium (see Barium)—Bismuth (see Bismuth)—Bodies, 85, 71—Bodies, detection of gaseous products produced by, 96, 97—Bodies, nature of, 88, 23—Bodies, properties of radiation emitted by, 85, 96—Bodies, radiation from, 81, 121—Bodies, source of energy in, 79, 103—Changes in earth, 98, 73—Cinnabarites (see Cinnabarites)—Components of thorium compounds, chemical separation, 91, 259—Constituent of bismuth from Joachimsthal pitchblende, 88, 224—Effect of barium salts and polonium, 80, 290—Element (see Element)—Emanation (see Emanation)—Gaseous mixtures arising from hot springs, chemical composition, 90, 328—Lead (see Lead)—Material, 80, 209; 83, 122—Matter, expulsion in radium transformations, 99, 215—Minerals (see Minerals)—Processes, 87, 207—Product of uranium series, 99, 146—Rare earths in Fango and in earth from fields of Capri, 91, 86—Substance discovered in Transvaal, 92, 203, 215—Substance, spectrum of, 79, 13—Substances, 88, 85, 97, 134, 145, 159, 199, 175, 187, 199, 211, 223, 235, 247, 259, 271; 89, 270—Substances and radium, 86, 250—Substances, comparison of α -rays produced by different, 100, 160—Substances, photographic action of α -particles emitted from, 100, 326—Substances, radiation of, 88, 169—Thorium (see Thorium)
- Radio-activity, absorption by liquids, 85, 239—Action of gravity on deposit of induced, 96, 173—And atomic weight, 83, 130—And electron theory, 85, 109—And matter, 89, 289—And occurrence of radium in Australian minerals, 90, 280; 92, 39—And radium, 94, 125—And valency, 85, 310—Cause and nature, 85, 261—Correlation and phenomena of luminosity with, 88, 89—Cosmical, 88, 166, 197—Due to Becquerel rays, 80, 269—Experiments, 88, 100; 90, 149—From springs of potable water, 93, 141—Induced, 89, 97—Induced, produced by salts of radium, 84, 25, 316—Of bacteria (see Bacteria)—Of certain minerals and mineral waters, 89, 133—Of constituents of thorianite, 94, 233—Of inert gases of atmosphere, 88, 100—Of matter, 85, 169—Of Plombières waters, 97, 132—Of salts of potassium (see Potassium)—Of thermal springs at Aix, 94, 242—Of thorium (see Thorium)—Of uranium (see Uranium)—Of uranyl double salts (see Uranyl)—Present state of our knowledge of, 98, 235, 247, 259, 271, 289, 300—Recent researches in, 99, 171, 181—Secondary, 83, 191—Standard of, 97, 33; 99, 45
- Radiographs, 41, 204, 292; 73, 257—Instantaneous, 76, 240
- Radiography, photographic veil in, 76, 107, 207—Recent developments in, 100, 244
- Radio-lead, 97, 119
- Radiology and electricity, international congress, 100, 244—And ionisation, international congress for study of, 92, 47
- Radiometer, 33, 171; 34, 8, 9, 21, 51, 32, 49, 51, 63, 83, 143, 261; 36, 80; 37, 251; 95, 231—Absorption, 35, 135—Cause of movement, 35, 44, 135—Explained by pyro-electricity, 35, 55—Explanation of movement of wings of, 40, 32—Influence of residual gas on the movement of, 24, 23—Movement of glass case of a, 33, 163—Of a symmetrical construction, 71, 197—Theory of, 34, 269, 275; 35, 125—Use in observing small gas pressures, 96, 97
- Radiometers, influence of sonorous vibrations on, 34, 133—Intensity, 34, 110
- Radiometric experiments, 35, 21
- Radiomicrometer, 57, 200
- Radiophonic receivers of selenium, influence of temperature on, 44, 59
- Radiophony, 43, 25, 35, 130; 44, 13—Produced by lamp-black, 44, 204—Produced by selenium, 43, 195
- Radiophotography of soft parts of man and lower animals, 75, 102
- Radiotelegraphic receivers (see Receivers)
- Radiotellurium, 88, 224; 90, 92; 91, 121
- Radium, 79, 1; 84, 190; 85, 11; 87, 25, 78, 97; 89, 33, 97, 174; 90, 255; 92, 10; 94, 125, 144, 153—Action of gravity on induced activity of, 100, 196—Action on copper and gold, 98, 256—Action on electric spark, 91, 68—Action on gelatin culture medium, 95, 232—Action on glass, 89, 240—And barium, separation, 99, 97—And helium, 88, 39, 147—And radio-active substances, 86, 250—And radioactivity, 94, 125—And thorium emanations, condensation points of, 86, 201—And transformation products, effects of temperature on activity of, 95, 39—And uranium in radio-active minerals, 92, 38; 100, 25—And uranium in radio-active minerals, ratio between, 100, 173—Atomic weight, 86, 61; 87, 183; 88, 159; 93, 55, 301; 96, 127; 97, 229; 99, 69; 100, 278—Chemical action on distilled water, 95, 247—Chemical reactions due to, 84, 250—Compounds, bearing of the colour phenomena presented by, 90, 157—Compounds, experiments and observations with, 88, 205—Contract for, 99, 303—Distribution in electric fields of active deposits of, 97, 156—Effect in facilitating the visible electric discharge in vacuo, 94, 22—Emanation, 99, 301—Emanation, action on elements of carbon group, 100, 209—Emanation, action on solutions of

- copper salts, 98, 157 — Emanation, chemical action of, 96, 243 — Emanation, chemical action on distilled water, 95, 247 — Emanation, condensation, 100, 61 — Emanation, condensation of water vapour in presence of, 97, 35 — Emanation, decay constant of, 92, 28 — Emanation, formation of mists in presence of, 98, 156 — Emanation, liberation, 100, 184 — Emanation, properties, 96, 8; 99, 76, 296 — Emanation, solid and liquid, 99, 165 — Emanation, spectrum of, 89, 501 — Emanation, variability in products resulting from changes in, 96, 95 — Emanations, 87, 157 — Emanations, action on diamond, 90, 1 — Emanations, bactericidal properties, 87, 308 — Emanations, chemical action, 97, 273 — Emanations, condensation by liquid air, 87, 308 — Emanations, differences in decay of, 99, 179 — Emanations, effect of extreme cold on, 88, 25 — Emanations, initial change of, 97, 155 — Emanations, properties of, 87, 241, 245 — Emanations, radio-active, 88, 100 — Essay competition in, 99, 60 — Gas from, 85, 196 — In Australian minerals, 90, 280; 92, 30 — In earth's crust, distribution, 93, 235, 247; 94, 95 — In Fango mud and in earth from fields of Capri, 91, 86 — In periodic system, 87, 143 — Induced radio-activity in gases due to, 83, 191 — Inducing character of, 88, 61 — Influence on rate of crystallisation, 99, 299 — Ionisation of gases by α -particles of, 95, 118 — Mother substance of, 96, 272 — Mystery of, 87, 158, 184 — Origin, 90, 187, 199 — Points of chemical philosophy involved in discovery of, and properties of its combinations, 94, 286 — Present in some "tufa" deposits from Hot Springs, Arkansas, 98, 109 — Production from uranium, 100, 242 — Production of helium from, 88, 100; 89, 255, 266; 94, 144; 98, 158 — Radiations, influence on atmospheric oxidation in presence of iron, 90, 168 — Radiations, influence on labile stereoisomerides, 90, 31 — Rate of decay of active deposit from, 95, 285 — Rays, 81, 95 — Rays, action on halides of alkali metals, 89, 249 — Rays, action on minerals, 89, 1 — Rays, action on selenium, 83, 226 — Rays and benzene derivatives, 90, 216 — Rays, chemical action on water, 99, 211; 100, 172 — Rays, chemical effects produced by, 84, 268 — Rays, deviation in a magnetic field, 81, 191 — Rays, dispersion in a magnetic field, 81, 118 — Rays, electric charge due to deviable, 81, 154 — Rays, influence on chlorine detonating gas, 91, 225 — Rays, intensely penetrating, 88, 101 — Rays, β -phosphorescence caused by, 91, 240 — Rays, photographic action, 89, 58 — Salts, action on globulins, 88, 73 — Salts, characteristics, 88, 160 — Salts, decomposition of water by, 99, 210 — Salts, evolution of heat by, 88, 223 — Salts, heat evolved by, 87, 159 — Salts, induced radio-activity produced by, 84, 25, 316 — Salts, liberation of emanation by, at different temperatures, 96, 161 — Salts, radio-activity of, 84, 88 — Scintillations, 88, 83 — Spectra, 83, 77 — Spectrum, 80, 269; 82, 73 — Spectrum, ultra-violet, 88, 202 — Spontaneous molecular activity, 88, 190 — Transformations, expulsion of radio-active matter in, 99, 215 — What may result from the study of, 89, 47
- Radium barium chloride, anhydrous, phosphorescence, 89, 97
- Radium bromide emanation experiments, 90, 95 — Examination of a sample of gas occluded in, 89, 85 — Helium in gases from, 88, 100 — Method of showing presence of helium formed from, 92, 77 — Spectrum of helium from, 94, 171 — Volatility of, 100, 338
- Radium C, recoil from radium B, 100, 290
- Radium chloride, preparation of pure, 88, 149
- Radiu, equivalent, of a coil, 84, 301
- Radix taraxaci, 2, 64
- Radiof, J., Derivatives of pseudocumol-sulphonic acid, 37, 161
- Radominski, M. F., Artificial production of monazite and xenotime, 31, 174 — Phosphate of cerium containing fluorine, 29, 113
- Radziszewski, B., Action of bromine on boiling ethylbenzol, 27, 303 — Certain new glyoxalines, 48, 270 — Chemical nature of desoxybenzons and kindred substances, 27, 303 — Derivatives of phenylacetic acid, 20, 46, 154 — New formation of stilben 27, 282 — Nitro-derivatives of phenylacetic acid, 22, 130 — Phenylacetic acid, 21, 203 — Phosphorescent cause of lophine, 35, 64 — Phosphorescent organic bodies, 35, 95, 124, 165 — Synthesis of oxaline bases, 48, 236 — Theory of phosphorescent phenomena, 48, 237 — Wax of corn straw, 21, 23
- Radziszewski, B., and L. Henry (see Henry, L.)
- Rafferty, C. W., "Introduction to Science of Radioactivity" (review), 99, 238
- Raffinose, 54, 37; 60, 221; 62, 98 — Combinations with bases, 61, 133 — Extraction, 61, 216 — Fermentation, 60, 233 — In American sugar beets, 75, 193 — In barley, 52, 293 — Melitose, or melitriose, 62, 15 — Solutions, red sediment formed in, 63, 5
- Ragiquet, M., Fluorescence of vitrified matters under action of Röntgen's rays, 75, 107
- Rag-washing machine, 21, 251
- Rags, bleaching for paper-making, 27, 34 — Bleaching coloured, 5, 335 — Colouring matter from, 3, 125 — For paper-making, chemical treatment, 84, 257 — Mixed fabric, containing vegetable and animal fibre, 11, 105 — Woollen and cotton, utilisation, 40, 137
- Raib, zincspath from, 25, 131
- Raikow, P., Apparatus for continual washing, 57, 221
- Raikow, P. N., Automatic exhibition of a gas flame after a given time, 74, 25 — Günzburg's reagent applied to detection of halogens in organic compounds, 79, 67
- Rail-steel, chemical methods for analysing, 44, 292, 299, 310
- Rails, rusting of, 58, 264
- Railway accidents, prevention, 4, 188 — And carriage spring steel, 69, 303 — From Arequipa to Puno and Cusco, 21, 47 — Grease, 8, 254 — Lines, potential between, 93, 114 — Train, express, method of stopping in a short time, 24, 253 — Underground, atmosphere, 16, 231
- Railways, iron and steel as applied to rolling stock of, 23, 89
- Raimondi, C., Differences in reactions of strychnine and gelsenine, 57, 251
- Raimondi, C., and G. Bertoni (see Bertoni, G.)
- Rain, action on plants, 48, 118 — Amount of matter removed from soil by, 41, 44 — Artificially causing, 65, 239 — Discoloured, 87, 199 — Fall, 3, 124 — Fall at London, 8, 71 — Fall at Oldham, 8, 71 — Fall, British, 12, 278 — Fall, comparative observations according to Fautrat's method, 39, 93 — Fall, daily course of, 45, 184 — Fall, determination, 44, 192 — Fall in Alsatia, 16, 73 — Fall in France, 21, 276 — Fall, influence of forests on, 42, 95 — Fall, inverse relation of chlorine to, 84, 176 — Fall of Alsace and the Vosges, 14, 128 — Fall on French Alps, 22, 82 — Following discharge of ordnance, 5, 12 — Greatest daily quantities of, 45, 88 — Meteoric sand, 25, 214 — Nitrogen compounds in, 100, 305 — Peculiar, 21, 251 — Red, composition and nature, 83, 159 — Red, which fell in Victoria, Australia, on Dec. 26, 1896, 83, 253 — Signs of, 17, 146 — Water, 8, 146 — Water, action of Nessler test on, 31, 245, 263 — Water, alternating predominance of n. trous and nitric acid in, 24, 144, 299 — Water analysis, 59, 298 — Water at Cirencester, chlorine in, 82, 265 — Water, bacillus in, 60, 40 — Water collected at different heights, chemical composition, 9, 225 — Water composition, 22, 108 — Water, conduction along the trunks of trees, 43, 167 — Water, n. trogenous matters in, 53, 251 — Water of tropical regions, nitrates in, 59, 289 — Water, percolation through soils, 92, 49 — Water, proportion of ammonia in, 47, 105 — Waters, and Seine, estimation of quantity of oxygen dissolved in, 26, 312 — Waters of city of Algiers, 50, 272 — Waters, sodium and chlorine in, 99, 253

- Reaction, acid (*see* Acid) — Anderson's

- 48, 226 — Anderson's, formation of double salt in, 49, 36—Between ammonium persulphate and sodium peroxide, 98, 197—Between free oxygen and potassium pyrogallate, heat evolved during, 84, 256 — Between iodine and hypophosphorous acid, velocity and mechanism of, 96, 241 — Between phenols and phosphorus pentachloride, 97, 143 — Between potassium-aluminium sulphate and a bromide-bromate mixture, 97, 102 — Between silver sulphide and silver sulphate, 98, 281—By which symmetric diphenyl pyrones are produced, 87, 262—Catalytic, 46, 9 — Chemical, forming a monovalent system, prediction of, 91, 143 — Chemical, in which one of the products continues the same reaction, 84, 263—Chemical, scheme for explaining, 43, 233—Clötz, 75, 138 — Colour, of reducing sugars given by alkaline *m*-dinitrobenzene, 94, 315—Diazo- (*see* Diazo-reaction)—Distinguishing phosphoprotein from nucleoprotein, 98, 243—Equilibrium, 93, 200 — For ketohexoses, 90, 182—Friedel-Crafts, 88, 254—Friedel and Crafts's, extension of, 95, 203—Friedel and Crafts's, formation of mixtures of isomers of constant melting-point in, 97, 263—Friedel and Crafts's, reciprocal displacement of hydrocarbon groups in, 97, 167—Grignard's, 91, 34; 92, 201—Grignard's, and radioactive lead, 95, 13—Grignard's, application for asymmetric syntheses, 93, 104 — Grignard's, applications, 96, 142, 159, 168, 177—Grignard, applied to esters of hydroxy-acids, 90, 302—Hofmann's, application to sparteine, 96, 294 — Of colouring matters of oxazine series, 95, 92—Of compounds of rhodium of use in chemical analysis, 91, 216 — Product of nitro-group, 94, 171—To detect traces of moisture, 96, 22 — Velocity before complete equilibrium, 80, 31—Velocity, lecture experiment to show, 100, 220—Zeisel, in case of diortho-substituted phenolic ethers, 92, 235
- Reactions at high temperatures and pressures, execution of, 66, 221—At low temperatures, 94, 242—Between dyes and fibres, 99, 44—Between metals and ammonium salts, 90, 142 — Between sodium thiosulphate and organic halogen compounds, 91, 197; 99, 20—Between sulphuric acid and the elements, 79, 261—Blowpipe (*see* Blowpipe)—Catalytic, effected by wood-charcoal, 95, 110—Chemical, 27, 44; 56, 35—Chemical, by heat borrowed from pile, 14, 118—Chemical, due to radium, 84, 256—Chemical, general equations of, 25, 245—Chemical, in gaseous mixtures subjected to very great pressures, 100, 48 — Chemical, influence of gum arabic on, 46, 233—Chemical, influence of light on, 52, 283; 53, 263—Chemical, influence of temperature on, 77, 274 — Chemical, irreversibility in, 77, 23—Chemical, Liebreich's dead space in, 58, 297—Chemical, limit, and that of product PV in gases, 84, 242 — Chemical, mechanism of, 36, 34 — Chemical, obstacles opposed to, by positions of certain groups, 91, 192 — Chemical, possibility of, 80, 328 — Chemical, produced by light, 18, 266 — Chemical, produced in a solution, 81, 180—Chemical, provoked by silent electric discharge, 82, 278—Chemical, retardation of, 35, 92—Chemical, use of hot and cold tubes in, 91, 211 — Colour, by aromatic hydrocarbons, 40, 26—Colour, involving addition of hydrogen cyanide to carbon compounds, 93, 201; 94, 264—Colour, of aromatic trioxide compounds, 68, 232—Colour, of certain organic compounds, 94, 297—Colour, of indolic substances with sugars, 99, 192 — Colour, of pyruvic acid with α - and β -naphthol in sulphuric acid solution, 91, 209—Colour, of saffron and its adulterants, 74, 306—Colour, produced by sodium hypobromite, 98, 200—Colour, with boric acid, 87, 27 — Coloured, 75, 131—Coloured, of aromatic amines, 63, 204—Copper (*see* Copper)—Diazo- (*see* Diazo-reactions)—Electric furnace, under high gaseous pressures, 88, 218—Endothermic, 58, 36; 68, 297—General conditions of, 15, 252 — Involving addition of hydrogen cyanide to carbon compounds, 88, 9; 90, 251, 253—Light, of white and yellow diphenylotatetrene, 99, 191—Limited, 66, 257 — Limited, speed of, 78, 95 — Microchemical, of arsenic applicable in forensic chemistry, 98, 245—Microchemical, qualitative analysis based on, 54, 221—Microscopic, 53, 62 — Molecular organic, 65, 25 — New thermic expression of, 28, 57 — Possible, that yielded negative results, 26, 238—Proteid, of Adamkiewicz, 83, 73, 85—Pyrogenic, 97, 11—Pyrogenic, thermo-chemical conditions of, 15, 227—Simple, limited by inverse action, 26, 228—Speed of, 42, 109—Thermo-chemical study of, 44, 13—Tinctorial, 75, 256 — With anthranol, 100, 183

- 180, 192, 204, 221, 228, 234, 239, 249, 252, 258, 264, 270, 285, 300, 302; **12**, 42, 68, 166, 175, 187, 290, 301, 304; **13**, 23, 28, 60, 72, 84, 96, 106, 118, 125, 131, 150, 163, 167, 197, 234; **14**, 4, 28; **15**, 44, 67, 102, 115, 127, 143, 155, 170, 259, 270, 285, 315; **16**, 8, 20, 32, 47, 63, 71, 228, 244, 292, 322; **17**, 230; **18**, 273; **19**, 142, 223; **20**, 282, 310; **22**, 202; **23**, 31, 153; **24**, 264; **26**, 275; **27**, 115, 207; **28**, 254, 280, 291; **35**, 156, 187; **36**, 258; **37**, 59, 101; **39**, 34, 64, 173; **40**, 35, 241, 278, 290, 299; **41**, 121, 123, 235; **42**, 235, 310; **43**, 66, 167, 218, 245, 268; **44**, 205; **45**, 65, 173, 207; **46**, 36, 230, 275; **47**, 25, 66, 70, 107, 110, 134, 164, 211, 221, 269; **48**, 224; **49**, 69, 94, 123, 126, 175, 179, 221; **50**, 23, 223, 270, 292; **51**, 26, 69, 95, 173, 218, 236, 262, 274; **52**, 22, 260, 303; **53**, 84, 130, 225; **55**, 172, 217, 223; **56**, 9, 228, 258, 260; **57**, 128, 132, 139, 180, 189, 210, 229; **58**, 24, 257, 281, 305; **59**, 71, 118, 166, 181, 227, 239, 241; **60**, 11, 231, 260, 294, 304; **61**, 121, 133, 225, 288; **62**, 109, 246, 281, 285, 298; **63**, 120, 129, 153, 166, 168, 238, 248, 262, 282; **64**, 36, 70, 234, 248, 297; **65**, 71, 74, 108, 147, 159, 310; **66**, 36, 256, 270, 306; **67**, 24, 61, 73, 149, 159, 214, 277; **68**, 46, 232, 265, 282, 305; **69**, 17, 118, 145, 157, 265, 276, 287, 70, 9, 241, 288; **71**, 25, 63, 94, 123, 144, 150, 174, 222, 260, 294; **72**, 25, 234, 243, 272, 281; **73**, 119, 142, 175, 199, 246, 284; **74**, 57, 234, 293; **75**, 48, 83, 115, 180, 191, 227, 251, 300; **76**, 36, 229, 254, 287, 289; **77**, 24, 82, 96, 115, 141, 166, 211, 223, 250, 285; **78**, 21, 243, 298, 299, 304; **79**, 72, 171, 110, 156, 175, 203, 228, 252, 259, 288; **80**, 33, 232, 234, 279, 292, 296; **81**, 71, 91, 114, 131, 173, 180, 191, 216, 224, 284; **82**, 17, 227, 309, 297, 291, 304; **83**, 17, 40, 70, 72, 94, 119, 162, 167, 179, 227, 229, 271; **84**, 12, 220, 243, 279, 280; **85**, 23, 84, 96, 112, 119, 139, 163, 180, 203, 229, 228, 240, 275; **86**, 15, 232, 233, 282, 291; **87**, 24, 60, 72, 95, 140, 180, 168, 171, 192, 225, 227, 251, 287; **88**, 23, 238, 250, 293, 305, 317; **89**, 24, 58, 71, 93, 130, 141, 143, 170, 192, 209, 220, 239, 251, 286; **90**, 30, 244, 248, 263, 294, 317; **91**, 24, 314, 31, 66, 95, 118, 125, 134, 164, 176, 201, 209, 232, 245, 263; **92**, 21, 179, 225, 276, 282, 293; **93**, 15, 45, 69, 81, 84, 115, 120, 159, 163, 181, 215, 221, 233, 228, 246, 274; **94**, 12, 212, 232, 243, 276, 280; **95**, 48, 62, 71, 95, 120, 131, 143, 167, 178, 191, 196, 226, 238, 252, 268; **96**, 12, 234, 246, 280, 282, 294, 318; **97**, 15, 48, 71, 98, 110, 120, 177, 200, 222, 226, 251, 265; **98**, 36, 225, 232, 258, 292, 294; **99**, 27, 60, 66, 84, 113, 116, 144, 168, 180, 192, 211, 226, 240, 264, 288; **100**, 18, 226, 229, 286, 291—Address to the king, **83**, 70—Chemical researches in, **10**, 111—Course of six lectures on some of the chemical arts with reference to their progress between the two great Exhibitions of 1851 and 1862, **6**, 8, 37—Report of committee of visitors, **91**, 210—Report on past, present, and future of, **5**, 178, 193
- Royal Irish Academy, **20**, 283; **22**, 261; **25**, 31, 200; **27**, 20
- Royal Medal, **90**, 250
- Royal Mint, **11**, 154; **21**, 45
- Royal Observatory (*see* Observatory)
- Royal Photographic Society, **77**, 47; **99**, 132
- Royal Sanitary Institute, **40**, 167, 193; **43**, 62; **55**, 94; **59**, 37; **67**, 47, 214; **69**, 92; **73**, 246; **76**, 231; **85**, 55; **90**, 47; **91**, 19
- Royal School of Mines, **13**, 137, 146, 172, 186, 210, 221, 259, 284, 294; **17**, 108, 120, 133, 166, 181, 193; **20**, 21; **22**, 201; **26**, 22; **28**, 17, 132; **36**, 24; **40**, 35; **41**, 220, 229, 235; **44**, 151; **46**, 130, 146; **48**, 6; **50**, 134; **52**, 146; **54**, 144; **55**, 36; **56**, 120; **58**, 138; **60**, 138; **62**, 143, 237; **64**, 131; **66**, 126; **68**, 114; **70**, 126; **72**, 115; **78**, 112—Associate of, **12**, 266, 299, 301, **13**, 9—Introductory lecture at, **42**, 254, 263—Metallurgical chair at, **41**, 235—Metallurgical lectures at, **50**, 194—Professorship of Chemistry at, **51**, 298
- Royal School of Mines and College of Chemistry, **8**, 153; **10**, 135; **12**, 142, 24, 114
- Royal Society and trade certificates, **67**, 289—Anniversary address, **70**, 288, 303—Anniversary meeting, **10**, 282—Award of Medals, **94**, 242—Conversazione, **39**, 101; **73**, 227, 280; **81**, 292; **83**, 225; **85**, 236, 298; **87**, 245, 308; **89**, 245, 308; **91**, 240, 330; **93**, 230, 303; **95**, 231; **97**, 258—M. Marey's official visit to, **73**, 11—Medals, **40**, 253—Officers, **8**, 290—Presidency, **52**, 247—Source, **11**, 142, 227
- Royal Society of Arts, **1**, 91, 114, 140, 152, 161, 175, 187, 200, 224, 249, 260, 272, 293, 304, 307; **2**, 20, 31, 296; **3**, 88, 104, 123, 219, 231, 307, 338, 7, 30, 200, 235, 247; **13**, 17, 29, 43, 54, 66, 79, 93, 114, 167; **15**, 17, 51, 104, 129, 145; **29**, 38, 100; **39**, 54, 185; **40**, 230; **41**, 59, 87, 134, 225, 295; **42**, 235; **43**, 13, 37, 223, 240, 316; **46**, 245; **47**, 37, 61; **48**, 237, 49, 47, 131, 188, 211; **51**, 26, 98; **52**, 261; **54**, 250; **58**, 233; **59**, 25, 61, 191; **65**, 57; **66**, 258; **67**, 100, 74, 13, 245, 257, 258; **76**, 241; **80**, 19, 81, 300; **82**, 249, 268; **83**, 305, 302; **87**, 158; **90**, 244; **95**, 108; **96**, 36, 57, 288; **97**, 82, 102; **98**, 12, 270—Albert medal of, **97**, 312; **99**, 312—And Dr. Hofmann's report, **11**, 48—Conversazione, **3**, 244—Examinations, **84**, 153—Exhibition of inventions, **1**, 290; **3**, 212, 228—Silver medals, **90**, 7; **93**, 305—Subjects for premiums for the sessions 1863-4 and 1864-5, **8**, 277, 296—Technological examinations, **26**, 34, 43
- Royal Veterinary College, **2**, 180, **10**, 148; **12**, 142, 23, 133
- Royal Victoria Hall, **56**, 129; **58**, 148; **60**, 148; **71**, 66
- Royds, T., and E. Rutherford (*see* Rutherford, E.)
- Royer, E., Experiments on intrapolar currents of a Grove element, **21**, 57—Formation of formic acid from carbonic acid, **21**, 178
- Royère, W. de la (*see* de la Royère, W.)
- Royle, H. M., "Chemistry of Gas Manufacture," *revi-w*, **97**, 95
- Royle, J. F., and F. W. Headland (*see* Headland, F. W.)
- Rozan's process for desilverising lead, **39**, 30
- Rozsnyay, M., Examination of quinine salts, **51**, 36
- Rubasse, **4**, 124
- Rubber, **90**, 194—Goods, analysis, **66**, 74—Goods, mineral matter in, **77**, 74—Nerve of, **96**, 247—Reclaiming waste, **92**, 11, 23—Shaping soft, with a rule, **27**, 20—Strength or nerve of crude, **98**, 31—Tree, Para (*see* Para)—Tyres, examination, **96**, 55—Valuing raw, **97**, 73—Versus corks, **86**, 162—Vulcanisation tests with plan-tation, **96**, 37, 187, 235; **99**, 249—Vulcanised, absorptive power of grey, **59**, 181—Vulcanised, utilisation of waste, **20**, 132—White, **82**, 108
- Rube, C., Determination of nitrogen, **50**, 58—Estimating magnesia and the alkalies, **11**, 226—Volumetric method of estimating chromates, **12**, 82
- Rubean-hydrogen, so-called, **50**, 104
- Rubenbauer, J., Solubility of the hy-drates of the heavy metals in soda, **87**, 239
- Rubencamp, R., and G. Zerr (*see* Zerr, G.)
- Rubenkraut, fraudulent addition in Rhenish Obst-Kraut, **64**, 74
- Rubénovich, E., Action of phosphoretted hydrogen on copper, copper sub-oxide, and ammoniacal salts of copper, **80**, 11—Action of phosphoretted hydrogen on oxide, hydrate, and car-bonate of copper, **80**, 123—Action of pure phosphoretted hydrogen on cop-per sulphate, **78**, 279
- Ruberite, **47**, 23, 47
- Ruberythric acid (*see* Acid)
- Rubia sikkimensis, colouring principles of, **68**, 253
- Rubiadin and rubiadin glucoside, consti-tution, **67**, 299—Constitution, **69**, 70
- Rubidamide, **75**, 151
- Rubidium, **7**, 54; **64**, 40—And cesium, **4**, 44, 163, 219, 286; **6**, 265; **22**, 25, 41, 46, 249—And cesium and potassium, investigations with, **73**, 195—And potassium, tri-haloid compounds, **66**, 198—Atomic weight, **33**, 261; **89**, 223; **91**, 221; **93**, 55; **99**, 69; **100**, 278—Detection, **86**, 60; **100**, 299—Double halogen salts of, **76**, 31—Extraction from lepidolite, **36**, 246—In beet-root, **7**, 26—In natural and commer-cial alkaline substances, **5**, 8—In natural and industrial alkaline mat-ters, **5**, 205—In vegetable substances, **7**, 145—Quantitative determination, **66**, 264, 284—Researches on, **94**, 12—Salts and potassium salts, optical relationship, **73**, 104—Salts, precipi-tation with insoluble salts of lime, **22**, 150—Salts prepared by means of lepidolite, **26**, 83
- Rubidium-ammonium, action of acetylene on, **87**, 311—Action of oxygen on, **94**, 47—Preparation and properties, **87**, 290
- Rubidium arsenites and arseniates, **95**, 109
- Rubidium calcium sulphates, **97**, 60
- Rubidium carbide, preparation and prop-erties, **87**, 311
- Rubidium carbonate, neutral, **100**, 172
- Rubidium chlorides, **94**, 83
- Rubidium fluorophosphate, **77**, 165
- Rubidium fluoride, **91**, 70
- Rubidium fluosilicate, **77**, 165
- Rubidium hydride, preparation and properties, **87**, 167
- Rubidium oxides, higher, **95**, 251
- Rubidium pentasulphide, **91**, 166
- Rubidium peroxide hydrate and rubidium percarbonate, **100**, 15
- Rubidium phosphate, **86**, 270
- Rubidium selenate, **75**, 272
- Rubidium sulphates, **94**, 82
- Rubidium-thallium chloride, **42**, 175
- Rubies, artificial preparation by means of fusion, **86**, 281—Artificial produc-tion, **36**, 286; **55**, 164; **63**, 06—Arti-ficial production of rhombohedric crystals of, **57**, 120—Specific gravity, **28**, 101—Synthesis, **62**, 295
- Rubin acid (*see* Acid)
- Rubini, A., and J. Möleschott, Re-searches on chondrine, **26**, 145
- Rühner, Max, Formation of fats in body of carnivora from carbohydrates, **54**, 333—Influence of stature on trans-formation of matter, **51**, 13—Micro-scopic structure of clothing, **73**, 281—New reactions for glucose and lac-tose, **52**, 148—Reaction of glucose and milk-sugar, **52**, 321—Substitu-tion values of principal organic nutrients in animal body, **49**, 242—Utilisation of certain articles of food in human digestion, **44**, 305—Value of wheat-bran for human diet, **48**, 280
- Rubus chamæmorus, colouring-matter of, **43**, 197
- Rücker, Adolf, and A. Naumann (*see* Naumann, A.)
- Rücker, Sir Arthur W., Address to British Association, **84**, 125—Constitution of chlorine, **40**, 262—Critical mean curvature of liquid surfaces of revolution, **54**, 282—Magnetic field pro-duced by electric tramways, **82**, 100

- Salt Lake, Great, 3, 102.
- Salt, 26, 20.—Action on human body, 23, 130.—Action on molten copper, 45, 80.—American, 2, 9.—And acid, inequality and loss of, near the poles of a galvanic battery, 24, 35.—And mineral constituents of food, 2, 247.—And radical, 17, 206.—And water, crystallised compound of, 35, 17.—As an adulterant in the dyeing trade, 16, 280.—Blue, of Fehling's solution and other cuprotartrates, 79, 236.—Bush and native fodder plants of New South Wales, 44, 78, 89.—Cake, crude, alkalimetric determination of sulphate of soda in, 44, 107.—Cake manufacture, loss of sulphuric acid in, 16, 17.—Cake or crude sulphate of soda, valuation, 29, 145, 164, 185, 205, 216, 231, 239, 243.—Chromic, phenomenon with regard to a dissolved, 95, 100.—Circulation and geological time, 83, 301.—Circulation, and its bearing on chemico-geological problems, 83, 205; 84, 50.—Common, analyses of several kinds, 20, 190.—Common, as a fungicide, 71, 222.—Common, as a manurial agent, 17, 142, 154.—Common, blue flame from, 39, 141; 61, 120, 277, 292.—Common, chemistry of, 21, 96.—Common, colouration of a coal fire by, 59, 15.—Common, dissociating, 62, 12.—Common, production of soda from, 14, 41.—Common, to test potatoes, 24, 34.—Common, volatilising, 21, 100, 168.—Common, volatility of, 13, 228.—Containing tin, cesium, and chlorine, 19, 263.—Crystalline, analysis, 42, 163.—Decomposition by electrolysis, 68, 258.—Decomposition by superheated steam, 31, 243.—Deposit near Berlin, 19, 288.—Deposits at Stassfurt, 19, 64, 77.—Diminution in certain seas, 3, 205.—Distribution in the soil, 38, 200.—Double crystallisation, 22, 181.—Efflorescences, 1, 215.—Evaporating pans for manufacture, 3, 239.—Fischer's, and decomposition by heat, 93, 90.—From Crab-Orchard, 23, 251.—From mother-liquors in manufacture of soda, 25, 283.—Glucinum (see Glucinum).—In agriculture, use, 8, 72.—In beer, 46, 18.—In extract of meat, 25, 263.—In sea air, 20, 298.—In sea water, determination, 47, 107.—Lead (see Lead).—Making in Portugal, 25, 275.—Manufacture, 15, 88.—Manufacture, evaporating pans for, 3, 239.—Microcosmic, behaviour of quartz and of silicic acid with, 38, 59.—Mines of Poland, 27, 118.—Mountain of, 14, 195.—New, bordering on potassium ferrocyanide, 60, 185.—Of beryllium (see Beryllium).—Of cuprotartrates (see Cuprotartrates).—Of hydrindamine (see Hydrindamine).—Of iridium base, 40, 300.—Of manganese and tungstic acids, complex double, 89, 288.—Of diazoamido benzene, cuprous, 82, 11.—Of sodium (see Sodium).—Phosphoammonio-molybdc, estimation of phosphorus in form of, 35, 1, 43, 67.—Phosphor (see Phosphor-salts).—Platinous, mixed, 76, 210.—Platinum (see Platinum).—Preservation of iron from action of, 34, 174.—Quadruple, 9, 265.—Rochelle, action on metallic hydrates, 57, 100.—Rock (see Rocks).—Roussin's, 40, 204; 41, 18.—See also Soda.—Separation and formation of oceanic salt deposits, equilibrium law as applied to, 84, 157.—Soap obtained directly from, 32, 152; 34, 118.—Solutions and attached water, 31, 49; 33, 136.—Solutions and water of crystallisation, 30, 237.—Solutions, cupric, action of hydrogen sulphide on, 74, 99.—Solutions, dissociation in mixed, 77, 189.—Solutions, electrical conductivities in acetamide 92, 245.—Solutions, electrolysis in liquefied sulphur dioxide at low temperatures, 96, 224.—Solutions, molecular volumes of, 49, 37.—Solutions, supersaturation of, 55, 135, 152.—Spring in Huel Seaton Mine, composition and origin of waters of, 27, 100.—Strontium (see Strontium).—Table, arsenic in, 88, 107.—That lost its savour, 26, 287.—Used by certain tribes, composition, 67, 121.—Vapours, alkali (see Alkali).—Water (see Water).—Works of Giraud en Camargue, 49, 21.—Zirconium-mercury double, 98, 234.
- Salts, 78, 304.—Acid, 35, 196; 67, 76.—Acid, combination heats of, 50, 24.—Acid, of monobasic acids, 88, 302.—Acid, relation of taste to degree of dissociation, 81, 273.—Acids in, volumetric determination, 91, 66.—Action of acids on, without intervention of a solvent, 39, 252.—Action of animal charcoal on, 35, 162; 39, 135.—Action of free bases on, 75, 167.—Action of oxides on, 39, 183; 44, 259.—Action of soluble upon insoluble, 1, 143.—Action of strong sulphuric acid on, 31, 245.—Action of sulphur on, 66, 183, 193.—Action of water on, 50, 284.—Action on diphenylcarlionic ether, 90, 83.—Action on glass, 16, 234.—Action on oxides, 37, 246.—Alkaline haloid (see Alkaline).—Alkaloid, of corresponding saturated or unsaturated acids, 97, 154.—Amine, action of bases and acids on, 84, 36.—Ammoniacal, 6, 238; 24, 240.—Ammoniacal, absorption by plants, 64, 147.—Ammoniacal, action of hydrated oxide of cadmium on, 88, 201.—Ammoniacal, action of nitrogen peroxide on, 93, 178.—Ammoniacal, action of vanadic acid on, 53, 252, 274.—Ammoniacal, action on metallic sulphides, 39, 251.—Ammoniacal, action on oxide of copper, 21, 154.—Ammoniacal, decomposition, 54, 11.—Ammoniacal, dissociation, 45, 99.—Ammoniacal, dissociation in presence of metallic sulphides, 36, 54.—Ammoniacal, estimation, 22, 21; 25, 214.—Ammoniacal, formula, 49, 190.—Ammoniacal, from liquors, 7, 10.—Ammoniacal, in human organism, 22, 21.—Ammoniacal, obtaining from liquors or substances containing ammonia, 5, 54.—Ammoniacal, reactions with calcium carbonate, 41, 295.—Ammoniacal, volatility, 33, 210.—Ammonio, of aluminium (see Aluminium).—And acids, 1, 220.—And acids, dissolved, molecular refraction, 71, 313.—And acids, superoxxygenated, in solution, 90, 11.—And alkalies and acids, combination of solid hydrates of dioxides with, 44, 72.—And coloured indicators, 74, 285.—And minerals, alkalinity and acidity as indicated by their reaction with test-paper, 27, 221.—And oxides, hydration, 44, 209.—And sulphurous acid gas, compounds, 90, 58.—And water combination, 54, 261.—Anhydrous and hydrated, 24, 251.—Anhydrous, electric conductivity, 49, 287.—Animal (see Animal).—Aqueous solutions of, density, 55, 3.—Aqueous solutions of, freezing, 24, 110.—Argentocupric basic, mixed, 80, 63.—Basic, 42, 210; 44, 91.—Basic, constitution, 56, 211; 60, 283.—Basic, containing two metals, 84, 11.—Basic double, 49, 82.—Camphor-water as a solvent for, 11, 96.—Carbonatopentamine cobaltic, 89, 275.—Changes of volume in dissolving, 1, 273.—Chemical neutrality, 51, 106.—Chemical properties of concentrated solutions of, 77, 126.—Chloronitrotetraminocobaltic, 96, 305.—Chromic, action of alkaline sulphites on, 78, 46.—Chromic, hydrolysis, 81, 185.—Chromous, action of nitric oxide on, 90, 233.—Chromous, action of oxygen gas on, 84, 243.—Cobaltous, action of hydrogen peroxide and other oxidising agents on, 75, 43.—Colloidal solutions of, in water, boiling-point, 82, 215.—Coloured, and derivatives of thiocyluric acid group, 99, 234.—Coloured, neutrality, 74, 285.—Complex, use in electrolytic analysis, 90, 215.—Compounds of cincol, diphenyloxide, nitroso-derivatives, and the carbanides with, 95, 249.—Concentrated solutions of, boiling-point, 20, 299.—Constancy in heat produced by reaction of certain, 57, 75.—Constitution, 7, 233; 24, 88.—Containing water, dissociation, 32, 226.—Crystalline, dissociation, 30, 273, 274.—Crystalline, refraction constants, 74, 268.—Crystalline, refrigerant mixtures formed of, 42, 13.—Crystallised, device for drying, 81, 91.—Cupric, colour in aqueous solution, 97, 10.—Cupric, constitution of ammoniacal, 85, 100.—Cupric, gases disengaged by action on steels, 99, 276.—Cupric,

reaction of, 67, 148—Cuprous, 90, 34
Cuprous, action of peroxide of
manganese on solutions of, 14, 107
Curves of solubility of, 49, 250—
Decammine- μ -amino-dicobaltic, 99,
24—Decomposition by ligands, 42,
107, 43, 118—Decomposition by
matters in fusion, 46, 100—Decomposi-
tion by water, 30, 301, 31, 8, 49,
120, 51, 1—Decomposition, hydro-
chloric acid condensed during, in
alkali works, 8, 202, 203—Decom-
position, time required for double,
31, 266—Dehydrating action, 50, 79
Deliquescent, absorption of mois-
ture by, 73, 1—Density of weak
aqueous solutions of, 55, 3—Deter-
mination of cinchona bases and
their, 47, 35—Determination of tem-
perature of decomposition, 53, 200
—Dextrobenzylphenylallylmethyl-
antimony, 83, 271—Diazo, (see
Diazo-salts)—Diazo, action on des-
methylserotonin and desmethyl-
serotonin, 86, 74—Diffusion of
simultaneous, 30, 4—Pitylhydro-
xydiphenylaminocobaltic, 96, 281—
Disaccharum, 83, 225—Dis-
solution in water, influence of
temperature on heat of, 55, 201
—Dissolved, electric transfer, 59,
200—Dissolved, magnetic rota-
tion, 65, 81—Distribution in
their solutions, influence of tem-
perature on, 42, 200—Double, 9, 203
Double, caused by fusion, charac-
ters and functions, 46, 10—Double
decomposition, time for, 31, 266—
Double, in solution, 86, 4—Double,
in solution, existence of, 40, 301—
Double, of pentachloride of anti-
mony, 86, 257—Double, of tetratomic
titanium, 86, 7—Earth, of Bellary,
26, 107—Electrical conduction pro-
duced by heating, 95, 224—Elec-
tricity developed by dissolving in
water, 20, 201—Electrolysis of, 52,
257, 53, 118—Electrometric
determination of hydrolysis of, 96, 200—
Epoxy, (see Epoxy) Ether (see
Ether)—Etheral, action of hydroxyl-
amines upon, 96, 10—Etheral,
action of metallic alkylates on, 55,
20—Etheral, action of sodium on,
64, 317—Etheral, halogen fatty,
with ketones and ketonic acids, 74,
119—Etheral, of α -brominated fatty
acids, transformation into
etheral salts of α -iodinated fatty
acids, 95, 317—Etheral, of dime-
thoxypropionic acid derived from
 d -glyceric acid, 91, 292—Etheral,
of active glyceric acid, 63, 273—
Etheral, of ethanetetraacetylxylic
acid, 72, 25—Etheral, of halo fatty
acids, action on phenylamine mag-
nesium iodide and orthotoluidine
magnesium iodide, 96, 28—Etheral,
of organic acids, action of ammonia
on, 79, 55—Etheral, of phenylacetic
acid, action of sodium on, 41, 222—
Ethylal of ortho, meta, and para-
ditolyltartaric acid, 74, 105—
Ferric, action on indigo, 52, 110—
Ferric, action on, in which the
iron is masked, 97, 12—Ferric, and
phenylhydrazine, 89, 65—Ferric, col-
loidal, 50, 45—Ferric, copper as a
reducing agent for, 99, 273—Ferric,
detection of soluble lead in leads by
coloured reactions of, 87, 95—Ferric,
hydrolysis, 81, 185—Ferric, reactions,
54, 61, 56, 203
214; 67, 1, 66—Ferric, standard
solution without titration, 60, 271,
272—Ferric, titration, 57, 148, 149
65, 275—Ferrous, absorption of nitric
oxide by, 40, 143; 52, 189; 77, 268,
290—Ferrous, action of permangan-
ate on, in presence of hydrochloric
acid, 99, 9, 75—Ferrous, action of
water-vapour on, 83, 95—Ferrous,
apparatus for production for titra-
tion, 39, 46—Ferrous, determining,
94, 213—Formation, 44, 60, 64, 29
—Formation from diortho-substituted

benzoic acids and organic bases, 89,
19—Formation of, part played by
time in, 42, 234—Formed by peroxide
of manganese, 34, 8—Found in coal
pits, 8, 209—Fused, electrolysis of,
96, 84—Fused, electrolysis of, re-
sults obtained in, 82, 271—Fused,
electrolytic dissociation of, 96, 60
—Fused, galvanic conducting power,
30, 207—Fused, line spectrum of
carbon in, 76, 107—Fused, molecular
condition, 98, 318—Fused, mole-
cular formulae of, 88, 301—Fused,
spectroscopic examination, 74, 258—
Fusibility, 48, 34; 49, 10—Fusibility
of mixtures, 69, 205—Halogen, of
alkaline-earth metals, combinations
of phenylhydrazine with, 79, 23—
Halogen double, of metals and di-
naphthyl pyrazole, 71, 203—Halogen
double, of tetravalent antimony,
91, 245—Halogen, of bismuth
(see Bismuth)—Halogen of lead
(see Lead)—Halogen, of niob-
ium oxychloride and of niob-
ium oxybromide, 94, 243—
Halogen, of organic bases, addition
products, 66, 111—Halogenous, con-
taining the same element, action of
hydracids on, 43, 144—Halogenous,
solubility, 50, 24—Haloïd, action of
pensulphates on, 91, 233—Haloïd,
alkaline and mercurous, reciprocal
action, 62, 25—Haloïd, detection, 62,
314—Haloïd, determination of iodine
in, 61, 270; 67, 200—Haloïd, oxida-
tion, 42, 100—Haloïd, polymerisation
of a cause of indifference of colour of,
99, 119—Having a common ion, solu-
bility of a mixture, 81, 264; 82, 94
—Heat of solution of, 27, 246—
Heat of hydration, 49, 216, 220—
Heats of dissolution in water, 52,
111, 161—Hexahydroxylamine-
cobaltic, 91, 243—Hexamminetriol-
dicobaltic, conversion into octam-
minediolcobaltic, 99, 24—Hydrated,
88, 208—Hydrated, action of heat
on solutions of, 25, 31, 133—
Hydrated, calorimetric analysis,
100, 302—Hydrated, coefficients of
cubical expansion of, 85, 277, 289—
Hydrated, composition, 54, 323, 377;
55, 22, 33, 46, 68—Hydrated, dis-
sociation, 30, 251—Hydrated, double,
52, 268—Hydrated, melting-point,
49, 234—Hydrated, use of vacuum
for drying, 97, 48—Hydration of,
44, 200; 49, 220; 53, 279; 54, 203
Hydroxyaquodetramminocobaltic,
96, 305—Hydroxylamine (see Hy-
droxylamine)—Hydroxynitrotetra-
minocobaltic, 96, 305—Hydroxypent-
amminocobaltic, 96, 281—In solid
state, chemical reactions between,
96, 3—In solution, 21, 250—
In solution, diffusion of, as
bearing evidence of their re-
ciprocal composition, 2, 97—In solu-
tion in liquid ammonia, metathetic
reactions between certain, 79, 293—
In solution, mutual reaction of, 1,
118—In solution, osmotic pressures,
63, 123—In solution, reciprocal decom-
position, 5, 320—In solution, refract-
ing power of simple, 61, 49, 73—
In solutions, state of, 35, 196; 65,
11—Influence of formation of, on
saponification of amides and ethers
by means of alkalis, 80, 183—In-
fluence of neutral, on hydrolysis of
iron perchloride, 98, 294—In-
fluence of temperature on heat of
dissolution, 55, 90, 221—Influence on
vapour pressure of aqueous ammonia
solution, 85, 21—Inorganic, measure-
ment of melting-points, 74, 197, 258
—Inversion of sugar by, 73, 161, 173
—Iodopentamminocobaltic, 98, 233—
Isomeric, of d - and l -methylhydrind-
amines with d -chlorocamphorsul-
phonic acid, 89, 19—Isomeric of type
 $NR_1R_2H_3$, 91, 198—Isomeric partially
racemic, containing quinquivalent
nitrogen, 81, 128, 86, 288, 97, 298

296—Isomeric quaternary, 88, 252—
Isomorphous, and fractional crystal-
lisation, 42, 304—Isomorphous,
optical properties of mixtures of, 42,
105—Isomorphous, variation of in-
dices of refraction in mixtures of,
37, 203—Isotonic coefficients of, 60,
25—Isotonic benzophenylallylmethyl-
ammonium, 83, 272—Lower etheral,
of acids of acetic acid series, 68, 253
—Luteocobaltic, 85, 275—Magnesian,
behaviour with lime salts at various
temperatures, 38, 153—Manganic, 77,
125—Manganous, action of metallic
magnesium on, 71, 2—Manganous, as
oxydases in presence of a colloid, 89,
119—Manganous, interference with
bichromate estimation of iron, 77,
133—Manganous, oxidising power,
76, 105—Mamurial (see Mamurial)—
Melted, dissociation spectra, 74, 12;
76, 244; 77, 28, 88; 78, 258, 270—
Melted, dissociation spectra of alkali
metals, sodium, potassium,
lithium, 74, 12—Melted, electric con-
ductivity, 59, 72—Melted, spectra of,
76, 201—Mercuric, and iodantipyrine,
compounds, 81, 227—Mercuric and
mercurous, 74, 277—Mercuric, deter-
mination, 73, 198—Mercurous, 73,
83—Mercurous, behaviour with
ammonia, 59, 314—Mercurous, titra-
tion with potassium permanganate,
96, 154—Metal, of feeble acids, 94,
160—Metallic, action of ammoniacal
salts upon certain, 39, 251—Metallic,
action of cupric hydrate on solutions
of, 84, 96—Metallic, action of mag-
nesium on, 14, 188; 32, 309; 33, 236
—Metallic, action of mercuric oxide
on aqueous solutions of, 83, 300; 84,
36—Metallic, action of sodium
amalgam on, 11, 225—Metallic, action
of sodium thiosulphate on solutions
of, at high temperatures and pres-
sures, 84, 254, 261—Metallic, action
on ultramarine, 36, 40—Metallic, and
saccharose, compounds, 89, 59, 179—
Metallic, and sulpho-urea, com-
pounds, 34, 217—Metallic, aqueous
solutions of, action of cupric hydrate
on, 85, 60, 96—Metallic, boiling-
points, 39, 286—Metallic, compounds
with organic bases, 75, 287—
Metallic, electromotive force of, 61,
293; 62, 5—Metallic, high-melting-
points, 34, 281—Metallic, of natural
yellow colouring matters, 77, 126—
Metallic, relative toxic power of, 47,
128—Metallic, separation and esti-
mation of copper in presence of
ether, 19, 206—Methylal and ethylal,
of ortho-, meta-, and para-ditolyl-
tartaric acid, 74, 105—Migration of,
65, 122—Mineral, action on crystal-
lisation of sugar, 33, 33—Mutual
solubility of, 69, 180—Negative
viscosity coefficients when dissolved
in water, 95, 254—Neutral, coagula-
tion and precipitation of clay by, 17,
160—Neutral, electro conductivity of
mixtures of, 54, 47—Neutral, in-
fluence on solubility of quinine, 2,
114—Neutral, mineral potassium, 63,
225—Neutral, mutual displacement
of bases in, 47, 117; 48, 204—No-
menclature of, 20, 281—Octamine-
diolcobaltic, conversion of hex-
amminetriolcobaltic salts into, 99,
24—Of acetato-chromium base, 98,
234—Of alkaline earth metals, solu-
tions of, 84, 21—Of alkaloids (see
Alkaloids)—Of copper tetrasulphide
hydrogen acid, 95, 191—Of dichloro-
chromium base, compounds with
ammonium salts, 96, 221—Of β -
dimethylglutaric acid (see Acid)—
Of dinitroalphanaphthol, 77, 90—Of
earthy metals, fluorescence of, 39,
262—Of heavy metals, dissociation,
90, 59—Of isomeric mer-
captoid form, of thioaliphonic
acid, 87, 200—Of metals and
ammonia, compounds, 90, 107—Of
organic bases, halogen addition pro-

- ducts of, 66, 111.—Of parahydroxyazo compounds with mineral acids, 97, 97.—Of *d* and *l*-phenylbenzyl-methylthylammonium, 89, 100.—Of rare earths, absorption spectra of crystals of, 97, 230.—Of rare earths, activity as oxidisers, 87, 59.—Organic, determination of lead, copper, and silver in compounds, 97, 192.—Organic, electrolysis of, 16, 312, 313.—Organic, of alkalies, and alkaline earths, ultimate analysis, 43, 39.—Organic, zinc in, 74, 186.—Osmosis of, 47, 237.—Oxalouranous, 87, 100.—Oxy- (see Oxy-salts)—Oxygenated, and organic bases, combination, 77, 213.—Oxygenous, non-saturated, constitution, 51, 195, 199.—Part played by, in action of drinking waters upon lead, 30, 82.—Per- (see Persalts). Per-carbonic acid (see Percarbonic).—Phenolphthalein (see Phenolphthalein).—Phenylhydrazine, cuprous, 31, 24.—Plumbic, 73, 100.—Potassic, removal from solutions obtained in manufacture of beet-root sugar, 28, 72.—Proportion of crystalline water of, 50, 12.—Reaction between, influence of small quantities of water in, 88, 197.—Relation of efflorescence and deliquescence of, 55, 225.—Relative stability of, 62, 74.—Roseo-cobaltic, 51, 214.—Sesqui- (see Sesquisalts).—Silver photo- (see Silver).—Simultaneous diffusion of, 30, 40.—Smelling, 3, 250.—Solubility, 12, 209, 59, 229, 66, 12, 85, 251, 275, 287, 288, 312; 86, 306.—Solubility in fused nitrate of soda, 50, 282.—Solubility in mixtures of alcohol and water, 12, 70.—Solubility in water, 25, 311.—Soluble and insoluble, reactions between, 36, 30.—Soluble in water, specific gravity of, 61, 109.—Soluble mutual action of elements of, without and within the animal economy, 14, 77, 81.—Soluble, specific gravity, determining by displacement in their own mother-liquor, 91, 197.—Solution in water, lowering of temperature due to, 19, 214.—Solutions of, chemical properties of, 78, 250.—Solutions of, relation of viscosity of mixtures of, to their state of ionisation, 85, 4, 30, 40.—Solvents of, organic compounds as, 65, 73.—Sources of error in the calorimetric study of, 53, 258.—Stannous, determination, 59, 84.—Stannous, reactions, 45, 198.—Stannous, titration, 77, 153.—Stassfurt, determination of potassa in, 38, 11.—Stassfurt, for sprinkling in stables, 48, 226.—Sulpho- (see Sulpho-salts).—Temperature of vapours issuing from boiling solutions of, 35, 132.—Thiosulphonic acid, action of arsenite and cyanide on, 98, 281.—Titanium trihalide (see Titanium).—Titanous, reduction of perchlorates by, 100, 252.—Triamine cobalt (see Triamine).—Triethylsulphine (see Triethylsulphine).—Transport by electrical discharge, 24, 45.—Uranous, reactions of, 50, 67.—Uranyl double (see Uranyl).—Vapour pressure of concentrated solutions of, 72, 201.—Variation of density of solution of certain, 62, 223, 232.—Volatile, or organic, estimation of cadmium in, 93, 257.—Volatilisation during evaporation, 69, 237.—Volatilisation during evaporation of water, 74, 258.—Volume of, in their aqueous solutions, 71, 305.

- Silicium hydrate, 41, 1
- Silicium iodide, 18, 75; 19, 273
- Silicium mercaptan, 16, 126
- Silicium nitride, 40, 214
- Silicium oxychloride, 17, 179—Action of heat on, 25, 70
- Silicium oxychlorides, derivatives, 26, 312
- Silicium phosphate, polymorphism of, 50, 279—Propyl compounds, 50, 12
- Silicium subchloride, 24, 144
- Silicium sulphocyanate, preparation, 26, 153
- Silicuretted hydrogen (see Hydrogen)
- Silicoacetic acid (see Acid)—Anhydride (see Anhydride)
- Silicoallyl derivatives, 17, 263
- Silicoaluminate of manganese (see Manganese)
- Silicoaluminides, 93, 11
- Silicocarbon compounds, 65, 275
- Silicocarbonate, crystalline, 53, 299
- Silicochloroform, 92, 84—Action on fluorides, 91, 105—Action of oxidising agents on, 99, 299—Action on potassium pyrrole, 99, 19
- Silicodiphenylamide, 81, 308
- Silicofluoride of aluminium (see Aluminium)—Of potassium (see Potassium)
- Silicofluorine, preparation and properties, 91, 105
- Silicogluconates of sodium (see Sodium)
- Silicoheptyl series, 24, 299
- Silicomolybdates, 44, 13; 46, 269, 303
- Silicomolybdic acid (see Acid)
- Siliconyl hydrate, 12, 238
- Silico-organic compound, 58, 272
- Silicophenylamide and thiocarbimide, interactions, 87, 70—And -imide, bromination, 92, 266
- Silicopropionic acid (see Acid)
- Silicospiegel, analysis, 82, 260, 303
- Silicotetrapyrrole, 99, 18
- Silicothioarea, formation from sulphobromide of silicon, 91, 35
- Silicotitanites of sodium (see Sodium)
- Silicotriphenylguanidine, 81, 308
- Silicotungstic acid (see Acid)
- Silicovanadomolybdates, 84, 295
- Silicoid, triphenyl- (see Triphenylsilicoid)
- Silicon, 57, 51, 64, 119; 65, 223—Acids (see Acids)—Action on alkaline metals, zinc, aluminium, lead, tin, antimony, bismuth, gold, and platinum, 74, 73—Action on aluminium, 93, 11—Action on copper, 95, 251—Action on gold, silver, platinum, and mercury metals, 60, 3, 67, 303—Action on tin, 74, 73—Action on water at a temperature of 100°, 89, 250—Action on water below 100°, 90, 83—Action on zinc, 74, 73—Alloy of titanium and aluminium with, 57, 51—Amorphous, action of hydrochloric acid gas on, 99, 190—Amorphous, action of reagents on, 85, 217—Amorphous, preparation, 71, 167, 177—Amorphous, properties, 86, 47—Analysis, 71, 161—And boron, line spectra of, 48, 1—And boron salts of igneous fusion, electrolysis, 63, 284—And boron test, 54, 301—And cobalt compounds, 86, 197—And copper and manganese, equilibrium between, 87, 94—And iron alloys, 60, 273—And manganese alloys, use in casting steel, 35, 226—And molybdenum compounds, 96, 47—And palladium compounds, 97, 299—And silica and alumina, action of chlorine on mixture of, 80, 123—And silver alloys, 98, 305—And zirconia, volatilisation of, 68, 16—Atomic weight, 55, 199; 93, 55, 195; 99, 69; 100, 278—Benzyl (see Benzyl)—Benzylethyl- (see Benzylethylsilicene)—Cementation of iron by, 85, 200—Chemistry of, 96, 14—Compounds, 55, 43, 223; 59, 296; 65, 214; 81, 308; 87, 79—Compounds and their derivatives, 58, 283—Compounds in plants, 38, 47—Compounds obtained by use of electric furnace, 82, 149—Crystalline, soluble in hydrofluoric acid, 90, 10—Crystallised, electrical resistance, 77, 71—Curious formation, 63, 46; 67, 136—Determining, Brown's method, 79, 210—Dibenzyl- (see Dibenzylsilicene)—Ferro- (see Ferrosilicon)—Films, 63, 241—Graphitoid, forms of, 13, 120—Graphitoid, preparation, 81, 79—In cast-iron, conditions of, 53, 106; 64, 224—In commercial irons, determination, 69, 13—In crude iron, 61, 121—In cryolite, determination, 60, 83—In ferrochromium, estimation,

80. 235.—In forge-iron, estimation, 88. 130.—In iron, 4. 75.—In iron and steel, determination, 17. 100. 115. 18. 233. 40. 40. 18. 42. 290. 331. 49. 233. 53. 300. 56. 49. 82. 215. 221. 241.—In metallurgy of steel, 67. 26.—In pig-iron, determination, 42. 290. 60. 79.—In pig-iron, estimation, 29. 87. 01. 107. 110. 112. 120.—In powdered aluminium, 90. 6.—In rich ferrosilicons, estimation by means of peroxide of sodium, 85. 21.—In siderurgical products, state in which it occurs, 78. 11.—In steel, determining, Brown's method, 78. 250.—In steels, 78. 63.—In unstable ferrosilicides, 85. 12.—Influence in determination of phosphorus in iron, 60. 20.—Influence on properties of cast-iron, 52. 5. 246. 53. 54.—Influence on properties of iron and steel, 54. 300.—Influence on properties of steel, 60. 273. 289. 299.—Line spectrum of, 77. 206.—Organic compounds containing, 80. 31.—Organic compounds of, 92. 58.—Organic derivatives of, 83. 106. 89. 81. 91. 103. 95. 67. 162. 97. 60. 92. 127. 98. 266. 276. 99. 60.—Powerful reducing action, 64. 75.—Preparing, 60. 158. 66. 113.—Recent advances in our knowledge of, 100. 245.—Reduction by hydrogen, 89. 274.—Refraction and dispersive power, 77. 271.—Researches, 92. 266. 93. 66. 99. 18.—Salts, 4. 225.—Solubility in silver, 90. 10. 04.—Solubility in zinc and lead, 89. 101.—Soluble in hydrofluoric acid, 90. 94.—Soluble in hydrofluoric acid, formation of, 93. 80.—Spark spectrum, as rendered by silicates, 83. 133.—Spectrum, grouping of lines in, 90. 156.—Volatilisation in hydrogen, 89. 286.
- Silicon amide, 88. 50
- Silicon borides, preparation, 82. 84
- Silicon bromides, 64. 20
- Silicon carbide, analysis, 68. 317
- Silicon chloride, action on cobalt, 93. 178.—Action on iron, 92. 280.—Action on nickel, 94. 12
- Silicon chlorides, 100. 172.—Alkyl- (see Alkylsilicon).—Belonging to silico-methane series, 99. 252
- Silicon chloroiodides, 63. 310
- Silicon chlorosulphide, 65. 36
- Silicon fluoride, action of water on, 41. 134
- Silicon halides and pyridine, acetonitrile, etc., 99. 19
- Silicon hydride, 58. 215.—Liquid, 86. 47.—Preparation, 87. 46.—Preparation and properties, 85. 166
- Silicon imide, 88. 59
- Silicon iodoform, 98. 318
- Silicon iron, remarkable specimen, 38. 299
- Silicon oxide, diphenyl (see Diphenyl)
- Silicon phosphate, hydrated, 55. 80
- Silicon selenide, 64. 73. 285
- Silicon steels, constitution and properties, 29. 34
- Silicon sulphide, formation in desulphurisation of iron, 100. 10. 14
- Silicon sulphides and oxysulphides, 97. 272
- Silicon sulphotribromide, formation of silico-thiourea from, 91. 35
- Silicon tetrabromide, action of sulphide of carbon on, in presence of bromide of aluminium, 91. 35
- Silicon tetrachloride, action on aromatic amido-compounds, 54. 271.—Action on silver and copper, 95. 311.—Action on substituted phenylamines, 65. 214.—Benzyl and ethyl derivatives of, 99. 92
- Silicon thiocyanate, 93. 66
- Silicones, 94. 47.—Ferro- (see Ferrosilicons)
- Silicotriphenylguanidine, 81. 308
- Silicyle oxide, benzylethylpropyl- (see Benzylethylpropylsilicyle oxide)
- Silk, H. J. T. Hewitt, and J. Kenner (see Hewitt, J. T.)
- Silk, 10. 42. 61. 120. 278.—Absorption of dilute acids by, 74. 105.—Action of chloride of zinc on, 7. 110.—And cotton, analysis of mixed tissues of, 42. 73.—And cotton and wool, absorption of weak reagents by, 46. 206.—And sulphuric acid, combination, 27. 284.—And wool and cotton in tissues, determination, 50. 123.—And wool and vegetable fibres, separating, 24. 85.—And wool in woven goods, separation of, 44. 261.—Artificial, 59. 265. 90. 83.—Artificial textile fibre resembling, 56. 239.—Black, solubility, 24. 301.—Black, spontaneous combustion, 22. 144.—Bleaching, 20. 299. 63. 93.—Colouration by food of the silkworm, 62. 98.—Conditioning, 10. 42.—Copper in, 41. 284.—Dress, analysis, 76. 188.—Dyeing, 1. 58. 27. 284.—Dyeing black, iron mordant used for, 14. 118.—Fabrics, bleaching, 26. 109.—Genesis of, 11. 71.—Hygroscopic properties, 20. 34.—Industry, artificial, 100. 301.—Loom, electric, 2. 235.—Nitrised, 64. 284. 65. 107.—Production in France, 33. 93.—Raw, chemical composition of water in preparation, 40. 10.—Red, natural, 28. 50.—Rotatory power, 64. 321.—Skein, 24. 74. 110.—Spiders', 20. 120.—Spontaneous combustion, 19. 84.—Tissues, detection of wool and cotton in, 2. 251.—Tussah, bleaching, 42. 40.—Tussah, in textile goods, detection, 73. 236.—Ungumming, 29. 275.—Vegetable, 40. 168.—Yama-Mai, 21. 50.—Yellow, colouring principles of, 62. 213.—Yellow, of commerce, analysis, 20. 201
- Silks, assay of, 56. 179.—Black, properties of weighted, 31. 61.—Chinese dyed, 57. 203.—Deep maroon on, 30. 146.—Dressing for, 28. 23.—Dyed and weighted, 62. 236.—Dyeing, gris d'aniline or nigrosin in, 31. 251.—Rotatory power, 65. 74.—Specific gravity, 65. 168. 216.—Weighting of, 40. 193
- Silkworms, Ailanthus, 13. 120.—Chemical and physiological studies of, 12. 262.—Disease, 14. 128. 141.—Eggs, chemical studies on, 52. 284.—Eggs, preservation, 39. 116.—Excrements of, 20. 203.—Fed upon oak leaves, 7. 300.—New, 8. 93.—Preservation, 10. 201.—Sulphites and hyposulphites in diseases of, 8. 108.—Treating open cocoons of, 8. 72
- Silliman, B., "American Contributions to Chemistry" (review), 32. 143.—Combustion of wet fuel in furnaces, 3. 151. 163.—Determination of photometric power of a rich gas by dilution with a poor gas of known value, 22. 323.—Farmer's theorem, 22. 323.—Intensity of light, 21. 96.—Microscopic diamonds, zircon, and topaz in sands of hydraulic washings in California, 27. 212.—Mineralogical notes, 44. 171.—Naphtha and illuminating oil from heavy California tar, 17. 171.—Obituary, 51. 69.—Sodium amalgamation, 14. 170.—Wollongongite, 20. 154
- Silliman, B., and J. D. Dana (see Dana, J. D.)
- Silliman, B., and A. Wurtz, Effect of atmospheric air, when mixed with gas, in reducing its illuminating power, 20. 154.—Investigation of flame temperatures, 21. 281
- Silliman, J. M., Examination of Bessemer flame with coloured glasses and spectroscopes, 22. 313. 23. 5
- Silos, preservation of green fodder in, 47. 225
- Silurian system of Bohemia, 16. 227
- Silva, A. J. Da (see Da Silva, A. J. F.)
- Silva, J. de S. e. Bromocamphocarboxylic acid, 28. 204
- Silva, R. D., Action of certain monoatomic sodic alcohols on camphor, 31. 239.—Action of silver upon monochlorhydrine, 22. 101.—Constitution of glyceric ether, 44. 192.—Isopropyllic ethers, 25. 286.—Phenote of isopropyl and some bromated derivatives, 21. 107.—Preparation of diisopropyl, 27. 34.—Production of certain aromatic hydrocarbons, 52. 12.—Propylamines, 20. 129.—Reducing action of hydriodic acid at low temperatures upon ethers and mixed ethers, 32. 156.—Succinate, benzoate, nitrite, and nitrate of isopropyl, 20. 105.—Synthesis of a diphenylpropane, 40. 203.—Synthesis of diphenylethane derived from ethylene chloride, 50. 57
- Silva, R. D., and J. M. Crafts, Preparation and properties of the oxide of triethylphosphine, 25. 156
- Silva, R. D., and C. Friedel, Action of chloride of iodine upon chloroform, on iodides of alcohol radicals, and on action of bromine upon chloroform, 26. 83.—Action of chlorine on chloride of isopropyl, 25. 33. 107.—Action of chlorine on various bodies of the C₃ series, and on substances isomeric with trichlorhydrine, 24. 240.—Action of metallic silver on chloroiodide of ethylene, 25. 167.—Experiments to ascertain whether the two chlorinated propyls derived from the methylchloroacetol and the chloride of propylene are identical, 24. 216.—Isomers of trichlorhydrine, reproduction of glycerine, 25. 178.—Production of methylic alcohol in distillation of formate of lime, 28. 32
- Silver, H. A., Applications of ebonite or hard india-rubber, 4. 221
- Silver, 64. 41.—Action of aqua regia on, 14. 298.—Action of dry hydrochloric acid on, 80. 304.—Action of light on, 43. 274.—Action of silicon tetrachloride on, 95. 311.—Action on hydrobromic acid, 84. 94.—Action on moist ultramine, 24. 98.—Action on monochlorhydrine, 22. 191.—Allotropic, 64. 231. 236. 283.—Allotropic forms of, 60. 34. 43. 53. 83. 107.—Alloys found in Egyptian tombs, 83. 311.—Alloys with other metals, and processes employed in their manufacture, 6. 141.—Aluminium, 29. 200.—Amalgam, artificially crystallised, 20. 188.—Amalgam, heat of formation, 74. 289.—Amalgam, molecular change in, 71. 98.—Amalgam, new native, 26. 264.—Ammoniacal solutions of, behaviour of double cyanides towards, 20. 60.—Ammonio-salts of, 14. 266.—And antimony, separation, 71. 104.—And argentiferous lead, separation, 24. 45.—And arsenic, separation, 71. 104.—And bismuth, separation, 93. 31.—And carbonic oxide, 73. 35.—And chloride of ammonium, determining proportional relation between, 15. 255.—And copper alloys, distillation, 95. 46.—And copper atomic weights, relation of, 53. 68.—And copper compounds of acetylene, 65. 169. 295.—And copper group alloys, 75. 300.—And copper in same solution, determination, 50. 236.—And copper, separation, 6. 42. 78. 101.—And galena separation, 2. 239.—And gold buttons in blowpipe assays, 84. 181. 192.—And gold, cupelling, 42. 27.—And gold, dissolved by potassium cyanide, relative weights of, 74. 106.—And gold in alloys, determination, 42. 331.—And gold in antimony and bismuth, presence and estimation, 67. 195.—And gold in base metals, determining, 66. 19.—And gold, separation, 23. 142. 280. 39. 135.—And gold, separation by volatilisation, 74. 2.—And gold, spitting of, in vapour of phosphorus, 50. 23.—And gold, toughening in melting crucible, 50. 37.—And hydrogen, 83. 35.—And hyposulphite of sodium, 23. 180.—And iron, separation, 72. 100.—And lead alloys, distillation, 95. 46.—And lead and zinc, separation and determination, 65. 184.—And lead, re-

lative stability of corresponding compounds of 99, 222—And lead, separation of, 3, 12, 7, 99, 46, 13, 66, 99, 91, 222—And manganese, separation, 72, 91—And mercury compounds, 83, 102—And mercury separation, 4, 218—And nickel alloy, 34, 120—And nickel, distinction between articles of, 74, 318—And oxygen, union, 83, 335—And silicon alloys, 98, 335—And steel, separation, 72, 100—And thallium, determination of electrolytic potentials of, 99, 21—And tin alloys, distillation, 95, 335—And tin, separation, 71, 102—And zinc alloys, 9, 109; 10, 202—Apparatus for detection and determination of minute traces, 86, 22—Articles, cleaning, 27, 27—Assay, 24, 11, 42, 209, 25, 37, 51, 74, 2, 318—Assay by moist way, 4, 69, 125, 127, 204, 241, 27, 321, 5, 2—Assay, sources of error in, 74, 318—Assays, description of a constant level apparatus for, 27, 50—Assaying in H.M. Indian Mints, 24, 243, 250—Atomic weight, 54, 17; 76, 119; 93, 28, 94, 184, 95, 208, 96, 180, 109; 98, 383; 99, 127, 51, 94, 99, 70; 100, 209, 274, 278, 280, 110—Atomistic size and quantitative value of, 23, 132—Auriferous, extraction from its ores, 9, 100—Bases of phosphorus, arsenic, and antimony series, 3, 78—Baths, cyanide of potassium in, 30, 177—Baths, method of reducing oil, 28, 72—Bismuth (see Bismuth)—Book of, 61, 113—Boronised, 61, 231—Brittle, 23, 243, 254—Brittle, from Bolivia, 27, 172—Bullion assay, Vohard's method, 81, 27—Change undergone by, after being buried, 23, 300—Coating wire with, 6, 101—Coefficient of expansion, 21, 276—Coin (see Coin)—Coinage (see Coinage)—Colloidal, 70, 200, 315; 88, 35, 83—Colloidal, preparation and properties of pure, 89, 218—Colloidal, properties of, 88, 38—Compounds, action of sulphurous acid on, 18, 80—Compounds, action on dibromocamphor, 80, 9—Compounds, assaying in wet way, 19, 3—Compounds, nature and reactions of, 33, 20—Compounds of thiourea, 65, 84—Containing bismuth, 55, 137—Containing mercury, assay of, 21, 203—Copper group alloys, 76, 31—Cupelling of, 42, 27—Deposit, recognising, 54, 190—Determination, electrolytic, 42, 70—Determination of atomic mass by electrolytic method, 75, 28, 30, 34, 34, 75, 21, 101—Determination, quantitative, 50, 114—Determination, volumetric method, 30, 109; 60, 70; 69, 131; 82, 285, 295—Displacement by platinum and malleum, 61, 87—Effects of bismuth on ductility of, 65, 224, 225, 277, 57, 191, 192—Electrochemical equivalent of, 49, 124, 174—Electrochemical reduction, 6, 120—Electro-deposition, 62, 137—Electrolysis of water in contact with, 20, 170—Electrolytic deposition, 97, 137, 140—Employment of chromic acid to distinguish, 1, 312—Estimation, 1, 222—Estimation in state of sulphurets, 1, 110—Estimation of small quantities in a large amount of lead, 88, 309—Estimation of sulphur in iron or minerals by means of a plate of, 18, 13—Estimation, volumetric, 35, 108; 97, 204—Estimation, volumetric, in presence of mercury, 100, 252—Extraction, Claudet's process, 22, 184—Extraction from arsenio-sulphurets, 23, 120—Extraction from cupreous iron pyrites, 31, 123—Extraction from cyanide baths, 36, 90—Extraction from galena, 4, 70—Extraction from its ores, 1, 98—Extraction from lead, 7, 46—Extraction from ores, 6, 226; 8, 252—Extraction from pyrites, 38, 281, 292, 39, 7—Filiiform, 37, 20—Filiiform, growth of, 53, 12—Filiiform native, 26, 100—

Form of, obtained in reduction of sulphide, 70, 189—Freezing-point, 72, 254—From sea-water, 23, 113—Fulminating, Liebig's production of, 49, 45—German, 22, 84—German, alloys, volatilisation, 50, 245—German, analysis, 52, 209—German, and platinoid wires, failure of, 76, 276—German, manganese a substitute for nickel in, 27, 249—Glycecol, action of chloroacetyl on, 44, 304—Gravimetric determination as the chromate, 100, 50—Haloids, solubilities in organic and inorganic solvents, 74, 100—Hardness of, 14, 150—In commercial bismuth, 44, 24—In complicated organic salts, determination, 97, 102—In copper, 72, 70—In galena, 40, 78—In galena, detection and determination in moist way, 48, 149—In metallic state, estimation, 4, 75; 15, 208—In pyrites, estimation, 85, 158—In same group with alkaline metals, attempt to explain, 90, 271—In sea-water, 3, 177, 240; 23, 113; 74, 140, 100, 100, 182, 191, 316—In silver-plating solutions, 76, 107—In subnitrate of bismuth, 27, 84—In thallium, separation, 97, 170—In volcanic ash, 55, 17—Influence of dissolved gases on electrode potential in system of silver acetates, aq., 100, 301—Iodometric determination based on reducing action of potassium arsenite, 100, 317—Iodometric estimation based upon use of potassium chromate as a precipitant, 100, 318—Lode discovery, 17, 205—Loss in roasting argentiferous blende, 88, 75—Medico-legal detection, 6, 231—Melting-point, 77, 115—Metallic, action of ferriocyanides on, 36, 277—Metallic, action of light on, 80, 161—Metallic, action of ozone on, 96, 50—Metallic, action on chloroiodide of ethyl, 25, 107—Metallic, deposition on glass, 96, 151, 163—Metallic, detecting, 60, 300, 61, 11—Metallic, estimation of silver oxide as, 13, 232—Metallic, gravimetric determination of free iodine by action of, 100, 308—Metallic, oxygen in, 37, 81—Metallic, preparation of pure, 25, 110—Metallic, solutions of, 70, 310; 71, 25—Metallic, treating solutions containing copper and silver to obtain, 8, 133—Metallurgy in Mexico, 25, 34, 143—Metallurgy in moist way, 33, 90; 34, 41—Mine, discovery of ancient, 21, 35—Mine of Potosi, 22, 110—Mines, new, 2, 203—Molecular, action on α -dichloropropionic acid, 36, 213—Molten, solubility of oxygen in, 22, 191—Moss, formation, 35, 68, 114—Native, analysis, 29, 225—Native, from New Zealand, 35, 6—Nickel, analysis, 58, 48—Nitroso- (see Nitrososilver)—Ore, 66, 42, 196, 220, 257—Ore analysis, 24, 20—Ores, 3, 270—Ores, amalgamating, 23, 287—Ores, application of sulphur in roasting, 25, 143—Ores, chemical reactions involved in amalgamation of, 79, 231—Ores containing sulphurets, roasting, 21, 239—Ores, flux for opening up basic, 53, 74—Ores, presence of gold in, 73, 71—Ores, reduction, 46, 47—Ores, treatment, 23, 262—Ornaments from Peru, composition of ancient, 71, 98—Oxidation, 35, 203; 57, 142; 74, 310—Permeability for oxygen gas, 50, 21—Phosphorised, analysis and properties, 56, 113—Photochemistry of, 42, 180—Plating, 54, 98—Plating, testing, 23, 119—Precipitation and separation in electrolytic way, 86, 57—Precipitation by copper, 26, 135—Precipitation by uranic protoxide, 31, 230—Prepared by different methods, determination of quality, 15, 111, 137—Pure, preparation, 15, 26, 50—Purity of, methods employed to make sure of, 15, 82—Pyrooxidation of, 32, 82—

Radiation at moment of its solidification, 47, 213—Reaction, arsenic acid recognised by, 47, 155—Recovery from photographic residues, 12, 255—Refining, 66, 140—Removal from sea-water by Muntz metal sheathing, 74, 182, 191—Removing from plated ware, 1, 288—Residues, recovery of, 65, 37; 67, 74—Salts, action of chlorine and iodine on, 1, 241—Salts, action of light on, 18, 122—Salts, action of tellurium and selenium on, 86, 309—Salts, ammoniacal, 28, 45; 72, 173—Salts and sub-salts of copper, reciprocal action, 7, 218—Salts, behaviour towards iodine, 20, 131—Salts, colloidal, 90, 304—Salts, haloid, 23, 180, 252; 45, 162, 173—Salts, haloid, effects of spectrum on, 44, 207—Salts, haloid, influence of light on, 23, 252—Salts, haloid, sensitiveness for light, when developed by alkalies, 27, 117—Salts, of monoacetylphosphoric acids, 89, 203—Salts, organic, simple relations between volumes of, 36, 243—Salts, sensitiveness to light, 36, 152—Selenium in, 33, 241; 35, 188—Sensitiveness to light, 82, 1, 13—Solubility of silicon in, 90, 10, 94—Solution, action of antimony hydride on dilute, 99, 312—Solution, ammoniacal, and dextrose, behaviour, 48, 305—Solution in presence of alkaline iodides, 44, 191—Solution, standardising, 63, 201—Spectra of, 75, 2—Substitute for, 4, 42—Tarnished, to clean, 3, 128; 13, 12—Tellurium in ingots of American, 85, 290—Test for, 97, 262—Trial-plates, constant-standard, 89, 120—Vapour, molecular weight, 93, 120—Voltameter, practical use of, 50, 22—Wires, collodion for protecting, 19, 272—Silver acetate, decomposition by iodine, 20, 180, 263—Silver alum, 31, 223—Silver ammonium alum, 31, 280—Silver antimonuret, 22, 83—Silver arsenate, 1, 118—Silver arsenite, 85, 202, 214, 227, 240—Canary-yellow, composition, 85, 181—Silver arseniuret, 22, 83—Silver-bismuth (see Bismuth-silver)—Silver bromide, 43, 84—Behaviour in light, 8, 220, 231, 255, 305—Chloride, and iodide, combinations with colouring matters, 51, 30—Chloride, and iodide, red and purple, 55, 257, 266, 278—Chloride, and iodide, separating mixtures, 79, 84—Chloride, and iodide, solubility in certain solutions, 3, 17—Chloride, and iodide, solubility in salts of mercury, 21, 226—Emulsion of dry, 38, 24—Reduction by light, 45, 222—Sensibility to light, 29, 52—Sensitiveness to so-called inactive colours, 78, 318—Silver bromides, ammoniacal, 77, 261—Silver-cadmium (see Cadmium-silver)—Silver carbonate, 54, 75—Action of chlorine on, 16, 79—Dissociation, Watts's principle applied to, 91, 201—Silver chlorate, 82, 300—Electrolysis, 50, 150—Preparation, 16, 79—Silver chloride, 26, 205—Action of carbon monoxide on, 52, 183—Action of hydrogen peroxide on, 84, 231—Action of light on, 16, 296; 19, 226; 64, 60; 65, 153, 307; 78, 263—Action of solar radiation on, in presence of hydrogen, 84, 36—Ammoniacal, crystalline, 50, 94—And monomethylamine, 75, 288—And silver cyanide, separation and estimation, 89, 19—And silver cyanide, etc., analysis of a mixture, 58, 232—And silver iodide, separation, 97, 167—And silver oxide, and solutions of chloride of potassium and potash, equilibrium of solution between, 90, 59—Battery of 3,240 elements, 32, 329—Behaviour in light, 8, 220, 231, 255, 305—Behaviour with bromine and iodine, 48, 284—Behaviour with concentrated sul-

- phuric acid, and with solution of perchloride of iron, 29, 277—Bromide, and iodide, combinations with colouring matters, 51, 26—Bromide, and iodide, red and purple, 55, 257, 260, 278—Bromide, and iodide, separating mixtures of, 79, 84—Bromide, and iodide, solubility in certain solutions, 3, 17—Bromide, and iodide, solubility in salts of mercury, 21, 226—Decomposition, 63, 244—Precipitates, estimation of opalescent, 94, 108, 170, 178—Precipitation, 4, 201; 52, 95—Reaction with biniodide of phosphorus, 29, 133—Reducing, 19, 178; 21, 253—Reduction by hydrosulphite of soda, 29, 208—Reduction by means of calcium, 93, 68—Reduction by means of hydrogen and inverse reaction, 83, 300—Reduction in moist way, 23, 261—Retention by mercurous chloro-amine, 81, 95—Solubility, 24, 252—Solubility in mercuric nitrate solution, 98, 22—Solubility in strong nitric acid, 25, 199—Spectrum impressed on, 44, 181
- Silver chlorides, ammoniacal, 75, 124
- Silver chlorobromide, 6, 14
- Silver chromate, 90, 95—Analysis of, 100, 180, 189—And ethyl bromide, interaction, 96, 77—Use in determination of sulphates and chlorides, 91, 3
- Silver collodiobromide, modification, 28, 306
- Silver cyanamide, 77, 12; 100, 154
- Silver cyanate, action on isobutyl iodide, 41, 36—Bromination, 90, 253—In galena, determination, 41, 42
- Silver cyanide and ammonia, combination, 20, 60—And mercury cyanide, autoreduction, 87, 19—And silver chloride, separation and estimation, 89, 19—And silver chloride, etc., analysis of a mixture of, 58, 232—Behaviour with sulphurous chloride, 52, 309—Gelatinous, 68, 178—Identification of minute quantities, 48, 49—Reactions, 50, 155—Reactions, identifications, 48, 73
- Silver dichromate, analysis, 100, 213, 228
- Silver dioxide and silver peroxy-nitrate, 92, 300
- Silver fluoride, 21, 28; 23, 13; 24, 291—And fluoride of ammonium, compound, 83, 45—Electrolysis, 50, 150—Preparation and properties, 63, 284
- Silver fulminate, decomposition, 40, 45—Decomposition by hydrochloric acid, 50, 256
- Silver fumarate action of ethyl iodine on, 39, 42
- Silver-gold (*see* Gold-silver)
- Silver hydride, 75, 215
- Silver hypoxynitrate, decomposition by heat, 95, 177
- Silver hypophosphate, 48, 270
- Silver iodide, action of heat on, 30, 288—Action of sunlight on, 27, 29—And silver chloride, separation, 97, 167—Behaviour in light, 8, 226, 231, 253, 305—Chloride, and bromide, combinations with colouring matters, 51, 30—Chloride, and bromide, red and purple, 55, 257, 266, 278—Chloride, and bromide, separating mixtures of, 79, 84—Chloride, and iodide, solubility in certain solutions, 3, 17—Chloride, and iodide, solubility in salts of mercury, 21, 226—Effect of heat on, 30, 288; 31, 4—In its photographic-chemical relation, 23, 21—Solubility in ammonia, 98, 46—Thermo-electricity of, 53, 225—Transformations of, 52, 80
- Silver lactate, action of alkyl iodides on, 77, 163
- Silver malate, action of alkyl iodides on, 74, 290; 77, 163
- Silver maleate, action of ethyl iodine on, 29, 42
- Silver malonates, 62, 85
- Silver-mercurousmercuric hydroxynitrates and the isomorphous replacement of univalent mercury by silver, 95, 308
- Silver monoxide, preparation, 68, 98
- Silver nitrate, 84, 23—Action of acetylene upon, 76, 85—Action of dry chlorine on dried, 21, 46—Action of hydrogen on, 28, 277—Action of iodide of ethyl on, 86, 24—Action of metals on, 55, 138—Action of pure hydrogen on, 29, 273—Action on bi-chloride of platinum, 14, 175—Action on chloroauric acid, 98, 23—Action on fatty acids of cotton-seed oil, 80, 134—Action on inorganic hydroxides, 97, 60—Action on ultramarine, 35, 240—Adulteration, 2, 154—Ammoniacal, 80, 123—Ammoniacal, action of sugar on, 73, 81—And ammonia, 49, 82—And ammonia compounds, 89, 275—And copper nitrate, action of certain non-metallic elements on solutions of, 55, 117—And copper nitrate, separation, 20, 203—And mercuric cyanide, reaction between, in the presence of ammonia, 48, 161—Compounds, 52, 260—Constitution, 95, 68—Corrosion of copper plates by, 24, 76—Diglycolamide, 22, 287—Electrolysis, 86, 70—Ethylidenimide, 38, 211—In alcoholic solutions as a reagent for acetylenic carbides, 58, 25—Influence on solubility of silver nitrite, 92, 105, 144—Interaction of nitric oxide with, 78, 314—Preparation, 4, 98—Preparation of pure, 5, 200; 47, 166—Reactions of oils with, 60, 62—Reduction by charcoal, 24, 10—Solution and hydrogen, 28, 289, 302—Solution, behaviour of hemisulphide of copper with, 31, 72—Solutions, concentration of metallic ions in albuminous, 91, 143—Test for arsenic acid, modified form, 19, 263
- Silver nitrite, action of bromoacetic ether on, 87, 92—Action of heat on, 23, 110—And mercurous and mercuric nitrites, interaction, 79, 211—Influence of silver nitrate on solubility, 92, 105, 144—Molecular volume, 97, 176—Products of heating, 92, 291—Two varieties, 92, 290
- Silver nitrocyanoide, 48, 154
- Silver nitrosilicate, 65, 109
- Silver nitrosyl, actions of, 40, 157
- Silver oxalate, 21, 108
- Silver oxide, action of cane-sugar on, 42, 260—Action of carbon monoxide on, 91, 208—Action of dry, on benzoylacetate ester, deoxybenzoin, and benzyl cyanide, 83, 189—Action of hydrogen peroxide on, 83, 226—And bromine and water, oxidation product of glycogen with, 34, 153—And lead oxide, compounds, 64, 272—And salts, action of chlorine and iodine on, 1, 241—And silver chloride and solutions of chloride of potassium and potash, equilibrium of solution between, 90, 50—As a blowpipe reagent, 52, 1—Behaviour, 40, 275—Behaviour of saccharine with, 47, 249—Curious properties, 9, 217—Estimation as metallic silver, 13, 232—Natural, 3, 214, 242, 268—Oxidation of aldehydes by, 100, 172
- Silver perchlorate, electrolysis, 50, 150—Fluoride, and chlorate, electrolysis, 50, 150
- Silver permanganate, decomposition, 65, 226
- Silver peroxide, oxidations with, 93, 31
- Silver peroxy-nitrate and silver dioxide, 92, 300
- Silver peroxy-sulphate, 81, 83
- Silver photobromide and photoiodide, 56, 176
- Silver photosalts, 56, 77
- Silver potassium carbonate, double, 56, 259
- Silver pyrophosphate, acid, 90, 117
- Silver selenide, compounds with selenides of arsenic, antimony, and bismuth, 97, 288—Reproduction in a crystalline state, 37, 20
- Silver subchloride, so-called, 54, 57—Violet, action of light and oxygen-generated salts on, 13, 3, 78
- Silver subfluoride, 62, 25
- Silver suboxide, 55, 185, 263; 79, 221—In silver scorias, 7, 135—Salts of, 2, 94
- Silver sulphantimonites, 76, 47
- Silver sulphate, 42, 163—And aluminium sulphate, double, 31, 209—And silver sulphide, reaction between, 98, 281
- Silver sulphide, action of hydrogen on, 78, 242; 80, 25; 87, 130—Action of infra-red rays on, 72, 80—And antimony sulphide fusibility of mixtures, 88, 35—And bismuth proto-sulphide, fusibility of mixtures, 89, 12—And gold sulphide, double, 25, 265, 283—And silver sulphate, reaction between, 99, 281—Formation, accidental, 12, 160—Reproduction in a crystalline state, 37, 20—Selenide, and telluride, 94, 107
- Silver sulphite, action of heat on, 100, 328—Stability, 65, 102
- Silver sulphocyanide and ammonia, combination, 20, 60—In gravimetric analysis, 83, 258
- Silver telluride found in the region of Kalzoorlie, 83, 312—Reproduction in a crystalline state, 37, 20
- Silver tetroxide, 41, 195
- Silver thiocyanate in gravimetric analysis, 85, 300
- Silver ultramarine, reactions, 40, 11
- Silver urea, 28, 203
- Silvers, colloidal, 91, 163
- Silverburn, C. M., Etching glass, 68, 102
- Silvered articles, estimating value, 3, 370—Mirrors (*see* Mirrors)—Surfaces of looking-glasses or mirrors, coating and protecting, 4, 224
- Silvering and gilding, 15, 329—By powdered tin, 6, 156—Glass (*see* Glass)—Glass mirrors (*see* Mirrors)—Mirrors (*see* Mirrors)—Porcelain (*see* Porcelain)—Process, application to an object-glass 25 centimetres in diameter, 14, 175—Telescopic object-glasses, 14, 128
- Silvestri, O., Chemical decomposition, dissociation applied to interpretation of volcanic phenomena, synthesis and analysis of a new mineral from Etna, and of common origin in volcanoes, 32, 157—Meteoric sand rain, 25, 214—Paraffins and other homologous hydrocarbons found in lava from Etna, 35, 156—Research on a peculiar substance which accompanied the meteoric dust which fell in Sicily in March, 1872, 25, 300—Supposed new volcano in Sicily, 24, 230

- Sodiomalate, ethylic, and ethylene dichloride, interaction, 78, 79—Ethylic, and mesityloxide, interaction, 79, 7, 103
- Sodiomethylmalonate of ethyl (*see* Ethyl)
- Sodium, 15, 310; 64, 32—A catastrophe averted, 16, 26—Action of hydrogen on, 88, 2—Action on acetic acid, 21, 227—Action on acetic ether, 21, 113—Action on acetone, 95, 244, 256—Action on acetylene, 77, 177—Action on albumenoid matter, 76, 82—Action on aldehydes, 87, 203—Action on aniline, 27, 81—Action on benzol, 34, 21—Action on carbon tetrachloride and chlorated benzene, 88, 70—Action on carbonic ether, 11, 160—Action on chlorated nitro-compounds, 26, 276—Action on chinoline, 43, 145—Action on chinoline and lepidine, 37, 85—Action on cinchamic ether, 43, 245—Action on crystallised dibrombenzol, 26, 228—Action on *aa*-dichloropropylene, 93, 289—Action on dimethylacetylacetic ether, 79, 203—Action on epichlorhydrin, 35, 164—Action on ethereal salts of phenylacetic acid, 53, 211—Action on ethers of fatty series, 18, 281—Action on ethers of monobasic acids of fatty series of simple function, 92, 21—Action on ethyldimethylbutanetricarboxylate, 82, 34—Action on formic ether, 18, 143—Action on halogen anilines, 36, 242—Action on iodide of methyl, 1, 245—Action on 1,3-iodine phenoxypropane, 87, 70—Action on two isomeric monobromotoluols, 23, 311—Action on mixture of phosgen ether and iodide of ethyl, 16, 288—Action on monochlorethylen chloride, 36, 213—Action on oil of turpentine, 3, 152—Action on paratrotoluene, 82, 36—Action on phenylic acetate, 41, 222—Action on succinic ether, 35, 64—Action on turpentine hydrochlorate, 44, 204—Action on water, 72, 38—Action on water and nitric acid, 20, 11—Alloys, definite, 65, 167—Alloys, formation, 89, 239—Amalgam, 6, 216; 24, 145; 33, 94—Amalgam, action on alcoholic solution of oxalate of ethyl, 27, 95—Amalgam, action on dinitroheptylic acid, 27, 268—Amalgam, action on nitronaphthalenesulphonic acid, 36, 52—Amalgam, action on oxalic ether, 2, 101; 24, 34, 132—Amalgam action on oxide of ethylene, 5, 210—Amalgam, action on phenanthrenquinone, 35, 107—Amalgam, action on silver ores, 15, 11—Amalgam, action on sulphide of carbon, 2, 203; 5, 139—Amalgam in Colorado, 14, 72; 15, 12—Amalgam process, with special reference to saving precious metals, especially gold, 14, 170—Amalgam, products of reduction of acetophenon with, 28, 106—Amalgam to reduce ethylic oxalate, 25, 127—Amalgamation, 13, 183, 191, 195, 204; 14, 23, 72, 108, 197, 179, 277—And bromine, volumes of at their boiling-points, 42, 287—And glycerine compound, 25, 198—And iodide of ethyl, successive action on acetic ether, 21, 7; 25, 208, 219, 225, 235—And lead alloys, 62, 314; 63, 8, 10, 83—And magnesium, behaviour, 21, 160—And potassium alloys, formation of liquid, 99, 59—And potassium amalgams, 82, 84—And potassium estimation, 80, 248—And potassium in ashes of plants, etc., determination, 50, 174—And potassium liquid alloys, 69, 20—And potassium, separation, 74, 227—And potassium, separation from lithium, 55, 18, 29, 40, 56, 78—And potassium, volumetric determination, 57, 214—And tin alloy, 65, 18—Anhydrous, derivatives of salicylic series, preparation, 18, 110—As a flux for minerals, 22, 224—As an explosive agent, 24, 86—At sea, 8, 300—Atomic weight, 93, 55, 275, 181, 183, 192, 202, 218, 228, 237, 253, 260, 276, 287; 95, 209; 99, 69; 100, 278—Behaviour of parabromaniline with, 43, 305—Blasting with, 16, 26—Boiling-point, 59, 237—Bottle, explosion of, 65, 61, 75—Burning in air, light emitted by, 5, 150—Composition, 19, 275—Compound of fluorene, 98, 233—Compounds, constitution, 20, 293, 313—Crystallised, 1, 244—Cutting of, 97, 73—Derivative of ethyl acetoacetate, action of monochloromethyl ether on, 100, 313—Derivative of ethyl malonate, action of bromocyclohexane and 4-bromo-1-methylcyclohexane on, 100, 229—Derivative of ethylic cyanacetate, action of ethylene dibromide and trimethylene dibromide on, 79, 261—Derivative of ethylic isopropylmalonate, action of ethylic isopropylpropionate on, 74, 119—Derivative of ethylic malonate, action of bromoacetal on, 77, 210—Derivative of ethylic malonate, addition to ethylic trimethylene dicarboxylate, 70, 287—Derivatives, crystalline forms, 65, 294—Derivatives of ethyl acetate, action of triisopropylpropane on, 95, 235—Derivatives of ethyl malonate and methylene chloride, interaction, 95, 306; 96, 277—Derivatives of ethyl malonate, action of triisopropylpropane on, 93, 242—Detection, 100, 296—Detection of sulphur by means of, 19, 179—Discovery of, 14, 25—Effect of blows on, 93, 200—Equivalent of, 75, 50—Estimation, volumetric, 77, 78—Ferro- (*see* Ferrosodium)—Flame, rendering quite monochromatic, 29, 145—Fusion of substances with, 21, 166—Heat of oxidation, 80, 23—How to preserve untarnished, 19, 119—In aluminium prepared by electrolysis, 73, 64—In lucifer matches, substitution for phosphorus, 19, 148—In qualitative analysis, 77, 105—In river and rain waters, 99, 253—Known to the ancients, 13, 250—Light, apparatus for obtaining a powerful, 93, 197—Light, lamps for, 68, 185—Light, production, 67, 248—Lines, reversal of, 36, 164—Loss in Leblanc's alkali-making process, 27, 181—Loss in Leblanc's soda-making process, 22, 21; 26, 251—Loss in soda-works, 22, 33—Manufacture, analysis of residues from, 33, 96—Metal, 91, 300—Metallic, action of sulphur on, 78, 101—Metallic, action on bromised ethers, 85, 156—Metallic, and chlorine, 22, 271—Metallic, formation, 78, 279—Metallic, formation from sodium peroxide, 78, 107—Metallic, manufacture, 64, 239—Metallic, reactions on chloroform, 31, 121—Metallic, use in blowpipe analysis, 83, 217—Oxidation, 17, 59—Phosphorescence, 17, 108—Potassium,

- lithium, alkaline metals, dissociation-spectra of melted salts, 74, 12 —Preserving, 15, 324, 329—Process, who was its inventor? 13, 191—Production, 63, 290—Quantitative, 21, 128, 203—Reaction on pure benzene, 12, 59—Reduction of potassium by, 3, 21, 66—Reversal of two lines of, in spectrum of light produced by a solar protuberance, 22, 21—Salt of diacetylacetone, action of acetyl chloride on, 90, 19—Salt of ethyl acetoacetate, action of heat on, 96, 207—Salt of malonic acid, addition of cyanogen to, 77, 166—Salts, borodectungstic acid and its, 42, 210, 221—Salts, influence on solubility of sparingly soluble acids, 92, 6; 100, 231—Salts of bibasic acids analogous to sulphuric acid, 85, 256—Salts of methenic and methinic acids, constitution, 91, 47 —Salts, solubility and specific gravity, 25, 249—Spectrum, 6, 227; 39, 243; 44, 3—Spectrum, reversal of, 18, 248—Test for, 54, 267—Vanadium in commercial, 47, 50—Vapour, anomalous dispersion, 85, 133 —Vapour-densities, 40, 293—Vapour, fluorescence, 92, 19—Vapour, fluorescence and magnetic rotation spectra, and their analysis, 94, 232 —Vapour, magneto-optics of, 92, 19
- Sodium acetoacetic ethers (*see* Ethers)
- Sodium acetamide, 28, 7
- Sodium acetate, 13, 189—And acetic acid, solution of iron anode in solution of, 80, 221—And nitrate of potassa, explosive property of a mixture of, 26, 264—And water, combinations, 23, 238—Carbonic and alcoholic fermentation, 22, 34—For preserving food, 26, 70—Maximum tension of vapour of, 55, 225—Solubility of lead sulphate in concentrated solutions of, 99, 236
- Sodium acetic ether (*see* Ether)
- Sodium acetoacetic ester (*see* Ester)—Ether (*see* Ether)
- Sodium acetonediacetic ethers (*see* Ethers)
- Sodium acetylacetone, action of bromoacetophenone on, 84, 252—Action of epichlorhydrine on, 89, 59—Action of monochloroacetic ethers on, 81, 252—Action of monohalogenated propionic ethers on, 85, 83
- Sodium acetylene, formation heat, 71, 306
- Sodium albuminate as therapeutic agent, 6, 127; 7, 145
- Sodium alcohol, behaviour of acetamide, when heated, with, 27, 292, 302, 318; 29, 2
- Sodium alcoholate, action of chlorides on, 27, 307—Action on aromatic amides, 73, 81—Action on benzoic acid ether, 25, 106
- Sodium alcoholate, 48, 46—Action on fumaric ethers, 43, 218—Action on fumaric and maleic ethers, 52, 109
- Sodium alkyl thiosulphates, action of alkalis on, 98, 34
- Sodium alum, 51, 302; 100, 52—Notes on, 91, 228—Of Japan, 44, 218—Preparation of crystallised, 3, 253
- Sodium aluminate, 18, 298, 303; 51, 109; 55, 309; 56, 13—Analysis, 64, 187—And its uses, 5, 296—And potassium aluminate in solution, 42, 29—As means for removal of lime and suspended matter from water for use in boilers, 79, 303—Carbonated, 47, 202—Manufacture, 8, 217—To preserve back cloths used in calico printing, 28, 325—Uses of, 20, 317
- Sodium amide, 69, 143—Preparation of sodium trinitride from, 90, 311—Reactions, 95, 95
- Sodium amidide, 63, 141
- Sodium ammonium, action on arsenic, 79, 10—Action on certain metals, 64, 320—Action on red phosphorus, 78, 39, 84—Action on selenium, 80, 123
- Action on tellurium and sulphur, 80, 135—And sodium potassium, racemates splitting the, 53, 167—Formation heat, 61, 25
- Sodium amylate, reductions with, 99, 299
- Sodium arsenate, influence on fermentation of glucose by yeast-juice, 94, 264
- Sodium arseniate, 4, 156; 5, 56
- Sodium arsenite, action on sodium ethyl thiosulphate, 96, 58—And sodium thiosulphate, interaction, 78, 209
- Sodium azide and benzhydroxamic chloride, interaction, 99, 91
- Sodium benzoate, 3, 238; 51, 56
- Sodium benzoyl acetic ethers (*see* Ethers)
- Sodium benzylate, action of alcohols on, 97, 143—Action on camphor cyanide, 63, 50—Condensation with propyl, butyl, and isoamyl alcohols, 98, 60
- Sodium bicarbonate, dissociation at 100°, 34, 152—Ferments in commercial, 17, 202—Preparing, 36, 254—Solubility and dissociation, 32, 9
- Sodium bichromate, chemical properties and constants, 54, 194
- Sodium binoxide, action on metalloine and on homonataloine, 87, 64—Action on metals of platinum group, 85, 149—Action on paraldehyde, 88, 257
- Sodium bismuthate, 86, 222, 234
- Sodium bisulphate, use in place of bisulphate of potash in decomposition of minerals, 12, 220
- Sodium bisulphite, 71, 248—And phenylhydrazine, combination, 80, 183
- Sodium borate, 4, 182
- Sodium borates, physical characters, 90, 284, 296
- Sodium borotungstates, 43, 47, 61
- Sodium bromate, application in volumetric analysis, 52, 320
- Sodium bromide, 21, 58, 238
- Sodium carbide, 77, 35
- Sodium carbonate, use of, 14, 130
- Sodium carbonate, 62, 274 —Action of aluminium on, 33, 238—Action of silica and analogous oxides at a high temperature on, 26, 706; 27, 59 —Action on cast-iron, 3, 197—Action on cotton fibre, 11, 113—Analysis of a native, 20, 130—And chromium oxide, behaviour of manganese peroxide and chloride of lime on ignition with, 45, 80—And potassium carbonate, double, 58, 53—And protoxide of chromium, double, 77, 45, 177—And sulphate of magnesia, 8, 19, 34—And zinc oxide in sulphur and arsenic determinations, 96, 240—Artificial production by action of carbonate of magnesia on chloride of sodium, 38, 33 —As a residue, 47, 307 —Boiling water containing, 87, 64—Decomposition, 54, 293—Detection of soda sulphate in, 22, 83—Dihydrated, 39, 184 —Ignition with, 89, 56—Manufacture, 6, 141; 8, 209; 21, 154; 23, 270; 24, 146, 158; 45, 120—Pure, 30, 234—Reaction under pressure, 52, 273—Reproduction, 55, 308 —Solutions, precipitation by calcium chloride, 21, 247—Solutions, spontaneous crystallisation, 100, 231 —To precipitate lime and magnesia for chemical purification of water, 89, 254
- Sodium carbonates in alkali manufacture, 49, 168
- Sodium chlorate, 21, 189, 192 —Crystal, composite, 78, 262—Preparation of chlorine by, 85, 273 —Pyro-electricity in, 48, 45
- Sodium chloride, 2, 73—And iodate of soda, double salt of, 5, 139—And potassium chloride, removal of large quantities in mineral analyses, 42, 305—And zinc sulphate, influence on soils and crops of water containing, 49, 236—At high temperatures, 78, 225—Behaviour in presence of metallo vapours, 19, 9—Decomposition, 19, 298—Determination in alkaline waters of coal mines, 58, 172—Determination
- of small quantities, 49, 202; 53, 53; 54, 25; 57, 251—Displacement of soda *cf.* by copper hydrate, 43, 144 —Dissociation, 67, 180 —Distribution according to altitude, 63, 131 —Electrolysis, 48, 58—Hydrolytic decomposition, 95, 228—In extract of meat, 25, 263—In plants, 65, 74—In soaps, estimation, 86, 183—Plant subjected to influence of, chemical modifications in, 85, 84—Saccharate of, 23, 299—Solutions, estimation of lime and magnesia simultaneously present in, 88, 310—Source of obtaining, 23, 130—Spontaneous decomposition, 7, 95—Transparent cubes of, 23, 276
- Sodium chromates, 85, 275
- Sodium cyanurate, formation, 72, 161
- Sodium diazobenzene sulphonate, reaction on iron cystinate in contaminated waters, 83, 35
- Sodium dichromate, manufacture, 55, 60
- Sodium dioxide, action on aloines and their halogen products, derivatives of anthraquinone obtained during, 85, 275—Action on gold, 96, 288—Employment to purify wells contaminated by carbonic acid, 82, 158—Properties, 83, 82
- Sodium disulphopersulphate, properties, 57, 211; 58, 183
- Sodium dithionate, preparation, 19, 178
- Sodium erythrate, *di-* (*see* Disodium)
- Sodium ethers, acetonediacetic, action of epichlorhydrine on, 87, 129
- Sodium ethoxide, cyanohydrocarbons and amyl nitrite, interaction, 95, 249; 96, 278
- Sodium ethyl, action of carbonic oxide on, 12, 303; 13, 42
- Sodium ethylacetylacetate, 69, 229
- Sodium ethylate, 28, 7—Action on deoxybenzoin, 71, 240—Action on mixtures of amides and ethers, 57, 78—Constitution, 26, 229—Crystals of, composition, 19, 22
- Sodium ethylthiosulphate, 31, 214 —Action of sodium arsenite on, 96, 58
- Sodium ferrocyanide, determination in soda, 46, 11—Manufacture, 43, 119
- Sodium fluoride and iron fluoride, double, 20, 107—Manufacture, 17, 252, 276
- Sodium formaldehyde sulphonylic acid (*see* Acid)
- Sodium formiate, action on benzoic acid, 28, 97—Action on sulphobenzoic and benzoic acids, 28, 279
- Sodium fulminate, 52, 309
- Sodium glucosate, 35, 217
- Sodium glycerinate, 54, 213
- Sodium glycolate, bibasic, 48, 117
- Sodium hydrate, action on amyl alcohol of slow fermentation, 35, 11—Crystallised, 21, 203—Formation from the sulphate, 44, 196—Preparation from sodium, 15, 306—Preservation of normal, 83, 18—Water expelled from, by boric and silicic acids, 3, 368
- Sodium hydride, heat of formation, 91, 221—Preparation and properties, 85, 71
- Sodium hydrocarbonate, analysis, 46, 245 —In milk, 60, 81—Production, 55, 212
- Sodium hydrochlorate, action on turpentine, 44, 204
- Sodium hydrogen sulphite, addition to ketonic compounds, 91, 56, 128
- Sodium hydrosulphide, 79, 283
- Sodium hydrosulphite, 43, 79; 92, 303—Action of sodium polysulphide on, 92, 82—Action on hematoxin of the blood, 35, 135—Employment in gas analysis, 94, 47—To determine aniline colours quantitatively, 28, 109—To estimate oxygen in blood, 27, 153—Use as a reagent in analysis of colours fixed on tissues, 34, 154
- Sodium hydroxide and benzaldehyde, interaction, 80, 253—Fusion with, 89, 56—Hydrate of, 67, 249—Solution for

- making standard solutions of, 98, 108
- Sodium hypobromite, action on certain nitrogenous aromatic derivatives, 58, 241—As a reagent, 23, 148—As reagent for guanamine, 50, 188—Change of colour of, 67, 241—Colour reactions produced by, 98, 200—Determination of urea by, 42, 107, 44, 87, 51, 11
- Sodium hypochlorite, action on aromatic sulphonic acids, 89, 133—Action on benzene sulphonamide, 85, 22—Action on oxides of thorium, zirconium, and cerium, 83, 249—Depreciation of electrolytically produced solutions of, 94, 253—Preparation, 11, 132
- Sodium hypodiphosphate, explosion, 2, 19, 47
- Sodium hyposulphate, 49, 103—Of barium, 50, 85—Barium
- Sodium hyposulphate, 4, 150, 17, 85, 147, 23, 117—Action of potassium permanganate on, 54, 84—Action on ferrous ferrioxides, 3, 220, 127—And acetic acid, refraction indices of aqueous solutions of, 42, 184—And silver, 23, 180—And sulphuretted hydrogen, reaction between, 42, 185—Applications to analysis, 8, 111—Barium, 59, 133—Case of dimorphism observed with, 49, 211—Decomposition by acids, 86, 198—Detection, 8, 280—First use in photography, 13, 240—For preparation of organic sulphur compounds, 22, 150—Manufacture from soda waste, 20, 96—Manufacture with alkali waste, 21, 72—New use for, 22, 95—Relations to metallic oxides, 10, 229—Removing from proofs on paper, 28, 110—Separation of arsenic from sulphuric acid by, 33, 74—To determine ferric oxide, 28, 44—Volumetric estimation of iron by, 6, 184, 22, 72
- Sodium iodate and chloride of sodium, double salt of, 5, 139
- Sodium iodide, preparation, 34, 54
- Sodium iodomercurate, 94, 135
- Sodium isobutylate, products of reaction on camphor at a high temperature, 94, 23
- Sodium malonate of ethyl (*see* Ethyl)
- Sodium manganate, crystalline, 5, 146
- Sodium manganates, hydrated, 63, 165
- Sodium manganites, 54, 84
- Sodium menthol, action of benzoic aldehyde on, 84, 47
- Sodium mercaptide, action on CH_3I , CH_3Br , and CH_3Cl , 35, 198—Action on phenylisocyanate, 52, 119
- Sodium metoxybenzoate, heat of formation, 83, 38
- Sodium metasilicate, pentahydrated, 25, 200
- Sodium methoxide, action on benzophenone chloride and benzylidene chloride, 89, 272—And its homologues, action on benzophenone chloride and benzal chloride, 83, 295
- Sodium methylarsinate, composition and estimation, 85, 300
- Sodium methylate, 52, 47
- Sodium monochloroacetate, hydrolytic decomposition by water and by alkali, 95, 116
- Sodium monosulphide as indicator in estimation of glucose by Fehling solution, 89, 71—Combination with water of crystallisation, influence of heat on, 55, 178—Preparation, 50, 216
- Sodium nitrate, 4, 68—Action on sulphide of sodium, 5, 80—Analysis, 65, 134—And ferrocyanide of potassium, compounds, 14, 58—And lead nitrate, mixtures of solutions of, 97, 93—And potassa nitrate, separation, 20, 190—And water, combination, 31, 250—Bolivian, 38, 274—Caustic soda prepared from, 6, 103—Consumption, 98, 83—Decomposition of sulphate of potash by, 27, 56—Deposits of Peru, 26, 27, 75—Effect of long-continued use on constitution of soil, 90, 18—Estimation of nitric acid in, 81, 75—
- Estimation of perchlorate in, 78, 41—Estimation of perchlorate of sodium in commercial, 90, 41—Formation of deposits of, 53, 11—Influence on gun-cotton, 55, 241—Influence on potatoes, 48, 260—Iodine from, 22, 225—Isomerism of, 23, 142—Manufacture, 3, 239—Native, 31, 263—Obtaining hyponitric and nitric acids from, 9, 47—Prize, result, 54, 12—Preparation of nitre from, 5, 268—Production at Iquique (Peru), 5, 31—Purification, 13, 34—Solubility, 9, 38, 45; 31, 250—Trade of South America, 32, 249—Transformation into nitrate of potash, 13, 192—Use as a manure, 51, 143—Used in metallurgy of nickel and soda, 22, 83
- Sodium nitrite, 10, 294; 12, 162—Analysis, 65, 134—And barium chloride, condition for quantitative equimolecular transposition in water, 95, 215—And mercuric and mercurous nitrates, interaction, 79, 211—Manufacture, 80, 145; 97, 237—Solutions, action of carbon dioxide on, 89, 130, 155—Solutions, action of carbonic acid on, 89, 191
- Sodium nitroprussiate, toxicity, 89, 226
- Sodium nitroprusside, 4, 152; 6, 28, 42; 60, 108—As a reagent, 3, 21, 29—As a reagent for kreatinine and acetone in urine, 48, 160—As test for alkaline sulphides in water, 13, 247—As test for certain alkaloids, 5, 355—Use of, 68, 186
- Sodium nitrosulphate, 72, 266
- Sodium oleate for soap bubbles, 13, 216
- Sodium orthovanadates and their analogues, 51, 189; 52, 177
- Sodium oxalate, acid, composition, 22, 14—In volumetric estimations, 79, 26—Solubility in water, 22, 244
- Sodium oxides, 78, 291
- Sodium paraoxybenzoate, heat of formation, 78, 38
- Sodium paratartrate, crystallisation, 53, 142
- Sodium paratungstates, action of ammonia on, 74, 84
- Sodium percarbonate, 89, 168
- Sodium perchlorate in commercial nitrate of sodium, estimation, 90, 41
- Sodium peroxide, 53, 289; 68, 109, 136; 69, 285—Action of gases on, 4, 204—And ammonium persulphate, reaction between, 98, 197—And calcium, strontium, barium, and magnesium peroxides, iodometry of, 89, 96—Application to water analysis, 68, 190—As a third group reagent, 75, 198—Comparative oxidising power, 98, 206—Decomposition of minerals and industrial products by, 98, 61, 76—Estimation of silicon in rich ferrosilicons by means of, 85, 218—Hydrate of, 81, 23—Hydrates of, preparation, 83, 71—In quantitative analysis, 77, 123—Opening-up pyrites with, 70, 179—Properties, 83, 59—Thermometric study of, 78, 327—Use of, 78, 109, 136—Use for qualitative analysis of organic substances, 90, 46—Use in analysis, 71, 238
- Sodium phenol, action on camphor cyanide, 63, 61
- Sodium phenylglycidate, interaction with phenylhydrazine, 90, 277
- Sodium phosphate, 11, 179; 33, 241; 85, 166—Action of ammonia on, 36, 88—And fluoride of sodium, manufacture, 17, 252, 276—And thorium phosphate, double, 56, 57—Cheap manufacture and use as manure, 13, 11—Detection in vitreous phosphoric acid, 58, 48—Determination of lithia by, 38, 240—Dibasic, 84, 24—Difference of energy displayed by, containing a different quantity of water of crystallisation, 24, 217—Use for removing manganese from solutions, 20, 35—Use in dyeing, 42, 330
- Sodium polymetallanthanate, homo- (*see* Homosodiumpoly-metallanthanate)
- Sodium polysulphide, 79, 283—Action on sodium hydrosulphide, 92, 82
- Sodium polysulphides, 41, 170
- Sodium potassium tartrate, 4, 176
- Sodium potassium alloy, photoelectric properties, 98, 268
- Sodium potassium carbonate, 57, 181
- Sodium propylate, products of reaction of, on camphor at a high temperature, 94, 23
- Sodium prussiate, manufacture, 9, 31
- Sodium pyrophosphate, 13, 142
- Sodium pyrophosphates, crystalline form, 53, 312
- Sodium pyrophosphite, 63, 177
- Sodium racemate, 53, 66
- Sodium ricinoleate, distillation, 29, 161
- Sodium salicylate, detection and determination in presence of ichthyol, 75, 71—In yellow fever, 44, 61—Use for estimation of mixtures of terpenic alcohols and their ethers, 85, 199
- Sodium selenide, 4, 116—And potassium selenide, 53, 167
- Sodium sesquichloride, 16, 87
- Sodium silicate, 4, 156—Action of oxalic acid on, 36, 286—Action on cotton fibre, 11, 113—Anti-fermentation action, 26, 240, 287; 27, 46—Anti-fermentation properties and physiological action, 26, 180—Antiseptic and therapeutic properties, 27, 94—Application for washing wool, 24, 46—Application of, 69, 69, 95—In soap making, 25, 119, 275—Manufacture, 9, 82—New use for, 24, 312—Soluble, 1, 286—Sophistication, 41, 251
- Sodium silicogluconates, 61, 132
- Sodium silicotitanates, 41, 241
- Sodium stannate, 1, 108; 4, 157; 17, 153; 25, 47, 59—Valuation, 1, 240
- Sodium stannite, action on gun-cotton, 29, 134
- Sodium suboxide, thermometric study of, 78, 327
- Sodium succinate, action of salicylic acid on, 54, 271—Condensation of furfuraldehyde with, 89, 80
- Sodium sulphate and copper sulphate, solubility of mixtures of, 84, 96—And magnesium sulphate, equilibrium between, 91, 70—And sodium thiosulphate, detection of sodium sulphate in presence of, 100, 176—Anhydrous, isomeric modifications, 29, 122—Assay of commercial, 30, 157; 33, 252—Converting, 31, 22—Crystals, presence of copper in, 42, 241—Decomposition by lime, 43, 280—Decomposition with barium carbonate, 43, 280—Diazobenzene (*see* Diazobenzene)—Efflorescence of the hydrates formed by, 29, 133—Heat produced by contact with water, 30, 121—In air, 11, 289—In atmosphere, 59, 301—In carbonate of soda, detection, 22, 83—In crude salt-cake, alkalimetric determination, 44, 107—In glass making, 15, 159—Influence on vapour pressure of aqueous ammonia solution, 83, 139—Isomeric modifications, 50, 232—Manufacture, 1, 20, 267; 42, 322—Maximum solubility, 49, 47—Monohydrated, 39, 184—Preparation, 2, 263; 4, 176—Solution, condition of dissolved substance in, 73, 252—Solution, properties, 87, 179—Solutions, spontaneous crystallisation, 97, 166—Supersaturated solutions, 2, 263—Temperature at which the spontaneous crystallisation of a supersaturated solution of, takes place, 25, 310—Used in glass manufacture, utilisation, 35, 116—Valuation, 29, 145, 164, 185, 205, 216, 231, 239, 243
- Sodium sulphates, two acid, 93, 280—Hydrated, 54, 274
- Sodium sulphide, 79, 283—Action of nitrate of soda on, 5, 80—Action on glycerine, 27, 234—Analysis of raw, 77, 153—And calcium sulphide, manufacturing a double, 9, 47—And hydrosulphide, oxidation by electrolysis, 74, 70, 80—Application as a blow-

- pipe reagent, 29, 28—Formation by action of sulphuretted hydrogen on sodium chloride at high temperatures, 27, 25—In black-ash, 28, 326—Solubility of bismuth sulphide in, 74, 169—Use in tanning, 33, 242
- Sodium sulphite, 17, 85, 146—Acid, difference of equality of samples of pure, 35, 127—Acid, fixation on double junctions, 81, 216—Action on ethanal, 92, 95—Action on salts of amidophenols, 67, 288—And potassium sulphite, isomerism of the double, 96, 275—And trioxymethylene, synthesis of sugars from, 89, 86—Aqueous, physical properties, 99, 297—Detection in presence of sodium sulphate and thiosulphate, 97, 85; 100, 176—Solubility of paraformaldehyde in solutions of, 87, 275—Use in photography, 59, 157
- Sodium sulphites and bisulphites, 49, 213
- Sodium sulphocyanide, 83, 61
- Sodium sulphovinate, 23, 107
- Sodium sulphuret for preparation of caustic soda, 25, 276—Preparation, 20, 215
- Sodium sulphhydrate, analysis, 77, 108
- Sodium tannate, 46, 257
- Sodium tartrate, 4, 176
- Sodium tetralanthanate, di- (see Disodium)
- Sodium tetratozylsulphite, compounds with aromatic amines and the phenols, and transformation into azoic colouring matters, 85, 264
- Sodium tetratozylsulphite and ethylnaphthylamine, colourless compound, 84, 47
- Sodium thiocarbonate, 45, 125
- Sodium thiosulphate, 67, 73—Acidified solution of, 65, 47—Action on solutions of metallic salts at high temperatures and pressures, 84, 254, 261—And organic halogen compounds, chemical dynamics of reaction between, 99, 20—And organic halogen compounds, reactions between, 91, 107—And sodium arsenite, interaction, 78, 209—And sodium sulphate, detection of sodium sulphite in presence of, 100, 176—As a type material for iodometry, 70, 282—Crystallised, decomposition by heat, 88, 295—Detection in sodium bicarbonate, 63, 72—Influence of hydrochloric acid in titrations by, 80, 227—Of ethyl (see Ethyl)—Reaction in photography by decomposition of, 71, 173—Solubility, 73, 72—Solutions, spontaneous crystallisation, 100, 237—Titration, 77, 213—Titration of mercury by, 82, 228, 235—Titration with iodine acid, 76, 178
- Sodium thiosulphite, action on salts of silver, 61, 192
- Sodium trichloracetate, dry distillation, 41, 35
- Sodium trinitride, preparation from sodium amide, 90, 311
- Sodium trithionate, crystalline form, 57, 211
- Sodium tungstate, 20, 120, 132, 216, 228—Action of organic acids on, 33, 251—As a reagent for baryta, 46, 12—Detection of blood-stains by means of, 23, 325—To form an elastic mass, 22, 215
- Sodium tungstates, action of zinc on, 90, 117—Ammonium (see Ammonium)—Double, 50, 105
- Sodium vanadate liquors, purification, 90, 316
- Soear and Frorde MM., Non-existence of carotene, 14, 289
- Soehne, M., and C. F. Boehringer (see Boehringer, C. F.)
- Sohn, C. E., "Dictionary of the Active Principles of Plants" (review), 69, 37—Water-bath regulator, 60, 293
- Sohnke, L., Origin of the current in a galvanic combination, 60, 12
- Sohniewindt, M., Iron-wire nets with asbestos covers, 74, 257
- Sohnke, L., Origin of electricity of storms, 53, 298
- Soil, absorption of bases by, 37, 204—Absorption of nitrogen by, 30, 18—Absorptive power, 21, 207, 221, 233, 255; 44, 296—Aeration of, 71, 270—Air enclosed in, 60, 232—Alcohol in, 43, 166—Ammoniacal fermentation, 67, 121—Analyses and their utility, 27, 6, 17—Analysis, 5, 156, 169, 197, 226, 244; 89, 181—Analysis by plants, 26, 95—And ash analysis, 70, 31—And crops, damage to, by waste waters and gases from manufactures, 40, 108—And crops, influence on atmospheric moisture, 53, 298—And plant, comparison of constituents of, 24, 73—And rainfall, temperature of, 52, 260—And subsoil waters, chemical procedures in, 49, 47—And water, salubrity, 23, 141—Arable (see Arable)—Capacity for water, 54, 177—Changes in volume, 38, 153—Circulation of air in, 73, 72—Constituents, action of lime on, 96, 245—Constituents and ammonium salts, interaction, 95, 117—Constitution, effect of long-continued use of sodium nitrate on, 90, 18—Cultivated, constant increase of organic matter in, 8, 176—Determination of available plant food in, 93, 64—Diluvial, of Brabant, analysis, 6, 229—Distribution of nitrifying organism in, 54, 228—Distribution of salts in, 37, 262; 38, 200—Effects of plant growth and manures on, 91, 235—Effects of compounds of copper on, 71, 293—Electric transmission through, 34, 142—Electric transmission through, by intervention of trees, 36, 61—Elimination of poisons, 67, 254—Enrichment of, in nitrogen, 48, 161—Fen and marsh, composition, 68, 191—Ferments and nitrigen, 80, 220—Ferments important in agriculture, 75, 222, 230—Fertility, 47, 35—Fertility of, action of earthworm in, 38, 72—From Cuttack, analysis, 44, 244—Geology of, 21, 228—Hygroscopic moisture of, significance for vegetation, 53, 49—Influence of artificial manures upon physical conditions of, 46, 184—Influence of chemical and physical properties of, on evaporation, 51, 202—Influence of tillage on, 52, 83—Influence on climate, 37, 10—Influence on plants, 52, 2—Inoculation, 91, 176—Iron chromium, from Andaman Islands, 63, 85—Jersey, composition, 86, 307—Marsh, amelioration of Kohdinger Moor, 48, 106—Marsh and fen, composition, 68, 191—Microbes in, 95, 312—Microbia of, 55, 177—Nitrification, influence of certain salts on, 52, 189—Of Alkalies (see Alkalies)—Of Manitoba, analysis of black, 51, 159—Of the Landes, peculiarities of, 22, 69—Of Tunis (see Tunis)—Oxidation of organic matter of, 74, 97—Peaty, 18, 154, 166—Peculiar, of Hungary, 35, 146—Permeability for air, 44, 48—Phosphoric acid in, total quantity of, 26, 288—Phosphoric acid of, 83, 276—Phosphoric acid soluble in the, 49, 178—Physical properties, influence on its percentage of free carbonic acid, 45, 88—Physical proportion of, in a dense and in a loose state, 46, 125—Propagation of heat in, by conduction, 36, 174—Retention of bases by, 91, 235—Reversion of superphosphate of lime in, 86, 170—Self-purification, 52, 361—Specific odour of, 63, 176, 179—Temperature of, in a loose and in a compact condition, 39, 240—Upheaving of, 21, 262—Vegetable, nitrification, 29, 197—Vegetable, organic matters constituting, 67, 193; 70, 233
- Soils, 38, 72; 95, 149—Absorbent power, 57, 101—Absorptive power, 37, 251—Absorptive power, for water vapours, and its bearing on vegetation, 36, 142—Acid, forage legumens on, 59, 49—Acid mineral substance in, 66, 149—Agronomic examination, 46, 123—Ammonia in, 54, 11, 23—Analysis of, 14, 68; 23, 130; 36, 184; 37, 204; 50, 11; 53, 101—Analysis, mechanical, 90, 17, 80; 93, 40—And ash of plants, manganese in, 26, 296—And waters, oxidation of ammonia in, 54, 226, 237—And building materials, permeability of, 46, 11—And plants, condition of potassa in, 56, 249—Application of cobaltinitrite method to estimation of potassium in, 99, 7—Arable (see Arable)—Available plant food in, 90, 265—Available plant food in, determination by use of dilute solvents, 84, 298—Available potash in, 73, 83—Beet-root sickness in, 37, 204—Calcareous, action of phosphates on, 35, 156—Calcareous, Ericaceae on, 59, 278—Calcareous, use of superphosphates on, 45, 151—Calcium carbonate in, determination, 71, 26—Carbon in, determination, 41, 290—Carbon in, estimation, 93, 197—Ceylon, analysis, 54, 126—Clay (see Clay)—Clay and sand in, determination, 67, 49—Clay in, estimation, 81, 218—Cohesive power, 39, 93—Composition, 51, 233—Crystalline, of Finistere, peat of, 43, 81—Cultivated, presence of lime as dolomite in, 86, 148—Determining mineral strength of, by water culture, 33, 109—Dry and moist, action of different phosphates on, 45, 109—Dry and moist, conduction of heat in, 38, 90—Effect of lime on insoluble phosphates in, 85, 157—Examination, 64, 161—Exhaustion by cultivation without manures, 60, 293—Exhaustion, points in connection with, 5, 284—Fen and marsh, composition of, 68, 191—Fen of South Lincolnshire, composition, 70, 153—Fertilisation of, part played by humic matter in, 76, 111—Fertility of, Grandeau's theory, 45, 234—Heath (see Heath-soils)—Heavy, 51, 49—Humous, behaviour of nitrogenous compounds in, 36, 246—Hungarian wheat, action of artificial manures on, 43, 178—Japanese, 46, 187—Japanese, examination of, 49, 245—Lime combined in, 59, 97—Meadow, nitrification of, 68, 264—Mineral, application of sparingly soluble phosphates on, 47, 225—Mineral plant food in, 69, 113—Moorland (see Moorland)—Nitrification of, 28, 81; 77, 18—Nitrifying power, 90, 250—Nitrogen in, 14, 68—Of Great Britain, 7, 235—Of South India, composition, 71, 261—Oxidation in, and its relation to productiveness, 94, 137—Peaty, high percentages of nitrogen in, 38, 72—Percolation of rain-water through, 92, 49—Phosphates in, determination, 1, 24—Presence of a cholesteral substance in, 99, 53—Productive power, 23, 223, 237—Quartz in, determination, 50, 33—Rice, from Burma, analyses of, 43, 227—Sampling, 85, 296—Sandy, absorptive power of, 52, 83—Scale for chemical valuation, 89, 197—Separation of alkalies from other bases in, 1, 193, 217—That are burnip-sick, concentrated molasses waste as a dressing for, 35, 156—Turnip sickness of, 44, 49—Vegetable, and atmospheric ammonia, reaction between, 61, 181, 191—Vegetable, nitrogenous principles in, 63, 95—Vegetable, phosphorus in, determination, 68, 68—Vegetable, sulphur in, determination,

- 65, 62—Virgin, of Australasia, exhaustion, 57, 55—Volcanic fertility, 27, 83; 175—Volcanic, part played by phosphoric acid in, 44, 37
- Sokol Banja, Serbia, meteor of, 37, 102
- Sokolnicki, M. Economical candles, 22, 65
- Sokoloff, N., Investigations of the water of the Neva, 51, 153; Urinary acid, 20, 100
- Sokoloff, N., and P. Latschinoff, Action of ammonia on acetone, 31, 100
- Sokoloffsky, N., Action of bromine upon acetone, 35, 82
- Solanaceous alkaloids (*see* Alkaloids)
- Solanum in Solanum lycopersicum, the tomato plant, 27, 47
- Solanum, 79, 200—In potatoes, 21, 216
- Solanum dulcamara, 86, 85
- Solanum dulcarum, fruit of, 96, 199, 200
- Solar apparatus, 45, 173—Atmosphere, 64, 125; 65, 107—Atmosphere and the gas of cleveite, comparison between, 72, 11—Atmosphere, chemical analysis, 3, 115—Atmosphere, refrangibility of brilliant yellow ray of, 19, 158—Atmosphere, spectrum of, 22, 82; 28, 170—Atmosphere, third permanent radiation of, 72, 12, 14 — Aureola, constitution, 21, 46—Beam, condensation, 9, 153—Chemistry, physical basis of, 4, 11—Corona considered as electric phenomena, 22, 204; 23, 121—Corona, electrical corona resembling, 25, 113 — (Cyclones, 27, 205; 29, 25, 101, 240—Diameter, extent of variations, 28, 238, 293—Diurnal variations of terrestrial magnetism, 53, 188—Eclipse (*see* Eclipse)—Eclipses (*see* Eclipses)—Electricity (*see* Electricity)—Energy (*see* Energy)—Flux (*see* Flux)—Heat (*see* Heat)—Helium (*see* Helium)—Induction (*see* Induction)—Light (*see* Light)—Oil (*see* Oil)—Parallax (*see* Parallax)—Photometry (*see* Photometry)—Physics, 15, 125—Physics Observatory, physical problems investigated at, 81, 214—Protuberances, 19, 83, 20, 107; 28, 32, 305; 29, 182—Protuberances, reversal of the two lines of sodium in the spectrum of the light produced by, 22, 214—Protuberances, spectroscopic observations, 21, 124—Radiation (*see* Radiation)—Rays (*see* Rays)—Scoriae, Zöllner's theory, 28, 160—Spectra, 48, 203 — Spectrometry, 22, 100, 205—Spectrum, 8, 21—Spectrum, action of various radiations of, on plants, 73, 36—Spectrum, atmospheric lines in, 4, 140—Spectrum, composition, 4, 293; 14, 155, 192—Spectrum, consequences of constitution of, 37, 123; 38, 91—Spectrum, dark rays of, and constitution of the sun, 37, 102—Spectrum, dark rays of, measure of intensity of, 42, 200—Spectrum, determination of wave lengths of principal rays and bands of ultra-red, 50, 163 — Spectrum, deviation of lines in, 36, 121—Spectrum, distribution of energy in normal, 43, 105—Spectrum, distribution of light in 42, 234—Spectrum, fluctuations in chemical action of, 29, 165—Spectrum, group of rays in, 42, 197—Spectrum, infrared region of, 70, 114—Spectrum, observing lines of, due to terrestrial atmosphere, 6, 213—Spectrum, origin of oxygen rays in, 59, 281—Spectrum, phosphorography of ultra-red region of, 47, 93—Spectrum, photographed in its own colours, 63, 120—Spectrum, photographic map of normal, 59, 124—Spectrum, photography of, 41, 195; 58, 311—Spectrum, purple of, 54, 171—Spectrum, rays of, 14, 203—Spectrum, representation of, 40, 32—Spectrum, spectro-photography of invisible parts of, 60, 184—Spectrum, telluric lines of, 11, 70 — Spectrum, telluric rays of, 42, 202—Spectrum, terrestrial lines of, 13, 128 — Spectrum, thermic maximum, spectral displacement of, 73, 47—Spectrum, ultra-violet, 37, 83—Spectrum, ultra-violet limit of, 63, 36 — Spectrum, ultra-violet, limit of at different altitudes, 40, 275—Spectrum, ultra-violet rays of, 9, 40—Spots, 4, 211; 17, 8 — Spots, and physical constitution of the sun, 33, 191—Spots and protuberances, relation between, 28, 32—Spots and storms, relations between, 29, 51—Spots and terrestrial temperature, connection, 23, 323 — Spots and whirlwinds, analogies between, 29, 255—Spots, explanation of, 28, 279 — Spots, Sir John Herschel's theory concerning, 9, 108—Spots, spectrum of, 20, 153, 164 — Spots, theory, 16, 83, 207, 230; 28, 82; 29, 10, 11—Spots visible by naked eye, 21, 94—System, constitution and origin of, 28, 305 — System, mutability of, 100, 195—Temperature, 21, 130; 22, 96; 40, 156—Theories, 30, 63—Trombes (*see* Trombes)
- Solaro, Rev. S., Supersaturation of liquids by their own vapour, 24, 313
- Soldani, A., and E. Berté (*see* Berté, E.)

- Solenoid electro-magnet, 76, 39—Spherical, induction produced by variation of intensity of electric current in, 9, 248, 213
- Solenoids, 95, 225
- Solfataras and deposits of sulphur at Kalamaki, 27, 137—Lateral, of the volcanoes of Chili, 29, 145
- Solid and fluid bodies, expansion, 40, 154 —And its saturated solutions, equilibrium between at various temperatures, 85, 103—Bodies, dilation by heat, 18, 30—Bodies in atmosphere, 17, 189—Bodies, plasticity and connection with formation of rocks, 82, 248, 266—Bodies, specific heat of, 8, 90—Colours (*see* Colours)—Combustible matters, distillation, 5, 355
- Solids, absorption of gases by, 44, 3—And liquids, solution in gases, 78, 297, 300—And liquids, vibratory forms, 38, 152—Chemically definite, perfect elasticity of, 49, 70—Determination with a vacuum, 51, 117—Diffusion, 45, 56—Diffusion into solids, 45, 22—Dissolved in liquids, apparatus for determination of rate of diffusion of, 79, 127—Elastic, applications to metrology, 83, 237—Formation at low temperatures, 89, 145—Granular and spicular structure, 88, 167—Inactive condition, 16, 149 — Incandescent, vapours of, 47, 116—Microprismatic method for distinguishing, 45, 287—Miscibility, 99, 105—Molecular weights, 52, 239, 251 —Organic, density, 40, 77—Pitch-like, determining the viscosity, 87, 309—Solubility in gases, 40, 256; 41, 103, 134; 74, 194—Solution in vapours, 71, 70—Specific gravity, 5, 40; 47, 13; 66, 211—Specific heat, 9, 203—Strained elastic, distribution of flow in, 61, 238—Surface flow of, 90, 141—Table of cubical expansion of, 57, 259—Use of microchemical balance for measurement of densities of, 98, 229—Viscosity of, 69, 307; 91, 69—Volatilisation in vacuo, 41, 191
- Solidification, 52, 208—Of certain substances, 5, 11
- Söllscher, C. and A. Weber, Reactions of aromatic chlorocarbons, 48, 205
- Sologne, agricultural terrain of the, 21, 214
- Solom, 59, 73
- Solomano, M., Isomeric phenolsulpho acids, and action of chloride of benzoyl on potassa salt of that acid, 20, 24
- Solomon, M., Damping of galvanometer needles, 81, 130
- Sölloft, F., Manufacture of butter from sour or sweet cream, 31, 208
- Soltsien, P., Detection of elements of the tissues of wheat and rye meal, 61, 156
- Solubilities, 67, 164—Determination of, 10, 3—Measurement at various temperatures, 81, 83
- Solubility, 12, 263; 41, 165; 50, 188; 90, 157—Curves of, 74, 233—Heat of solution, and degree of dissociation, relationship between, 77, 189 — Of chemical compounds, 5, 115
- Solutio atropine glycerina, 2, 210
- Solution, 9, 25; 30, 81; 56, 152, 181; 57, 179, 220, 249—Abnormal, novel case of, 65, 251—And dissolution, 70, 12—And pseudosolution, 65, 47; 70, 59; 92, 257—Aqueous (*see* Aqueous)—Chemical, reactions produced in, 81, 180 — Compounds, examples of, 61, 172—Concentration at electrodes in a, 83, 11—Determination of sugars in normal, 35, 11—Extension of Mendeleeff's theory, 56, 255—Fermentable experiments with, 65, 74—For making standard solutions of sodium hydroxide, 98, 108 — Fractional extraction, 93, 72 — Heat of, solubility, and degree of dissociation, relationship between, 77, 189—Hydrate, theory of, 62, 183, 194; 66, 277—Laws of, 51, 142—Laws of perfect, 99, 40, 52, 63, 74 — Molecular aggregation in, 96, 232—Nature of, 54, 95, 181, 203, 215, 295, 303; 55, 152, 187; 56, 191—Nature of, lecture experiments on, 85, 156—Of effective principle of supranal gland or paranephros, producing pure, 99, 89—Of molecular combinations, 87, 143 —Partial separation of constituents of a, 56, 146—Pseudo- (*see* Pseudo-solution)—Saline (*see* Saline)—Special case of, 55, 153—State, 92, 229—Theory of, 58, 151—Volume-changes which accompany, 79, 58
- Solutions, 22, 52—Acid (*see* Acid)—Adhesive, for joining together surfaces or articles of leather, wood, paper, etc., 5, 335—Alcoholic, vapour tensions, 58, 132—Ammoniacal, electrolysis with coke electrodes, 54, 66—Ammoniacal, solubility of salts of lime in, 2, 107—Analysis of highly dilute, absorption spectrum of, 64, 120—And liquids, viscosities of mixtures, 81, 283—Apparatus for producing spark spectra of, 97, 35—Apparatus for storing, 83, 47 —Aqueous (*see* Aqueous)—Association v. dissociation, 63, 290 — Caustic, stoppers of bottles for, 4, 98 — Colloid, conductivity of, 91, 304—Colloidal, 83, 128; 89, 202—Colloidal, osmotic pressure, 92, 10—Colloidal, theory of, 88, 243—Coloured, influence of temperature of, on their absorption spectra, 66, 7, 41—Compressibility, 83, 143—Concentrated, catalysis in, 84, 205, 213—Concentrated, osmotic pressure of, 99, 40, 52, 63, 74—Concentrations of, 64, 262 —Containing potassium and sodium sulphates, test of ionisation coefficients determined by conductivity method for, 80, 46, 57, 68, 76 — Crystallising (*see* Crystallising)—Detannisation in analysis of tanning materials, 94, 289—Diazo (*see* Diazo)—Diffusion and molecular weights, 93, 234—Dilute, dissociation in, 92, 91—Dilute, measurement of electrical conductivity in, 78, 59—Dilute, refractive power and density, 74, 25—Dilute, theory of, based on vant

- Hoff's law, **90**, 148—Dilute, transport number, **85**, 94—Electric conductivity in bromine, **90**, 260—Electrical, internal friction of, **78**, 59—Ferrie, reduction, **46**, 287—Ferrous, maintaining reduction of, **79**, 282—General doctrine of, **22**, 25—Fluorescent (*see* Fluorescent)—Freezing-points, **60**, 278; **61**, 91—Heated by open steam, temperature of, **93**, 42, 68, 233—Hydrate theory of, application to electrolytes, **91**, 254—In antimony sulphide, cryoscopic examination, **89**, 311—Inorganic (*see* Inorganic)—Investigating dissociation equilibria in, **99**, 237—Metallic, action of phosphorus on alkaline, **27**, 32—Metallic, action of sulphur on, **44**, 143; **65**, 74—Metallic, behaviour with filter-paper, **37**, 211—Metallic, colours in, **92**, 37—Metallic, reactions of aqueous trimethylamin in, **35**, 219—Metallic, reduction by gases, **48**, 295; **52**, 3—Method of measuring the vapour pressure, **66**, 288—Nature of, **57**, 116; **59**, 248; **60**, 46, 68, 253; **63**, 305; **64**, 27, 30, 51, 149; **67**, 25—Normal, **40**, 239; **55**, 236—Of bases, viscosity, **100**, 12—Of salts of alkaline earth metals, **84**, 21—Of volatile substances, vapour pressure, **79**, 238—Photosensitive, action of β -rays on, **99**, 106—Preservative, and building stones, **2**, 241, 253—Processes operative in, **98**, 1—Rotatory power, **66**, 282—Saline (*see* Saline)—Salt (*see* Salt)—Saturated, sources of error in experiments with, **12**, 32—Solid, **81**, 185; **92**, 244—Specific heats of, determining, **92**, 35—Standard, preparation, **94**, 211—Standardising, **63**, 93; **71**, 296—Supersaturated, **11**, 250; **12**, 252; **22**, 87; **39**, 16, 110, 141—Supersaturated, crystallisation, **11**, 289; **12**, 93, 130; **20**, 36—Supersaturated, preparation, **24**, 311—Supersaturated, spontaneous crystallisation, **93**, 103—Supersaturated, supposed action of solutions of Glauber's salt on, **21**, 52—Tellurous and telluric, action of hydrogen monosulphide on, **87**, 209—Theory of, **63**, 147, 157, 169; **81**, 103; **94**, 251; **99**, 89; **100**, 253—Turbid, clearing of, **84**, 174—Viscosity of, **97**, 153, 261; **100**, 12—Volumetric, adjustment of, **29**, 23—Volumetric, expansion by heat, **47**, 13
- Solvay, E., and R. Lucion (*see* Lucion, R.)
- Solvents and fluorescence, colour of, **59**, 216—Association in mixed, **92**, 7—Colouring-matters in, variation in absorption spectra of, **38**, 210—Dissociating power, **84**, 95, 106, 135, 146, 159—For essential oils, **17**, 98, 100, 278—For indigo, **26**, 231—General law of congelation of, **46**, 302—Impedance of solutes in, as manifested by osmotic pressure, **95**, 164—Influence in Claisen condensation, **95**, 291—Influence on rotation of optically active compounds, **82**, 252; **83**, 117; **85**, 310; **89**, 297; **90**, 20; **95**, 116; **96**, 268, 291; **97**, 262; **98**, 257; **99**, 107, 248—Influence on rotatory power of molecules, **88**, 46—Law of vapour tension of, **55**, 295—Optically inactive, influence on rotatory power of optically active substances, **27**, 300—Organic, action on sulphur and metallic sulphides, **41**, 23—Organic, influence of, **68**, 201, 234—Organic, influence on rotatory power, **68**, 110—Other than water, refractive index of bodies dissolved in, **94**, 41

- Spain, fluorine in mineral waters of, 81, 4.—Nickel ores in, 34, 72.
- Spalteholz, M. W., Estimation of phenols in disinfectants, 79, 182.
- Spanish earth for clarifying wines, 74, 306.—Grass, improvements in, 8, 167.—Grass in manufacture of paper, 12, 151.—Iron ore, 4, 164.—White, 47, 61.
- Spanton, W. D., Iodate of calcium as an antiseptic, 61, 166.
- Spar, calcareous, isomorphism of, 23, 131, 142.—Calcareous rods, elasticity of, 31, 72.—Iceland, corroded figures and asterism in, 21, 180.—Iceland, law of extraordinary refraction in, 26, 49.—Iceland, researches with, 59, 301.—Iceland, solution of, 61, 265.—Iceland, speed of reactions with acids, 57, 263.
- Spare, C. R., and E. F. Smith (see Smith, E. F.).
- Spark, arc and induction, behaviour of fluorine towards nitrogen, oxygen, and chlorine in, 99, 240.—Electric, action of radium on, 91, 68.—Electric, action on marsh-gas, 19, 81; 20, 34.—Electric, action on mixtures of nitric oxide, 58, 130.—Electric, constitution, 79, 62.—Electric, dissociation of gases by, 55, 252.—Electric, duration, 22, 21; 26, 83.—Electric, effect on activity of metals, 94, 23.—Electric, phosphorescence of rarefied gases during passage of, 11, 209.—Electric, photographs of black, 69, 100.—Electric, power of light of, to penetrate space, 16, 183.—Electric, produced in gases, thermic and galvanometric laws of, 39, 195.—Electric, producing figures similar to those of Lichtenberg by, 21, 298.—Electric, spectrum in a compressed gas, 35, 275.—Electric, thermic laws of, 41, 70, 195.—Electric, trajectory, 30, 121.—Electric, undulating movements accompanying, 58, 11.—Electric, wandering, 38, 152.—Gap, high pressure, 87, 245.—Induction, 30, 20.—Induction, action on gaseous hydrocarbons, 15, 196.—Induction, permanent, stratification produced by, 9, 200, 295.—Short, phenomena, 97, 225.—Spectra (see Spectra).
- Sparks, electric, 21, 214, 236.—Electric, distribution and spectra of metallic vapours in, 89, 253.—Electric, voltaic, and electric magnetic, prismatic decomposition of, 3, 198.—Electro-magnetic (see Electro-magnetic)—Induction, 22, 35.—Induction, of high temperatures, production of, 51, 311.—Spectra of, from thick wire coils, 55, 153.
- Sparrow, J., and A. Poole (see Poole, A.).
- Sparteine, 4, 287, 306; 88, 107; 98, 96.—Action on ethyl iodide, 92, 57.—Action on methyl iodide, 92, 21.—And its salts, 54, 108.—Application of Hofmann's reaction to, 96, 294.—Constitution, 92, 105.—Diiodo- α -methyl- (see Diiodo- α -methyl-).—Hydrates of methyl-, dimethyl-, and trimethylsparteine, 92, 95.—Iso- (see Iso-sparteine)—Methyl- (see Methyl- α -Methyl- (see α -Methylsparteine))—Stereoisomerism of the two iodo-methylates, 92, 26.—Symmetric character of the molecule, 92, 70.
- Sparteine, iodoalkylates, 54, 226.
- Sparteineum hydrate, trimethyl- (see Trimethylsparteineumhydrate).
- Sparteineum, dimethyl- (see Dimethylsparteineum)—Methyl- (see Methylsparteineum).
- Spathic iron (see Iron)—Minerals (see Minerals).
- Speak, S. J., Constant water-bath, 60, 208.
- Speaking telephone (see Telephone).
- Spear, Elwood B., A. A. Noyes, and W. C. Bray (see Noyes, A. A.).
- Specht, L., and F. Lorenz (see Lorenz, F.).
- Speciale, S., Lavas of the volcanoes of Ernic, 40, 192.
- Specialisation, danger of, 97, 106, 114.
- Species, origin of, 9, 178.—Replacement of, 9, 171.
- Specific gravities and areometers, 23, 22.—And atomic weights of diamond, graphite, and charcoal forms of carbon, numerical relations between, 2, 1, 18.—And atomic weights and hardness of metallic elements, relation between, 27, 215.—And gaseous volumes, 30, 215, 248, 260.—And molecular weights of substances, 41, 120.—Determination, 38, 300; 39, 97.—Indicated by Baume's hydrometers, 24, 28.—Method of taking, 29, 127.—Of elements of periodic system, arrangement, 69, 127.—Of liquids, variation in methods of taking, 13, 50.—Of liquids and solids, 20, 61.
- Specific gravity, 20, 300; 24, 253, 265.—And atomic weight, relation between, 8, 24.—And solid contents, 4, 268.—Apparatus, 47, 85.—Apparatus for liquids, 36, 168, 194, 195, 204.—As

- test of value of gold alloys, 1, 60—
Bottle for liquids spontaneously inflammable in contact with air, 28, 211—Bottle for spontaneous inflammable liquids, 29, 104—Bottle for tropical climates, 60, 236—Determination by means of the pyrometer, 50, 67—Determination, differential method, 44, 51—Determination, instrument for, 41, 154—Determinations, 49, 3—Of a liquid, 63, 58—Of a saline solution, relation to molecular weight of the salt dissolved, 70, 62—Of alcohol, 22, 71, 191—Of aqueous hydrobromic acid, 23, 242—Of aqueous solutions of tartar emetic, 47, 178—Of gas, continual indicator of, 1, 111—Of gases, 63, 24—Of iodine trichloride, 35, 216—Of lime-water, 55, 217—Of liquid substances, 5, 40—Of liquids, 27, 179, 41, 203; 45, 46; 47, 13; 57, 138—Of melted magnesia, 71, 50—Of milk of lime, 54, 38—Of mineral substances, determination, 5, 246—Of minerals, liquid for determining, 48, 227—Of mixtures of alcohol and water, 1, 207; 21, 298—Of nitric acid, 16, 113; 68, 174—Of oils, 25, 148—Of paraffin wax, 47, 221—Of pure chromic acid, 24, 228—Of rare and costly substances, determination, 64, 177—Of rubies and sapphires, 28, 101—Of saline solutions, 21, 47—Of salts soluble in water, 61, 109—Of solid fats, 42, 307—Of solids, 5, 40; 47, 13; 66, 211—Of sparingly fluid substances, 66, 97—Of substances, 4, 337—Of tinctures, 18, 203—Of vapours at high temperatures, 1, 22—Problem, 16, 78, 88, 101, 104, 158, 172—Table for ascertaining weight of a cubic foot of any mineral ore, metal, earth, or any other substance from its, 17, 187—Tables of, 41, 295
- Specific heat (*see Heat*)—Magnetism of ozone, 43, 120—Resistances, high, 59, 166—Rotation of cane-sugar, 39, 84—Rotatory power of cane-sugar and invert-sugar, 36, 52; 42, 177, 196, 208, 221, 233, 257, 299, 328—Volume and genesis of elements, 72, 230, 237—Volume of chloral, 42, 288—Volume of crystallisation, 40, 307—Volumes of liquid compounds, 8, 82; 46, 107; 50, 117—Volumes of liquids, determining, 62, 279—Volumes of esters of fatty series, 48, 34—Weights of metals, 17, 284
- Specimen Exchange Club, 2, 251, 298, 310, 323, 341, 3, 15
- Specimens, anatomical, preservation, 16, 153—Chemical, 41, 274—Chemical arrangement of, 15, 35—Chemical exchange of, 2, 166—Chemical Society's disposal of, 12, 249—Preservation of, 15, 59
- Speck, H., Drainage considered in its bearing upon water supply, 22, 203—Influence of light on transformation of matter, 43, 235—Researches on consumption of oxygen and excretion of carbonic acid in man, 36, 101
- Spectacle-makers' Company and registration of opticians, 81, 312
- Spectacles, 21, 239
- Spectra, absorption, 18, 49; 39, 74; 88, 141, 151—And certain organic liquids, 47, 178—And chemical constitution, relations between, 33, 77, 89, 152, 240, 263; 95, 306; 96, 28; 98, 22, 254, 266, 278, 315—And constitution of pyridine and various derivatives, relationship between, 99, 81—And isomeric change, relationship between, 99, 81; 100, 23—And optical rotatory power, relation between, 95, 67; 96, 20—Components of rare earths giving, 56, 74, 85, 135, 154, 165, 172—In relation to chemical structure of colourless and coloured substances, 94, 20, 40—Influence of temperature of coloured solutions on their, 66, 7, 41—Observing, 31, 255—Of alizarin and its tinctorial derivatives, 39, 289—Of alkaloids, 51, 135—Of benzoic acid, the benzoates, and benzamide, 95, 91—Of certain colouring matters, 52, 54—Of chromium compounds, 67, 207, 219, 231, 245, 255—Of cobalt salts, 43, 27—Of crystals of rare earth salts, 97, 239—Of cupric bromide, 69, 257—Of dissolved dyes, influence of their state in solution on, 99, 164—Of halogen, nitro-, and methyl derivatives of camphor, 99, 81—Of hydrobromic solutions of cupric bromide, 69, 275—Of hydrocarbons isolated from products of action of aluminium chloride on naphthalene, 97, 308—Of liquefied air, 72, 65—Of metallic nitrates, 85, 162—Of nitrates in relation to ionic theory, 99, 245—Of organic bodies, 43, 126—Of oxycarbamil and its alkyl derivatives, 81, 307—Of oxygen, 54, 19; 60, 75—Of parabenzquinone, quinol, and quinhydrone, 99, 20—Of phthalic, isophthalic, and terephthalic acids, phthalic anhydride and phthalimide, 95, 92—Of potassium and sodium at low temperatures, 29, 268—Of solutions of salts of didymium containing phosphoric acid, 89, 209—Of vapours of benzene and homologues, and of benzene solutions, 97, 97—Photographic records of, 39, 132, 135—Property of the lines and bands in, 212—Rare earths which produce, 68, 75, 91—Relation between molecular structure of carbon compounds and their, 41, 270—Ultra-violet, of enolketotautomers, 90, 19—Variations in, 53, 77
- Spectra aluminium (*see Aluminium*)—Arc, effect of pressure on, 96, 153—Arc, photographs of, 93, 231—Artificial, effect of temperature on, 5, 233—Calorific, 21, 225—Cold bands of obscure, 32, 168—Coloured, production by light, 39, 282—Comparative scale of, 21, 11—Discontinuous phosphorescent, in high vacua, 43, 237—Dissociation, of melted salts, 78, 270—Emission, 88, 153—Examination of, 76, 12, 46—Existence of two, produced by carbon incandescent at same temperature, 22, 172—Experiments illustrating low temperature, 57, 200, 239—Flame, 54, 212, 225; 90, 13—Flame, at high temperatures, 67, 279; 70, 2, 15—Flame, D-lines of, examined by blowpipe, 34, 212, 226, 237—Flame, of alkaline metals, 89, 130—Flame, thermo-chemistry of, at high temperatures, 95, 265, 277, 289—Formed by curved diffraction gratings, 47, 54—Fundamental property common to both classes of, 61, 219—Gaseous, 19, 158; 20, 21, 56, 106—Homologous, 47, 138—Line, 70, 17—Line, of boron and silicon, 48, 31—Luminous, 21, 57, 225—Luminous constitution, 20, 129, 164—Magnetic, fixing, photographing, and exhibiting, 23, 266—Metallic, 29, 10—Metallic, increasing intensity of, 5, 234—Metallic, new kind, 52, 4—Metallic, photography of, 62, 209—Metallic, wave lengths of, in ultra-violet, 58, 237, 247, 304—Observed in high vacua, 44, 23; 64, 30—Of alkaline metals (*see Alkaline*)—Of aluminium (*see Aluminium*)—Of argon (*see Argon*)—Of artificial light (*see Light*)—Of beryllium (*see Glucium*)—Of boric and phosphoric acid blowpipe beads, 29, 66—Of cathode light in gases containing nitrogen and carbon, 88, 108—Of cathodic phosphorescence of terbium and dysprosium diluted with lime, 94, 79—Of cobalt compounds (*see Cobalt*)—Of colouring matters (*see Colouring*)—Of compound bodies, 21, 143; 76, 277—Of copper (*see Copper*)—Of electric light (*see Electric*)—Of elements (*see Elements*)—Of erbium (*see Erbium*)—Of erbium (*see Erbium*)—Of flames (*see Flames*)—Of gadolinium (*see Gadolinium*)—Of gas-vacuum end-on tubes, re-examination of, 60, 223—Of gases (*see Gases*)—Of glucinum (*see Glucium*)—Of gold (*see Gold*)—Of hydrogen (*see Hydrogen*)—Of inorganic substances, 56, 50—Of iron (*see Iron*)—Of krypton (*see Krypton*)—Of lightning (*see Lightning*)—Of manganese (*see Manganese*)—Of melted salts (*see Salts*)—Of metallic vapours (*see Vapours*)—Of metalloids (*see Metalloids*)—Of metals (*see Metals*)—Of nebulae (*see Nebulae*)—Of neon (*see Neon*)—Of non-metallic bodies, 36, 111—Of non-metals in melted salts, 74, 11—Of non-metals, influence of temperature on, 46, 171—Of organic compounds, 91, 154—Of oxygen (*see Oxygen*)—Of planets (*see Planets*)—Of polonium (*see Polonium*)—Of radium (*see Radium*)—Of rare earths, 82, 127—Of rare earths of terfied and other metals, 92, 5—Of rarefied gases traversed by electric discharges, action of an electromagnet on, 30, 284—Of samarium (*see Samarium*)—Of selenium (*see Selenium*)—Of silicon (*see Silicon*)—Of silver (*see Silver*)—Of simple bodies, 21, 119—Of stars (*see Stars*)—Of sulphur (*see Sulphur*)—Of sunspots (*see Sunspots*)—Of tellurium (*see Tellurium*)—Of tin (*see Tin*)—Of uranium salts (*see Uranium*)—Of uric acid, murexide, and ureides in relation to colour, and their chemical structure, 91, 266—Of vapours (*see Vapours*)—Of various orders of colours in Newton's scale, 66, 300—Of xenon (*see Xenon*)—Of ytterbium (*see Ytterbium*)—Of yttrium (*see Yttrium*)—Periodic maxima of, 74, 246—Phosphorescence, indicating existence of new elements, 92, 273—Phosphorescent, in high vacua, discontinuous, 43, 237—Phosphorescent, of S8 and europium, 92, 25—Phosphorescent, photographic researches on, 80, 49—Photographs of, 40, 311—Primary, distribution of bands in, 31, 8—Prismatic, reducing, 77, 260—Quantitative analysis of, 75, 5—Solar, 48, 203—Spark, of solutions, apparatus for producing, 97, 35—Spark, of certain minerals, 69, 192—Spark, photographing, 36, 140—Stellar, 8, 241; 16, 312; 20, 2—Stellar, fixed lines in, 7, 137—Structure of, 87, 207, 218, 234—Thermic, 35, 20, 95—Twofold, of oxygen and nitrogen, explanation, 71, 169—Ultra-violet absorption, of albumenoids in relation to that of tyrosin, 80, 31—Ultra-violet absorption of earths in gadolinite, 37, 237—Ultra-violet absorption, of enolketotautomers, 90, 19—Ultra-violet emission, of certain elements, photographs of, 43, 289—Ultra-violet emission, of metallic vapours, 50, 127—Ultra-violet, of aromatic compounds, 92, 7, 9—Ultra-violet, of closed chain carbon compounds, 81, 307—Ultra-violet, of diazo-compounds in relation to their constitution, 91, 127—Ultra-violet, of enolketotautomers, 91, 158—Ultra-violet, of metals, 93, 231—Ultra-violet spark, emitted by metallic elements and their combinations under varying conditions, investigation by means of photography, 48, 105—Wave-lengths, simple relation between, 56, 269
- Spectral analysis, 49, 201; 51, 25; 52, 213—And the Bessemer process, 17, 145—Mathematical, 51, 159, 171, 183—Meteorites in, 56, 279—Of certain gases, 71, 281—Of light of stars, 14, 202—Of non-conducting compounds, 77, 218—Quantitative, 23, 154; 37, 31; 38, 47; 41, 230; 65, 270; 74, 258—Quantitative, absorption of radiation through bodies, and its application to, 37, 10—Use of prisms of flint glass and bisulphide of carbon for, 8, 52
- Spectral analytical reactions for salts of

- magnesia, 35, 40 — Apparatus (see Apparatus) — Bands, discovery of faint, 63, 179 — Bodies, 52, 72 — Colours (see Colours) — Displacement of solar thermic maximum, 73, 47 — Illuminator, 27, 235 — Lines, influence of refraction on, 52, 302 — Lines, numerical nomenclature, 8, 59 — Lines of oxygen, 76, 288 — Lines of oxygen and thallium, 76, 265 — Lines, width of, 21, 238 — Photometer, 72, 237 — Rays (see Rays) — Research on atmospheric air, 77, 288 — Researches on the star Altair, 72, 269 — Study of bodies, 52, 76
- Spectrochemistry, development, 92, 174, 187**
- Spectrocolorimeter, 64, 203**
- Spectroelectric tubes, 32, 249**
- Spectrograph, 92, 204**
- Spectrometer, 92, 264 — Colour-perception, 100, 266 — Reflecting, 7, 223 — Thermo- (see Thermospectrometer)**
- Spectrometry, 27, 153 — Solar, 22, 199, 205 — Stellar, 18, 167**
- Spectronatometry, 27, 153**
- Spectrophotography of invisible parts of solar spectrum, 60, 184 — Vacuum, 64, 275**
- Spectrophotometers, 37, 31; 43, 59**
- Spectrosaccharimeter, 64, 177**
- Spectroscope, 4, 176; 18, 96; 92, 264 — Aniline colours in, 33, 260 — Applied to Bessemer process, 22, 44 — Astronomical observations with, 7, 124 — Automatic, 23, 118, 202 — Automatic Browning's, 21, 201 — Binocular, 93, 231 — Construction, 11, 244 — Determination of lithium by means of, 34, 94, 122 — Diffraction grating direct, 92, 263 — Direct-vision, 37, 103; 47, 213 — Direct vision diffraction, pocket, 92, 263 — Discoveries with, 23, 104 — Echelon, 91, 241; 99, 308 — Examination of Bessemer flame with, 22, 313; 23, 5, 25 — For blast-furnaces, 52, 279 — For laboratory, 22, 229 — Improved, 8, 8; 17, 84 — Improvement of, 29, 222 — In discovery of blood stains and dissolved blood, 17, 114, 124 — In water-analysis, 22, 322 — In which the prisms are automatically adjusted for minimum angle of deviation, 22, 222 — Interferential, 77, 82 — Interposition scale for, 23, 119 — Laboratory, measuring apparatus for, 37, 115 — Micro- (see Microspectroscope) — New form, 7, 117; 20, 214; 35, 101; 52, 201 — Of direct vision, 87, 249 — Pocket, 19, 142 — Registering, 23, 98 — Slit of a, 41, 79; 71, 175 — Stellar, 16, 133 — Support for a pocket, 36, 51 — Universal, 44, 82 — Use in discriminating anthracenes, 41, 52, 95, 117 — Use in manufacture of aniline colours, 53, 287 — Use to distinguish a feeble light with a stronger light, 19, 299 — With blowpipe for mineralogists, 34, 91 — With a fluorescent eye-piece, 30, 252 — With slide, 16, 180**
- Spectroscopes, 54, 74 — Construction of slit of, 74, 258 — Direct-vision, compound prism for, 39, 64 — Direct vision, glass reading-scale for, 27, 149 — Direct-vision, micrometer scale for, Procter's, 27, 150 — Multiple transmission fixed arm, 84, 266 — Prism, dispersion, 65, 128 — Three new, 7, 40**
- Spectroscopic analysis (see Analysis) — Anomalies, 47, 247 — Apparatus (see Apparatus) — Association of Italy, 25, 179 — Investigations, 40, 285 — Method for discovering in gaseous mixtures and liquids the smallest quantity of gaseous or volatile hydrocarbon, 33, 76 — Method for transit of Venus, 27, 320 — Notes, 20, 271; 22, 218, 277; 35, 124; 41, 172 — Observations, 27, 244; 68, 183 — Observations by monochromatic light, 45, 86 — Observations influence of temperature on, 55, 233 — Observations on dissolved cobaltous chloride, 51, 259 — Optics, 39, 253 — Phenomena, 53, 211 — Phenomena of sun spots, 19, 223, 247, 268 — Proceedings, 50, 303 — Process, 24, 74 — Research, 95, 13, 25, 42, 51 — Research, calcium in, 94, 305 — Researches, 43, 270; 44, 216 — Studies and chemical researches, 72, 177, 188, 203, 215, 226, 230, 248, 259, 274, 284, 301, 311; 73, 5, 15, 29, 39, 51, 66, 80, 88, 113, 124, 135, 147, 150, 171, 183, 192, 204, 210, 224, 241, 249, 263**
- Spectroscopy, 43, 211 — Applications of theory of electric discharge to, 94, 197, 205 — Bibliography of, 74, 222 — End-on illumination in private, 39, 145, 166, 188 — Methods of, 33, 29 — Practical, 51, 23 — Progress of, 74, 307 — Radiant matter, 47, 261; 49, 159, 169, 181, 194, 205; 51, 301; 52, 23, 46; 53, 75, 133; 54, 28, 40, 54, 63, 70, 55, 107, 119, 131**
- Spectrum, abnormal, of light, 40, 264 — Absorption, difference of, of one and the same substance, 38, 59 — Absorption, of camphor, 97, 261 — Absorption, of didymium, 39, 135; 54, 27 — Absorption, of fluid hyponitric acid, 22, 240 — Absorption, of manganese salts, 92, 116 — Absorption, of mercury vapour, 92, 102 — Absorption, of methæmoglobin, 64, 113 — Absorption, of oxygen, 52, 319; 54, 19; 55, 45; 58, 163; 60, 75 — Absorption, of ozone, 42, 268; 43, 36; 45, 163; 69, 289 — Absorption, of para-nitrosodimethylaniline, 90, 20 — Absorption, of potassium vapour, 100, 266 — Absorption, of solutions of chromium oxalates of blue series, 69, 157 — Absorption, of triphenylmethane, 97, 236 — Afforded by solution of nitrate of didymium, 6, 140 — Analysis, 4, 159, 302, 328; 5, 40, 201, 214, 218, 251, 261, 287; 6, 155; 7, 178; 9, 70, 194; 13, 21, 102; 14, 224; 25, 04; 27, 301; 51, 139 — Analysis, apparatus for simplifying, 11, 32 — Analysis, application of induction coil to, 4, 118, 130 — Analysis, application to discovery of chlorine, bromine, and iodine, 12, 243 — Analysis, application to microscopic investigations, 11, 256 — Analysis as applied to heavenly bodies, 14, 173, 186, 199, 209, 215; 15, 54; 19, 187 — Analysis in connection with spectrum of sun, 27, 73 — Analysis in its application to Bessemer process for manufacture of steel, 23, 174 — Analysis, lecture experiments on, 51, 57 — Analysis, methods and progress of, 19, 157 — Analysis, new element accompanying zirconium discovered by means of, 19, 121 — Analysis of cadmium (see Cadmium) — Analysis of fatty oils (see Oils) — Analysis of minerals (see Minerals) — Analysis of neodymium (see Neodymium) — Analysis of non-conducting minerals (see Minerals) — Analysis of oils (see Oils) — Analysis of praseodymium (see Praseodymium) — Analysis, peculiarities observed in researches on, 27, 295 — Analysis, quantitative, 39, 124 — Analysis, remarks on some matters relating to, 20, 310 — Analysis, with its applications to astronomy, 15, 259, 276, 285; 16, 8, 20, 47, 71 — Analytical observations, influence of temperature on, 56, 51 — And atomic weight of germanium (see Germanium) — And equivalent of caesium (see Cesium) — Apparatus, measurement of absorption of light by, 22, 35 — Arc, of meteorites, photographic, 69, 80 — Arc, spark lines in, 97, 263 — Artificial, formation with a Fraunhofer line, 19, 40 — Attributed to chlorophyll, 90, 291 — Below red ray, observations by means of effects of phosphorescence, 34, 82 — Blue band of, 4, 303 — Blue, of argon, 72, 99 — Bright line, production by anomalous dispersion, 83, 215 — Caloric, of the sun and of lime-light, 26, 82 — Carbon band, variation due to pres-**
- sure, 91, 211 — Colours (see Colours) — Determining wave-lengths in, 28, 107 — Diffraction grating, uneven distribution of light in, 86, 22 — Discoveries, 7, 140 — Distribution of energy in normal, 44, 143 — Distribution of heat in, 40, 21 — Effects on haloid salts of silver, 44, 297 — Electric, of rare earths of terbium group, 53, 63 — Emission, of erbine (see Erbine) — Fluorescent, of argon (see Argon) — Hydrocarbon flame, origin, 46, 293 — Impressed on silver chloride, 44, 184 — Infra-red region of, influence of molecular grouping of organic bodies on their absorption in, 43, 75, 92 — Line, influence of collisions and of motion of molecules in line of sight upon constitution of, 92, 107 — Lines, 6, 213; 19, 12 — Lines at violet end of, 8, 249 — Lines, illustrating, 20, 23 — Lines, influence of atmosphere on, 11, 103 — Long, of electric light, 7, 147, 162, 185, 198, 208 — Luminous portions, 70, 62 — Measurement of rotatory dispersive power in visible and ultra violet regions of, 99, 13 — Microscope (see Microscope) — Muscular, 30, 41 — Nerve centres for perception of, 66, 305 — Observations, 3, 153; 41, 84 — Observations connected with eclipse of sun, 8, 227, 249, 265 — Of colour of water and ice through great thicknesses, 16, 195 — Of more volatile gases of atmospheric air, 83, 13 — Of a radio-active substance, 79, 13 — Of radium (see Radium) — Of Ramsay's compound of argon and carbon, 72, 99 — Of spark in compound gases, particularly in fluoride of silicon, 6, 282 — Of zirconium (see Zirconium) — Photographic, of comet b, 1881, 44, 183 — Photography and spectroscopy, 80, 273 — Photography of highest rays of, 71, 228, 248 — Photometric measurements in different parts of, 36, 152 — Projected, fluorescence and violet end of, 27, 33 — Rays (see Rays) — Reactions, influence of temperature on sensitiveness and delicacy, 21, 287 — Red, of argon, 72, 289 — Solar (see Solar) — Spark, of dysprosium, ultra-violet, 97, 277 — Spark, of silicon, as rendered by silicates, 83, 133 — Spark, of yttrium, 97, 250 — Thermo- (see Thermo-spectrum) — Top, 97, 285 — Tubes, 93, 303 — Ultra-violet, 91, 61 — Ultra-violet, absorption by crystalline substances, 74, 196, 204 — Ultra-violet, of ytterbium, 94, 37 — Ultra-violet, photography of Bunsen flame reactions in, 70, 103, 148 — Visible, absorption-bands in, 43, 92 — Visible, wave-lengths of prominent lines of, 48, 283 — Work, progress in, 63, 133

- Strontium boride, preparation and properties, **76**, 253
- Strontium bromide, volatility, **100**, 328
- Strontium carbide, solubility of carbon in, **95**, 82—Temperature of formation, **95**, 251
- Strontium chromate, action on mercuric chloride, **75**, 276—And calcium chromate, solubilities of, **66**, 150—Properties, **90**, 305
- Strontium cyanide, manufacture, **3**, 240
- Strontium dioxide, **27**, 201; **28**, 322—Heat of formation of hydrated and anhydrous, **81**, 225
- Strontium formate, hemihydration of, **4**, 310
- Strontium hydrate, **1**, 19
- Strontium hydride, preparation and properties, **85**, 71
- Strontium iodide, anhydrous, **71**, 198
- Strontium iodomercurates, **93**, 146
- Strontium manganate, formation and dissociation, **53**, 167
- Strontium nitride, formation, **99**, 4
- Strontium nitrites, molecular volumes of, **98**, 279
- Strontium oxide and barium oxide, hydrates of, **98**, 120—Heat of formation of anhydrous, **97**, 142
- Strontium oxychloride, **44**, 106
- Strontium peroxide and barium, magnesium, sodium, and calcium peroxides, iodometry of, **89**, 96
- Strontium phosphate, **65**, 298
- Strontium phosphides, crystalline, **80**, 289
- Strontium sulphate, action of heat on, **19**, 199—Discovery in Upper Silesia and its application to agriculture, **15**, 218—In and around Bristol, **13**, 249, 251—Solubility in concentrated sulphuric acid, **45**, 22
- Strontium sulphide, **75**, 299—Anhydrous, crystallisation, **78**, 303—Decomposition, **77**, 95—Duration of phosphorescent power of, **77**, 96—Phosphores-
- cence, **76**, 11; **79**, 155—Phosphorescence, activity of manganese with respect to, **81**, 22—Phosphorescence, colour of, **76**, 47—Phosphorescent, composition of, **78**, 267, 286—Phosphorescent mixtures formed by, **78**, 71—Phosphorescent, prepared from carbonate of strontium and sulphur vapour, **79**, 130—Phosphorescent, properties of, **77**, 201—Phosphorescent, stability, **76**, 195—Preparation, **32**, 137; **58**, 305—Production, **76**, 326
- Strontium titanates, crystalline, **54**, 60, 261
- Stroof, J., Apparatus for concentrating sulphuric acid, **40**, 228
- Strophantite, crystalline, elementary composition, **58**, 59
- Stroud, W., Focometer and spherometer, **76**, 227

- Substance, liquid volume of a dissolved, 94, 302—Radio-active, discovered in Transvaal, 92, 203, 215—Radio-active, spectrum of, 79, 13
- Substances, antiferment, 25, 214—Aromatic, constitution, 11, 117—Aromatic, relation between chemical constitution and colouring power in, 33, 108—Astringent, titrating, 34, 230—Basic, affinities of feebly, 87, 152—Basic, application of powerfully optically active acids to resolution of externally compensated, 80, 263, 264—Bituminous, distillation, 4, 251; 11, 71—Calcareous, artificial production of organic, 25, 143—Colloid, freeing aqueous solutions of, 33, 266—Colloidal, 50, 24—Colloidal, reciprocal influence of dissolved, 91, 71—Colourless and coloured, absorption spectra in relation to chemical structure of, 94, 29, 40—Containing a triple bond, action of ozone upon, 97, 59—Diastatic, testing, 77, 173—Dissolved in liquefied gases, conductivity of, 88, 268—Earthy, constitution of natural, 78, 303—Electrised, manner in which X-rays occasion the discharge of, 74, 73—Elementary, announced from 1877 to 1887, 58, 188—Elementary, origin, 38, 66, 96, 107—Elementary, resolution into their ultimates, 88, 100—Examinations by time method, 35, 215—Explosive (*see* Explosive)—Hydroaromatic, 90, 168; 94, 90, 99; 96, 77, 87; 98, 226, 236—In solution, capillary separation, 67, 261—Indolic (*see* Indolic)—Influence of temperature on optical properties of dissolved, 97, 47—Inorganic, magnetising constants, 80, 290—Inorganic, melting and boiling points, 41, 45—Inorganic, relation between crystalline form and chemical constitution, 95, 272—Inorganic spectra, 56, 50—Inorganic, triboluminescence, 97, 301—Insoluble in water and acids, analysis, 12, 127, 195—Non-miscible, simultaneous distillation of two, 86,

95—Non-saturated, experiments on splitting, 69, 313—Normal, general law of solubility of, 69, 108—Of unalterable constitution, alteration in colours of, 95, 47—Optically active, artificial preparation, 50, 228—Optically active, which contain no asymmetric atom, 99, 166; 100, 253—Organic, absorption of nitrogen by, under influence of radio-active materials, 94, 95—Organic, action of, 34, 140—Organic, action of nitrogen sulphide on, 92, 269—Organic, action of ozone on, 8, 222—Organic, action on ultra-violet rays, 40, 229—Organic, analysis, nature of effect of, 67, 88, 25, 90—Organic, analysis, use of sodium peroxide for, 90, 46—Organic and inorganic, removal in water, 16, 277—Organic, artificial formation, 47, 279—Organic, catalytic activity in, 8, 9—Organic, chlorine, bromine, and iodine in, 75, 150—Organic, classification by series, 4, 191, 249—Organic, combustion, 76, 247, 248—Organic, combustion in aqueous solution, 77, 213—Organic, containing oxygen, additive compounds of halogens with, 91, 103, 197—Organic, containing sulphur, nitrogen in, 82, 99—Organic, decomposition, influence of various substances in preventing, 22, 253—Organic, decarboxylation in, 56, 202—Organic, determining bromine in, 47, 249—Organic, determining chemical affinity of, 99, 115—Organic, determining free nitrogen in, 34, 205—Organic, determining analysis, 16, 96—Organic, determining nitrogen in, 51, 35—Organic, determining sulphur in, 47, 273—Organic, determining water in, 10, 110; 51, 297—Organic, elementary analysis of, 60, 73—Organic, estimation of carbon in, 4, 13—Organic, estimation of halogens in, 94, 188, 205—Organic, estimation of oxygen in, 4, 27—Organic, experiments on crystallisation-point, 70, 317—Organic, freezing-point curves for some binary mixtures of, 87, 268—Organic, freezing-points of binary mixtures of, 92, 268—Organic, having a high boiling-point, vapour densities, 25, 57—Organic, in mandarin orange tree, production and distribution, 90, 244—Organic, in solution, molecular volume, 73, 54—Organic, melting-points, 24, 145; 63, 197—Organic, of high refractive power, 53, 58—Organic, oxidation and sulphonation, 66, 270—Organic, preserving, 4, 69; 27, 142; 43, 178—Organic, preserving from decay, 27, 284—Organic, putrefaction, 27, 112—Organic, relation between chemical composition and density of their solutions, 89, 117—Organic, sulphur in, detection, 19, 179—Organic, sulphur in, determining, 36, 133; 47, 273—Organic, synthesis, 15, 17, 51, 104, 129, 145, 174—Organic, which have the property of optical rotation, synthesis, 27, 84—Organic, yellow, spectra of, and luteine, 19, 215—Property of highly purified, 75, 126—Radio-active, 88, 88, 67, 134, 145, 169, 169, 178, 187, 199, 211, 221, 238, 247, 250, 271; 89, 270—Radio-active, and radium, 86, 250—Radio-active, radiation of, 88, 169—Relationship between constitution of, and fluorescence which they exhibit, 81, 56—Siliceous, pyrometric value, 22, 83—Soluble, carrying down of, by certain precipitates, 97, 275—Specific gravity, 4, 337—Specific gravity of sparingly fluid, 66, 97—Time taken to dissolve, 97, 298—Tinctorial, patents relating to, 55, 13—Undergoing chemical transpositions, changes in total weight of, 93, 271, 272—Vegetable, absolute decomposition of, 92, 212—Vegetable, compound for coating to preserve them

from decay, 9, 189—Vegetable, preserving, 8, 133—Vegetable, treatment and preparation of beverages therefrom, 4, 161—Volatile, apparatus for determining by loss of weight, 93, 62—Weighed in air, correction of weights of, to weights in a vacuum, 100, 300—Which form a continuous series of mixed crystals, spontaneous crystallisation, 97, 263—Which form three different liquid phases, 96, 100—Which should neither be heated nor melted in platinum crucibles, 8, 12—Substitution derivatives (see Derivatives—Laws of, 80, 104)—Succinaldehyde, 25, 227—Succinates, metallic and earthy, solubility in water, 92, 10—Succinamide, melting-point and relative constitution, 19, 252—Succinane, 46, 124—Succinyl derivatives, 20, 251—Succinyl dithiocarbamides, derivatives, 71, 278—Suckert, F., and W. J. Müller (see Müller, W. J.)—Sucrose, 66, 237, 249—Action of acetic and hydrochloric acids on, 71, 215—And sulphuric acid, formation of fructose from, 37, 122—In grapes, 82, 279—In presence of lactose, 79, 56—Polarimetric determination, 96, 292—Sudborough, J. J., Acetylation of arylamines, 83, 128—Action of nitrosyl chloride on unsaturated carbon compounds, 64, 143—Action of sodium ethoxide on dihydrobenzoin, 71, 240—Additive compounds of α - and β -naphthylamine with trinitrobenzene derivatives, 83, 138—Chlorination of aniline, 70, 267—Constitution of camphoric acid, 72, 187—Diortho-substituted benzoic acids, 71, 239—Di-phenyldinitroethylene, 83, 198—Influence of radium radiations on labile stereoisomerides, 90, 31—Nomenclature of acid esters of unsymmetrical dicarboxylic acids, 83, 138—Researches in the stilbene series, 75, 138—Stilbene derivatives, 72, 188—The late Victor Meyer, 76, 265—Sudborough, J. J., W. A. Bone, and C. H. G. Sprankling (see Bone, W. A.)—Sudborough, J. J., and M. J. P. Davies, Esterification constants of substituted acrylic acids, 99, 246—Sudborough, J. J., and T. H. Davies, Diortho-substituted benzoic acid, 91, 159—Sudborough, J. J., and M. E. Feilmann (see Feilmann, M. E.)—Sudborough, J. J., and J. M. Gittins, Esterification constants of normal fatty acids, 97, 81—Esterification constants of substituted acrylic acids, 99, 105—Sudborough, J. J., and H. Hibbert, Additive compounds of δ -trinitrobenzene and alkylated arylamines, 88, 276—Differentiation of primary, secondary, and tertiary amines, 90, 31—Estimation of hydroxyl radicals, 89, 10—Estimation of primary, secondary, and tertiary amines, 99, 142—Sudborough, J. J., H. Hibbert, and S. H. Beard (see Beard, S. H.)—Sudborough, J. J., P. G. Jackson, and L. L. Lloyd (see Jackson, P. G.)—Sudborough, J. J., and T. C. James, Addition of iodine to acetylenic acids, 95, 248— α -Chlorocinnamic acids, 91, 158—Halogen derivatives of cinnamic acid, 100, 231—"Practical Organic Chemistry" (review), 100, 12—Sudborough, J. J., and L. L. Lloyd (see Lloyd, L. L.)—Sudborough, J. J., and G. H. Miller (see Miller, G. H.)—Sudborough, J. J., and W. H. Perkin, jun. (see Perkin, W. H., jun.)—Sudborough, J. J., and N. Picton, Influence of substituents in trinitrobenzene molecule on formation of additive compounds with arylamines, 93, 131

Sudborough, J. J., and D. J. Roberts, Esterification constants of substituted acrylic acids, 91, 158—Sudborough, J. J., and W. Roberts (see Roberts, W.)—Sudborough, J. J., and E. R. Thomas, Esterification constants of substituted acrylic acids, 95, 273—Sudborough, J. J., and J. Thomas, Addition of bromine to cinnamic acid and its esters, 95, 32—Addition of bromine to unsaturated compounds, 95, 273—Sudborough, J. J., and Walter Thomas, Simple method for estimation of acetyl groups, 91, 150—Sudborough, J. J., and K. J. Thompson, Action of caustic alkalis on cinnamic acid dibromide and its esters, 87, 201—Bromocinnamic acids, 88, 252—Sudborough, J. J., and Sir W. A. Tilden, Action of nitrosyl chloride and of nitric peroxide on some members of the olefine series, 67, 108—Sudborough, J. J., and G. Williams, Addition of bromine to the α - and β -chloro- and bromocinnamic acids and their methyl esters, 95, 273—Sudera, Island of, analysis of coal in, 32, 8—Sudet, H., Estimation of manganese by persulphate method, 91, 136—Sudman, H. L., and E. E. Berry (see Berry, E. E.)—Suet of commerce, purification, 24, 312—Sueur, H. R. Le (see Le Sueur, H. R.)—Suez, climate of, 19, 274—Suffolk, W. T., Fluid medium for immersion lenses, 40, 213; 312—Liebig's extract, 21, 296—Microscopic manipulation, 20, 145, 157, 169, 181, 193, 219, 231, 243, 235, 267, 291, 301, 318; 21, 8, 19, 29, 38, 50, 52, 88, 100, 113, 125, 136, 149, 158, 171—Mounting microscopic objects, 76, 277—New methylated spirit, 64, 320—"Spectrum Analysis as Applied to Microscopic Observation" (review), 29, 195—Sugar, 3, 80; 95, 158—Absorption by bone-char, 38, 32; 41, 287—Accompanying sorbite, 79, 23—Action of bone-black on solutions of pure, 41, 60—Action of caustic lime on pure solutions of, 43, 36—Action of copper hydroxide on, 45, 288—Action of heat on, 26, 48—Action of iodine, bromine, and chlorine on, 10, 253—Action of water on, 26, 48; 29, 93—Action on ammoniacal silver nitrate, 73, 81—Added to wine, detection, 55, 201—Adulteration with dextrin, 25, 94—Agar-agar, 51, 130; 57, 82—Alcoholic fermentation, glycol in products of, 57, 62—Alkalinity of various substances on rotary power of, 36, 183—Analysis, 24, 9; 30, 104; 31, 212, 223, 261; 32, 45, 145, 225, 226, 248, 258; 37, 37; 45, 86, 150; 46, 22, 45, 113; 60, 98, 306; 66, 43, 59, 72, 81, 94; 69, 212, 223, 233, 247—Analysis by inversion, 48, 229—Analysis, physical and chemical, 23, 304—Analysis, singular process of, 51, 145—And chloride of potassium, combination, 27, 117—And iodine, compound of, 2, 89—And lime, combinations, 25, 156—And mineral and nitrogenous substances in beet-root, proportion between, 41, 219—And molasses, separating, 10, 92—And starch, 3, 307, 317—And sugar-like bodies, 13, 161—And sulphuric acid, behaviour of alkaloïds towards, 26, 193—Aqueous solutions of, solubility of difficultly soluble compounds in, 19, 226—Artificial, 28, 110; 29, 84; Beet, 33, 210; 76, 288—Beet, chemical studies on, 46, 254; 50, 309—Beet, cultivation, 43, 36—Beet, determining diabetic, 76, 240—Beet, influence of reagents upon formation, 50, 35—Beet, manufacture, 50, 93—Beet works, waste waters of, 51, 13—Beet-root, 17, 83; 21, 13, 120; 24, 86, 145, 289; 31, 196; 40, 181; 95, 36—Beet-root, acid in molasses of, 20, 107—

Beetroot, analysis of ash, 37, 127—
Beetroot, cultivation in Ireland, 23, 200—Beetroot, extraction, 26, 48 —
Beetroot, in California, 23, 70 —
Beetroot, manufacture, 1, 204, 276; 25, 167—Beetroot, manufacture, removal of potassic salts from solutions obtained in, 28, 72—Beetroot, production, 27, 106—Beetroot, quantity of pure sugar in raw, 26, 240—
Beetroot, saline matters which are drawn from the soil and from manures by, 31, 83—Beetroot, works, 22, 19—Beetroot, works, accident at, 22, 105—Beets, cultivation, 37, 133 —
Beets, experiments with, 43, 167—
Beets, manuring, 48, 83 — Beets, raffinose in Amer.can, 75, 193 —
Behaviour of arsenic acid with, 46, 13—Boiling, 11, 22; 19, 31—Bone-black in manufacture of, 43, 36—
Candy manufacture, 37, 30—Cane, absorption of dry ammoniacal gas by, 29, 102—Cane, action of alkaline copper solutions on, 26, 277—Cane, action of bromine on, 40, 211—Cane, and beet juices, analysis, 55, 207—
Cane and beet, analysis, 55, 207—
Cane, and grape, mixtures, action of alkaline copper solution on, 26, 277—Cane, and milk-sugar, determination of mixtures of, 51, 192, 297 — Cane, and rock crystal, rotatory equivalent of, 20, 34 —
Cane, ash, analysis, 37, 76, 127—
Cane, cellulose fermentation of, 34, 63—Cane, chemical manures applicable to, 46, 24—Cane, citric acid from, 71, 296; 72, 100—Cane, constitution of sugars isomeric with, 25, 155 —
Cane, conversion into glucose, 24, 252—Cane, detection of anhydrous glucose mixed with, 47, 252—Cane, detection of glucose in, 46, 24—Cane, detection of starch-sugar mixed with, 41, 221; 42, 305, 326—Cane, estimation, 62, 280—Cane, experiments with, 65, 106—Cane, ferment which inverts, 53, 156—Cane, formation of formaldehyde in solutions of, 98, 288—Cane, glucosic fermentation, 2, 16—Cane, hydrolysis by *d*- and *l*-camphor- β -sulphonic acid, 91, 49—Cane, in its relations to simple and other syrups, 6, 293—Cane, in presence of milk sugar, determination, 74, 293—Cane, in sweet potato, 62, 63—Cane, influence on conductivities of solutions of potassium chloride, hydrogen chloride, and potassium hydroxide, 83, 223—
Cane, inversion by acids and salts, 32, 271—Cane, inversion, influence of neutral salts on, 53, 264—Cane, inversion, spontaneous, in aqueous solution, 67, 168—Cane, manufacture and refining, 11, 26, 51—Cane, methylation of, 92, 233—Cane, modification under influence of alcoholic ferments, 8, 121—Cane, products of fermentation of, induced by arabic soil, 48, 213—Cane, reagent for, 60, 282—Cane, reversions of, 54, 136—
Cane, rotatory power, 34, 110—
Cane, solubility in water, 44, 82—
Cane, specific rotation, 39, 84—
Cane, specific rotatory power, 36, 52; 42, 177, 196, 208, 221, 233, 257, 269, 328—Cane, succrate of hydrocarbonate of lime applied to refining of, 24, 108—Cane, transformation in crude sugars and in sugar-cane, 33, 64—Cane, transformation into male and pectic acids, 4, 291—Cane, yeasts, used for fermentation of cider, 87, 275—Colour, preparation from glucose, 26, 216—Compounds with acids, 3, 15—Constitution, 2, 179—
Copper test for, 4, 286, 290—Crude, acid in, 27, 23, 36—Crude, determination of yield of, 30, 82—Crushing and making, 21, 216—Crystalline, rotatory power, 31, 281—Crystalline, treating to render it more suitable for fermentation and conversion into alcohol and vinegar, 9, 12—Crystal-

line, transformation into inactive glucose in crude cane-sugars, 35, 155—Crystallisable, influence of various substances on, 39, 264—Crystallisation, 34, 63—Crystallised, 20, 159; 98, 117—Crystallised, action on cupropotassic reagent of Barreswil, 26, 215—Crystallised anhydrous, 45, 128—Cupric test-pellets for, 41, 63, 78, 91—Detection, 74, 293—Determination, 36, 11; 47, 72; 48, 140—
Determination by fermentation, 61, 37—Determination by means of Fehling's solution, 45, 221; 53, 23; 59, 36; 91, 299; 92, 20; 96, 21—Determination by means of a salt of iron, 28, 240—Determination by polarisation, 53, 23—Determination, volumetric, 74, 51—Determination, volumetric, by ammonio-cupric solution, 71, 235, 257—Determinations, comparative, 47, 247—Diabetic, determining, 76, 240—Electric, 59, 14, 35 —
Extraction, 17, 299—Estimation on by ammoniated cupric test, 39, 77—
Estimation by stannous chloride, 85, 71—Estimation, gravimetric, 75, 191—
Estimation, iodometric, 82, 191—
Estimation of pure, in raw and refined commercial sugars, 40, 74, 97, 107, 131—
Estimation, quantitative, 21, 143—
Estimation, use of cupric liquors for, 27, 21—Estimation, volumetric, 27, 269—Examination of, 53, 73—Experiments on, 12, 259—
Extraction, 12, 10 —
Extraction by baryta, 24, 264—Extraction from liquids, 21, 226—Feeding cattle on, 52, 284; 54, 201—Fermentation, 21, 47—Fermentation, products of, 55, 212—Formation of acetyl from, 48, 270—Formed from agar-agar, 51, 130 —
From cane, saline compounds of, 23, 200—From melons and beet, 23, 278—From molasses, 26, 39—From sorb berries, 90, 304—From sweet potatoes, 20, 94—From treacle, cheap process for, 44, 37—Glucose, and dextrine added to wines, detection, 55, 203—Glucose, manufacture, 77, 106—Glycoside- (see Glycoside-sugar) —
Grape, and copper, combination, 31, 261—Grape, and its isomers, configuration of, 66, 247—Grape, and milk sugar, estimating, 77, 141; 79, 29 —
Grape and milk sugar, examination, 28, 170—Grape anhydrous, crystallised, 45, 128, 179 —
Grape, crystallised, 36, 87—Grape, decomposition, 95, 36—Grape, decomposition in alkaline solution by oxide of copper, 19, 250—Grape, detection along with dextrine and analogous bodies, 28, 226 —
Grape, estimation, 22, 36; 47, 57—Grape, extracting, 2, 297—Grape, in beet-root, 30, 82—
Grape, preparation, 46, 208—Grape, preparation of chemically pure, 29, 28—Grape, quantitative determination, 93, 126—Grape, test for, 3, 224 —
Grape, to recognise beside cane-sugar, 5, 98—Grape, to reduce telluric oxide, 22, 312—Grape, wines mixed with, 42, 318—Group, new synthesis in, 75, 161—In barley, determination, 13, 161, 191—In beer, 12, 206—In beetroot, determination on, 40, 181—In beetroot, distribution, 30, 251—In beets, 49, 50—In blood, determination, 39, 218—In blood, formation, 33, 191—In calcium saccharate, determination, 47, 118—In cereals, 59, 180—In chocolate, estimation, 79, 119—In diabetic urine, determination, 47, 179—In diabetic urine, estimation, 2, 261—In fruits, 32, 19—In glycerine, detection of, 8, 227—In green malt, determination of pre-existing, 74, 293—In liqueurs, determination, 58, 196—In malt, 45, 198—In malt, determination, 13, 161, 191—In melons, 20, 249—In milk of buffalo cow, 89, 262—In nectar of flowers, 38, 93—In orange-peel, 78, 278—In raw beetroot sugar, quantity, 26, 240—In roasted coffee, de-

tection, 63, 249—In soap, estimation, 64, 28—In sweet wine, 78, 59—In urine, 3, 29—In urine, cause of error in testing for, 81, 251—In urine, chloroform a test for, 10, 74—
In urine, detection, 25, 272; 46, 78; 58, 109, 69, 117, 70, 48—In urine, detection and determination, 67, 251 —
In urine, detection, possible error in, 71, 245—In urine, detection with alkaline solution of copper, 47, 119—
In urine, estimation, 2, 35—In urine of fox, 4, 247—In urine, picric acid as reagent for, 48, 214—In urine, reagent for, 54, 166—In urine, test for, 2, 329—In vine leaves, 28, 293 —
In wine, normal quantity, 20, 310 —
Industry, bichromate of lime for, 25, 214—Influence of defoliation of beet on yield of, 33, 18—Invers on, 89, 156—Inversion by carbonic acid, 45, 100—Inversion by salts, 73, 161, 173; 74, 203, 215, 231, 232, 249—
Invert, alcoholic fermentation, 61, 228—Invert, composition, 52, 270—
Invert, experiments, 72, 236—Invert, specific rotatory power, 42, 177, 196, 208, 221, 233, 257, 269, 328; 65, 165 —
Inverted, 20, 262, 285; 31, 250; 59, 72—Inverted and neutral, 40, 205—
Inverted and ordinary, influence of temperature on optical rotatory power of, 24, 241—Inverted and ordinary, separation on, 21, 22—
Inverted, deviation of polarised light by solutions of, 39, 212, 234—
Inverted, influence of lead acetates on determination of, 72, 186—Inverted, nature of, 52, 224—Inverted, reduction of oxide of copper to the state of metal by means of, 18, 180 —
Liquor, tell-tale, from safes of two vacuum sugar-pans, analysis, 33, 5 —
Liquors, use of acid n.trate of mercury in analysis, 87, 8—Luminescence, use of ultramarine in, 12, 302—
Luminosity produced by striking, 78, 156—Making, titration for estimating degree of alkalinity of beet-root juice in, 27, 204—
Manufactories in France, 21, 240—Manufacture, 6, 215; 7, 290; 17, 21; 19, 202; 21, 143; 38, 307—Manufacture and refining, 19, 107; 21, 252; 25, 27, 39, 78, 104, 111, 119—Manufacture, application of barytes and barytic products in, 8, 33—Manufacture, chemistry of, 18, 287—Manufacture, conditions of, 31, 22—Manufacture, employment of bi-phosphate of alumina in, 12, 10—
Manufacture, improvements in, 11, 302—Manufacture in France, and experiments concerning function of lime in process of defection, 33, 210 —
Manufacture, influence of chemical knowledge on, 17, 60—
Manufacture, influence of gypsum in, 43, 36—Manufacture, nutritive value of divers roots used for, 20, 228—Manufacture, prize essay, 25, 106—Manufacture, relation between real ash and sulphated ash in products of, 30, 227—Manufacture, substitution of alum-shale for bone-black, 19, 249—Manufacture, sulphurous acid in, 7, 258—Materials, analysis, 82, 169—Measuring in manufacture of effervescent wines, 62, 297—Milk, and calcium hydroxide, products from, 98, 210—
Milk, and cane-sugar, determination of mixtures of, 51, 193—Milk, and galactose, 51, 118—Milk, and grape sugar, estimating, 77, 141—Milk, ash in commercial, 74, 50—Milk, behaviour with permanganate of potassa, 26, 229—Milk, cane-sugar in presence of, 74, 293—Milk, determination, 74, 49—Milk, estimation, comparison of methods, 63, 191—
Milk, in plants, elements of, 53, 167—Milk, in a juice of vegetable origin, 24, 144—Milk, lactic fermentation, 37, 123—Milk, nitrogenous compounds, 24, 263—Milk, partial synthesis, 40, 156; 41, 48—

- Milk, reductive action on alkaline solution of copper, 39, 195—Mixed with lime, products of distillation, 25, 265—Neutral, 40, 205—Neutral, inactive of, 57, 170—New kind, 1, 45—New, with an aromatic nucleus, 60, 293—Non-crystallisable, in formation of molasses, part of, 23, 95—Obtaining from molasses, strontianite for, 45, 141—Of future, 11, 48, 82, 95—Of populus, 40, 301—Of snow-berries, 52, 189—Optically inactive, 36, 167—Optically neutral, preparation, 21, 287—Ordinary and inverted, influence of temperature on the optical rotatory power of, 24, 241—Ordinary and inverted, separation, 21, 287—Organic base from, 25, 299—Oxidation, 26, 181—Oxidation, acids obtained from, 26, 58—Palm, from Calcutta, 40, 206—Potato, injurious action of, 44, 192—Preparation of glycolic acid from, 43, 174—Presence of tin in certain kinds, 59, 255—Raw, obtained by use of centrifugal machines, 23, 32—Raw, preserving samples for quantitative analysis, 20, 228—Raw, valuation, 33, 205—Reactions, 55, 230—Reagent for, 86, 276—Reductive, in commercial products, determination, 36, 223—Reductive, in commercial products, optical inactivity of, 33, 108—Reductive, transformation of saccharose into, during refining, 34, 71—Refineries, revivification of bone-black by ammonia in, 25, 34—Refinery, notes from laboratory of a, 21, 1, 25, 37, 49, 61—Refining, 10, 263; 17, 146, 276; 23, 180, 204; 26, 217—Refining, action of bone-black in, 25, 106—Refining, animal charcoal used in, 17, 249; 24, 46—Refining, applying osmose to, 26, 95—Refining, chemical researches on, 17, 249—Refining, chemistry of, 2, 40, 18, 287; 19, 78, 96, 130, 153, 166, 177—Refining, fluosilicic acid for, 19, 250—Refining, method of applying bone-black in, 24, 241—Refining process, 18, 93—Refining process, Dr. Schwarz's, 10, 120, 131—Rotatory power of, influence of alkalinity of various substances on, 36, 182—Salts of, action of water and solutions on, 29, 92—Series, composition, 19, 190—Series, synthetical experiments in, 62, 8, 20—Solutions, decolourising, 9, 11—Solutions, effect of boiling down in vacuum-pans, 26, 59—Solutions in mixture of alcohol and water, osmotic pressure of, 92, 257—Solutions, purification for optical saccharometer, 25, 306—Starch, conversion into a sweet, hard, granular condition in which it resembles ordinary sugar, 8, 42—Starch, detection of honey sophisticated with, 42, 271—Starch, in urine, determination, 50, 177—Starch, mixed with cane sugar, detection, 41, 221; 42, 305, 326—Starch, syrup, mixed with sugar-house molasses, detection, 44, 265—Starch, technically pure, and wine obtained with its use, 74, 28—Syrups, bleaching by ozone, 40, 86—Testing glycerine for, 19, 71, 167—Tests, 37, 273; 38, 188—Tests, thymol and menthol, 55, 239—Three kinds in one solution, estimation, 21, 97—Tin in, 59, 255—Transformation of skins of snakes into, 8, 121—Value of beetroots for, 24, 241—Wines of, 47, 45—Wines, manufacture, 55, 128; 56, 139—With aromatic nucleus, 60, 293—Works, determination of the non-crystalline matter of, 61, 62—Works products, nitrites in, 87, 31—Works, purifying waste-waters from, 43, 118; 52, 12
- Sugar-cane, alcoholic fermentation of juice of, 59, 265—And syrups, 6, 293—At Gadeloupe, culture of, 47, 12—Cultivation in New Caledonia, 20, 250—Defecation with magnesia, 36, 247—Juice, extraction by new apparatus, 34, 152—Juice, organic acids in, 35, 104—Juice purification, succrate of hydrocarbonate of lime applied to, 23, 19—Localisation of phosphates in, 86, 278—Principal amide of, 77, 75
- Sugar phenylurethanes, 89, 179
- Sugars, 26, 144; 27, 22; 54, 213—Acetic derivatives of, 20, 203—Acetic ethers of, 71, 88—Action of alkalies on, 81, 89—Action of copper hydroxide on, 51, 35—Alkylated, addition of alkyl halides to, 94, 59—Alkylation of, 86, 191; 88, 20—Analysis, 24, 9; 31, 212, 261; 60, 306—Analysis of crude, 39, 25—And allied substances, notation for indicating configuration of, 99, 124—And furfuric compounds, relations between, 60, 233—Beetroot, vanillin in, 42, 109—Cane, and inverted, action of light and heat on, 47, 277—Colour reactions of indolic substances with, 99, 192—Decomposition under influence of acids, 74, 233—Detection by polarised light, 46, 291—Determination, 74, 119, 107—Determination by Barreswill's method, 27, 256; 28, 44—Determination by normal solutions, 35, 11—Determination of mineral matters in, 62, 64—Determination, volumetric, by an ammoniacal cupric solution, 71, 195—Determination with solutions of copper potassium carbonate, 65, 37—Estimation of glucose in, 22, 120—Estimation of value for commercial purposes, 21, 12—From cellulose, 84, 7—From quercitrin, 60, 317—From trioxymethylene and sodium sulphite, synthesis, 89, 86—In blood, determining, 39, 218—Isomeric with cane sugar, constitution, 35, 155—Maple, and syrups, composition of, 51, 88—Multitriation, 69, 120—New method of determining constitution, 99, 203—Nomenclature of, 54, 37—Obtained from manna, mannetetrose, and mannitriose, 87, 142—Of certain fungi, 59, 168—Of hesperidine and isohesperidine, 57, 263—Other than xylose and dextrose in products of hydrolysis of wood from trunks of trees, 83, 249, 256, 270, 282, 292—Production, 83, 83—Raw, ash of, determination, 61, 211, 222—Raw, cleansing, 21, 130, 178—Raw, commercial analysis, 34, 40—Raw, composition, 27, 142—Raw, incineration, 52, 118—Reducing, colour reaction of, given by alkaline *m*-dinitrobenzene, 94, 315—Reducing, extraction, 86, 318—Reducing, gravimetric estimation, 81, 71—Reducing, separation and isolation, by means of hydrazine, 90, 294—Refining, substitution of borate of lime for lime in, 35, 118—Rotatory powers of, modifications produced by inactive substances on, 9, 187—Synthesis, 66, 165, 179, 194—Tinted with ultramarine, 38, 26—Transformation, 75, 190—Vanilla in raw, 43, 118—Vanillin in crude, 41, 284—Vanilline in raw beetroot, 42, 119

- Sulphate, ammonic, electrolysis, 54, 270—And chromous chloride, preparation and properties, 43, 222—Argentite, molecular weight, 96, 201, 215—Chinidin, test for, 72, 41—Chloro- (*see* Chlorosulphate)—Chromic, 92, 65—Chromic, reaction of green, 91, 304—Chromous, ammoniacal, 82, 71—Cupri-ammonia, influence of temperature on dissociation of, 84, 21—Cupric, solution and magnesium, zinc, and iron, reaction between, 80, 303—Cuprosodic, conditions of formation and solubility, 89, 224—Cuprous, 87, 168; 95, 59; 99, 288—Cuprous, ammoniacal, 97, 119—Cuprous, existence of, 77, 23—Diethyllic, formation, 24, 229—Ethylic, action of ethylic iodide and zinc on, 15, 227—Ferric, 91, 201—Ferric, and sulphuric acid, combination, 88, 83—Ferric, basic, 92, 35—Ferric, hydrated, molecular transformations, 92, 70—Ferric, molecular states of anhydrous and anhydrous, 96, 47—Ferric, purification of sewage by, 66, 257—Ferric, reduction in volumetric analysis, 60, 93, 159—Ferric solutions, hydrolysis of very concentrated, 92, 45—Ferrous, 59, 84, 96, 106, 229—Ferrous, action on plant life, 49, 234; 50, 167, 193—Ferrous, action on soils, 59, 84, 167, 192, 229—Ferrous, and copper sul-

- phate, interaction in solution of, **96**, 201—Ferrous, antiseptic properties, **53**, 255—Ferrous, behaviour on keeping, **45**, 287—Ferrous, in agriculture, **52**, 115—Ferrous, oxidation by seawater, **74**, 316—Ferrous, preservation, **47**, 165—Ferrous, test for nitric acid, and its employment as an approximate indicator of the amount of nitrates in potable water, **28**, 248—Ferrous, test to estimate oxidised nitrogen in potable waters, **28**, 283—Ferrous, use in estimation of chlorates and bromates, **90**, 105—Furnaces (see Furnaces)—Hydro- (see Hydrosulphate)—Hydrogen-phenyl- (see Hydrogenphenylsulphate)—Lead-potassium (see Lead-potassium)—Manganous solubility, **84**, 156—Manufacture of soda from, **43**, 72—Mercuric, **70**, 246—Mercuric, and fatty aldehydes, combinations, **79**, 131—Mercuric, dissociation by water, **71**, 221—Mercurous, action of water on, **81**, 299—Mercurous, for standard cells, **100**, 150—Of dimercurammonium series, **31**, 5—Of soda-crystals, copper in, **42**, 241—Sodic, action of nuclei on, super-saturated solutions of, **22**, 242, 253, 215—Sodic, in solution, constitution, **20**, 267—Sodic, transition temperature, **78**, 229, 238—Sodium ethylthio- (see Sodium)—Solutions, solubility of cupric hydroxide in ammoniacal, **99**, 106—Stannic, compounds with sulphates of alkaline earths and with lead sulphates, **94**, 243—Titanous, electrolytic preparation, **90**, 213—Tricupric crystalline, **51**, 199—Uranous, 180—Morphism and composition, **65**, 230—Water, calcic, from Lautaret, composition, **83**, 203
- Sulphates**, **38**, 232; **39**, 228—Aceto- (see Acetosulphates)—Acid and basic, of neodmium and praseodymium, **85**, 170—Acid aniline ortho- (see Aniline)—Action of dry gaseous hydrochloric acid on, **39**, 74—Action of hydrochloric acid gas on, **81**, 122—Action of sulphuric acid on solubility, **55**, 128—Alkalimetric determination, **41**, 114, 158—Alkaline earth (see Alkaline)—And chlorides in aqueous solution, is there a constant relation between the heats of formation of? **57**, 36—And sulphites, thiosulphates, and sulphides, detection in presence of each other, **72**, 101; **78**, 213—Anhydrous cupro-ammonium, **86**, 220—Basic aluminic, **15**, 293—Calcium ammonium, **95**, 103—Ceric, **84**, 232—Chromic, condensed **95**, 83—Chromic, constitution, **93**, 127—Chromo- (see Chromosulphates)—Compounds of, in fixed equivalent proportion, **12**, 240—Conjugated, **55**, 184—Conversion of hyposulphites into, **50**, 58—Copper glycooll (see Copper)—Cryoscopy of **91**, 118—Crystalline basic, **54**, 84—Crystalline basic cupric, **52**, 2—Decomposing action of high temperatures on, **15**, 324—Decomposition, **71**, 17—Decomposition temperatures of, **56**, 121—Decreasing solubility of, **57**, 62, 141—Determination, **89**, 54—Determination, volumetric, **59**, 73—Determination without standard solutions, **54**, 233—Double, **89**, 172, 184; **100**, 177—Double, modifications of, **52**, 247—Double, water in, **24**, 280—Earthy, separation of, **18**, 83—Ferric, **46**, 36—Ferrisodic, preparation, **91**, 305—In nitric acid, **61**, 289, 301—In waters, determination, **38**, 70—Iridodi- (see Iridodisulphates)—Isomeric anhydrous, of form $M^2SO_4.R_2SO_4$, **86**, 278—Lead in, electrolytic, estimation, **81**, 226—Mercuric, capacity of organic bodies for combining with, **73**, 242—Metallic, action of hydrochloric acid on, **38**, 178—Metallic, action of sulphurous anhydride on, **82**, 256—Metallic, action on para-
- tungstate of potassium, **79**, 11, 242—Metallic, and caustic alkalis, interaction, **96**, 290—Metallic, decomposition, **75**, 59—Molecular heats and volumes of the rare earths and their, **42**, 110—Multi-p.e., **52**, 315—Of form $R_2SO_4.2MSO_4$, **80**, 300—Of rare earths, **93**, 105—Of sesquioxides of aluminium, chromium, and iron, action of hydrochloric acid on, **87**, 74—Of vitriol group, **75**, 163—Of zinc (see Zinc)—Potassium nitrohydroximido- (see Potassium)—Pyro- (see Pyrosulphates)—Reactions of ferric oxide on, at high temperatures, **51**, 50—Reduction by living beings, **46**, 254—Reduction by sulphuraires, **47**, 34—Soluble, determination by standard solutions, **34**, 9—Table of, **68**, 42—Thallous, **88**, 11—Thio- (see Thiosulphates)—Use of chromates of barium and of silver in determination of, **91**, 3—Volume constitution of, **44**, 13—Volumetric estimation, **100**, 313—Volumetric process for, **19**, 116—Yellow and red, oxides of cerium and, **1**, 130
- Sulphation in presence of mercury**, **96**, 33
- Sulphazotates**, **69**, 201
- Sulphetheric acids** (see Acids)
- Sulphydantoic acid** (see Acid)
- Sulphydantoin**, **28**, 83; **35**, 217—Decomposition by barium hydrate, **40**, 253
- Sulphhydrates**, reaction of, **47**, 106
- Sulphhydrocarbid** obtained from mass of meteoric iron, **32**, 313
- Sulphide**, acetic, **59**, 240—Ammoniac, vapour density, **18**, 31—Analysis, **77**, 108—Antimonic, precipitation from boiling solutions, **22**, 190, 259—Argentite, electric and chemical deportment of, **36**, 36—Arsenious, properties of colloidal, **12**, 257—Carbonic, effect on radicular system of the vine, **39**, 251—Carbonylic, **17**, 268—Cobaltic, **16**, 256—Cupric, existence of, **73**, 262—Cuprous, and mercuric sulphide, fusibility of mixtures formed by antimony sulphide with, **91**, 293—Disodic, formation, **27**, 45—Ethyldi- (see Ethyldisulphide)—Ferrous, in char, **30**, 171, 205, 217, 225, 233, 239, 240, 283, 293—Hydric, manipulation, **28**, 64—Hydric, qualitative analysis of a solution containing, **72**, 63—Manganic, oxidisability of, **36**, 61—Mercuric, and cuprous sulphide, fusibility of mixtures formed by antimony sulphide with, **91**, 293—Mercuric, occurrence in nature of amorphous, **25**, 71—Ores, smelting, Holloway's process, **40**, 101—Oxy- (see Oxy-sulphide)—Phosphoric, action on benzophenone, **53**, 260—Sesqui- (see Sesquisulphide)—Silicon chloro- (see Silicon)—Solutions, indicators used in titrating with standard, **68**, 236—Solutions, physical composition of, **65**, 46—Stannous, action of alkaline sulphides on, **45**, 263—Stannous, action of hydrochloric acid on, **48**, 34—Strontic, production of phosphorescent, **77**, 95
- Sulphides**, **13**, 45—Action of vapour on, at a red heat, **94**, 46—Alkalic, electrolysis, **15**, 270—Alkaline earth (see Alkaline)—Analysis, **26**, 314—Analysis, use of bromine in, **42**, 259—And arsenides, antimonides, and double compounds with metals, recognition, **65**, 44, 53—And arsenides and sulpharsenides, crystallographic and chemical relations, **29**, 197—And hydrogen dioxide, interaction, **98**, 256—And sulphates, sulphites, and thiosulphates, detection in presence of each other, **78**, 213—And sulphydrates, polysulphides, and hyposulphites coexisting in solution, estimation, **83**, 154—Arsenical, decomposing, **56**, 193—As negative poles in battery, **23**, 291—Carbonic, **15**, 134—Colloidal,
- examination of, **89**, 59—Cyano- (see Cyanosulphides)—Determination of sulphur in, **43**, 89—Determination of sulphur in native, **40**, 205—Di- (see Disulphides)—Dialkylidi- (see Dialkylidisulphides)—Dissociation in presence of boiling water, **37**, 250—Earthy, decomposition by solution in a large bulk of water, **18**, 294—Estimation, **12**, 109—Estimation of sulphur in, by stannous chloride, **85**, 71—Formation by compression, **48**, 66—Formation by pressure, **49**, 93—Formation heat of, **50**, 47—Hydro- (see Hydrosulphides)—In sulphurated springs, **31**, 218—Luminous, of M. E. Becquerel, **35**, 63—Manufacturing, **35**, 188, 208—Metallic, **59**, 229, 301—Metallic action of acid vapours on, **75**, 207—Metallic, action of chloride of phosphorus on, **7**, 72—Metallic, action of citric and tartaric acids on, **3**, 65—Metallic, action of copper chlorides on, **51**, 238—Metallic, action of soluble, **45**, 257—Metallic, action of water on, **40**, 228—Metallic, as electrodes, **77**, 189—Metallic, decomposition, **30**, 186—Metallic, decomposition of minerals and industrial products by, **98**, 61, 76—Metallic, decomposition with hydrochloric acid, **30**, 65—Metallic, detection of small quantities, **71**, 6—Metallic, dissociation, **38**, 152, 190—Metallic, dissociation in fused, **58**, 87—Metallic, dissociation of ammoniacal salts in presence of, **36**, 54—Metallic, electrical conducting power of, **23**, 181—Metallic, electrochemical production of, **74**, 191—Metallic, electro-motive power, **23**, 255—Metallic, formation, **29**, 51, 176; **30**, 186; **76**, 23—Metallic, oxidation, **35**, 188—Metallic, precipitation and re-dissolving, **94**, 266—Metallic, properties, **36**, 109—Metalliferous, concentration by flotation, **93**, 9—Mineral, artificial production, **66**, 287—Mineral, formation, **64**, 85—Native, desulphuration of, **3**, 14—Natural, **35**, 165—Natural, behaviour with iodine and other reagents, **38**, 168—Opening up, **61**, 114—Oxidation, **62**, 206—Oxy- (see Oxy-sulphides)—Phosphorescence, action of very low temperatures on, **91**, 70—Poly- (see Polysulphides)—Quantities formed by successive compression of their elements, **50**, 70—Reduction by means of metallic calcium, **95**, 296—Separation of, **60**, 185—Soluble, in crude sodas, estimation, **6**, 313; **7**, 11—Treating, Bessemer process, **39**, 94, 103—Use of bromine in analysis of, **42**, 259
- Sulphinic acid**, **83**, 252
- Sulphindigotic acid** (see Acid)
- Sulphine base**, optically active, **82**, 239—Compounds, **20**, 250—Compounds of thiourea, **37**, 275—Salts containing the ethylene radical, **53**, 129—Salts, triethyl- (see Triethylsulphine)—Trimethyl- (see Trimethylsulphine)
- Sulphines**, **31**, 280; **33**, 18; **58**, 37—Aromatic, **31**, 42
- Sulphinic acid** (see Acid)
- Sulphinic acid**, benzoic, **55**, 76—Benzoic, chemistry of, **92**, 292—Orthobenzoic, **72**, 253
- Sulphines**, **55**, 76
- Sulphite**, cuproso-cupric, **44**, 273—Reduction of tetrathionate to, **92**, 58—Sodium hydrogen (see Sodium)—Tetrazoditoly- (see Tetrazoditoly-sulphite)
- Sulphites**, **56**, 35; **60**, 84, 97, 185—Action on nitroprussiates, **85**, 287—Analysis, **26**, 314—And hyponitrites, conversion of Pelouze's nitrosulphates into, **51**, 124—And nitrites, interaction between, **81**, 152—And sulphates, thiosulphates, and sulphides, detection in presence of each other, **78**, 213—Antiseptic properties, **16**, 169—Cuproso-cupric, **45**, 263—

Beds of Island of Saba, 31, 22.
 Behaviour towards water, and vapour pressure of, 96, 306.—Black, of Magua, 61, 50.—Black substance produced from, 41, 244.—Blue or green modification, 87, 215.—Boiling point 63, 1.—Calcium compounds, 51, 259.—Californian, 4, 320.—Cell, with a solid electrolyte, generation of a voltaic current by, 52, 219.—Cells, experiments with, 52, 22.—Changes it undergoes when in contact with certain soils, 20, 249.—Combustion, 48, 105.—Combustion-heat of 43, 258.—Combustion in air and oxygen, 95, 230.—Combustion in calorimetric bomb, 92, 46.—Compounds, 24, 157.—Compounds, asymmetric optically active, 82, 238.—Compounds, constitution of primuline and allied, 63, 177.—Compounds, detection by blowpipe, 27, 321.—Compounds, gaseous, estimation, 81, 114.—Compounds in atmosphere, estimation, 70, 288.—Compounds in Canadian petroleum, 94, 186, 191, 200.—Compounds in caustic soda-lye, oxidation, 49, 136.—Compounds of barium, 53, 178.—Compounds of molybdenum, 50, 225.—Compounds of silicon, 46, 259.—Compounds of the cruciferae, 60, 185.—Compounds of tungsten, 53, 264.—Compounds of uranium, 9, 214; 13, 237.—Compound, organic, new class of, 9, 105.—Compounds organic, preparation by means of hyposulphite of sodium, 22, 35.—Compounds with iodides, 97, 218.—Condition in which it exists in coal, 41, 201.—Containing ores, calcination of, 23, 155.—Crystalline, superfusion of, 52, 11.—Crystallisation, 13, 88, 97; 17, 251.—Decomposition of water by, 8, 38.—Deposit, 22, 178.—Deposits at Kalamaki, 27, 137.—Deposits of Iceland, 27, 111, 126.—Deposits of Island of Saba, 20, 214.—Derivatives of cymol, 27, 137.—Derivatives, quadrivalent, spiro configuration, 81, 80.—Destiny, during germination of peas, 52, 284.—Detecting free, 70, 269.—Detecting by hydrogen compound, 10, 103.—Detecting by means of potassium or sodium, 19, 179.—Determination, 28, 226; 29, 271, 68, 219; 75, 111, 89, 41, 54.—Determination, quantitative, 8, 285; 38, 210; 54, 325; 64, 217.—Determination, volumetric, by means of baric chloride, 59, 41.—Determination, iodine solutions for, 75, 218.—Determinations, use of sodium carbonate and zinc oxide in, 95, 240.—Dilatation of fused, 37, 51.—Disinfection by burning, 62, 155.—Distillation with superheated steam, 40, 229.—Dye-stuffs, 95, 107.—Economy of, 1, 310; 2, 15.—Effects on plants, 49, 265.—Electrical machine, 11, 71.—Estimation, 3, 67; 20, 47; 46, 217; 54, 266.—Estimation by barium, 24, 61, 66, 140, 171, 220.—Estimation, gravimetric, 86, 223.—Estimation in presence of iron, 81, 60.—Estimation in presence of sulphuric acid, 14, 48.—Estimation, Sauer's method, 36, 7.—Experiment on, 41, 110.—Extractable by alcohol from vulcanised rubber, instance of possibility of deception by, 55, 179.—Extraction, 30, 208; 33, 10.—Extraction from alkali waste, 33, 172.—Extraction from oxysulphure of calcium, 9, 11.—Fixation on benzol and toluen, 37, 203.—Flame, 31, 99.—Formation of organic compounds containing, 83, 71.—Free, in a meteorite, 7, 130.—From alkali or blue waste, 11, 58.—From coke, 23, 252, 263.—From pyrites, 34, 218.—Gases, controlling escapes of, 36, 49.—Gases, prevention of escape, 39, 226.—Group, metalloid of, 3, 303.—Group, new element of, 3, 193.—Halogen (*see* Halogen)—Halogenous derivatives of, 54, 98.—Has it been decomposed? 65, 204.

—Hydrocarbon obtained from rosin oil by heating with, 40, 150.—Limiting-point, 61, 85, 95, 108, 125, 153; 95, 169; 96, 25.—Importation, 30, 240.—In animal charcoal, estimation, 21, 35.—In antiphyloxic mixtures, estimation, 79, 280.—In asphalt, determination, 79, 111.—In Borden spring at Luchon, 87, 46.—In burnt pyrites, determination, 60, 293.—In California, 4, 320.—In caoutchouc, estimation, 1, 300.—In carboniferous substances, determination, 46, 13.—In cast-iron, 7, 87; 23, 61, 132, 143, 204; 74, 76, 257, 75, 104; 85, 191.—In cast-iron, estimation, 21, 107; 29, 134; 81, 54.—In cast-iron, estimation by Elliott's method, 25, 11, 35.—In cast metal, determination, 72, 15.—In coal, 41, 201.—In coal, determination, 5, 245; 30, 211; 31, 261; 40, 237, 253; 43, 89; 59, 108.—In coal, estimation, 24, 76; 26, 145; 27, 53; 83, 192; 82, 206.—In coal-gas, 21, 204; 22, 203, 307; 33, 210.—In coal-gas, estimation, 7, 73; 17, 89, 259, 292.—In coals, cokes, and ores, estimation, 78, 254.—In coke, determination, 5, 245; 30, 211; 31, 261; 38, 147; 43, 89; 58, 65.—In coke, estimation, 24, 76; 33, 288, 300.—In combustibles, determination by Eschka process, 67, 90.—In commercial irons and in sulphides decomposable by acids, determination, 58, 208.—In commercial lead, determination, 72, 235.—In copper, determination, 62, 239.—In copper pyrites, estimation, 5, 45.—In dense coke, estimation, 23, 288, 300.—In fuel, determination, 68, 49.—In fuels in Eschka's process, detection, 66, 169.—In green rape, distribution, 89, 55.—In Iceland, 30, 72; 40, 31.—In illuminating gas, 42, 303.—In iron, 38, 145; 58, 255.—In iron, colorimetric estimation, 54, 158.—In iron, determination, 21, 147; 58, 63, 71, 95; 59, 107; 75, 47, 109; 90, 230, 326.—In iron, estimating, 17, 22, 207; 28, 229; 46, 199; 72, 229.—In iron ores, determination, 54, 38.—In iron pyrites, determination, 42, 317.—In iron pyrites, estimation, 5, 45.—In its relations to other elements, 94, 132.—In leaden chambers, continuous combustion, 15, 325.—In Louisiana, 20, 167.—In mineral waters, estimating, 12, 307.—In minerals containing iron, estimation, 17, 291.—In minerals, determination, 18, 15.—In minerals, estimation, 17, 207.—In naphtha, estimation, 82, 12.—In native sulphides, determining, 40, 205.—In oils, 71, 296.—In ores, detection, 28, 227.—In ores, estimation, 74, 189, 224; 78, 254.—In organic bodies, detection, 41, 101.—In organic bodies, determination, 58, 96.—In organic bodies, oxidation, 62, 48.—In organic compounds, determination, 18, 7.—In organic compounds, estimation, 27, 53.—In organic matter, determining, 97, 167.—In organic, substances, detecting, 19, 179.—In organic substances, determining, 36, 133; 47, 273; 68, 186, 281; 72, 318.—In organic sulphides, determination, 63, 201.—In oxygen and air, temperature of ignition and slow combustion, 88, 243.—In petroleum, detection, 16, 186, 198.—In pig-iron, determination, 29, 201; 93, 201.—In pig-irons, estimation, 22, 144; 46, 236.—In pig-iron, etc., estimation, 28, 248, 266, 276.—In protein compounds, determination, 53, 24.—In pyrites, 17, 73, 85, 122; 41, 250.—In pyrites, assay of, 4, 276.—In pyrites, determination, 41, 173, 184; 42, 317; 45, 95; 48, 285; 49, 202; 74, 62; 93, 213.—In pyrites, estimation, 18, 72; 25, 257; 27, 15, 33, 45; 70, 181, 212; 71, 132.—In pyrites of Iowa coal, 25, 71.—In roasted copper ores and cupiferous pyrites,

74, 62.—In Roumanian petroleum, estimation, 80, 184.—In shale naphtha, 45, 98.—In Sicily, 29, 122.—In soluble slags, estimation, 55, 74.—In state of viscosity, specific heat of, 74, 97.—In steel, detection, 7, 87.—In steel, determination, 29, 134, 204, 58, 59, 133; 88, 149; 90, 230.—In steel, estimation, 21, 107; 28, 229; 46, 199; 58, 47, 70, 63; 68, 181, 74, 75, 121; 81, 54.—In steel making iron, estimation, 58, 47, 59, 95.—In steels, determination, 90, 230.—In steels, estimation, 58, 191.—In sulphides decomposable by hydrochloric or sulphuric acids, volumetric determination, 54, 23.—In sulphides, determination, 43, 89.—In sulphides, estimation by stannous chloride, 85, 71.—In sulphides of iron, 75, 121.—In sulphites, determination, 51, 139.—In sulphur ores, 44, 47.—In ultramarine, estimation, 24, 229.—In vegetable soils, determination of, 65, 62; 65, 185.—In water, action on cast-iron pipes, 27, 269.—In wrought-iron, determination, 29, 134.—In zinc powder, 45, 287.—Industry of Sicily, 30, 218.—Influence of copper on estimation of, 54, 290.—Influence on Eggertz's carbon colour test, 58, 175.—Influence on fermentation, 4, 111.—Iodised and iodide of sulphur, 80, 172.—Island, New Zealand, 56, 251.—Line spectra of, 70, 49.—Lines in photographic spectroscopy of minerals, 90, 140.—Lyes, Mond's technical analysis and valuation of, 42, 97.—Magistry of, 34, 154.—Manufacture, 7, 94.—Manufacture from alkali waste in Great Britain, 18, 157.—Melted, expansion, capillarity, and viscosity, 36, 121.—Melted, variations in viscosity in, 69, 253.—Metals, formation, 26, 156.—Microchemical recognition, 67, 196.—Mines, process for working, 44, 204.—Molecular magnitude, 60, 25.—Molybdate of ammonia a test for, 3, 192, 204.—Most highly oxidised compound of, 65, 101.—Nacreous crystals of, 49, 136; 52, 58.—Native, in soil of Paris, 43, 81; 44, 60.—Obtaining coke quite free from, 19, 215.—Obtaining from metallic sulphides, 5, 168.—Octahedra of, with a square base, 52, 176.—Octahedral and prismatic varieties, production by same medium and temperature 30, 144.—Octahedral, durations of transformations of superheated, into prismatic sulphur, 49, 235.—Ores, calcining, 5, 81.—Ores, sulphur in, 44, 47.—Ores, valuation, 35, 146.—Orienting influence of, 84, 301.—Oxidation, 32, 62.—Oxygen acids of, 40, 133; 57, 150.—Pastilles, 18, 103.—Phosphorescence, 30, 98; 48, 83, 236.—Plastic, 34, 68.—Practical losses in vitriol manufacture, 16, 93, 107.—Precipitated, action in dyeing, 36, 254.—Precipitated, adulteration, 19, 103.—Precipitating, 23, 84, 95.—Prismatic, speed of transformation into octahedral state, 52, 176.—Production in Italy, 9, 146.—Products of, of, in siderurgy, 75, 35.—Properties of, 7, 115; 12, 276.—Quadrivalent, asymmetric synthesis, 81, 160.—Recovering, 16, 163.—Recovery from alkali waste, 16, 27, 41; 19, 234; 24, 289; 47, 202.—Recovery from spent oxide, 48, 204.—Red, of Japan, 48, 283.—Regeneration from soda waste, 15, 125.—Regeneration in alkali manufacture, 36, 273.—Relation between refractive power and chemical activity, 99, 246.—Salts, 21, 60, 287.—Salts, basic, 11, 22.—Salts, produced with phosphorus sesquisulphide, 44, 214.—Salts, reaction of chlorine on, 21, 121.—Sensitive reagent for, 4, 98.—Separation from its gangue, 46, 254.—Separation of

- dithionie acids from other acids of, 83. —Stress, action of chlorides of acids of, on organic compounds, 29. —Shower, 17. —Sicilian, 21. —Salt, 68. 13. Salt, tempered, 65. 286—Solubility in acetic acid, 35. 163—Solubility in alcohol, 53. 20 —Solubility in aqueous solution of carbonate of soda and in linseed oil, 22. 214—Solubility in coal-tar oils, 19. 20 —Solubility in petroleum, 19. 213—Soluble in sulphide of carbon, preparation, 5. 255—Spectroscopic examination of, 22. 191 —Spectrum, 24. 13. 67. 76. 255 —Spot, Royal Pump Room Harrogate, analysis, 18. 195—Springs, 23. 84—State of, in products of combustion of coal-gas, 73. 57 —Stereochemistry of, 82. 239—Strength of solutions of, in carbon disulphide, 43. 192—Substitution for oxygen in fatty series, 37. 153. 250—Superfused, duration and solidification, 49. 10. 21. 46—Test, 54. 280—Trade in Italy, 47. 255—Transformation under influence of light, 21. 69 —Treating alkali waste to obtain, 9. 107—Two new states of, 63. 236—Use in vegetation, 63. 84 —Used in manufacture of vitriol or sulphuric acid, sources of, 17. 255 —Vapour action, 72. 255 —Vapour, action on metallic copper, 57. 95—Vapour, colour of, 78. 226 —Vapour-density, 82. 267—Volatility, 77. 150—Waste, 25. 252. 264—Waste gases of Claus-Chance process, 97. 85 —Water, alteration by contact with air, 25. 213—Waters, formation of natural, 35. 86 —Waters from the Rayen spring at Bagnères-de-Luchon, 87. 31 —Waters of A. organic matters dissolved in, 52. 35—Waters of Yorkshire, 62. 191—Well, Ballynahinch Spa, analysis, 32. 65—Well, Harrogate, analysis, 18. 155
- Sulphur anion and complex sulphur acids, 37. 131
- Sulphur bichloride and perchloride of iodide, compound, 1. 215
- Sulphur bromide, 27. 292; 31. 276
- Sulphur bromides, 89. 287
- Sulphur chloride, 37. 153—Acid, 100. 265 —Action of ethane mercuride on, 92. 180 —Action on aniline, 22. 80; 63. 180 —Action on aniline in presence of sulphide of carbon, 23. 142. 275 —Action on cupric derivatives of acetylacetone and benzoyl acetone, 70. 221—Action on hydrocarbons, 80. 239—Action on metals and sulphides, 16. 24—Action on metallic oxides, 99. 180 —Action on oils, 57. 22. 43. 113; 58. 4; 82. 158—Action on pentathrite, 74. 84—Analysis, 64. 189 —And chlorine, action on oxides, 96. 70—Properties of, 15. 5 —Reaction with aniline, 32. 180
- Sulphur chlorides, 22. 226; 25. 310; 29. 31. 17
- Sulphur crystallites, 24. 229
- Sulphur dichloride, 24. 159
- Sulphur diiodide, 30. 179
- Sulphur dioxide, 27. 23—Action of dry, on oxy-salts, 66. 199 —Action on ammonia, 71. 236 —Action on aromatic compounds, 93. 289—And carbon dioxide and carbon disulphide, reactions of, 52. 183—And hydrogen dioxide, production of ozone in interaction between, 99. 307—And hydrogen sulphide, interaction, 91. 231—And oxygen, combination, 81. 114 —Apparatus, 58. 187—Apparatus for determining composition of, 77. 213 —Electrolysis of salt solutions in, 96. 224—Refraction and dispersion, 100. 297—Solubility in sulphuric acid, 43. 14. 45
- Sulphur hexafluoride, 86. 220—Density and analysis, 86. 221
- Sulphur iodide, 6. 311; 80. 172
- Sulphur iodides, 66. 111 —And sulphur and iodine, relations, 86. 5
- Sulphur monochloride, action on metal loads and metals, 99. 35 —Action on minerals, 78. 54—Action on salts of organic acids, 99. 308 —Action on tellurium minerals, 86. 308
- Sulphur oxide and lead oxide, reactions between, 75. 241. 260
- Sulphur oxides and oxides of nitrogen, formation heat, 42. 35
- Sulphur oxy-acid, 58. 36
- Sulphur oxychloride, 45. 98
- Sulphur oxychlorides, 29. 73; 40. 43
- Sulphur oxytetrachloride, 28. 106
- Sulphur perfluoride, 81. 202—Density and analysis, 81. 225
- Sulphur-selenium-tellurium group elements, substitutions of, 85. 252
- Sulphur sesquioxide, constitution, 85. 11
- Sulphur tetrachloride and gold trichloride, combinations, 53. 35. 110—Existence and dissociation, 26. 277; 28. 106
- Sulphur tetroxide, Traube's, 64. 158
- Sulphur urea, isolation of the missing, 19. 7
- Sulphurea, action of alcoholic potassa on, 53. 251—And guanidin, 31. 49—Derivatives, 45. 88; 53. 143 —Diphenyl- (see Diphenylsulphurea) —Transformation of carbon oxy-sulphide into ordinary, 47. 154
- Sulphureas with acid radicals, 36. 153
- Sulphurets, 4. 174; 22. 82. 83—Action of anhydrous sulphuric acid on, 1. 11—Soluble, decomposition by water, 25. 46
- Sulphuretted aniline (see Aniline)—Combinations of uranium, 10. 123. 158—Substance in cotton oil, 72. 209
- Sulphuric acid (see Acid)
- Sulphuricin, 30. 196
- Sulphuring of hops (see Hops)
- Sulphurised and nitrated compounds derived from sulphide of carbon, 87. 208—Colouring matters (see Colouring) —Compounds, estimation of methoxyl groups in, 87. 304
- Sulphurium, 7. 263
- Sulphuremolybdates, 70. 318
- Sulphurous acid (see Acid)—Springs, argon and helium from the gases, 72. 309
- Sulphuryl chloride, action on acetic ether, 38. 9—Action on acetoortholuidide and acetaratholuidide, 66. 35—Action on secondary amine bases, 49. 70 —Action on selenium and selenium dioxide, 97. 158—And ammonia, reaction between, 100. 304 —And its conduct towards alcohols, 35. 197—Behaviour at high temperatures, 48. 247—Preparation, 27. 71; 44. 107. 274
- Sulphuryl fluoride, 83. 130
- Sulphuryl perchloride, vapour-density, 45. 87
- Sulphydantoine, synthesis, 45. 130
- Sulphhydrate, ammoniac, 18. 150
- Sulphuric acid (see Acid)
- Sultones and oxysulphonic acids, 79. 276
- Sulvanite, 82. 238
- Sumac, tannin in, 17. 73. 109—Tannin of, 29. 26
- Sumach leaves, tannic acid of, 41. 63—Sicilian, Rhus coriariae, colouring matter of, 74. 120—Sicilian, yellow colouring matters of adulterants of, 77. 208
- Sumpner, W. E., Diffusion of light, 66. 301—Measurement of small differences of phase, 90. 278—Theory of phase-meters, 92. 222 —Variation of coefficients of induction, 57. 159
- Sumpner, W. E., and W. E. Ayrton (see Ayrton, W. E.)
- Sumpner, W. E., W. E. Ayrton, and T. Mather (see Ayrton, W. E.)

- Tellurium bichloride, action of ammonia upon, 75, 47
- Tellurium dicyanide, 98, 315
- Tellurium dioxide, action of anhydrous chlorides on, 98, 4—Quantitative precipitation and application to separation of tellurium from selenium, 100, 168
- Tellurium diphenyl, 85, 270
- Tellurium fluoride, 92, 256
- Tellurium oxide, 47, 220; 49, 93
- Tellurium sulphides, 87, 209
- Tellurium sulphoxide, 47, 221; 49, 91
- Tellurous acid (*see* Acid)
- Tempany, H. A., and F. Watts (*see* Watts, F.)
- Temperature, absolute, 23, 170—Absolute zero of, possible method of attaining, 84, 73—Action on period of induction, 89, 152—And rainfall, influence on wheat crop, 48, 47—And rainfall of London, 40, 133—Arrangement for compensating for, with the weighing or balance barometer, 22, 154—At the end of May and first days of June, 1871, 24, 31—Below earth's surface, 2, 295—Calculating curve of, in a rod along which heat is being conducted, 39, 71—Changes produced in mixtures of liquids of different natures, 10, 226; 15, 118; 22, 21, 34, 58—Chart, 1, 273—Coefficients of conductivity of aqueous solutions, 93, 274—Constant, apparatus for maintaining, 54, 302—Constant, baths for, 18, 284—Constant, in laboratory operations, 22, 225—Constant, instrument for maintaining, 18, 3—Constant, maintaining, 28, 239—Constant, method of obtaining, 32, 31—Corrections of barometers, 72, 204—Critical, 62, 310—Critical, and melting point, relation between, 74, 101—Cyclically varying, measurement of, 71, 266, 303—Determination, 42, 120—Determination by means of data in a Charlottenburg certificate, 78, 6—Effect on growth of potatoes, 74, 155—Effect on ionisation, 99, 232—Effect on nature of light emitted by the vapour of certain metals or metallic compounds, 5, 233—Electric alarms to indicate, 20, 215—Equilibrium, dynamical analogues of, 97, 156—Evaluation of absolute scale of, 87, 177—For the night, pre-determination of the minimum 55, 176—Higher, raising in certain solutions by steam of 212° F., 20, 255—In atmosphere, connecting equilibrium of, 5, 81—Indicator for use with platinum thermometers, 85, 212—Influence on capacity of some metals for conducting heat, 20, 106—Influence on chemical reactions, 77, 274—Influence on electric conducting power of thallium, 8, 42—Influence on magnetisation, 24, 238—Influence on refractive power, 72, 288—Influence on rotatory power, 75, 107—Influence on spectrum-analytical observations, 56, 51—Limits of nerve activity in warm-blooded and cold-blooded animals, 88, 22—Low, burner and foot-blower, 28, 326—Low, importance of accurate measurements at, 91, 137—Low, investigations, 91, 216—Low, obtaining, 47, 305—Low, phenomena, 94, 173, 183—Low, phenomena and their scientific applications, 90, 141—Lowering of, due to solution of salts in water, 19, 214—Measurement of, 63, 285; 70, 219; 86, 61, 273—Nadir of, 84, 49—Of cellulose (*see* Cellulose)—Of Central Europe during winter of 1869-70, 21, 228—Of earth, determinations of, 11, 70—Of earth's crust, 3, 248—Of flame (*see* Flame)—Of globe (*see* Globe)—Of greatest density of water, 31, 217—Of ground, variation at different depths, 15, 130—Of human body, 20, 238; 24, 288—Of sea (*see* Sea)—Of soil (*see* Soil)—Of sun (*see* Sun)—Of visibility, minimum, 69, 204—Periodical variations, 15, 250—Reduction of annual curves of, 22, 287—Required for forming fusible combinations and for melting the same, 16, 120—Solar (*see* Solar)—Terrestrial, and solar spots, connection between, 22, 423—Underground, in the Jardin des Plantes at Paris, 22, 58—Variation of surface tension with, 63, 162—Variations, correction of errors due to, 35, 160, 170
- Temperatures, determination of, 36, 230—Developed in industrial furnaces, 65, 133—Furnace (*see* Furnace)—High, 28, 174; 30, 98; 94, 53—High, action on copper, bismuth, silver, tin, nickel, and cobalt sulphides, 75, 202—High, apparatus for experiments at, 99, 248—High, bath for, 4, 110—High, determination of, 41, 218; 71, 334; 74, 150—High, determination by refrangibility of light evolved by fluid or solid substances, 30, 149—High, flame spectra at, 70, 2, 15—High, materials for resisting, 19, 226—High, measurement of, 68, 48; 74, 258—High, optical measurements of, 43, 195—High, preservation of constant, 67, 168—High, production, 16, 243; 79, 181—High, production by gas and air, 13, 5, 99—High, spectra of oxygen at, 69, 292—Spectrometric measurements of, 39, 22—Low, 94, 53—Low, life at, 68, 312—Low, measurement, 81, 219—Low, production, 13, 196; 48, 280—Low, liquefaction of air and research at, 73, 40—Low, reactions at, 94, 242—Low, thermometers for, 68, 74; 94, 47—Low, vapour densities at, 2, 303—Lowest, determining with thermoelectric junction, 92, 169—Lowest possible, production, 52, 82—Measuring by electricity, 26, 152, 164—Of furnaces (*see* Furnaces)—Of spontaneous crystallisation of mixed solutions, 97, 93—Pressures, and volumes, corresponding, 64, 259; 68, 256—Scale of, 19, 288, 296—Thermometers for extreme, 53, 97—Transition, determination, 80, 278—Transition, influence of foreign substances on, 97, 92
- Tempering bronzes (*see* Bronzes)—By compression, 45, 140—Glass (*see* Glass)
- Tendering for public appointments, 98, 197
- Teneriffe, Peak of, 77, 103
- Tengerite, 92, 42
- Tennant's nitrometer, 39, 168
- Tensiometer, conservations with a, 72, 199
- Tensions, electric (*see* Electric)
- Tephroite, artificial production, 48, 82
- Tephrosia purpurea, glucoside from, 99, 82
- Teplitz, minerals from, analysis, 23, 275
- Teracrylic acid (*see* Acid)
- Terbium, 86, 73; 88, 11; 97, 208; 100, 73—And dysprosium, compounds of, 97, 75—And other metals of the rare earths, spectra of, 92, 5—And some of components, 92, 3—Atomic weight, 93, 56, 305; 95, 288; 99, 69—Atomic weight and spark spectrum, 93, 231—Diluted in lime, spectra of cathodic phosphorescence of, 94, 79—Group, rare earths of, electric

- spectrum of, 53, 63—Isolation, 92, 177, 100, 156—Rare earths, spectra of, 92, 5
- Terbium**, an element in, 72, 292—Equivalent of, 53, 121; 62, 213
- Terby**, F. Singular configuration of spots on the planet Mars, 27, 268—Spots on the sun, 23, 300
- Tereb chloride** of iodine (*see* Iodine)—Of phosphorus (*see* Phosphorus)
- Tereben**, 28, 32, 108; 29, 113—Essence transformation into cymen, 29, 113—Isomerism from a physical point of view, 29, 241
- Tereben hydrochlorate**, 28, 141, 264
- Terebenthene**, 63, 201—Action of electrolysis on, 41, 172—Essence of, examination, 100, 256—Isomerism from a physical point of view, 29, 241—Tetra- (*see* Tetraterebenthene)
- Terebenthene bihydrochlorate**, 40, 88
- Terebenthene hydrochlorates**, liquid, 47, 222
- Terebenthenes**, action of crystalline formic acid on, 58, 11
- Terebenthin**, essence, transformation into cymen, 29, 113
- Terebenthyle**, di- (*see* Diterebenthyle)
- Terebic acid** (*see* Acid)—Series, carburets of, 27, 153
- Terebratula diphyi** in calcareous rock, 52, 70
- Terephthal aldehyde** (*see* Aldehyde)
- Terephthalic acid** (*see* Acid)
- Teriodide** of boron (*see* Boron)
- Terling**, disinfectants at, 17, 289
- Ternary system**, lead-tin-bismuth, state of equilibrium of, 78, 95
- Terne**, B. Contribution to fat industry, 39, 135—Iron in bone-black, 65, 222—Utilisation of animal refuse, 39, 150
- Terne drosses**, assay, 92, 64
- Teroxide** of thallium (*see* Thallium)
- Terpene**, action of deutoxide of nitrogen on, 20, 226—Family of hydrocarbons, isomerism in, 27, 82—Isolation of a new, 97, 245—Series, alcohols of (*see* Alcohols)—Series, isomerisation in, 99, 299—Sesqui- (*see* Sesquiterpene)
- Terpenbromide**, 26, 60
- Terpenes**, 67, 297; 72, 313; 77, 57; 78, 251—And allied compounds, 74, 253; 279—And camphor and allied compounds, 39, 284—And derivatives, action of pentasulphide of phosphorus on, 59, 183—And essential oils, 79, 179—And essential oils, aerial oxidation of, 69, 143—And etheral oils, 51, 275; 53, 25; 56, 37—And hydrochloric acid, compounds of, 39, 256—Chemistry of, 88, 22; 96, 277; 97, 93; 99, 106, 248—Constitution, 37, 45; 58, 250—Derivatives, 86, 32—Examination for cymene, 41, 291—Isomeric, and their derivatives, 29, 80, 183; 32, 231—Nitroso- (*see* Nitrosoterpenes)—Oxidation, 46, 120—Sesqui- (*see* Sesquiterpenes)—Synthesis, 89, 223; 91, 210; 92, 233, 244; 93, 124; 94, 250, 265; 95, 129; 96, 29; 97, 155; 98, 267—Two new, 96, 24
- Terpenic alcohol** (*see* Alcohol)—Compounds in geranium, evolution, 82, 279
- Terpinene**, active, transformation of oil of turpentine into, 53, 60, 109—Conversion into menthene, 58, 239; 59, 72, 120—Synthesis, 32, 19
- Terpinol**, active, synthesis, 53, 252—Inactive, synthesis, 54, 37
- Terpinols**, action of acids and anhydrides on, 57, 181
- Terpin**, 37, 166; 39, 160
- Terpin hydrate**, synthesis, 89, 223
- Terpinene**, action of chromyl chloride on, 99, 248
- Terpinol**, inactive, synthesis, 89, 223
- Terpinol**, 37, 166; 39, 160; 55, 201; 56, 180; 57, 131, 211—Composition, 51, 284; 52, 272
- Terquem**, A. Modifications in the Bunsen lamp, etc., 42, 35—Preparation of Plateau's glycerin-liquid, and its application to study of the coloured rings produced by their laminae, 30, 186—Production of the laminary systems of Plateau, 37, 237—Transformation of a vitroscope into a tonometer, and its use for determining the absolute number of vibrations, 29, 112
- Terra alba**, 20, 132, 156, 228, 252; 23, 168; 33, 21
- Terras Mine**, occurrence of pharmacosiderite, scorodite, and olivenite in greenstones at, 34, 10
- Terrat**, P., Testing for diastase from barley, 77, 12
- Terreil**, A., Action of reducing agents on nitric acid and nitrates, 14, 298—Action of sulphuric acid on cellulose, 25, 286—Analysis of a chrysotile, 51, 203; 52, 36—Analysis of native magnetic platinum of Nischine-Tagils, 33, 231—Commercial orpiment, 53, 278—Composition of black matter obtained on calcining ferrocyanide of potassium, 33, 117—Composition of the mineral water of Montrond, 47, 294—Crystalline ammoniacal silver chloride, 50, 94—Crystallised oxides of antimony and antimonites, 13, 82, 241—Determination of alkaline metals in silicates and substances not attacked by acids, by means of hydrate of baryta, 33, 74—Formation of kermes, 33, 36—Influence of materials employed in construction of a well on composition of mineral water of Montrond, 55, 284—Law of Dulong and Petit, 34, 9, 21—Manganese in the scoria from old copper workings, 5, 210—Metals which accompany iron, 35, 226—Modifications which minerals undergo when submitted to action of saline solutions, 21, 22—New reagent for salts of protoxide of tin and arsenious acid, 6, 301—New treatment of commercial nickel to obtain a pure sulphate of nickel without the use of sulphuretted hydrogen or of ammonia, 31, 141—Phytolaccic acid, 42, 317—Preparation of basic zinc acetate, 66, 222—Preparation of permanganic acid, 6, 57—Preparation of pure nickel from the nickel of commerce, 33, 262—Process for finding traces of gold in irons, cast-irons, steels, and ores, 11, 136—Separation of cobalt and nickel, and of manganese from nickel and cobalt, 13, 133—Solubility of tribasic calcium phosphate, 44, 66—Vanadium in clays, 2, 143
- Terreil**, A., and A. Wolf, Resin of pallsander wood, 42, 166
- Terrestrial atmosphere** (*see* Atmosphere)—Bodies, moving force of, in relation to attraction of gravitation, 99, 179
- Terry**, Alfred, Test for starch, 24, 277
- Terry**, George, "Pigments Paint, and Painting" (review), 69, 11
- Terry**, Hubert L., "India-Rubber and its Manufacture" (review), 96, 269
- Terry**, N. M., and H. Hübner, α -Bromsulphotolul and α -sulphotolul, 24, 97— α -Sulphotolul, 24, 73
- Tervet**, J. N., New design for potash bulbs, 85, 112
- Tervet**, J. N., and J. T. Hewitt (*see* Hewitt, J. T.)
- Tervet**, Robert, Sulphur in shale naphtha, 45, 98
- Teschmacher**, E. F., Determination of the amount of morphia in opium, 35, 47
- Teschmacher**, E. F., and J. D. Smith (*see* Smith, J. D.)
- Test fluids**, modification of Mohr's burette to adapt it for all, 26, 180—Paper, alkalinity or acidity of certain salts as indicated by, 27, 221—Paper for urea, 29, 111—Paper, Schönbein Pagenstecher's, to detect traces of hydrocyanic acid gas, 87, 173—Paper, ultramarine, preparation, 22, 286—Papers, phenolphthaleine, 55, 129—Plate, Nobert's, 4, 128—Solutions, volumetric adjustment of, 26, 159—Tube condenser, 70, 239
- Testimony**, expert, 69, 210; 76, 142
- Testing materials**, International Association for, 84, 147; 93, 224—Set, portable standard, 92, 265
- Tesu**, colouring matter of, 69, 71
- Tetmayer**, M., Resistance of aluminium-bronze and brass, 61, 266
- Tetraalcoylidimide**, symmetric, 91, 118
- Tetraalcoylidimidodiphenylanthrones**, preparation and properties, 87, 154
- Tetraalkyl stannimethane derivatives**, preparation, 89, 20
- Tetrabromide**, action of bromine on, 78, 47
- Tetrabromodiphenylquinone**, 97, 11
- Tetrachlorether**, behaviour with potassium cyanide and alcoholic potassa, 37, 274
- Tetrachlorhydroquinone** for identification and separation of fatty acids, 80, 59
- Tetrachlorobenzoylbenzoic acid** (*see* Acid)
- 2.4-Tetrachloro-1,3-dicetotetrahydronaphthalene, 79, 144
- Tetrachloromethane** preparation, 83, 143
- Tetrachlorophenol**, 62, 249—Preparation, 87, 263
- Tetrachloroplatinate**, argentic, decomposition by water, 100, 256
- Tetrachloropyridines**, constitution, 80, 276
- Tetrachloroquinone**, formation, 70, 174, 213; 4:5-Tetrachlorotoluene, properties, 94, 218
- Tetrachlorotoluenes**, constitution, 90, 252
- Tetraethylammonium bromide**, molecular weight, 99, 306; 100, 299
- Tetrahydrobenzene**, 81, 307—Chloroketodimethyl- (*see* Chloroketodimethyltetrahydrobenzene) — 5-Chloro-3-keto-1:1-dimethyl-4-tetrahydrobenzene) — Derivatives, 91, 22 — Dimethyl-43- (*see* Dimethyl-43-tetrahydrobenzene)
- Tetrahydroisokinolein and isokinolein**, 77, 224
- Tetrahydroisoxylol**, 36, 120
- Tetrahydronaphthalene**, keto- (*see* Ketotetrahydronaphthalene)—Series, 86, 9; 89, 247
- ac*-Tetrahydro-2-naphthol, resolution by means of 1-methylcarbamide, 94, 217
- ar*-Tetrahydro- α -naphthylamine, substitution products, 89, 247
- ar*-Tetrahydro- β -naphthylamine and formaldehyde, reaction between, 89, 247—Halogen derivatives, 89, 247
- Tetrahydronaphthylamines**, inversion of optically active, 82, 299
- Tetrahydronaphthylglycols** (cis and trans) and their combination, 99, 264
- Tetrahydroparatolquinoline**, racemic, resolution into its optically active components, 80, 20—Resolution, 80, 264—Resolution into its optically active components, 95, 69
- Tetrahydropapaverine**, non-resolution by tartaric acid, 78, 251—Resolution into its optically active components, 77, 235
- Tetrahydropyrone derivatives**, 79, 216
- Tetrahydroquinoline**, resolution, 80, 263
- Tetrahydroquinolines**, enantiomorphously related, 79, 237
- Tetrahydroquinolein urethanes**, aromatic, 79, 35, 226
- Tetrahydroquinoline**, 48, 249
- Tetrahydrotrimesic acid** (*see* Acid)
- Tetraketopiperazine**, 95, 69; 99, 140
- Tetrakylammonium iodides**, action of potassium on, 57, 22
- Tetralkylammonium bromide and triallylamin**, 39, 263
- aay*-Tetramethyl- and *ayy*-trimethyl-tricarballic acids (*see* Acids)
- Tetramethylacridines**, 100, 242
- Tetramethylammonium salts**, 54, 258 — Salts, action of heat on, 57, 198
- Tetramethylammonium ferrocyanide**, 34, 217; 35, 8
- Tetramethylammonium hydroxide**, 92, 9
- Tetramethylammonium iodides**, poisonous effects, 27, 208
- Tetramethylammonium nitrate**, formation, 41, 241; 51, 72

- 2,7,9,10-Tetramethylanthracene dihydride, constitution, **91**, 110
- Tetramethylbenzol, **21**, 22
- Tetramethyldiamidobenzhydrol, products of condensation with primary aromatic amines with the para position occupied, **35**, 133
- Tetramethyldiamidobenzophenone derivatives, **77**, 273
- Tetramethyldiamidodiphenyldianthranol-tetramethylhydramide, symmetric of the corresponding oxanthranol, **76**, 119
- Tetramethyldiamidodiphenylethane, disymmetric, **79**, 310, **81**, 251
- Tetramethyldiamidophenylloxanthranol, condensation with benzene toluene, and dimethylaniline, **88**, 235
- Tetramethyldiaminobenzhydrol, compounds with methylenic derivatives, **97**
- Tetramethyldiaminobenzhydrol methylene compounds, constitution, **98**, 47
- Tetramethyldiaminodiphenylenephényl-methane, disymmetric, **88**, 148
- Tetramethyldiaminophenylloxanthranol derivatives, **89**, 107
- Tetramethyldiaminoxanthranol, **95**, 305
- Tetramethylene derivatives, **54**, 258; **55**, 66; **65**, 61; **69**, 202; **70**, 265—Series, synthesis in, **39**, 251
- Tetramethylene bromide, **60**, 133
- Tetramethylenecarbinol, **83**, 106
- Tetramethylenedicarboxylic acid (*see* Acid)
- Tetramethyl glucose and tetramethyl methylglucosides, stereoisomeric, **90**, 250—Derivatives, **97**, 9
- Tetramethyl methylglucosides and tetramethylglucose, stereoisomeric, **90**, 250
- Tetramethylphosphonium salts, action of heat on, **57**, 108
- Tetramethylpyrone, **82**, 22
- Tetramethylammonium, poisonous effects of iodides of, **27**, 208
- Tetranitro-cellulose explosive, **74**, 239
- Tetranitro-cyanophenbenzide, **39**, 43
- Tetranthera polyantha, var. citrate nees, essence of, **97**, 167
- Tetraoxycyclohexane rosanilines, **90**, 207, 208
- Tetraphenyl, **21**, 101
- Tetraphenylanthracene dihydride and its derivatives, **91**, 105, 118
- Tetraphenylbutanediol and its products of dehydration, **87**, 170
- Tetrahydroethylen, **25**, 101—Preparing, **58**, 37
- Tetraphenyl guanidin, **30**, 144
- Tetraphenylphosphoric amides (*see* Amides)
- Tetrapropylene, **70**, 270
- Tetrathionene, **30**, 206
- Tetrathionate of potassium (*see* Potassium)—Reduction to sulphite, **92**, 48
- Tetrathionates, action of alkalis on, **96**, 212—Action of carbonates on, **97**, 114
- Tetrazine derivatives, preparing, **77**, 226
- Tetrazodiphenyl chloride, action of cyanacetic ethers containing substituted acid radicals on, **82**, 84—Action on acetylacetic acid, and on the phenylhydrazones of benzoic aldehyde, **79**, 144
- Tetrazoline, **85**, 91; **92**, 260; **94**, 217—Formation, **80**, 252
- Tetrazolium nucleus, action of substituted groupings in, **79**, 251
- Tetrazones, **80**, 301
- Tetrazole of tin (*see* Tin)—Plumbic, **39**, 139
- Tetronerythrin, a new organic pigment, **25**, 142
- Tetry, L., Action of pentachloride of phosphorus on tetrachlorobenzoylbenzoic acid, **86**, 188—Condensations with zinc and iodoacetate of ethyl, **87**, 21—Derivatives of methylcyclohexanone, **86**, 257—Direct analysis of essence of pennyroyal, **86**, 186
- Tetry, L., and L. Bouvenault (*see* Bouvenault, L.)
- Teubner, E., Detection of small quantities of mercury, **42**, 307—Qualitative test for traces of mercury, **40**, 229
- Teucerium fruticans, **39**, 149
- Texan Maclura aurantiaca, valuable products obtained from, **26**, 46
- Texas mica from analysis, **56**, 274
- Mineral research in Llano county, **92**, 41—Therm and vitria from, **61**, 7, 18
- Text-Books, errors in, **25**, 10
- Textile chemistry (*see* Chemistry)—Fabrics (*see* Fabrics)—Fibres (*see* Fibres)—Goods, arsenic in, **47**, 179; **71**, 137—Goods, detection of Tussah silk in, **73**, 236—Goods, new material for dressing, **36**, 73—Manufactures, salicylic acid in, **43**, 37
- Textiles, bleaching, electrolysis in, **84**, 156—Chemical functions of, **94**, 232
- Teyssier, R., "Manuel Guide de la Fabrication du Sucre" (review), **88**, 304
- Thabius, M., Analysis of the deposit of Chabert water, **52**, 320
- Thaer, A., Comparative-manurial experiments on experimental field at Giessen, **31**, 218—Manure experiments on trial field of University of Giessen, **39**, 91
- Thalén, T. R., Brilliant spectral rays of the metal scandium, **42**, 60—Spectra of ytterbium and erbium, **42**, 184—Spectroscopic examination of thulium, **42**, 197—Spectral researches on scandium, ytterbium, erbium, and thulium, **47**, 217
- Thalén, T. R., and J. Angström (*see* Angström, J.)
- Thalénite, formula assigned to, **86**, 68
- Thalheim, W., Formation of graphite by the decomposition of cyanogen compounds, **41**, 283
- Thallosequin reaction, **57**, 231; **74**, 100—Test, **42**, 107, 183, 329—Test for quinine, **75**, 207
- Thallene, **34**, 188
- Thallie acid (*see* Acid)—Compounds, **35**, 155
- Thalline, **51**, 179—And antipyrine, behaviour of, **57**, 102
- Thallium, **5**, 349; **6**, 1, 29, 168; **7**, 101; **8**, 146; **9**, 24; **12**, 33; **13**, 122; **16**, 74; **64**, 41, 85, 285—Amalgam, **14**, 96; **16**, 74—Analysis, **98**, 6, 16, 32, 41, 55, 71, 81, 92, 107, 160, 171, 181, 194, 208, 219, 228, 230, 251, 264, 273, 291, 301, 311—Analytical notes on, **7**, 100, 133, 145, 104, 218—And alcohol radicals, compounds, **32**, 40—And alcoholic radicals, combinations, **29**, 264—And bismuth, separation, **7**, 100—And cadmium, separation, **7**, 143—And copper, separation, **7**, 133, 218—And diphenyliodonium nitrates, are they isomorphous? **74**, 217—And iron chloride, double, **17**, 165—And iron, separation, **7**, 104—And magnesium alloys, **15**, 245—And platinum alloys, **97**, 264—And silver, redetermination of electrolytic potentials of, **99**, 21—And silver, separation, **97**, 176—Atomic weight, **26**, 231; **29**, 14, 29, 30, 55, 65, 75, 85, 99, 105, 115, 126, 137, 147, 157; **67**, 171; **69**, 109; **93**, 56; **99**, 69; **100**, 278—Blowpipe, reaction for, **19**, 309—Combination-heats of soluble compounds of, **50**, 11—Compounds, **26**, 110, 114—Conducting power, **8**, 42—Contributions to history of, **7**, 290; **8**, 1, 195, 219, 231, 243, 255, 270; **10**, 1, 58, 278—Contributions to knowledge of, **17**, 138—Detection and estimation in presence of lead, **53**, 51—Determination, **60**, 86; **64**, 239, 296—Determining by titration, **67**, 187—Detonating mixture, **18**, 200—Discovery of the metal, **7**, 13, 172, 263, 306—Distribution and determination, **29**, 171—Dumas' report on a memoir of M. Lamy relating to, **7**, 14—Electric conducting power of, influence of temperature on, **8**, 42—Electrical conductivity of, **8**, 42—Electrolytic behaviour, **47**, 209—Estimation, **81**, 286—Estimation as acid and neutral sulphates, **81**, 208—Estimation as the chromate, **80**, 286—Estimation by means of permanganate of potash, **8**, 102—Estimation, electrolytic, **89**, 311—Estima-
- tion in thalious state, **86**, 7—Estimation, iodometric, **89**, 24—Estimation, volumetric, **85**, 179—Ethyl combinations of, **21**, 106—Extraction, **30**, 177—Extraction on a large scale from the flue dust of pyrites burners, **8**, 159—Glass, **13**, 166—Halogen compounds of, **93**, 223—In alkaline solution, estimation, **99**, 304—In commercial hydrochloric acid, **7**, 104—In lepidolite and mica, **9**, 169—In mineral water, **8**, 8—In platinum, detection and estimation, **55**, 241—In preparations of bismuth, **7**, 77—In relation to genesis of the elements, **73**, 304—In sphalerite found at Geroldseck, detection, **23**, 215—Isomeric relations of, **33**, 155—Jury award for, **6**, 89, 119, 131, 155—Lancet on, **7**, 107—Magnesium (*see* Magnesium-thallium)—Mineral, new, **15**, 160; **71**, 91; **91**, 176—Physiological action, **8**, 144—Pigments, **37**, 96—Place to be assigned to, among the elements, **21**, 239; **22**, 60—Poisonous effects, **8**, 129—Position in chemical systematics, and in sylvine and carnallite of Kalusz, **48**, 183—Preparation, **34**, 250—Preparation from the liquors of the white vitriol works and lead mines of the Lower Hartz, **18**, 35—Preparation on a large scale, **26**, 72—Preservation, **22**, 179—Ray, wave length of, **10**, 132—Reaction on metallic solutions, **12**, 242—Relation to alkali metals, **100**, 298—Salt, double, **23**, 249—Salts, physiological action, **62**, 44—Salts, solubility, **9**, 37—Spectral lines of, **76**, 265—Spectral ray of, **9**, 54—Spectroscopic examination of, **42**, 107—Spectrum, **7**, 146—Volatility, **99**, 119
- Thallium bisulphate, **33**, 10
- Thallium chlorate, **33**, 156
- Thallium chloride and iron chloride, double, **17**, 165—Rubidium- (*see* Rubidium-thallium)
- Thallium chlorobromides, **82**, 303; **83**, 35, 71; **84**, 24, 268; **86**, 55
- Thallium cyanide, **28**, 280
- Thallium ethers, chloro- and bromo-metallic, **9**, 64, 241
- Thallium fluoride, **10**, 37
- Thallium hypophosphate, **69**, 168
- Thallium ion, existence of a subvalent, in aqueous solution, **97**, 176
- Thallium iron alum (*see* Alum)
- Thallium-magnesium alloys (*see* Magnesium-thallium)
- Thallium oxalate, **9**, 34
- Thallium oxide a test for ozone, **16**, 83
- Thallium perchlorate, isomerism with the potassium and ammonium perchlorates, **14**, 217, 242
- Thallium peroxide, salts of, **12**, 136
- Thallium phosphates, **11**, 188; **21**, 227
- Thallium-platinum cyanide, **36**, 243
- Thallium protoxide, use as an ozonoscopic substance, **19**, 238
- Thallium silicates, **9**, 306
- Thallium teroxide, **19**, 131
- Thallium vanadates, **27**, 45, 132
- Thallium-zinc selenate, **100**, 298—Sulphate, **100**, 298
- Thames as it was, is, and may be, **2**, 63—Deodorisation by perchloride of iron, **1**, 254—Empoisonment with arsenical perchloride of iron, **2**, 112—State of, **6**, 116; **16**, 77—Water, filtered, and spring water from chalk strata, **31**, 282—Water, nitrates in, **34**, 82—Water, permanganate of potash and acetic acid on bacteria in, **75**, 171—Water, reports on, **47**, 21, 31
- Than, C. von (*see* von Than, C.)

- Urea, 10, 115; 19, 273; 87, 152—A product of spontaneous decomposition of an aqueous solution of hydrocyanic acid, 24, 230—Action of alcoholic potassa on, 54, 50—Action of alkaline hypobromite on, 37, 270; 38, 305—Action of chlorine on, 88, 285—Action of trichloroacetyl chloride on, 29, 118—Action on asparagin, products of, 32, 73, 195—Action on ethyl glyoxylate, 94, 71—Action on pyruvic acid, 84, 231; 87, 142—Action on xanthone hydrol, 96, 293—Albumen in, detection, 48, 304—And acetate of ammonia in spring waters, 37, 233—And chloroacetyl, combination, 28, 27—And chloroacetyl, combination, 27, 142—And nitrous acid, reaction between, in aqueous solution, 23, 179—And phosphoric acid, combination, 19, 261—And potassium cyanate, 32, 99—And sulphurea, benzylic derivatives, 33, 75—And sulphurea, transformation of carbon oxy-sulphide into, 45, 195—And thiourea derivatives of phthalic acid, 46, 185—And thiourea, substitution derivatives, 71, 280—And urine, separation, 2, 192—Attempt to make it take the form of amino-magnesian phosphate, 89, 35—Bacillus ferment in, 40, 206—Coloured reaction, 36, 121—Compounds, 21, 82—Constitution, 15, 159; 29, 284—Conversion into carbaminic acid, 20, 166—Conversion of albumenoid matters into, 24, 288—Conversion of carbonate of ammonia into, 17, 152—Crystallisation on skin, 13, 276—Decomposition, 86, 175—Detection of bromine in presence of, 26, 145—Determination, 40, 86, 156; 42, 186; 48, 34; 61, 229; 62, 225, 284; 64, 178—Determination by hypobromite process, 73, 103—Determination by means of alkaline hypochlorites and hypo-

- bromides, 41, 104; 45, 27—Determination by means of sodium hypobromite, 42, 104; 44, 48, 104, 107; 51, 27—Determination, Knop-Huher method, 52, 104—Determination, quantitative, 93, 142—Determination with bromine solution, 51, 95—Determination with bromine water, 54, 85—Estimation, 13, 44; 20, 283; 34, 282; 37, 135; 67, 123; 70, 104—Estimation, apparatus for, 31, 36—Estimation by hypobromite, 35, 81, 114, 122—Estimation by means of Millon's reagent and the mercurial pump, 26, 50—Excretion, 45, 109—Excretion by kidneys, 24, 264—Excretion, variations in, 28, 107—Ferment, of, 33, 86; 39, 263—Fermentation, 43, 190—Formation by action of permanganate of potassa on albumenoid substances, 21, 202; 24, 211—Formation by hydrolysis of lead cyanate, 88, 302—Formation in animal system, 35, 210—Formation in aqueous alcohol, 75, 177—Formation, place of, 69, 220—From ferrocyanide of potassium, 4, 260—From phenylhydrazine, action of saccharine on, 84, 104—High homologues of, 75, 107—Hydroxyl (*see* Hydroxyl)—In animal body, 26, 36—In animal organism, antecedents of, 21, 46—In aqueous solution, detection, 47, 285—In bile, 22, 288—In blood and in muscles, 59, 300—In blood and tissues, 32, 180—In chyle and in lymph, 1, 82—In milk of herbivorous animals, 13, 56—In spring waters, 37, 231—In urine, determination, 40, 143—In urine, determining with bromine water, 56, 105—In urine, estimation, 62, 287; 87, 71—Isolation and synthesis, 99, 121—Lactyl, 28, 294—Oxidation of aluminates to, 23, 23—Pallidous chloride, 41, 23—Preparation, 16, 299; 68, 126—Preparation from carbonic acid and ammonia, 21, 287—Production, 63, 285—Propyl- (*see* Propylurea)—Pseudoheptyl- (*see* Pseudoheptylurea)—Salts of, 70, 37—Sugar in, detection and determination, 67, 253—Sulphuretted, 21, 131; 23, 264—Synthesis, 62, 264; 99, 121—Test for, 46, 242—Test paper for, 29, 113—Titration, 52, 118—Transformation into sulphocyanide of ammonium, 7, 104—Transformation of ammonium cyanate into, 72, 46—Variations in cases of phosphoric poisoning, 41, 283—Variations under influence of caffeine, coffee, and tea, 28, 156—Volatility, 65, 197
- Urea hydrochlorate from phenylhydrazine, 85, 166
- Urea hydrochloride, hydrolysis, 87, 151
- Urea oxalate, formula of, 66, 52
- Ureas, acids, 73, 240—Aldehyde derivatives, 38, 48—Alkyl (*see* Alkylurea)—Aromatic synthetic, 75, 200—Compound, action of nitric acid on, 35, 188—Compound, new class, 13, 214—Condensed, 20, 166—Estimation of nitrogen in, 79, 21, 109—Formation, 79, 99—Of piperidine and aromatic amines, mixed, 88, 281—Oxidation, 79, 108—Poly-substituted, 40, 208—Sulphuretted, 21, 46, 131; 34, 92
- Urech, F., Action of potassic carbonate upon isobutylaldehyd, 40, 32—Action of potassium carbonate upon isobutylaldehyd, 41, 34; 43, 12—Cyan derivatives of acetylaldehyd and aldehyd ammonia, 28, 204—Cyanogen derivatives of acetone, 26, 229
- Urech, F., and C. Hell (*see* Hell, C.)
- Urechites suberecta, poisonous principle of, 37, 106
- Uredo of maize, chemical characters, 29, 184
- Ureides, 44, 204—Absorption spectra in relation to colour and chemical structure, 91, 266—Acidic constants, 94, 204—Condensed, 48, 204—Derived from normal acids, 64, 12—Glyoxylic, 89, 143—Of pyruvic acid, 31, 19—Pyruvic, 31, 40
- Ureometer, 33, 256; 44, 215; 68, 214; 69, 256—Water, 77, 105
- Urethane, action of nitric acid on, 35, 185—Action on ethyl glyoxylate, 94, 71—Action on pyruvic acid, 84, 219—Action on xanthone hydrol, 96, 293—From an analytical point of view, 54, 73, 166, 310—In urine, detection, 54, 310—Mono-substituted derivatives, formation, 91, 233—Physiological action of, 54, 61—Pyromucic, hydrolysis, 85, 107
- Urethanes and aldehyds, compounds of, 31, 31—And primary benzenoid amines, interaction, 82, 299—Of fatty series, properties, 53, 251; 54, 50
- Uric acid (*see* Acid)—Derivatives of alloxan series, synthesis, 38, 273—Derivatives of alloxanic series, synthesis, 39, 61—Series, research on, 81, 118—Series, synthesis of substances of, 53, 40
- Urich, A., and E. Schulze (*see* Schulze, E.)
- Urinary acids, estimation by sucrate of lime, 87, 130—Concretion found in horned cattle, 26, 144—Phosphorus, 79, 35—Pigment, 5, 171—Pigment-resolution in microscopic examination of urinary sediments, 48, 171
- Urine, 10, 115—Acetone in, detection, 76, 241; 90, 148—Acetone in, determination, 68, 281—Acidity, 82, 207—Albumen in, detection, 42, 210; 43, 13; 49, 58; 50, 153; 54, 43; 61, 229; 62, 255; 63, 37; 68, 281—Albumen in, detection, test for, 47, 239—Albumen in, determination, 41, 122; 58, 245; 64, 262—Albumen in, picric acid employed as a reagent for, 48, 214—Albumen in, reagent for, 49, 236; 67, 109—Albumenoid ferment in, 11, 116—Albuminous, 14, 129—Alkalies in, determination, 51, 95—Aniline in, detection, 58, 61—Alteration, 34, 110—Analysis, 75, 25—And blood, detection of peptones in, 55, 24—And milk, reaction of, 46, 244—And sewage, 14, 177—And urea, separation, 2, 192—Animal, gum in, 53, 34—Arsenic in, determination of small quantities, 43, 233—Biliary pigments in, detection, 68, 281—Blue colouring matter of, 14, 82, 177—Blue, extraction of colouring matters of, 47, 129—Calcium phosphate in, solubility of, 50, 46—Carbamic acid in, 68, 282—Caseine in, presence of, 48, 182—Chlorides in, estimation, 91, 163—Chlorine in, determination, 52, 118—Chlorines in, determination, 69, 145—Clinical analysis, 53, 240—Composition, 54, 218—Compound, 30, 229—Conjugated phosphoric acid in, 48, 160—Constituent, 28, 97—Copper in, 43, 233—Creatinine in, determination, 65, 57—Determination, 46, 24—Diabetic determination of sugar in, 2, 261; 47, 179; 57, 102—Diabetic examination of, 15, 74—Diabetic presence of acetone in, 35, 29—Diamines in, detection, 62, 285—Distinctions between the colourations by chrysophanic acid and santonine, 55, 70—Electrical reactions of bacteria applied to detection of tubercle bacilli in, 100, 20—Examination, 68, 281—Fermentation, 34, 50, 250; 35, 95; 54, 201—Fermentation, ammoniacal, 29, 146; 36, 257—Formation of crystals of calcium oxalate in, 37, 76—Hemialbumose in, 50, 60—Human, determination of nitrogen in, 53, 23—Human, estimation of amount of uric acid in, 12, 25, 47—Human, reducing agents in normal, 66, 91—Hydric acetate from, 21, 247—Hydrogen sulphide in, detection, 58, 166—Hypo-sulphurous acid in, detection, 57, 71—Icteric, albumen in, 51, 303—Indian, in, detection, 38, 275—Indigo-red in, detection, 62, 285—
- Iodides in, 64, 213—Iodine in, detection, 126, 300; 26, 71; 43, 109; 50, 68, 176; 72, 24—Iodine in, determination, 50, 68, 176—Iron in, detection, 45, 234—Iron in, determination, 76, 194—Kreatinine in, 5, 97—Kreatinine in, detection, 17, 96—Kreatinine in, determination, 67, 33—Kreatinine in, sodium nitroprusside as a reagent for, 48, 60—Lead in, detection, 68, 5—Lead in, determination of small quantities, 43, 233—Mercury in, detection, 82, 249—Mercury in, determination, 74, 318—Morphine in, detection, 53, 74—New body found in, after ingestion of chloral hydrate, 31, 217—Nitric and nitrous acids in, determination, 46, 24—Nitrites in, recognition, 69, 181—Nitrogen in, determination, 68, 29; 69, 145; 71, 150; 73, 282—Nitrogenised matters of, determination, 46, 92—Non-acid and di-acid phosphate in, determination, 68, 282—Normal, absorption of free oxygen by, 82, 207—Normal, acidity, 29, 259—Normal, action of sulphate of copper on, 26, 118—Normal, reductive power, 55, 260—Of dogs, allantoin and hippuric acid in, 37, 275—Of eczema patients, ptomaine extracted from, 67, 288—Of fox, sugar in, 4, 247—Of omnivora, 4, 112—Of pleurisy patients, ptomaine extracted from, 70, 109—Of swine, guanin in, 34, 205—Of tortoise, 90, 64—Oxalic acid in, estimation, 82, 72—Oxygen in, determination of free, 32, 103—Oxylic acid in, detection, 54, 86—Pathological colouring matters in, 31, 41—Peptones in, detection, 55, 24—Phenol in, detection, 46, 281—Phosphate of lime in, 4, 287—Phosphoric, 53, 97—Phosphorus in, detection in cases of poisoning, 43, 198—Phosphorus in, determination of total, 62, 240—Phosphorus in, a case of acute poisoning, 42, 259—Pigments, 62, 285—Pigments formed on heating with acids, 50, 47—Precipitation of albumenoids, 61, 289—Preparation of hydrochlorate of creatinin from, 24, 146—Ptomaines extracted from, 61, 87; 66, 257; 68, 294—Ptomaines from infected, 64, 273—Reaction for acetaetic acid in, 74, 318—Reaction of bile pigments in, 39, 150—Reactions of bile acids and their detection in, 39, 135—Red colouring matter of, 14, 177—Reducing agent in, containing benzoic acid, 43, 37—Reducing power, determination, 47, 190—Salicin in, 9, 204—Salicylic acid in, detection, 36, 10; 44, 82—Specific gravity of, as a test, 6, 278—Sugar in, 3, 29—Sugar in, cause of error in testing for, 81, 226—Sugar in, chloroform a test for, 10, 74—Sugar in, detection, 25, 272; 46, 78; 58, 109; 69, 145; 70, 48; 71, 245—Sugar in, detection and determination, 67, 253—Sugar in, detection, possible error in, 71, 245—Sugar in, detection with alkaline solution of copper, 47, 119—Sugar in, estimation, 2, 35—Sugar in, picric acid as reagent for, 48, 214—Sugar in, reagent for, 54, 166—Sugar in, test for, 3, 329—Sulphocyanic, 50, 260—Toxic alkaloids in, 51, 131—Transit of alcohol into, 21, 252—Treating, 14, 177—Urea in, estimation, 40, 43—Urea in, influence of sugars on determination of, 41, 161—Urethane in, detection, 54, 310—Uric acid in, 74, 318—Urobiline in, detection of pre-formed, 43, 13—Variations in amount of nefrozymase present in, in different states of the body, 12, 81—Violet-coloured sediment in, 25, 58—Xanthine in, appearance, of, 11, 238—Xanthine substances of, diagnosis, 66, 173—Xanthinoid compound in, 49, 224

72, 40—Production of sodium and potassium nitrite, 63, 290—Pure phosphoric acid, 68, 60—Quick method for refining gold, silver, and platinum in quantity, 63, 140—Quick method of preparing silicon, aluminium, and other chlorides in quantity, 60, 158; 66, 113—Recent investigations on fulminates, 57, 255; 64, 28—Reduction of alumina, 70, 102—Revolution in voltaic electricity, 71, 2, 160—Scorification versus cupellation, 77, 39—Separation of cadmium from copper, 63, 193—Separation of gold and silver from iron and steel, 72, 100—Separation of tin from antimony, 57, 124; 62, 216—Silicon, 57, 53—Silicon films, 63, 241—Silicon hydride, 58, 115—Simple electrical saw, 63, 97—Solenoid electro-magnet, 76, 39—Solution for depositing metallic cobalt, 59, 64—Stability of petroleum compounds, 65, 29—Sulphur in iron, 58, 255—Summary of food analyses, 62, 99—Test for tallow, 56, 106—Tetranitrocellulose, 74, 230—Thermoeffects produced under influence of high pressure, 77, 192—Three modified forms of voltaic cells, 62, 4—Use and construction of pressure tubes, 57, 155—Various methods for production of aluminium, 62, 51—Zinc eisen, 55, 100—Warren, Rev. Isaac, "Table and Formula Book" (review), 61, 95—Warren, T. P. Bruce, Action of sulphur and sulphur chloride on oils, 57, 26, 43, 113; 58, 4, 15—Action of sulphur chloride on oils, 82, 158—Adulteration of coal-tar naphtha, 58, 235, 247—Adulteration of oils, 55, 134—Analysis of mixed paints, 56, 278; 57, 31—Arsenic in the home, 58, 206—Combustions, 71, 143, 152—Contamination of water with lead, 59, 256—Corrosion of plates of steam boilers, 61, 243—Deep sea dredgings, 56, 172, 182, 192—Detection of adulteration of nickel, etc., by the magnet, 55, 37—Detection of arsenic, 83, 10—Detection of fixed oils, 70, 121—Electrical resistances of fixed and volatile oils, 16, 161—Electrification, 20, 111—Electrification and electrolysis, 57, 143—Examination of butter, 56, 222, 231, 243, 262—Examination of feed-water for steam boilers, 59, 207—Examination of oils, 56, 168, 208—Examination of oils, fats, and allied substances, 62, 27, 51, 75, 125, 179, 215, 251, 288—French technical terms, 57, 262—Is a safe now safe? 57, 130—Magnetic viscosity, 59, 124—Magnetisation of metals, 61, 231—Manufacture of butterine, 56, 133—Mathematical investigation of chemical phenomena, 58, 47—Measuring magnetic susceptibility and permeability, 56, 15—Metallic manganese, 56, 27—New form of combustion-tube, 51, 277—Nickel laboratory utensils, 55, 16—Nickel plating, 55, 61—Observations on extractum carnis, 18, 204—Sensibility of earth-nut oil to heat when electrified, 58, 259—Separation of wool and cotton, 67, 132—Softening magnesium waters, 55, 308; 56, 22—Stability of the fatty glycerides, 60, 42—Testing lubricating oils, 55, 203—Thiocamf, 60, 36—Valuation of coal for use in steam-boilers, 64, 299—Valuation of oil-cake, 53, 211—Vapour densities, 55, 228—Walnut oil, 59, 279—Water supply to steam boilers, 58, 273—Waterproofing, 58, 242—Warren, W. H., Reinforced concrete, 92, 247—Warrington, Mr., Refining gold when alloyed with tin or antimony, 1, 92—Warrington, A. W., Determination of temperature by means of data in a Charlottenburg certificate, 78, 6—Hydrometers of total immersion, 78, 144—Warrington, A. W., and Victor Meyer (*see* Meyer, V.)—Warrington, T. C., Composition of water, 73, 137, 145, 156, 170, 184—Warsaw, agricultural exhibition at, 78, 228—Wartenberg, H. von (*see* von Wartenberg, H.)—Warth, Constantine, and W. Kelbe (*see* Kelbe, W.)—Warth, Frederick John, and R. C. Farmer (*see* Farmer, R. C.)—Warth, F. J., and H. Warth, Composition of Indian laterite, 87, 256—Warth, H., Composition of soot from mineral coal, 82, 6—Diagram of composition of igneous rocks, 82, 29—Mutual action of alumina and ferric oxide at incipient white heat, 84, 305—Use of gypsum for the recovery of ammonia as a by-product in coke making, 93, 259—Wartha, A., Method for determining the temporary hardness of water, 42, 271—Wartha, N. V., Congelation of bisulphide of carbon, 23, 128—Wartha, V., Alizarine, 22, 130—Anthracene pigments and preparation of anthracene in pure state, 22, 50—Ballo's alleged hydrate of sulphide of carbon, 23, 180—Detection of small quantities of sulphur present in coal-gas, 23, 311—Determination of sulphurous acid in wine, 48, 106—Determining the temporary hardness of water, 43, 292—Direct oxidation of anthracinon by hydrate of potassa, 25, 202—Examination of wine, 43, 51—Explosion during the heating of wine, 41, 262—Influence of pressure on phenomena of combustion, 36, 154—Litmus, 34, 184—Solvent for indigo-blue, 23, 252—Wartha, V., and A. Schuller (*see* Schuller, A.)—Wartha, Dr. von (*see* von Wartha, Dr.)—Wartmann, E., Iris observed on the Lake of Geneva, 16, 95—Warwick, Countess of, Secondary and Technical School at Bigods, Duncow, 78, 256—Warwick, Arthur W., Potassium cyanide assay of lead ores, 63, 10, 145—Warwick, A. W., and T. D. Kyle (*see* Kyle, T. D.)—Warwick, Hill Sleane, Electrolysis of metallic formates, 66, 255, 265, 274, 286, 310, 323—Warwickite, 30, 217—Wash-bottle, 21, 236; 30, 192; 36, 119, 165; 37, 110; 39, 19, 190, 227; 40, 35; 44, 213, 304; 45, 12; 58, 171, 182; 91, 147—And pipette combined, 93, 71—Movable jet for, 37, 23—Self-

- acting, **1**, 195—Useful jet for, **36**, 165.
- Wash for hair, **4**, 268—Leather, **10**, 39.
- Washer, **29**, 262.
- Washers and luting for ether, etc., **35**, 72.
- Washing agents, **28**, 21—Apparatus, **24**, 217; **47**, 50; **57**, 221—Bottle, atmospheric, **27**, 185—Bottle for hot water, acids, or ammonia, **65**, 179—Mixtures, **25**, 186; **39**, 280.
- Wassum, S., 175, 185, 179; **10**, 180.
- Wasmuth, B., Permeability of the skin for microbes, **67**, 134.
- Wasowicz, D. von (*see* von Wasowicz, D.).
- Wasowicz, V., and P. Jannasch (*see* Jannasch, P.).
- Wassage, M., and A. Peterman (*see* Peterman, A.).

- Wassiljewa, Alexandra, and A. Coehn (*see* Coehn, A.).
- Wassily-Sorokine, M., Anilides of glucosides, **56**, 258.
- Waste, **2**, 103, 114—Cotton (*see* Cotton). —From manufacture of bone-glass, application to preparation of pure sal-ammoniac, **23**, 325—Gases (*see* Gases)—Heat (*see* Heat).
- Watanabe, Tossio, and Henri Moissan (*see* Moissan, H.).
- Watches and chronometers, spiral regulator, **29**, 196—Lubrication of, **1**, 144—Palladium alloys in, **53**, 100.
- Water, **2**, 20—Absorption of ozone in, **26**, 21; **28**, 84—Absorption spectrum, **49**, 182—Acetone in, detecting, **79**, 292—Acid-, Stellarton, analysis, **22**, 12—Action at high temperatures, **61**, 169—Action in irrigation, **44**, 40—Action in its circulation through the earth, **2**, 223, 234—Action of chlorine on, **61**, 212—Action of iron on, **82**, 58—Action of lead on, **18**, 296—Action of mass of, **34**, 181—Action of metallic magnesium in, **80**, 211—Action of silicon on, at a temperature of 100°, **89**, 250—Action of silicon on, below 100°, **90**, 81—Action of sodium on, **20**, 11; **72**, 38—Action of sulphur on, **31**, 197—Action of tannin on, **1**, 179—Action of wood-charcoal on organic matter in, **82**, 190—Action on acids, **64**, 284—Action on basic salts of copper, **64**, 85—Action on calcium biphosphate, **69**, 192—Action on carbohydrates at an elevated temperature, **16**, 26—Action on chloride of antimony, **24**, 23—Action on chlorides of iodine, **35**, 126—Action on chloroform, **53**, 155—Action on copper, **33**, 100—Action on diazo-salts, **92**, 8; **93**, 20—Action on different substances, **2**, 35—Action on glass, **14**, 70; **34**, 271; **66**, 73—Action on halogen compounds of alcohol radicals, **35**, 194; **36**, 223—Action on iodo-mercurate of ammonia and iodo-mercurate of potassium, **80**, 23—Action on iron, **21**, 262, 285; **22**, 34; **78**, 202—Action on lead, **4**, 172; **18**, 296; **28**, 15, 312, 314; **29**, 145, 164, 287; **35**, 110; **46**, 145, 170; **78**, 209—Action on lead pipes, **45**, 7, 14, 116—Action on magnesium, **80**, 234—Action on mercurous sulphate, **81**, 299—Action on metallic copper and lead, **78**, 209—Action on metallic sulphides, **40**, 228—Action on pentachloride of molybdenum, **83**, 193—Action on phosphorous tetrachloride and phosphorous oxychloride, **76**, 326—Action on phosphoryl chloride, **75**, 200—Action on silicon and boron fluorides, **41**, 134—Action on stannic chloride, **60**, 174, 317—Action on sugar, **26**, 48; **29**, 93—Action on uric acid, **32**, 29—Action on zinc, **49**, 107—Aerated chalybeate, preparation of, **1**, 137—Air in, **24**, 133—Air-pump (*see* Pump)—Alcohol in, **43**, 166; **57**, 232, 242—Almond (*see* Almond)—Alteration in wells by proximity of burial grounds, **24**, 288—Ammonia-free, **61**, 29; **64**, 243—Ammonia free, preparation, **41**, 160—Ammonia in, estimation by Nessler's reaction, **94**, 107—Ammonia in filtered, **37**, 9, 19, 30, 38, 93, 111—Amount evaporating in open air, **32**, 314—Amount expelled from hydrates of potash, soda, and baryta by boracic and silicic acids, **3**, 368—Analysing methods, **29**, 128, 150—Analyses, **6**, 248; **7**, 79, 131, 141, 149; **11**, 35; **12**, 87; **16**, 254; **17**, 45, 60, 72, 79, 128, 142; **19**, 230; **20**, 39; **21**, 219, 257, 249, 261; **22**, 153, 211; **23**, 22, 132; **25**, 129, 140, 157, 273; **26**, 68; **27**, 115, 280; **28**, 98; **29**, 78; **32**, 248, 258; **33**, 95, 128, 235; **35**, 94, 114, 264; **36**, 24; **38**, 131, 206; **39**, 62, 67, 94, 103; **40**, 1, 39; **41**, 272; **44**, 176; **45**, 35; **46**, 227, 237, 267; **47**, 195, 249; **50**, 237; **54**, 183; **56**, 113; **57**, 212; **59**, 10, 26, 298; **60**, 203, 249, 281; **61**, 143; **64**, 197; **66**, 102, 111, 119, 184; **68**, 199; **70**, 83, 109, 112, 140, 151; **81**, 47, 95; **91**, 118—Analysis, alkaline potassium permanganate solution used for, **46**, 284—Analysis, ammonia process, **24**, 203; **47**, 19; **49**, 65—Analysis and the sanitary value of water, **16**, 275—Analysis, application of soap-test to, **7**, 184—Analysis, curiosity in, **24**, 206—Analysis, determination of ammonia in, **43**, 137—Analysis, determination of nitrogenous matter, **16**, 7—Analysis, determination of total residue in, **61**, 193—Analysis for 28, 6d., 55, 154—Analysis in Chemical Society, **31**, 249—Analysis in India, **26**, 64, 80, 171, 185, 246—Analysis, loss on ignition in, **53**, 82—Analysis, method of stating results, **3**, 285, 345; **53**, 186—Analysis, modification of Wanklyn's method, **33**, 135—Analysis, Nessler's process in, **69**, 144—Analysis of bad, **57**, 171—Analysis, spectroscopic in, **22**, 38—Analysis, standard methods, **65**, 178—Analysis, technological, **15**, 178—Analysis, tintometer in, **84**, 50—Analysis to determine scale-forming ingredients, **62**, 299, 311—And acetic acid, solidification of mixtures, **27**, 117—And alcohol, combinations, **20**, 211, 263—And alcohol, limit of separation by distillation, **39**, 251—And alcohol, mixtures of ether with, **1**, 143—And alcohol, specific gravity of mixtures of, **1**, 207—And alcohol, specific heat of mixtures, **21**, 298—And alcohols soluble therein, simultaneous distillation, **24**, 167, 181—And alum, compounds, **54**, 12—And anhydrous acids, **37**, 21—And aniline, experiment to illustrate a temperature of equal density of, **99**, 144—And argon, combination, **74**, 122—And carbonic acid, combination, **45**, 87—And carbonic acid, compounds, **80**, 195—And carbonic acid, specific heats at very high temperatures, **49**, 235—And common salts contained in rocks and minerals, **24**, 220—And dilute caustic soda, action on crystalline and amorphous arsenic, **88**, 290—And dilute saline solutions, action on lead, **35**, 110—And ether, mixtures, **67**, 121—And ethyl alcohol, admixture, **61**, 208—And ethyl alcohol, mixtures, boiling-point curve for, **85**, 185—And ethylic alcohol, distillation of mixtures of, **75**, 277—And fire-proof paper, **42**, 330—And heat, action on sugar, **26**, 48—And hydrocarbons, heat set free by reaction of, **27**, 153—And hydrofluoric anhydride, **70**, 246—And iodide of butyl, simultaneous distillation, **25**, 82—And iodine and potassium chlorate, interaction, **62**, 97—And metals, electromotive force between, **20**, 167—And methyl-alcohol, specific heat of mixtures, **37**, 28—And 2-methyl piperidine, mutual solubility, **97**, 261—And nitric acid, action on basic telluric nitrate, **50**, 207—And nitric acid, action of sodium on, **20**, 11—And nitrogen tetroxide, reaction between, **22**, 286, 311—And normal butyric acid, solidification of mixtures of, **99**, 209—And propyl alcohol, mixture, **58**, 263—And pyridine mixtures, physico-chemical properties of, **97**, 91—And saline solutions, action on lead, **34**, 223, 234—And saline solutions, chemical action on zinc, **38**, 59—And salts, combinations, **54**, 261—And sewage examination results, **80**, 161—And silver oxide and bromine, oxidation-product of glycogen with, **34**, 153—And soil, salubrity, **23**, 141—And steam, separator for, **21**, 192—And sulphuric acid, contraction on mixing, **65**, 14—And zinc chloride, combinations, **53**, 275—Apparatus for collecting samples, **70**, 54—Apparatus for determining composition, **77**, 203—Apparatus for showing formation, **23**, 120—Arsenic in, **2**, 127—Arsenical, of Court St. Etienne, **60**, 67—Arsenical, of Whitbeck, Cumberland, **2**, 127; **8**, 74—Arsenical thermal, **5**, 6—Artesian, of the French Sahara, origin, **60**, 209—As fuel in making iron, **3**, 328—As an oxidising and reducing agent, **35**, 185—At Buda Pest, examination, **37**, 274—At high temperature, energy of, **90**, 119—At Leeds, **4**, 23—At a temperature of 100°, action of silicon on, **89**, 250—Barometer (*see* Barometer)—Bath, constant, **60**, 178, 208—Bath, constant level of, **25**, 209—Bath, continuous, **22**, 42—Bath regulator, **60**, 250, 269, 293; **81**, 65—Bath with a constant level, **47**, 166—Bath, vacuum, **69**, 245—Bath, vacuum, for temperatures below 100°, **74**, 197—Baths of porcelain, **67**, 216—Baths, preservation of constant level, **69**, 84—Behaviour of chloride of iodine, bromide of iodine, and chloride of bromine with, **36**, 247—Blast, **38**, 67—Boiler, containing sodium carbonate, **87**, 64—Boiling, cement to resist, **19**, 156—Boiling-point, **20**, 240—Boiling-point of solutions of, in alcohol, **70**, 52—Bottle well, composition, **89**, 9—Bottles, new kind, **65**, 124—Box deposit, **35**, 140—Bromine (*see* Bromine)—Caloric capacity when near its greatest density, **22**, 227—Caloric capacity, variations, **21**, 153—Camphor, **20**, 299—Capacity of soil for, **54**, 177—Capillary conduction, **52**, 228—Carbonated solution of calcium carbonate in, **63**, 192—Carbonates in, estimation, **19**, 190—Carbonic acid in, estimation, **84**, 80, 92, 101, 145, 158, 164—Carried as gas, **47**, 61—Chalybeate (*see* Chalybeate)—Characteristic of, numerical value, **84**, 240—Chemical action of penetrating rays of radium on, **99**, 211; **100**, 172—Chemical action on zinc, **38**, 59—Chemical analysis and purity, **64**, 249—Chemical decomposition as illustrated by, **34**, 43—Chemical examination, **3**, 313—Chloride of lime in, detection, **46**, 43—Chlorine, distillation, **87**, 91—Chlorine in, estimation, **21**, 217, 237—Chlorine solution in, **44**, 195—Cisterns, (*see* Cisterns)—Clarification of, **22**, 21—Colour in, estimation, **31**, 133; **34**, 77—Colour of, **5**, 55; **48**, 47—Colour of alcohols compared with that of, **74**, 181—Colours (*see* Colours)—Colouration of, **37**, 94—Composition, **59**, 147; **63**, 236; **63**, 218, 229, 239; **66**, 41, 73, 137, 155, 156, 170, 184—Composition, apparatus for determining, **77**, 203—Composition by volume, **56**, 173; **67**, 243—Composition, gravimetric, **61**, 75; **67**, 34, 68, 77, 90, 101,

1. 139-141. 101. Compressed, refraction of, 20, 21. Condensation in arable soils, 36, 191. Conductivity, preparation, 97, 127. Conducts, 16, 21. Constitution, 73, 2. Contained in double sulphate of iron and ammonia, 27, 21. Containing carbonic acid, action on minerals and rocks, 36, 23. Containing free acids, natural life in, 26, 127. Containing sodium chloride and zinc sulphate influence on soils and crops, 49, 236. Containing soluble sulphides, colour produced by Nessler test in, 31, 235. Contaminated, is it injurious for domestic purposes? 39, 28. Contaminated, reaction of diazobenzene sulphonate of sodium on iron cysteine in, 83, 35. Contaminated with choleraic poison, purifying, 29, 27. Contamination, 59, 236. Cooling, 76, 6. Copper in, determination of small quantities, 94, 2120. Courses, communication at a distance by means of, 33, 1700. Crystal, 22, 2360. Crystalline, of alums, 58, 220. Crystalline, of calcium butyrate, 46, 78. Currents theory, report on, 27, 210. Dangerous, 70, 2223. Decomposing with induction coil, 14, 274. Decomposition, 49, 125. Decomposition and the battery, 45, 221. Decomposition by iron pyrites, 37, 49. Decomposition by phosphorus, arsenic, and antimony under influence of nitric acid, with production of ammonia, 9, 242. Decomposition by platinum, 33, 74. Decomposition by radium salts, 99, 210. Decomposition by salts of protoxide of chromium, 78, 243. Decomposition by sulphur, 8, 38. Decomposition by ultra-violet rays, 100, 184. Decomposition by zinc in conjunction with a more negative metal, 25, 145. Decomposition, metallic formates in presence of, 45, 22. Decomposition, mutual helpfulness of chemical affinity, heat, and electricity in producing, 26, 1009. Decomposition of ammonium bicarbonate by, 54, 250. Decomposition of calcium chloride by, 39, 184. Decomposition of cements by, 50, 10. Decomposition of diazo-compounds by, 55, 1200. Decomposition of earthy and alkaline sulphides by solution in a large bulk of, 18, 294. Decomposition of gallium protochloride by, 46, 46. Decomposition of organic matter in, 61, 77, 80. Decomposition of salts by, 30, 263; 31, 8. 49, 100; 51. Decomposition of soluble sulphurets by, 25, 46. Delicate test for nitric acid in, 25, 80. Density, 29, 1. Destruction of soap by, 78, 209. Development of living germs in, 46, 289. Dissociation, 7, 229. Dissociation, electrolytic, 75, 116. Dissociation of glycerides by, 61, 13. Dissolution of salts in, influence of temperature on heat of, 55, 221. Dissolving resin in, 20, 323; 21, 12. Distilled, action on lead, 86, 168. Distilled, bleaching effects during electrolysis of, 60, 103. Distilled, chemical action of radium on, 95, 247. Distilled, chemical change produced by immersion of lead in, 85, 130. Distilled, colour, 47, 72. Distilled, density and expansion, 23, 50. Distilled, electro-conductivity, 50, 70. Distilled, electrolysis of, 45, 174; 60, 69, 103. Distilled for laboratories, 93, 26. Distilled, germination in, 83, 154. Distilled in copper vessels, oxidising properties, 74, 107. Distilled, lead in, 32, 82. Distilled, preparation of ammonia-free, 40, 18. Distilled, preparation of pure, 15, 204. Distilled, use, 16, 25. Double decomposition in absence of, 43, 247. Drainage, 62, 97. Drainage of cultivated lands, 67, 49. Drinking, action on lead, parts played by salts in, 30, 82. Drinking, ammonia test, 28, 93.

Drinking, analysis for ammonia, 50, 182. Drinking, and disease, 55, 173. Drinking at Birkach and Hohenheim, chemical examination, 36, 142. Drinking, at Freising, 38, 109. Drinking, contributions to decisions on, 69, 277. Drinking, determination of magnesia in, 32, 136. Drinking, hygienic significance, 46, 149. Drinking, organic impurities in, 44, 82. Drinking, preservation, 39, 34. Drinking, purification, 28, 143; 94, 142. Drinking, sterilisation by William Kuhn system, 68, 49. Drinking, wholesomeness of, 43, 171, 181. Drinking, zinc in, 49, 83, 103, 107, 115, 51, 188. Dropping influence machine, 57, 30. Drops floating on surface of, 44, 211. Ebullition, 9, 269, 19. Ebullition, cause of, 25, 170. Efflorescing, 80, 231. Electric resistance, 47, 278. Electromotive force in free jets of, 40, 214. Electrolysis, 40, 215; 44, 260, 295; 45, 13. Electrolysis, modification of Hofmann's apparatus, 26, 67. Electrolysis with oxidisable electrodes, phenomena accompanying, 33, 218. Engine for raising, 49, 229. Estuary, chemistry of, 54, 311. Evaporated by an oak tree, 22, 239. Evaporation and decomposition of carbonic acid by leaves of plants and trees, 22, 35. Evaporation by plants, 20, 105. Evaporation, determination of total residue from, 73, 281. Evaporation from the soil, 38, 90. Evaporation in a current of air, 87, 101. Evaporation, influence of the elements of arable soils on, 47, 130. Evaporation under influence of solar radiations which have traversed coloured glasses, 40, 55. Examination, 40, 63; 58, 49; 63, 200; 73, 89; 74, 50. Examination and water pollution, 38, 71. Examination, apparatus for, 55, 124. Examination, bacteriological, 64, 147; 66, 13; 67, 234; 68, 207, 301; 74, 75. Examination, bacterioscopic, 53, 332. Examination, bacterioscopic, report of committee appointed to consider the standardisation of methods for, 90, 177. Examination, biological, 52, 52, 66, 73, 89, 101. Examination, chemical, 74, 75. Examination for bacteria, 39, 135. Examination for dissolved gases, 60, 109. Examination for organic matter, 19, 278, 304; 20, 26, 112. Examination for organic purposes, 17, 22, 69, 215. Examination for sanitary purposes, 47, 7. Examination, microscopic, for organic impurities, 48, 180. Examination, microscopical, 42, 65. Examination of corpuscles in, 48, 34. Expansion, 21, 190; 59, 249. Expansion on change of temperature, 74, 258. Expansion on freezing, 24, 169. Extraordinary sample, 70, 3. Feed, for steam-boilers, examination, 59, 207. Filter (see Filter)—Filtering, Souchon process, 6, 117. Fluorine in, 1, 276. For boiler purposes, 53, 261. For locomotives, report on, 13, 58, 69. For steam boilers, 16, 137, 201, 217. For steam boilers, purification, 67, 171, 185, 230; 69, 207. For use in boilers, sodium aluminate as means for removal of lime and suspended matter from, 79, 303. Forms and actions of, 6, 200. Formula of, 10, 12. Free, evaporation of, 45, 78. Free from ammonia, 28, 182. Free from ammonia, preparation, 41, 160. Freezing, 16, 141; 21, 57; 24, 81, 26, 71, 83, 95, 107. Freezing, bursting projectiles by, 21, 273. Freezing in pipes, 68, 174. Freezing-point, 20, 82. Freezing-point, lowering by pressure, 42, 1. Freezing, thawing, and evaporation, 3, 173. Freezing, to prevent, 17, 49, 98. Fresh, estimating dissolved oxygen in, 82, 163. Fresh, from salt, 4, 288. Fresh, iodine in,

80, 185. Fresh, obtaining by evaporation, 9, 107. Fresh, produced by condensing steam, refrigerating, 5, 348. From a hot spring, 42, 324. From a man aca! point of view, 12, 206. From artesian well, analysis, 23, 300. From city pumps, 4, 70, 200. From Cathkin, near Rutherglen, analysis, 23, 113. From coal, measures at Westville, 23, 189. From condensing engines, estimation of oil in, 92, 108. From Dart which destroyed fish, 40, 54. From dropping well at Knaresborough, analysis, 73, 190. From Ionian Islands, analysis, 27, 169. From Jouhe, near Old (Jura), analysis, 81, 275. From Old Crescent Well, Harrogate, analysis, 30, 151. From peat moors and alder swamps, injurious effect on meadows, 42, 81. From salt wells near Dudley, analysis, 49, 186. From superficial strata of London basin, analysis, 1, 184. From wells in towns and populous places, 25, 107. From Zem-Zem well in Merca, analysis, 68, 303. Frozen purity of, 6, 170. Gas, 51, 143; 59, 180. Gas, action on iron, 64, 209. Gas, ammoniacal, benzoic acid in, 26, 228. Gas, carburetted, in the Bunsen burner, 93, 78. Gas, odourising, 61, 210. Gas, paraffins in commercial, 37, 187. Gas, separation of tarry matter from, 22, 324. Gas, system, Strong's, 42, 27. Gas tar (see Tar)—Gas, tarry matter from, 311, 324. Gas, use of, 60, 160. Gas, versus coal-gas, 59, 85. Gases dissolved in, estimation, 36, 237; 68, 302. Gilding as compared with pyro-gilding, 26, 137. Glass as a solvent for coralline, 21, 230. Glass, Fluckiger's reactions, 24, 46. Glass, neutral, for washing wool, 24, 46. Glass, reactions, 22, 263. Glass, solution of, 22, 230. Gum (see Gum)—Halhydrate, 20, 107. Hamburg, 66, 144. Hammer, luminosity of, 22, 230. Hard and soft, 22, 168, 204. Hard, and stone, 55, 128, 131. Hard, softening, 90, 93. Hard, softening by heating under pressure, 91, 148. Hardness of, 21, 156, 168; 51, 297. Hardness of, and mounds of coal ashes, 73, 50. Hardness, anomalous degrees of, 12, 12. Hardness of, determining, 42, 271; 43, 292; 46, 235. Hardness of, estimation for technical and scientific purposes, 25, 70. Hardness, soap tests for, 44, 302. Harrogate, analysis, 14, 49. Heat of dissolution of salts in, 52, 111, 161. Heated, arrangement for showing convection currents in, 35, 83. Heating, 6, 153. Hot, as an agent in warfare, 4, 28. Hydrogen of, ammonia from, 41, 155, 195, 272. Impure, 28, 95. Impure, cleansing or clarifying, 11, 202. Impurities and purification, 4, 86; 6, 283; 15, 60. Impurities in, ascertaining and removing, 5, 181. In alcohol and ether, detection, 43, 107. In alcohol, proportion, 41, 36. In animal charcoal, estimation, 25, 276. In blood, quantity, 59, 300. In chemical action, mode of intervention, 29, 9. In chloride of calcium bulbs, acidity of, 21, 178. In closed funnel phenomena of, 4, 112. In contact with silver, electrolysis, 20, 170. In crop-bearing soils after long drought, determination, 67, 288. In cultivated lands, regulating amount, 31, 217. In double sulphates, 24, 280. In foods, 95, 176. In glucoses, honey, etc., estimation, 52, 280. In illuminating gas, quantity, 19, 310. In iodine, determining, 66, 144. In irrigation, changes and effects of, 45, 176; 53, 40. In long tubes, propagation of pressure and flow of, 30, 162. In moss-plants, movement of, 52, 261. In organic substances, determination, 10, 110; 51, 297. In paraffin residues and crude paraffin, estima-

tion, 30, 57.—In phenol, estimation, 61, 236.—In potato-starch, determination, 51, 297.—In sealed tubes, temperature at which it freezes, 94, 89.—In silicates, determination, 36, 80; 60, 310.—In soap, determination, 66, 200.—In starch, determination, 52, 225.—In starch, percentage of, 19, 297.—In steam-boilers, 65, 13.—In sulphate of ammonia, determination, 72, 6.—In superphosphates, determination, 63, 100, 114, 122.—In superphosphates, proportion, 42, 250, 260.—Incompressibility of, 12, 193.—Increase of volume of, under 40, 29, 25.—Index of refraction, 21, 225.—Index of refraction, variation of, 21, 201.—Influence in production of milk, 12, 81.—Influence on combustion of carbon monoxide, 81, 25.—Influence on leaden pipes, 24, 22.—Influence on siliceous minerals, 20, 35.—Intervention in chemical action, 29, 9.—Iodated, saline, of Sales, 26, 47.—Iodine in, 74, 186.—Ions of pure, 93, 10.—Jacketted flexible tube, 60, 187.—Jet air-pump, 36, 95.—Jet blower, 96, 250.—Jet, impact of, 20, 166.—Keeping in zinc tanks, 20, 227.—Lime (see Lime).—Liquid ammonia molecular weight of, 53, 238.—Loch Katrine, 45, 125.—London, 13, 136; 15, 189.—London, for drinking, 26, 287.—London, past, present, and future, 15, 25, 37, 109, 61; 73, 99.—London, purity of, 74, 243.—London, supply, 4, 76, 176, 260; 14, 118, 120; 21, 92; 25, 206; 26, 239; 43, 51, 104, 174, 204, 266; 44, 33, 86, 140, 186, 254, 288; 45, 28, 81, 113, 170, 180, 194, 217, 283; 46, 17, 107, 153, 191, 236, 207; 47, 10, 100, 134, 208, 211, 290; 48, 63, 77, 99, 102, 159, 197, 243, 297; 49, 41, 111, 130, 185, 230; 50, 7, 38, 84, 157, 108, 254, 258, 301; 51, 57, 98, 104; 52, 51, 266, 296, 314; 53, 90, 137; 54, 44, 92, 185, 211, 260, 318; 55, 53, 100, 183, 242, 290; 56, 32, 104, 176, 222, 272; 57, 39, 67, 125, 166, 204, 245; 58, 46, 91, 176, 195, 252, 310; 59, 91, 138, 196, 246, 310; 60, 91, 104, 166, 216, 252, 309; 61, 43, 105, 144, 190, 238, 252, 307; 62, 33, 104, 157, 196, 267, 313; 63, 60, 115, 205, 266, 303; 64, 41, 122, 161, 220, 277; 65, 52, 100, 158, 218, 256; 66, 4, 54, 116, 167, 201, 260, 322; 67, 54, 103, 150, 198, 250, 293; 68, 47, 148, 153, 202, 249, 310; 69, 43, 91, 141, 186, 246, 261; 70, 41, 104, 141, 215, 240, 296; 71, 44, 92, 141, 202, 250, 300; 72, 41, 92, 148, 205, 262; 73, 5, 65, 111, 146, 193, 241, 300; 74, 41, 88, 169, 207, 243, 266, 313; 75, 41, 90, 147, 200, 247, 266; 76, 40, 104, 101, 206, 247, 307; 77, 33, 90, 122, 185, 232, 288; 78, 40, 136, 165, 205, 248, 319; 79, 88, 137, 184, 241, 260; 80, 26, 135, 166, 199, 240, 266; 81, 43, 90, 165, 197, 231, 266; 82, 30, 156, 165, 191, 240, 265; 83, 44, 88, 136, 183, 250, 294; 84, 30, 94, 144, 190, 251, 311; 85, 43, 90, 150, 190, 248, 308; 86, 40, 161, 203, 251; 87, 8, 57, 103, 147, 197, 244, 305; 88, 40, 104, 160, 217, 264, 311; 89, 52, 88, 146, 211, 242, 290; 90, 43, 106, 172, 201, 262, 314; 91, 12, 91, 137, 195, 237, 288; 92, 32.—Lowering temperature, 21, 208.—Lowering temperature due to solution of salts in, 19, 214.—Lowering temperature of maximum density of, produced by solution of chlorides, bromides, and iodides of potassium, sodium, rubidium, lithium, and ammonium, 83, 287.—Magnesia-hard, softening, 39, 258.—Magnesian, 21, 05.—Magnetic rotation of mixture of, with acids of fatty series, 54, 203.—Manganese in, 84, 258.—Manganese in, determination, 97, 3.—Mass, action of, 43, 106.—Measurement of gases over, 18, 1, 133.—Measuring electrolytic dissociation of, 100, 213.—Meter, 22, 72; 25, 155—

Meters, reports on the results of the competition for, 26, 169.—Metropolitan, analysis, 13, 24, 72, 119, 120.—Metropolitan, composition and quality, 13, 11, 60, 168, 216, 276; 14, 12, 83, 170, 216, 240, 288; 16, 77, 220, 268; 17, 24; 33, 55; 34, 216; 35, 12, 22, 125, 146, 165, 277; 36, 23, 102, 140, 157, 248, 267; 37, 53, 63, 154, 202, 236; 38, 37, 72, 199, 221, 276; 39, 24, 72, 150, 174, 240; 40, 6, 31, 76, 145, 182, 225, 289; 41, 42, 111; 42, 211, 319.—Metropolitan, supply, 2, 168; 14, 118, 120; 15, 22, 134, 151, 170, 190, 203; 17, 255, 269.—Micro-organisms in, 52, 84.—Mineral (see Mineral).—Mississippi river, 70, 81.—Mixture with sulphuric acid, heat liberated by, 36, 256.—Mode of intervention in chemical action during mixture of saline solutions, 28, 70.—Molecule of, 8, 147.—Molecular conductivity, 92, 256.—National and international conservation of, for power, 100, 10.—Natural, containing excess of oxygen, 19, 276.—Nitric acid in, estimation, 10, 10.—Nitrates in, detection and determination, 74, 222.—Nitrites in, determination, 32, 163; 63, 228.—Nitrites in, estimation, 78, 29.—Of artesian well of Rochefort, 24, 216.—Of Ben Rhydding, Yorkshire, analysis, 2, 242.—Of Black Sea, specific gravity, 20, 311.—Of boiling springs in New Zealand, composition, 5, 96.—Of brine springs of Stoke Prior, Worcestershire, chemical examination, 48, 207.—Of Chabertout, analysis of deposit formed by, 52, 320.—Of combination of alums, 54, 322.—Of condensation of low-pressure steam-engines, system of purifying, 26, 23.—Of crystallisation, 22, 215; 53, 308; 54, 53.—Of crystallisation, influence of heat on combination of sodium monosulphide with 55, 177.—Of Danube, 49, 47.—Of dilution, variation in amount, 40, 286.—Of field drains, composition, 71, 197.—Of Great Glacier, analysis, 79, 159.—Of Grenelle artesian well, 19, 273.—Of Grosnard, analysis, 21, 264.—Of Hamburg, 66, 111.—Of Hatray, near Spa, 26, 19.—Of Holy Well, analysis, 16, 254.—Of hydrosilicates, 20, 119.—Of infiltration of St. Petersburg, condition of, 25, 83.—Of Irish Sea, condition of, 21, 182.—Of Mediterranean colouration, 21, 276.—Of Meuse, 52, 200.—Of mineral springs near Cairo, sulphate, 22, 144.—Of mines, barium sulphate from, 60, 80.—Of Neva, 51, 153.—Of Nile, 202.—Of Nile, analysis, 58, 71.—Of old sulphur well at Harrogate, analysis, 18, 155.—Of Pulton, Wilts, analysis, 3, 77.—Of remarkable medicinal spring in Jamaica, analysis, 17, 140.—Of Rhine, constituents, 23, 156.—Of River Hooghly, analysis, 34, 84.—Of River Mahanuddy, analysis, 26, 306.—Of River Newa, fermentable matter in, 22, 203.—Of river Rhone, distribution, 25, 310.—Of river Rhone, oxysulphocarbonate of iron in, 82, 315.—Of rivers, changes of quality, 23, 227.—Of St. Dunstan's Well, analysis, 39, 250.—Of Shotley Bridge Spa, analysis, 49, 102.—Of soil and of plants, evaporation, 21, 180.—Of spring of St. Thiebaut, analysis, 29, 51.—Of Thirlmere, 33, 216.—Of towns, 22, 107.—Of well of Carisbrooke Castle, 40, 310; 41, 10, 57.—Ordinary and distilled, action on lead and tin condensers of distillation apparatus, 29, 145.—Organic impurity in, determination, 6, 306.—Organic matter in, 9, 224; 14, 133, 304; 15, 95, 133; 17, 102; 21, 295; 41, 254.—Organic matter in, detection, 41, 30.—Organic matter in, determination, 49, 150; 50, 237; 51, 170.—Organic matter in, estimation, 2, 273; 76, 280; 89, 210, 220.—Organic matter in, oxidation, 43,

42.—Osmose, manurial results with, 46, 123.—Oven, lamp for, 26, 84, 96.—Oxygen dissolved in, action on reducing agents, 27, 293.—Oxygen dissolved in, determination, 41, 215.—Oxygen dissolved in, estimation, 61, 57; 77, 237; 85, 259.—Oxygen in, determining free, Bunsen's method, 42, 206, 221.—Oxygen in, estimation, 38, 184.—Oxygen in, estimation of dissolved, 85, 259.—Oxygen in, estimation of free, 54, 9.—Oxygenated, 15, 123; 21, 264, 276; 51, 61, 72; 52, 36.—Oxygenated, absence of, in snow fallen at Rouen, 21, 129.—Oxygenated, action on chrome oxides, 54, 98.—Oxygenated, action on hydrated manganese oxide, 62, 202.—Oxygenated, action on organic matters, 45, 263.—Oxygenated, action on oxygen compounds of manganese, 62, 202.—Oxygenated, action on permanganic acid and the permanganates, 61, 254.—Oxygenated, action on silver oxide, 41, 183.—Oxygenated, and chromic acid, 59, 157.—Oxygenated, and ozone, 26, 118.—Oxygenated, decomposition, 41, 159.—Oxygenated, electrolysis, 46, 46.—Oxygenated, for bleaching wool, 59, 84.—Oxygenated, for cotton-bleaching, 64, 9.—Oxygenated, formation during electrolysis, 37, 82.—Oxygenated, in organisms of plants, 39, 149.—Oxygenated, its industrial uses and employment in surgery and medicine, 47, 202.—Oxygenated, molybdic reaction of, 65, 132.—Oxygenated, its preparation and uses, 52, 177.—Oxygenated, not the cause of colouration in ozone test-papers, 17, 130.—Oxygenated, preparation of pure, 6, 301.—Oxygenated, reactions with chromic acid, 59, 48.—Oxygenated, reducing properties, 52, 24.—Oxygenated, stability, 41, 250.—Pathogenic micro-organisms in, 54, 72.—Pathogenic organisms in, 54, 238.—Peaty, action of air on, 41, 245.—Perforation of zinc cisterns by, 42, 246.—Permanganate of potash in, 17, 192.—Phenicated, to preserve meat, fish, and vegetables, etc., 23, 191.—Pipes, corrosion of iron, 22, 23.—Pipes, corrosion of unlined, 30, 46.—Pipes, lead versus tin for, 19, 104.—Pipes, prevention of bursting, 44, 248.—Pollution, 25, 167.—Pollution by sewage, 49, 104.—Potable, 21, 167; 53, 239.—Potable, analysis, 45, 59.—Potable, bacteriological examination, 70, 140; 74, 73.—Potable, behaviour of different bacteria in, 55, 225.—Potable, chemical examination, 74, 73.—Potable, chemistry of, 50, 203.—Potable, examination, 73, 237.—Potable, micro-organisms of, 53, 116; 54, 51.—Potable, lead in, detection, 83, 40.—Potable, nitrates in, detection, 60, 110.—Potable, nitrates in, determination, 61, 15.—Potable, nitrates in, estimation, 23, 254; 44, 23, 46, 70, 80.—Potable, nitrates in, ferrous sulphate as an indicator of amount, 28, 248.—Potable, nitric acid in, estimation, 22, 227.—Potable, organic matter in, determination, 36, 26; 46, 23, 63, 72, 90, 101, 108; 47, 218, 232; 75, 206.—Potable, putrescent organic matter in, 36, 2, 20, 42.—Potable, radio-activity from springs of, 93, 141.—Power, utilisation, 17, 300, 306.—Precipitation of muddy matter from, 23, 225.—Precipitation of zinc by, 30, 163.—Previously boiled and exposed to the sun, disengagement of oxygen from green twigs submerged in, 37, 251.—Proof cloth (see Cloth).—Proof glue (see Glue).—Proof paper (see Paper).—Proof paste (see Paste).—Proof pasteboard (see Pasteboard).—Proof, rendering tissues, 21, 95; 42, 330.—Proofing, 22, 72; 43, 199; 58, 233, 243, 245.—Proofing and recovering products employed therein, 9, 96.—Proofing canvas, 75, 108.—Proofing

material, 12, 258—Propagation and pressure in long tubes, 30, 152—Pure, from lead pipes, 8, 157—Purification, 8, 253; 45, 120; 51, 22; 52, 37; 65, 6; 69, 8; 97, 275—Purification, agents for, 40, 180—Purification by alum, 51, 241; 54, 35—Purification by continuous fractional distillation, 89, 141—Purification by means of the halo gens, 82, 71—Purification by metallic iron, 1, 83—Purification by oxide of manganese, 1, 108—Purification by oxides of iron, 1, 47—Purification, Clarke's process, 52, 100—Purification, determination of carbonate of sodium necessary to precipitate the lime and magnesia for, 89, 254—Purification of dirty, 22, 95—Purifying, 9, 131; 14, 60, 71; 19, 230—Purifying patent, metallic iron, 1, 108—Purifying patents, 1, 132—Purity and chemical analysis, 64, 250—Putrescible matter in, 17, 203—Rain (*see* Rain-water)—Reaction on sulphuric acid and its salts, 27, 105—Reciprocal combustion of elements of, 23, 60, 283; 24, 81—Red Sea, 96, 215—Red Sea, composition, 13, 117—Reducing agent, 54, 10—Refraction, 21, 225—Relations of contraction on mixing acetone with, 74, 203—Removal of micro-organisms of, 52, 27, 40—Removal of gypsum from, 21, 70—Rendered physiologically pure by filtration, 50, 115—Reservoirs in soil, 77, 117—Retaining power, 35, 220—River, 41, 143, 266, 267; 43, 113; 85, 276, 288—River, filtration, 22, 72, 84—River, impurities in, 36, 242—Rotating, ebullition of, 85, 273—Salt, crystallised compounds, 35, 17—Saturated with gypsum, 19, 266—Scarborough, analysis, 6, 278—Sea (*see* Sea)—Separation and estimation of iron and phosphoric acid from, 88, 280—Sewage in, detection, 64, 233—Sewage, of Paris, utilisation, 30, 263—Sewage, purification, 20, 274—Sewage, utilisation, 21, 248—Silica in, estimation, 79, 13—Snow (*see* Snow-water)—Soda- (*see* Soda-water)—Softening by aid of lime-water, 26, 301—Softening by means of lime, 25, 23, 35, 50—Softening, Clarke's process, 17, 98—Softening, quantities of lime and soda for, 58, 84—Solid, 34, 101—Solubilities of gases in, 71, 255—Solubility in, of substitution derivatives of benzene, 73, 153—Solubility of aluminates of lime in, 45, 187—Solubility of cane-sugar in, 44, 82—Solubility of gases in, 81, 13—Solubility of glass in, 61, 132—Solubility of gypsum in, 35, 105—Solubility of lime in, 37, 103—Solubility of ozone in, 41, 15—Solubility of potassium perchlorate in, 33, 15—Solubility of salts and elementary gases in, 25, 311—Spa, unusual amount of ammonia in, 27, 6—Specific heat of, 21, 166, 201—Spectrum of colour of, through great thickness, 16, 195—Sprengels, action of, 58, 207—Spring, determination of nitric acid in, 38, 275—Spring, from Santa Catalina, analysis, 20, 228—Spring, improving, 24, 23—Spring, impurities in, 36, 242—Spring, organic matter in, 21, 216—Statistics, 21, 166—Sterilisation, production of ozone for, 100, 160—Sterilising, simple method, 68, 158—Substitutes, nomenclature of, 8, 182—Subterranean, in north west region of Bismarck, 76, 110—Sublimates (*see* Sublimates)—Solubility, *see* Solubilities—Solubility in action on cast iron pipes, 27, 100—Sublimated, 21, 231—Sublimated hydrogen, preservation, 64, 257—Sublimated hydrogen, super-saturated, 38, 275—Sulphuretted, of the Ber Keraui, in the Libyan Desert, analysis, 31, 262—Super-saturation of oxygen in, 67, 87—

Supplied from Calcutta hydrants, 28, 95—Supplied for domestic purposes, circumstances which affect purity of, 33, 102, 125, 145, 167—Supplied to Manchester, 27, 173—Supplies and fever death rate, 79, 120—Supplies, dairy, problems relating to, 86, 235—Supplies, purification by use of hypochlorites, 100, 321—Supply and death rate, 18, 213—Supply and quality in City of Munich, 21, 167—Supply and waterworks at Posen, 23, 101—Supply, arsenic in, 2, 111—Supply, artesian, 51, 26—Supply for domestic purposes, 19, 227—Supply, Metropolitan, 2, 168; 14, 118, 120; 15, 22, 134, 151, 170, 190, 203; 17, 255, 269—Supply of towns, 7, 33; 15, 1; 18, 202; 21, 252; 23, 71—Supply, sanitary problems, 75, 289—Supply to steam boilers, 58, 274—Surface tension of, 76, 22—Suspension of clay in, 30, 57, 97; 34, 142—Synthesis, lecture experiment on, 35, 85—Taking samples for bacteriological purposes, 74, 258—Tar, 16, 214; 17, 210—Tar, anthracene from, 51, 44—Temperature of greatest density, 31, 217—Temperature of maximum density, 71, 74—Test, bacteriological, 57, 15—Tests, 17, 166, 180, 203; 54, 302—Thames, filtered, and spring water from chalk strata, 31, 282—Thames, nitrates in, 34, 82—Thames, permanganate of potash and acetic acid on bacteria in, 75, 171—Thames, report on, 47, 21, 31—Thermal, Buxton, 45, 84—Thermal, Buxton, analysis, 46, 201—Thermal, Buxton, chemical examination, 43, 268—Thermal phenomena accompanying action of, on aluminium powder, 99, 168—Thermal phenomena attending solution of ammonium nitrate in, 35, 9—Thermal, mineral of the Solfatara at Pozzuoli, 22, 95—To keep in burst pipes, 3, 48—To prevent freezing, 17, 40, 98—Transmutable nature of, 18, 61—Type, 21, 97—Under high pressure, saccharification of starch by, 45, 88—Ureometer, 77, 105—Use of phenolphthalein in illustrating the dissociating action of, 74, 32—Use of Treadle scale for solutions lighter than, 71, 292—Vacuum pump (*see* Pump)—Vapour, action of carbonic oxide on, at a red heat, 94, 36—Vapour, action of nitrogen upon, 92, 201—Vapour, action on ferrous salts, 83, 11—Vapour, action on molybdenum, 83, 11—Vapour, action on sulphides at a red heat, 94, 46—Vapour, condensation in presence of radium emanation, 97, 35—Vapour, decomposition by electric spark, 86, 253—Vapour density, 16, 38, 50—Vapour from, 3, 300—Vapour, influence on reduction of carbonic anhydride by means of carbon, 92, 94—Vapour, volatility of mercury with, 2, 143—Vatry, experiments on, 40, 171—Vatry, peculiarities of, 38, 101—Velocity of sound in, 21, 142—Versus fire, 4, 1—Vichy, 6, 294—Viewed as hydric acid, 2, 326—Viscosity of, 35, 220—Waves, refraction of, 49, 234—We drink, 16, 51—Weight of a cubic decimetre of, at 40° C., 22, 154—Weissenburg, analysis of, 34, 73—Well, 55, 220—Well, estimation of free oxygen in, 37, 7—Well, London, 15, 150—Well, nitrates in, 4, 239, 253—Well, which caused typhoid fever, composited on, 40, 97—Well, Worthing, 13, 131—Wheels, 22, 31—Withdrawal of, 21, 100—Works of Berne, 22, 203—Zinc in, 76, 203, 213—

Waters, acid arising in volcanoes of the Cordilleras, 29, 164—Acid improvement of, 19, 287—Action of sunlight on natural, 83, 25—Aerated, freezing of, 15, 62—Alkalies in, determination, 61, 38—Alkaline earthy carbonates in, determination, 46, 302—

—Ammonia in, 42, 83—Ammonia in atmospheric, 64, 321—Ammonia in, disappearance, 34, 152—Ammonia in, estimating, 95, 142—Ammonia in, from gas purifiers, treating, 80, 37—Ammonia in, variation of amount, 71, 225, 237, 249—And salts, oxidation of ammonia in, 54, 226, 237—Artesian of the French Sahara, 60, 209—Bituminous, 72, 269—Black, of the equatorial regions, 58, 305—Boiler feed, analysis, 39, 5—Boiler, rapid analysis, 78, 319—Carbonated ferruginous, 44, 204—Carbonic acid contained in, 34, 110—Chalybeate (*see* Chalybeate)—City, of United States, relative purity of, 44, 265—Containing chlorides and bromides, estimation of organic matters in, 89, 219—Contaminated, and the cholera, 50, 235—Contaminated by cesspools, 48, 227—Contaminated, cystine in, 82, 255—Contaminated, fatty acids in, 85, 143—Copper in, 24, 205—Distilled, preparation, 77, 12—Drainage (*see* Drainage)—Drink ng, of Königsberg, 35, 210—Dublin, estimation, 41, 62—Examination by ammonia method, 31, 233—Feed, of steam boilers, analysis, 60, 317—Feeding steam boilers with certain, 4, 316—Filtered, of Rhone, examination, 62, 250—Fluorised, 80, 295—From hot springs at Djebel Achkel, analysis, 82, 275—From Sétif, action on lead, 84, 243—From washing wools, treatment of, 47, 270—From wells near the sea, changes in composition, 35, 82—Gas, testing, 39, 134—Hardness of, determination, 49, 149—Hardness of, intermediate frothing point in determining, 31, 245—Hardness of, use of a solution of oleate of potassium for determining, 90, 55—Hygienic, decision on potable and household, 72, 210—In arable soils, analysis, 21, 46—In India, analysis, 26, 64, 80, 185, 246—Industrial and sewage, purification, 64, 105—Industrial, analysis, 62, 12, 236—Iron in, determination, 30, 246, 257—Lime in, estimation, 77, 135—Magnesian, softening, 55, 276, 308; 56, 11, 22—Manganese in, 84, 183—Manganese, of Excelsior springs, 61, 123—Meteorite lime in, 29, 250—Mineral (*see* Mineral)—Moorland (*see* Moorland)—Muddy, of the Hugli, during rainy season, and its purification, 30, 37—Natural, action of sunlight on, 83, 25—Natural, determination of gases dissolved in, 20, 20—Natural, determination of hardness of, 63, 201—Natural, determination of organic matter in, 40, 99—Natural, determination of organic nitrogen in, 40, 179—Natural, elimination of lime from, 20, 201—Natural, estimation of ammonia, nitric acid, and nitrous acid in, 81, 27—Natural, filtration, 63, 46, 56—Natural, gold in, 70, 6—Natural, oxygen of, 44, 308—Natural, reagent for estimating the amount of carbonic acid in bicarbonates contained in, 18, 169—Natural, self-purification, 52, 260—Nile, fertilising properties, 59, 157—Nitrates in, detection, 18, 179—Nitric acid in, estimation, 21, 94—Nitrites in, determination, 91, 299—Nitrites in, estimation, 17, 123—Of contaminated wells, tyrosine in, 81, 252—Of Dead Sea, 45, 247—Of different types, varying qualities of malt albumenoids extracted by, 46, 220—Of London, analysis, 12, 302—Of London, Registrar-General's reports on, 25, 159, 169—Of Luchon, microbia in, 54, 237—Of Paris, 50, 249—Of Prince Edward Island, Nova Scotia, 30, 154—Of salt lake of Urmi, 80, 61—Of South Oranais, 48, 270—Of wells of Guilloitère and Brotteaux à Lyon, contaminated, 81, 126—Of Yellowstone National Park,

- analyses, 59, 113, 125, 153, 163—Organic carbon in, determination, 53, 271—Organic matters contained in, 10, 274—Osmose, 52, 285—Peaty, clarification by alum, 12, 191—Peaty, purification by freezing, 97, 270—Plombières, radio-activity, 97, 132—Polluted, purification, 47, 201—Potable, 43, 268—Potable, ammonia in, 50, 270—Potable, ammonia in, estimation, 46, 247—Potable, analysis, 26, 215; 29, 165; 33, 85, 104—Potable, and house filters, 60, 185—Potable and unsalubrious, determination of vegetable substances present in, 26, 193—Potable, and lead, 50, 128—Potable, bacteriological examination, 70, 149; 74, 73—Potable, chemical analysis, sanitary value of, 54, 103, 133—Potable, chlorine in, determination, 94, 258—Potable, examination, 50, 156—Potable, examination for microb., 51, 30—Potable, gases dissolved in, 8, 45—Potable, in South-west Lancashire, 89, 6—Potable, micro-organisms of, 52, 275, 308—Potable, nature and examination of organic matter in, 17, 147—Potable, nitrates in, 73, 269—Potable, nitrates in, estimation, 22, 94; 26, 105; 63, 233—Potable, nitrates in, origin of, 23, 43—Potable, nitric acid in, 50, 270—Potable, nitric acid in, estimating, 25, 205—Potable, nitrates in, estimating, 62, 203—Potable, nitrous acid in, 50, 270—Potable, nitrous acids in, detection and estimation, 40, 8, 61—Potable, organic nitrogen in, estimating, 92, 8—Potable, organic purity of, 38, 283—Potable, peroxide of chlorine as a sterilising agent for, 84, 116—Potable, phosphates in, determination, 84, 69, 78—Potable, points in analysis of, 11, 260, 285—Potable, purification, 79, 35; 86, 224—Potable, significance of nitrates in, 70, 236—Purification, 63, 237; 71, 185—Purification, biochemical, 81, 45—Purification, comparative examination of methods, 81, 46—Putrid, 53, 156—Rain (*see* Rain)—Refuse, purification, 57, 32—River (*see* River)—Salicaceous, mean composition, 41, 283—Saline, chlorine, bromine, and iodine in, 76, 203—Saline, oxygenated, 12, 121—Selenitic, origin of arsenic and lithia in, 47, 10—Soft and hard, in brewing, 42, 36—Soil and sub-soil, chemical procedures in, 49, 47—Solution of chlorine in, 42, 119—Spring, estimation of nitric acid in, 21, 94—Spring, in Duchy of Meiningen, 36, 184—Spring, hot, 62, 264—Spring, nitric and nitrous acids in, 63, 134—Spring, of the town of Munster, 38, 200—Spring, urea and creatine of ammonia in, 37, 233—Spring, zinc in, 42, 49—Subterraneous, composition, 64, 153—Suint, amines in, 55, 266—Sulphates in, determination, 38, 70—Sulphur (*see* Sulphur)—Sulphuretted, of the Pyrenées, origin, 12, 252—Sulphuric acid in, estimation, 36, 227—Sulphurous, of Eauv-Bonnes, changes when in contact with a limited quantity of air, 26, 193—Sulphurous, of Bagnères de Luchon, electricity developed in, 11, 71—Thermal, 94, 70—Used for drinking, etc., 20, 41—Waste, and industrial gases, influence on soils and plants, 45, 88—Waste, chemical purification, 40, 181—Waste, from manufactories, purification, 45, 265; 46, 24—Waste, from sugar works, purifying, 43, 118; 52, 12—Waste, of starch works, use of, 37, 133—Waste, purification of industrial, 54, 333—Waste, treatment, 47, 12—Well, alkaline reaction, 54, 24—Well, analysis, 55, 284—Well, estimation of organic matter and nitric acid in, 20, 167—Well, Indian, excessively saline, 85, 297—Waters, Arthur W., Method of mounting electrical resistances, 49, 139—Waters, W. L., Variations in the E.M.F. of Clark cells with temperature, 76, 252—Waterhouse, George B., Estimation of titanium, 85, 198—Waterhouse, Major-Gen. J., Action of light on metallic silver, 80, 161—Sensitiveness of silver and other metals to light, 82, 1, 13—Watering roads, chloride of calcium for, 34, 110—Streets with saline solutions, 24, 215—Streets with salts, 23, 120, 191—Waterspouts, 29, 35, 92—Waterville, labradorite rocks from, composition, 25, 71—Waterling, H., Manurial experiment with barley, 50, 296—Watkin, E. L., and J. Morrow (*see* Morrow, J.)—Watkin, F. W., Apparatus for measuring volume of gas involved in various chemical actions, 56, 152—Watkins, C. A., Yeast and other ferments, 15, 156—Watkins, E. J., Ropiness in flour and bread, 93, 199—Watkins, Hezekiah, Hell-gate explosion, 52, 271—Watson, Mr., Portland cement, 41, 189—Watson, A. Forbes, Argon, 71, 111—Watson, Charles J., Phenomena of vibration, 24, 33—Watson, David, Determination of arsenic in copper, 46, 46—Watson, Edwin Roy, Acetylenic ketones, 90, 252—Relation between chemical constitution of monoazo-dyes and their fastness to light, 100, 251—Silver dioxide and silver peroxynitrate, 92, 300—Watson, E. R., and S. Ruhemann (*see* Ruhemann, S.)—Watson, E. R., A. Chandra Sirkar, and Jatindra M. Dutta, Relation between chemical constitution of monoazo-dyes and their fastness to light, 100, 313—Watson, George, Constitution of basic salts, 60, 283—Liebreich's dead space in chemical reactions, 58, 297—New catalytic reaction, 46, 9—Observations on precipitation, 61, 207—Transition of precipitates from amorphous to crystalline state, 63, 109—Volatility of pyrophosphoric acid, 68, 199—Watson, Herbert Edmeston, E. C. C. Baly, and J. N. Collie (*see* Baly, E. C. C.)—Watson, H. W., "Elements of Plane and Solid Geometry" (review), 24, 107—Watson, John, Certain scales of diurnal Lepidoptera, 4, 331—Prevention of frosting of window panes, 69, 290—Watson, J. Forbes, Fibre-yielding plants of India, 1, 293, 304—Watson, W., Construction and attachment of galvanometer mirrors, 87, 250—Determination of moment of inertia of magnets used in measurement of horizontal component of the earth's field, 91, 200—Hints on the preparation of diagrams, 89, 128—Instrument for comparing thermometers with a standard, 75, 249—Quartz-thread vertical force magnetograph, 89, 127—Watson, W., A. E. Briscoe, and C. V. Boys (*see* Boys, C. V.)—Watson, W. F., "Elementary Experimental Chemistry, Inorganic" (review), 84, 229; 85, 70—Watson, William Henry, Action of Nessler test on rain-water, 31, 263—Action of oils on metals, 42, 190—Action of sea-water on lead and copper, 35, 192—Action of various fatty oils upon copper, 36, 200—Analysis of chalybeate water from a spring at Sellafield, near Whitehaven, 32, 11, 309; 33, 16—Boiler incrustations, 36, 33—Detection of milk adulteration, 40, 102—Determinations of ammonia in water analysis, 43, 137—Effect of alcohol on saliva, and on the chemistry of digestion, 39, 226—"Science Teachings in Living Nature" (review), 40, 178—Watt, Alexander, "Art of Paper-Making" (review), 61, 226—"Art of Soap making" (review), 49, 102; 52, 199—"Art of Leather Manufacture" (review), 50, 305—Dichlorhydrine, 25, 191—Electrical centrifugal machine for laboratories, 52, 232—"Electro-Metallurgy" (review), 60, 61—Specific rotatory power of cane- and invert-sugar, 42, 196, 221—Watt, G., E. J. Bevan, C. F. Cross, C. M. King, and E. Joynson (*see* Cross, C. F.)—Watt, Henry Edgar, Alkaloids of Senecio latifolius, 99, 139—Estimation of orcinol in orchella weed, 97, 286—Watt, J., Converting vegetable fibrous substances into pulp, 5, 335—"Watt" and "horse-power," relation between, 50, 167—Watters, L. L., and J. A. Mathews (*see* Mathews, J. A.)—Watteville, C. de (*see* de Watteville, C.)—Wattmeters, dynamometer, 97, 190—Electrostatic, 63, 140—Hot-wire, 96, 30—Watt-photometer, 92, 264—Watts, Francis, Analysis of iron and steel, 45, 270—"Introductory Manual for Sugar-Growers" (review), 67, 108—Milk analysis, 61, 162—Oil obtained from lime-leaves, 53, 107—Simple method of sterilising water, 68, 178—Watts, F., and H. A. Tempany, Keeping power of Fehling's solution, 97, 45—Polarimetric determination of sucrose, 96, 292—Watts, Henry, "Dictionary of Chemistry" (review), 7, 165, 305; 8, 21, 122, 251, 306; 9, 189; 10, 58, 106, 238, 285; 11, 9; 13, 31, 14, 166; 15, 93; 18, 8; 32, 143; 39, 203; 44, 141; 57, 169; 60, 256; 65, 272; 70, 195—Dinner to, 17, 301—"Index to the First Twenty-five Volumes of the Journal of the Chemical Society" (review), 29, 203—"Index to Gmelin's Handbook of Chemistry" (review), 26, 20—"Journal of the Chemical Society" (review), 29, 203—"Manual of Chemistry" (review), 48, 269; 53, 212; 60, 220—Obituary, 50, 10, 270—Watts, H., and G. Fownes, "Manual of Elementary Chemistry" (review), 18, 283; 26, 312; 35, 136; 36, 81—Watts, H., and F. Richardson (*see* Richardson, F.)—Watts, H., and Dr. T. Richardson (*see* Richardson, T.)—Watts, H., and A. Wurtz, "History of Chemical Theory from the Age of Lavoisier to the Present Time" (review), 19, 224—Watts, Hugh F., Determination of tungstic acid in wolframite ores and concentrates, 95, 19—Watts, John, Phosphates of ammonia of the British Pharmacopoeia, 11, 115—Strength of a solution of phosphoric acid of various densities, 12, 160—Watts, J. J., and T. E. Thorpe (*see* Thorpe, T. E.)—Watts, O. P., and E. R. Suhm, Experiments with calcium alloys as reducing agents, 99, 257—Watts, W. Marshall, Absorption of mixed gases in water, 9, 70—Atomic weights of gold, platinum, iridium, osmium, rhodium, and palladium, 19, 302—Binocular power of Hare's blowpipe, 22, 217—Commercial sulphuric acid, 36, 42, 54—Existence of a relationship between spectra of some elements and squares of their atomic

- weights, 86, 231—Existence of two spectra produced by carbon in condensate at the same temperature, 22, 172—Helium vacuum tubes, 97, 95—“Index of Spectra” (review), 25, 200—“Introduction to the Elements of Chemistry” (review), 64, 320—“Introduction to the study of Spectrum Analysis” (review), 90, 17—New form of micrometer for use in spectroscopic analysis, 32, 14—Spectrum of the Besselmer flame, 21, 80, 23, 40—Temperature and heating powers of flames, 21, 201; 22, 116—Vapour densities, 24, 227
- Watts' principle, applications to dissociation of carbonates of lead and silver, 91, 201
- Waugh, G., Pharmaceutical Society, 2, 237
- Wave, electromagnetic, propagation of, 51, 245—Explosive, 45, 89, 63, 49, 72, 46—Form, effect on alternate current arc, 73, 209—Fronts, anchoring, and focal lines, 85, 115—Length for high frequency electrical oscillations, 100, 13—Length of D₂ helium line, 73, 14—Length of thallium ray, 10, 132—Lengths, determination by measurements with a prismatic scale, 27, 175—Lengths not hitherto recognised, 53, 72—Lengths of light rays, photography of, 81, 267—Lengths of rays of high refrangibility, measurements, 47, 193—Lengths of thermic rays at low temperatures, 42, 47—Making resistance of ships, 99, 232—Motion, model to illustrate properties of, 88, 304—Of high water, 8, 70—Train, passage of an oscillator, 71, 36
- Waves, alternate current, apparatus for demonstrating propagation of, in cables, 97, 108—Cusped, propagation and relation to primary and secondary focal lines, 83, 106—Electric absorption along wires by a terminal bridge, 74, 254—Electric, attenuation along a line of negligible leakage, 77, 283—Electric, in wires, effect of capacity on stationary, 75, 185—Electric, reflection and transmission along wires, 81, 58—Electric, stationary, on spiral wires, apparatus for metrical study of, 89, 245—Explosive, 49, 106—Light (see Light)—Ocean, height, length, and velocity of, 57, 90—Periodic, 33, 237—Refraction of water, 49, 232—Sound (see Sound)—Surface decay of, produced by a superposed layer of viscous fluid, 100, 9
- Wavellite from Montebello, analysis, 26, 58
- Wawinkiewicz, R., and E. Langer (see Langer, E.)
- Wax, 10, 55; 13, 165; 90, 194—Adulteration, 39, 172—Adulteration with paraffin, 4, 83—Adulteration with tallow, 28, 158—Adulteration with tallow, detection by aid of alcohol, 25, 167—Analysis, 62, 208; 74, 50—Bees' (see Bees')—Black, from Madras, 17, 250—Bleaching, 22, 192, 204—Candles, dyeing black, 28, 72—Canabua, chemical composition, 19, 17—Canabua, detection, 50, 46—Chinese insect, 73, 281—Crystalline structure of, 5, 130—Examinations of, 50, 204—For painting, 2, 96—Found in treatment of fibre for paper manufacture, 71, 164—From cocoa leaves, 4, 47—In opium, 22, 130—Japan (see Japan wax)—Melting point, 79, 150—Of corn-straw, 21, 23—Of Ficus gummiiflua, 39, 194—Of Raphia palm, 95, 232—Paraffin, specific gravity, 47, 221
- Waxes, cerasin, 93, 210—Of conifers, 99, 235—Superficial action of solvents on, 43, 267—Sopification, 63, 273—Testing, 19, 310—Vegetable, composition and occurrence, 22, 58—Vegetable, from Japan, 26, 60

- alloy of, 21, 273—And chromium, separation, 11, 104; 76, 65—And cobalt, separation, 1, 95; 29, 193; 55, 236; 57, 125; 76, 65—And copper alloys, 2, 303; 3, 22; 37, 51, 70, 149, 164, 4, 91; 72, 208; 73, 168—And copper alloys, analysis, 61, 136; 71, 92 —And copper alloys, thermo-chemistry of, 83, 49—And copper and lead smelting works, injurious constituents of smoke of, 46, 208—And copper and mercury, volumetric and gravimetric estimation, 37, 96 —And copper, basic salts of, 20, 35—And copper, determination of equivalents of, 48, 243 —And copper, estimation, volumetric, 8, 38—And copper, heat of combination, 80, 253 —And copper industries of United States, 36, 205—And copper, separation, 19, 156; 83, 221, 230, 247—And copper, separation by sulphuretted hydrogen, 47, 244—And cupric sulphate solution, reaction between, 80, 303—And gold, separation by quaternary, 41, 173—And hydrochloric acid, compounds, 53, 262—And hydrogen combinations, 2, 181, 215, 272—And iodoacetate of ethyl, condensations with, 87, 71—And iron, alloys, 19, 214; 20, 70—And iron, electrolytic separation, 91, 247—And iron, poisoning by, 11, 288—And iron separation, 51, 230; 55, 236; 57, 125; 59, 232; 76, 65; 87, 312; 90, 215—And lead, estimation, 79, 12—And lead ores mixed treatment, Ellerhausen's process, 83, 98—And lead, tin, and cadmium alloys, 60, 268—And magnesium, action on metallic solutions, 63, 203—And magnesium alloys, 90, 100—And manganese, alloy, 22, 194 —And manganese, separation, 11, 147; 40, 33; 57, 125; 63, 258; 64, 182; 65, 159; 76, 65—And nickel, separation, 1, 95; 29, 193; 39, 74; 50, 151; 55, 236; 57, 125; 59, 88; 61, 124; 76, 65; 88, 317; 90, 215—And nickel, separation and determination, 53, 172, 196—And nickel separation, electrolytic, 90, 45—And nickel and cobalt, separation, 47, 273—And silver, alloys, 9, 100; 10, 202—And silver and lead, separation and determination, 65, 184—And strontium alloys, 85, 12—And sulphuric acid, interaction, 56, 205, 221—And tin, action of sulphuric acid on, 44, 237; 45, 60—Arsenical, purification, 67, 49—Arseniferous, purification, 50, 45—Ash, detection of manganese in, 48, 193—Atmospheric corrosion, 83, 302—Atomic weight, 49, 19; 59, 297; 73, 107, 226, 238, 250, 264; 93, 50; 99, 60; 100, 278—Behaviour of acrolein towards, 11, 237—Black patina upon, 20, 58—Black varnish for, 4, 109—Blende, extracting indium from, 22, 312—Blende from an antimony mine, 30, 222—Blende, roasting, 46, 58—Boiling-point, 82, 107—Cadmiferous, ores (*see* Ores)—Chemical action of water on, 38, 59—Chemically pure, explanation of the difficult solubility of, in acids, 67, 61—Chemically pure, sulphuric, 64, 211—Cisterns (*see* Cisterns)—Coke elements, use in electrolysis, 46, 102, 103—Colouring, 19, 72—Condensation with, 87, 71—Containing iron, purification, 20, 173—Copper-zinc—Covered pipes, corrosion when used for conducting water, 5, 188—Decomposition of sulphuric acid by, 27, 113—Decomposition of water by, in conjunction with a more negative metal, 25, 143—Decomposition on copper or brass, 22, 108—Decomposition in presence of antimony, 45, 69 —Determination, 36, 96; 46, 220; 56, 68; 64, 244; 67, 5; 77, 79, 183 —Determination, actual state of, 41, 207—Determination as ZnS, 47, 150 —Determination by battery, 24, 100,

- 172—Determination, electrolytic, 43, 304; 74, 91—Determination, indirect titrimetric, 100, 208—Determination of small quantities, 96, 303—Determination, quantitative, 49, 202; 58, 84—Determination, quantitative, along with manganese, 59, 180—Determination, volumetric, 18, 187; 28, 226; 36, 153; 38, 274; 40, 33; 46, 231; 47, 248; 63, 243; 65, 179; 75, 182; 76, 6, 15, 29, 38, 51; 85, 18; 97, 201, 215—Double ammonium phosphates of, in analysis, 80, 303—Dust, 92, 58, 80—Dust, action on chlorides of sulphoparabromobenzoic acid, 34, 271—Dust, action on naphthylamine, 51, 227—Dust, action on zinc hydrate, 52, 203—Dust, decomposition of simple organic compounds by, 42, 210—Dust, distillation of resins and resinous acids with, 36, 223—Dust, occlusion of hydrogen by, 51, 15, 126—Electrolytic deposition, 94, 18; 95, 165; 97, 89, 99, 137, 140—Equivalent of, 55, 208—Estimation, 24, 128—Estimation as phosphate, 82, 101—Estimation, electrolytic, 81, 54—Estimation in form of sulphide, 81, 50; 89, 12—Estimation, volumetric, 25, 286; 31, 222; 36, 89; 67, 30; 80, 59; 87, 121—Etching in relief on, 14, 68—Extraction from its ores by the wet way, 19, 250—Ferrocyanide titration of, 82, 177—Foil, action of silvered, on ammonium formate, 36, 168—For desilverising lead, 22, 317—For tinning, 26, 47—Free from arsenic, preparation, 49, 180—Freezing point curves of alloys containing, 75, 170—From german silver alloys, volatilisation, 51, 123—Fumes, diseases produced by, 6, 192—Gas-holders, use of lime-water in, 51, 83—Gilding on, 29, 230—Giving coatings of colour to, 14, 68—Ignition of hydrogen by, 38, 276—In American apple rings, 74, 49—In animals, 35, 182—In certain alcohols, 82, 316—In Cleveland iron stone, 8, 136—In drinking water, 49, 83, 103, 107, 115; 51, 18—In iron ores, determination, 63, 25—In ores, determination 45, 264; 63, 36—In organic salts, 74, 186—In powder, determination, 54, 314—In spring waters, 42, 49—In state of diffusion in dolomitic districts, 47, 92—In vegetables, 35, 182—In water, 76, 293, 313—Industry of United States, 36, 205—Influence of metallic deposits on, in presence of acids and bases, 27, 204—Insoluble matter of, 3, 3—Magnesium-*(see)* Magnesium-zinc—Manganese in commercial, detection, 48, 193—Manufacture, 11, 47; 16, 25—Melting by gas, 2, 240—Metallic, corrosion when used as boiler protector, 41, 102—Metallic, for analysis, 45, 287—Metallic, in zinc powders, determination, 54, 85—Metallurgical treatment of complex ores containing, 42, 204—Metallurgy, 24, 182—Microchemical test for, 94, 189—Micro-structure of, 86, 211—Mineral from a blast-furnace, 59, 202—Native, 6, 47—Occurrence in same group with alkaline earths, 80, 271—Of Leclanché battery, analysis of crystals deposited on, 25, 265—Ore, cadmiferous, 81, 173—Ore in form of oolite, 1, 166, 178—Ores and copper ores, estimation, 20, 242—Ores and lead ores, Ellershausen's process for treatment of mixed, 83, 98—Ores, assay of, 35, 70—Ores, furnaces for reducing, 7, 69—Ores, influence of air in reduction of, 41, 200—Ores, treatment, 7, 142; 8, 299—Organo-*(see)* Organo-zinc—Ovens *(see)* Ovens—Paint, 24, 181—Paper, 15, 324—Plumbiferous, behaviour on remelting, 54, 24—Powder, 27, 247—Powder, action on benzyle chloride, 54, 250—Powder, action on bromide of trimethylene, 85, 144—Powder, action on fatty acids, 88, 221—Powder, action on dibromides, 85, 300—Powder, action on saturated fatty acids, 83, 167—Powder, ammonia in, 72, 37—Powder, behaviour of alcohols with, 43, 166—Powder, behaviour of ammoniac gum resin on distillation with, 40, 301—Powder, determination of metallic zinc in, 54, 85—Powder, determining value, 41, 161; 42, 48—Powder, reduction of ellagic acid by, 38, 48—Powder, sulphur in, 45, 287—Powder, valuation of, 38, 275; 63, 12—Powder, value of, 43, 268—Powder, vat for woollen dyeing with, 28, 294—Powder, volumetric determination, 55, 164—Powder, volumetric determination of grey, 55, 249; 57, 12—Powdered, estimation by stannous chloride, 85, 71—Plates, amalgamating, 12, 242—Precipitation, 94, 303—Precipitation by sulphuretted hydrogen in presence of bisulphate of potassium, 34, 94—Precipitation by water, 30, 163—Precipitation, influence of ammonia and its salts on, 4, 150—Precipitation of copper by, 81, 134—Preparation from blende, 39, 124—Process, desilverisation of lead by, 42, 281—Production, extraction of lead from the residues, 58, 37—Properties of, 52, 314—Pure, 82, 292—Pure, production, 73, 24—Purification, 47, 169—Reducing properties, 15, 194—Reduction of tungstic anhydride by, 82, 65, 225—Reductor, behaviour of molybdic acid in, 97, 113—Reductor, use in estimation of vanadic acid, 87, 215—Reservoirs *(see)* Reservoirs—Salts, action of hydrogen sulphide on alkaline solutions of, 98, 40—Salts, action of sulphuretted hydrogen on, 3, 14—Salts, behaviour with plants and with the soil, 52, 83—Separation and determination, 58, 99; 61, 307—Separation and estimation by electrolytic method, 87, 259—Separation, electrolytic, 49, 60—Separation from all metals of its group, 52, 313—Separation of cadmium from, as sulphide in presence of trichloroacetic acid, 95, 274—Solution in dilute acids, 74, 303—Source of hydrogen occluded by, 52, 205—Spectrum, 89, 251—Spectrum, spark and arc, invariability of wavelengths in, 89, 98—Spongy, deposits of, 80, 209—Statues, to blacken, 12, 180—Substitute for lead in pigments, 58, 35—Substitution of magnesium for, in synthesis of unsaturated alcohols, 99, 123—Synthesis by means of mixed organo-metallic derivatives of, 99, 180—Syntheses by mixed organo-metallic compounds of, 97, 179—Tanks *(see)* Tanks—Tinning with, 26, 47—Titration, 49, 214; 64, 150—To etch in relief on, 12, 24—Volatilisation from German silver alloys, 50, 245—White as a pigment, 20, 203—Zinc-white, substitution for white-lead in oil paints, 83, 287—Zinc acetate, 40, 10—Basic, preparation, 66, 222—Crystalline anhydrous, preparation, 50, 296—Zinc-aluminium alloys, 89, 274—Zinc arseniate, 40, 217—Zinc borate and ammonia, 20, 166—Zinc carbon element, electromotor force of, 46, 46, 57—Zinc chloride, 57, 232; 60, 122—Action on anhydrous acetic acid, 6, 107—Action on camphor, 20, 229—Action on chlorocamphor, 67, 278—Action on codeine, 28, 278—Action on oxalic ethers, 17, 285—Action on resorcin, 72, 61—Action on silk, 7, 119—Ammoniated, 18, 13—Analysis, 69, 27—And aniline compounds, and their use in the manufacture of dyes, 11, 256—And camphor, interaction, 66, 313—And hydrochloric acid, combinations, 53, 310—And peroxide of manganese battery, report on, 40, 143—And water, combinations, 53, 275—As a reagent for alkaloids, 41, 110; 42, 318—Electrolysis of fused, in cells heated externally, 93, 255—Electrolysis of solutions of, 80, 209—Hydrates of, 54, 95—Impure, reducing the metal from, 20, 276, 288—Poisoning by, 1, 96—Tanning with, 31, 22—Use in esterification of succinic acid, 97, 112—Zinc chromite and cadmium chromite, 60, 72—And magnesium chromite, basic, 63, 261; 64, 61—Zinc-copper alloys, 100, 47—Alloys, want of uniformity in action on nitric acid, 81, 239—And tin-copper alloys, 56, 235—Zinc cyanide and mercury cyanide, conditions which determine combination between, 65, 164—And strontium and calcium cyanides, 44, 60—Decomposition in carbonic acid, air, and pure hydrogen, 34, 92—Mercuric, 97, 274—Zinc cyanides, ammoniacal, 56, 279—Zinc dextrosate, 60, 57—Zinc eisen, 55, 100—Magnesium, 67, 78—Zinc ethide, action on the benzoate from propylene chlorohydril, 51, 47—Zinc ethyl, 51, 227—Action on bichlorinated acetal, 18, 188—Act on of bromoacetyl bromide on, 36, 264; 37, 174—Action of chloride of cyanogen on, 17, 57—Action of phosphuretted hydrogen upon, 22, 209, 311—Action on amines and phosphines, 47, 142, 294—Action on azobenzene, 41, 270—Action on benzonitrile, 41, 270—Action on benzoylic cyanide, 42, 242—Action on nitrous and nitric ethers, 17, 129—Action on organic compounds, 51, 151—Action on phenylacetonitrile, 41, 291—Action on silicic acid methyl ether, 27, 46—Formation heat of, 56, 200—History of, 10, 202—Preparation, 8, 286; 9, 61; 19, 100; 20, 322; 21, 58; 76, 20, 34; 83, 49—Zinc ferrite, 55, 140, 296—Zinc ferrocyanide, 57, 186—Zinc fluoride, 67, 159—Zinc formiate, formation in cisterns containing oil of turpentine, 50, 188—Zinc gold slimes, reduction of, 76, 57, 192—Zinc green, 8, 47; 28, 24—Zinc hydrocarbons, action of monochlorinated acids on, 35, 8, 29—Zinc hydroxide, solubility in alkalis, 93, 21—Zinc hydroxylamine, preparation, 65, 74—Zinc hypochlorite, 3, 176—Zinc iodide isomorphism of mercuric iodide with, 94, 71—Zinc-magnesium organic derivatives, syntheses by means of mixed, 96, 71—Zinc methyl, 2, 9—Action of bromoacetyl bromide on, 36, 264; 37, 174—Action of bromated bromide of acetyl on, 26, 265—Action of phosgen on, 22, 299—Preparation, 38, 304—Zinc nitrates, basic, 65, 311—Zinc oxide, action of hydrogen peroxide on, 85, 166—And ammonia, chromate of, 20, 166—And sodium carbonate in sulphur and arsenic determinations, 96, 240—Characteristics of, 65, 12—Dissociation, 57, 175—Estimation, 75, 133—For polishing glass, 3, 15—Hydration, 86, 70—In alkaline solutions, 42, 30—Manufacture, 9, 201—Polymerisation and heat of formation, 86, 24—Red, 26, 169—Zinc oxchloride, 45, 276—Zinc peroxide, composition, 88, 256—Zinc peroxides, 89, 95—Properties and constitution, 86, 84—Zinc phosphate, 3, 342—Treating organic and other substances containing, 3, 221—Zinc phosphates, 40, 205—Zinc phosphide, 36, 11—Employment in therapeutics, 18, 6

- Zinc phosphides, 98, 294
 Zinc selenide and its dimorphism, 81, 191
 Zinc silicates, synthesis, 92, 94
 Zinc sulphate, ammoniacal, 51, 106, 227
 —Ammonium (*see* Ammonium)—And ammonia, 20, 166—And sodium chloride, influence on soils of water containing, 49, 236—Crystallisation, 44, 295—Decomposition, 1, 59—Effects on the organism, 53, 239—Purification, 11, 87, 46, 68; 47, 35—Thallium- (*see* Thallium-zinc sulphate)
 Zinc sulphates, crystallisation, 44, 295
 Zinc sulphhydrate, 39, 185
 Zinc sulphide, 7, 143; 72, 110—Amorphous, 71, 77—Compounds, 63, 88—Determination, 56, 57—Hydrated, 19, 190—Phosphorescent, 66, 221; 67, 60; 74, 149—Phosphorescing, 90, 233, 305—Precipitation, 75, 317—Preparation in crystalline form, 87, 238
 Zinc sulphocarbonate, 22, 276
 Zinc sulphophosphate, 21, 144
 Zinc sulphuret exposed to air, 22, 179
 Zinc titanates, 56, 149; 58, 108
 Zinc xylidate, abnormal solubility of, 35, 217
 Zinco and steels, 56, 35
 Zinchole, M., Zymometer, 43, 234
 Zincoferous galena (*see* Galena)
 Zincing, 64, 285—Electro- (*see* Electro-zincing)
 Zincite and willemite, artificial production, 55, 225—Hydro- (*see* Hydro-zincite)
 Zincke, T., Action of ammonia and the amines on the quinones, 40, 301—Action of dilute sulphuric acid upon hydrobenzoin and iso-hydrobenzoin, 34, 270—Aromatic hydrocarbons, 23, 251, 310—Chlorides of hydrobenzoin and isohydrobenzoin, 35, 263—Ditolyls, 23, 262—Essential oil of the fruits of *Heracleum spondylium*, 20, 263—Formula of benzil, 48, 305—New series of aromatic hydrocarbons, 25, 46—Nonylic acid from the octyl alcohol of the *heracleum* oil, 25, 57—Researches from the laboratory of, 40, 191—Some of the derivatives of benzyltoluol, 26, 94—Synthesis of aromatic acids, 21, 95—Two modifications of benzophenon, 24, 34
 Zincke, T., and A. Blatzbecker (*see* Blatzbecker, A.)
 Zincke, T., and A. Breuer (*see* Breuer, A.)
 Zincke, T., and G. Egly (*see* Egly, G.)
 Zincke, T., and A. P. N. Franchimont (*see* Franchimont, A. P. N.)
 Zincke, T., and P. Hunaeus (*see* Hunaeus, P.)
 Zincke, T., and A. Kekulé (*see* Kekulé, A.)
 Zincke, T., and L. Klippert (*see* Klippert, L.)
 Zincke, T., and M. Plaseuda (*see* Plaseuda, M.)
 Zincke, T., and A. Rinne, Orthodinitrobenzol, 31, 109
 Zincke, T., and F. Sinteris (*see* Sinteris, F.)
 Zincke, T., and W. Thorner (*see* Thorner, W.)
 Zincke, T., and C. Wachendorff, Methyl derivatives of anthracen, 36, 213—Styrolen alcohol, 35, 263
 Zincke, T., and J. F. Walker (*see* Walker, J. F.)
 Zincke's reaction, modification of, 72, 57
 Zincobaric chloride (*see* Chloride)
 Zincography, photo- (*see* Photozincography)
 Zincomagnesian chloride (*see* Chloride)
 Zinospath from Raibl, 25, 131
 Zinin, N., Action of zinc on quadrichlorobenzyl and some other bromated and chlorated compounds, 24, 206—Amaric acid and its homologues, 36, 264—Benzile, 3, 223—Benzimide, 20, 286—Chlorbenzil, 18, 151—Derivatives of benzoin, 16, 24—Derivatives of desoxybenzoine, 23, 203—Derivatives of lepidin, 25, 107—Derivatives of lepidin, constitution, 60, 264—Facts serving to complete the history of bodies of stilb e series, 18, 247—Introduction of hydrogen into organic compounds, 4, 164—Isopropylene, 35, 113
 Zink, W. A. H., and A. E. Hill (*see* Hill A. E.)
 Zinno, S., Novel method of preparing oxygen, 36, 168
 Zircon, action on alkaline carbonates and chlorides, 12, 69—And titanate acid, separation, 10, 91, 218—Density, 9, 57—Formation, 5, 57—Occurrence and extraction, 77, 134, 145—Opening-up, 49, 174—Treatment and qualitative composition, 52, 233, 240
 Zircons, absorption in, 52, 220—Action of heat on, 19, 156—New earth in some, 19, 121, 142, 181—Of Ceylon, 25, 305; 85, 270—Of Mudgee, New South Wales, 23, 78—Reproduction, 59, 11
 Zirconates, 74, 42, 53—Earthy, 64, 61
 Zirconia, 27, 232; 33, 261—Action on alkaline carbonates, 12, 58—And the oxides of uranium, spectra of compounds of, 21, 73—And phosphoric acid, combination, 53, 252—And silica, volatilisation, 68, 16; 71, 13—And thoria, extraction, 68, 28—And thoria, separation, 75, 230—And titanate acid, separation, 14, 33—Crystalline form, 22, 215; 45, 240—Formula of, 2, 10, 335—Light, 18, 276; 19, 107, 213, 310—Preparation, 88, 282—Reduction with magnesium, 92, 164
 Zirconia oxides, isomorphism of, 1, 131
 Zirconium, 12, 45, 171; 21, 190; 22, 23; 56, 219; 64, 124; 97, 205—Analysis, 98, 6, 16, 32, 41, 55, 71, 81, 92, 107, 160, 171, 181, 194, 208, 219, 228, 239, 251, 264, 273, 291, 300, 311—And aluminium, separation, 59, 100—And beryllium, separation, 89, 77—And iron, separation, 79, 97, 112; 80, 265; 89, 63—And iron, separation of titanate acid from, 21, 120—Atomic weight, 60, 6, 17, 32; 77, 221, 231; 87, 78; 93, 56; 99, 60; 100, 278—Behaviour toward organic bases, 89, 15, 27—Compounds, 28, 45—Compounds, complex, 91, 26—Compounds, halogen, 92, 144—Estimation of iron in presence of, 89, 311—Metal, analytical investigation of, 99, 116—New element accompanying, 19, 121, 142, 181—Salts, 91, 234; 95, 90—Separation, 70, 57—Separating and determining, 53, 287—Separating and estimating, 53, 55, 260—Specific heat, 29, 52—Spectrum, 24, 167—Studies on, 98, 21
 Zirconium carbide, 73, 175
 Zirconium chlorides, 73, 25—Examination, 70, 217—Preparing, 64, 315
 Zirconium colloids compared with those of other metals of fourth group, 86, 175
 Zirconium dioxide, properties, 78, 52
 Zirconium fluoride, double, 76, 4
 Zirconium hydroxide, colloid, and zirconium tetrachloride, 95, 190
 Zirconium-mercury double salt, 98, 234
 Zirconium nitride, spontaneous formation, 92, 164
 Zirconium nitrides, preparation, 78, 322
 Zirconium oxalates, 75, 113
 Zirconium oxide, action of peroxide of hydrogen and hypochlorite of sodium on, 88, 249
 Zirconium phosphate and sodium phosphate, double, 56, 57
 Zirconium silicate, 97, 93—Containing argon and helium, 94, 227
 Zirconium silicide, $ZrSi_2$, and titanium silicide, $TiSi_2$, 94, 95
 Zirconium tetrabromides, derivatives, 79, 89
 Zirconium tetrachloride and colloid zirconium hydroxide, 95, 190—Derivatives, 79, 6, 15, 32, 43
 Zirconium tetraiodide, 74, 102; 90, 231
 Zirconium-tungstic compounds, 74, 12
 Zirkelite, 93, 232; 95, 232
 Ziurck, Dr., Boiling-point of water at high localities, 20, 240—Gas for heating purposes, 21, 35—Keeping water in tanks made of zinc, 20, 227
 Ziureck and Erdmann, MM. (*see* Erdmann, M.)
 Zizmann, E., Objective treatise of the stroboscopic disc, 23, 143
 Znatoviz, B., and P. Wreden, Octo- and hexahydronaphthalen, 35, 242
 Zodiacal light and aurora borealis, 21, 82
 Zoeller, R., and E. Grete (*see* Grete, E.)
 Zoeller, T., and A. Grete (*see* Grete, A.)
 Zoller, B., Conservatory properties of potassium xanthate, 35, 64
 Zoller, P., Investigation of Himalaya tea, 23, 287—Nutrition of fungi, 31, 208—Xanthogenic acid, 43, 259
 Zöllner, F., Influence exercised by density and temperature on spectra of gases heated to redness, 23, 156—Periodicity of the heliographical description of the sun's spots, 23, 311—Spectrum of aurora borealis, 23, 108—Temperature and physical constitution of the sun, 23, 35
 Zöllner's theory of solar scories, 28, 169
 Zonandi, F., Alkaloidal stearates and their therapeutic application, 75, 71
 Zone reactions, sensitiveness of, 72, 24
 Zoological and anatomical preparations, preservation, 21, 190
 Zopf, Dr. W., "Die Flechtenstoffe" (review), 97, 34
 Zoppetti, V., Electrolysis in metallurgy, 53, 240
 Zorn, L., and H. Brunel (*see* Brunel, H.)
 Zorn, W., Actions of nitrosyl silver, 40, 157—Diazo-compounds of fatty series, 39, 43—Nitroso-silver, 36, 40
 Zortman, I. H., and J. B. Cohen (*see* Cohen, J. B.)
 Zotta, V. von (*see* von Zotta, V.)
 Zouchos, C., Detection of albumen in urine, 63, 37
 Zouteveen, H. H. van (*see* van Zouteveen, H. H.)
 Zschiesche, H., Salts of the cerium bases, 20, 118—Salts of cerium metals, 21, 264
 Zschimmer, Dr., "Die Glasindustrie in Jena" (review), 100, 206
 Zsigmondy, R., Aqueous solutions of metallic gold, 80, 223—"Colloids and the Ultramicroscope" (review), 100, 171—Cryolite, 59, 180—Source of error in determining the nitrogen of halogeniferous bodies, 59, 181
 Zuber, M., Ultramarine, 19, 297
 Züblin, H., Halogens, 44, 274—Synthesis of isosuccinic acid, 40, 204
 Züblin, H., and V. Meyer (*see* Meyer, V.)
 Züblin, J., Normal nitrobutan, 37, 173
 Züblin, J., and V. Meyer (*see* Meyer, V.)
 Zuckerswerdt, Dr., and Dr. West (*see* West, Dr.)
 Zuelzer, M., Determination of chlorine in urine, 52, 118
 Zulkowsky, Carl, Constituents of corallin, and their relations to colouring matters of rosanilium group, 33, 244—Constitution of rosolic acid, 36, 7—Crystalline constituents of corallin, 42, 84
 Zulkowsky, Karl, Action of glycerin upon starch at high temperatures, 35, 8—Apparatus for determination of hydrogen, 34, 163—Behaviour of starch with glycerine, 45, 130—Composition of corallin, 35, 142—Constituents of corallin, 37, 238—Examination of fats, 48, 87—Examination of prussiate melt, 51, 36—Influence of caoutchouc tubing on illuminating power of coal-gas, 26, 229—Rapid separation of slimy precipitates, 54, 25

- Zelz, R., and G. Hufner (*see* Hufner, G.)
- Zelzer, M. and B. Proskauer (*see* Proskauer, B.)
- Zumbusch, Emilie, and L. Vanino (*see* Vanino, L.)
- Zundnadelgewässer, improved, **22**, 179
- Zuno, M., Detection of resin oil in oil of turpentine **65**, 144
- Zupino, V., Dehydration of selenite and hydration of anhydrite, **84**, 289—Hydrate of alumina, **83**, 103
- Zuntz, N., Action of amido compounds on animal nutrition, **48**, 226
- Zuntz, M., and S. Pollitzer (*see* Pollitzer, S.)
- Zürcher, C., Effects of cold on plants, **21**, 300—Steam indigo-blue, **35**, 115
- Zürich Chemical Society, **20**, 202; **22**, 213; **23**, 132—Exhibition, **70**, 162—Laboratory of V. Meyer, communications from, **33**, 139—Polytechnic, presentation of addresses to Prof. G. Lunge, **96**, 57—Swiss Polytechnic School, chemical laboratories, **49**, 17—University, laboratory of, **44**, 274; **59**, 179
- Zwenger, C., Cumaric acid, hydrocumarine, and hydrocumarinic acid, **23**, 46, 262—Gallic acid ethers, **24**, 100; **25**, 83—Quinic acid in leaves of *Vaccinium myrtillus*, **2**, 204
- Zwicke, M., and H. Koehler (*see* Koehler, H.)
- Zwicker, H., and A. Gutbier (*see* Gutbier, A.)
- Zwilling, R., and L. Cuniasse (*see* Cuniasse, L.)
- Zygomycetes, chemical composition, **44**, 122
- Zymase, **10**, 155—Of human milk, **47**, 270—Of Jequirity, **52**, 54
- Zymohydrolysis, reversible, **78**, 19
- Zymometer, **43**, 234
